General Information

Introduction

President's Welcome

Welcome to Columbia Basin College (CBC)! For the past 63 years, CBC has been the gateway to a higher education for thousands of students seeking affordable, high-quality education and we are thrilled to have you as a part of our family.

Whether you are here to pursue a two-year degree, receive a certificate to begin a new career or earn an applied bachelor's degree, your educational goals are very important to us and we are here to support you.

We hope your experiences at CBC will be marked with successful achievement, personal growth and memories that you will cherish forever.

Go Hawks!

Rebekah Woods, J.D., Ph.D.
President, Columbia Basin College

Mission, Vision, & Values

Mission

Columbia Basin College inspires, educates and supports all students in an environment of academic excellence leading to the completion of degrees, certifications and educational transfers, while fostering meaningful employment, engaged citizenship and a life-long joy of learning.

Vision

Columbia Basin College will be the educational home that transforms students' lives through economic and social mobility and strengthens the communities we serve through meeting the ever changing educational needs of our region and state.

Values

Student Learning

Our first priority is to work collaboratively to ensure student learning, success and completion in an environment of open inquiry, respect, critical thinking and creativity. We strive to create community and belonging where students mature and develop intellectually, emotionally, ethically and physically both inside and outside of the classroom.

Culture of Excellence

We provide excellent teaching and services through a theory-driven and data-informed culture of innovation, collaboration, continuous improvement of performance and a commitment to professional growth and development for all employees.

Diversity, Equity and Inclusion

We celebrate diversity in all its forms and we believe that our many unique perspectives makes us stronger. Diversity among our team enriches our institution and our students' experience. We are dedicated to eliminating barriers to success through intentional and equitable efforts to provide quality learning opportunities.

Sustainability

We consciously practice and model broad-based sustainability for our students, and our communities, through the balancing of economic, societal and environmental factors when considering campus development of facilities, processes, programs and curricula.

Wellbeing

We create a healthy environment that encourages physical and emotional wellness and enjoyment of learning.

History of CBC

Columbia Basin College has served Benton and Franklin counties for more than 60 years.

The first classes at CBC were authorized by the State Board of Education in May, 1955. Classes began in September, 1955 in temporary quarters at the former Pasco Naval Airbase.

The Pasco School District received title to more than 150 acres of land for the present campus site in Pasco. CBC's first permanent building was completed in 1957 and was the V building which was replaced in 2011 by the Center for Career and Technical Education (CTE).

The Community College Act of 1967 separated the College from the Pasco School District and CBC became the 19th community college district in the state of Washington.

CBC continually expands and renovates programs which now includes applied bachelor's degrees. The enrollment of the College has grown from 299 students in 1955 to more than 8,000 students per quarter today. The faculty includes 140 full-time instructors and 300 part-time instructors.

Accreditation

Columbia Basin College is accredited by the Northwest Commission on Colleges and Universities.

Accreditation of an institution of higher education by the Northwest Commission on Colleges and Universities indicates that it meets or exceeds criteria for the assessment of institutional quality evaluated through a peer review process. An accredited college or university is one which has available the necessary resources to achieve its stated purposes through appropriate educational programs, is substantially doing so, and gives reasonable evidence that it will continue to do so in the foreseeable future. Institutional integrity is also addressed through accreditation.

Accreditation by the Northwest Commission on Colleges and Universities is not partial but applies to the institution as a whole. As such, it is not a guarantee of every course or program offered, or the competence of individual graduates. Rather, it provides reasonable assurance about the quality of opportunities available to students who attend the institution.

Inquiries regarding an institution's accredited status by the Northwest Commission on Colleges and Universities should be directed to the administrative staff of the institution. Individuals may also contact:

Northwest Commission on Colleges and Universities

8060 165th Avenue NE, Suite 100
Redmond, WA 98052
(425) 558-4224
nwccu.org

CBC's accreditation reports can be found at columbiabasin.edu/accreditation.

Research & Instructional Assessment

Columbia Basin College's commitment to its mission and goals requires conducting regular evaluations of progress in achieving those goals. Testing and surveying at various points in students' educational journeys are essential parts of this evaluation process. In addition, students may be asked to cooperate in various surveys, interviews, focus groups and other data collection efforts by the College.

Since the goals of CBC are directed to the education of the whole person, student achievement can be measured only by evidence concerning the whole person. To protect confidentiality of data, the Office of Institutional Research never releases personal information about individuals and, wherever possible, avoids attaching names to personal data during analysis.

College-Wide Student Learning Outcomes

Students who graduate from Columbia Basin College will be able to identify and demonstrate their knowledge in a variety of general education areas. The outcome of their learning experience is demonstrated in the areas embodied in the college-wide Student Learning Outcomes. CBC provides the opportunity for students to successfully complete courses which incorporate knowledge in six areas.

CBC's Student Learning Outcomes are:

Think Critically

- Understand, analyze and evaluate the elements of one's environment and one's habits of thought
- Conceptualize alternatives to both

Reason Quantitatively and Symbolically

- Develop a sense of number and pattern

Introduction

- Analyze, evaluate and synthesize symbolic statements and quantitative arguments

Communicate Effectively

- Use spoken and written language to express opinions, discuss concepts and persuade an audience
- Synthesize ideas and supporting information to create effective messages

Apply Information Tools and Resources

- Accurately assess information needs
- Select appropriate information tools and resources and use them efficiently
- Evaluate, manage and use information effectively and responsibly

Develop Cultural Awareness

- Respect self and others
- Explore and appreciate different cultures in an increasingly diverse, global community
- Challenge culture-bound assumptions

Master Program Learning Outcomes

- Become familiar with a body of knowledge
- Demonstrate ability to know or do the stated program learning outcomes, which are developed by each department and program and assessed annually

Applied Bachelor's Degrees

The Washington State Legislature authorized the community college baccalaureate program to increase access to bachelor's degrees for Washington citizens. In particular, AAS graduates whose credits are generally non-transferable to four-year institutions can pursue these degrees without having to start their college education from scratch, allowing full-time students to complete the upper-level degree in approximately two years.

Columbia Basin College offers two applied bachelor's degree types, Bachelor of Applied Science and Bachelor of Science:

- Applied Management (with optional concentration in Agriculture or Healthcare Administration)
- Cyber Security
- Dental Hygiene
- Information Technology
- Project Management (with optional concentration in Construction)
- Bachelor of Science in Nursing (RN-BSN)

All bachelor's degrees offered at CBC are approved by the Northwest Commission on Colleges and Universities and the Washington State Board for Community and Technical Colleges.

CBC Locations

Columbia Basin College has grown and expanded throughout Benton and Franklin counties since its inception in 1955. The Naval Airbase at the Pasco airport housed most of the

programs for the first two years of the College. CBC opened its first new building in fall, 1957 on the current, 150-acre Pasco campus.

Other Pasco locations include the Columbia Basin Access Center (CBAC) on 20th Avenue which centralizes CBC's English Language Acquisition (ELA) program. CBAC is adjacent to the Chase Center where the College's Early Childhood Education program is housed and provides classes.

CBC also serves the community in other locations across the bi-county area. In 1974, the College constructed its first buildings in Richland next to the Richland Public Library on Northgate Avenue. This campus now hosts a variety of CBC classes. Additionally, the Richland Health Science Center as well as the Medical Science Center nearby support health science programs.

For maps, driving directions and parking information, visit columbiabasin.edu/map.

Columbia Basin College Foundation

Since 1984, the Columbia Basin College Foundation continues to partner within the Tri-Cities community to build productive and mutually beneficial relationships with individuals, businesses and other organizations for the benefit of CBC.

The Foundation seeks to acquire and manage donations that support student scholarships, academic programs and faculty enrichment grants. On occasion, the Foundation is active in supporting capital campaigns for needed college projects.

Financial support is derived from a multitude of community-focused engagement activities, including annual campaigns, special events, major gift solicitations, planned giving bequests and alumni relations. Constituent communications are provided through newsletters and social media websites.

The CBC Foundation Board of Directors represents a broad spectrum of alumni, business, agriculture, civic and professional leaders.

For more information, visit us at columbiabasin.edu/foundation.

Financial Information

Student Status for Tuition & Fee Purposes

Full-time student: student registered for 10 or more credits per quarter.

Part-time student: student registered for 9 or fewer credits per quarter.

Student Status for Financial Aid

Full-time student: student registered for 12 or more credits per quarter.

Three-quarter-time student: student registered for 9 to 11 credits per quarter.

Half-time student: student registered for 6 to 8 credits per quarter.

Less-than-half-time student: student registered for 1 to 5 credits.

Residency Requirements for In-State Tuition

A resident student is one who is a U.S. citizen and has met specific requirements demonstrating permanent residence in the state of Washington. Permanent residence in the state of Washington is evidenced by physical presence in the state as well as having a sufficient number of permanent Washington documents. Documentation should be dated one year and one day prior to the commencement of the quarter for which a student is applying for residency status.

These documents can include:

- Voter's Registration
- Washington State Driver's License
- Car Registration
- Bank Accounts
- Federal Tax Return (required)

Students wishing to change their residency classification must complete a residency questionnaire and provide necessary documentation. Application for reclassification prior to registration into classes is preferred. Residency reclassification must take place prior to the 30th calendar day of classes of the quarter residency is requested. Documentation received after the 30th calendar day will be considered for the following quarter.

Special tuition allowances may apply to some eligible non-citizens, Washington higher education employees and to military personnel and their dependents stationed in the state of Washington. For further information, contact the Student Records office.

Tuition & Fees 2019-20

Rates are subject to change. Tuition is set by the State Board for Community and Technical Colleges which acts upon legislative authority.

*CBC's BAS program costs may vary; please visit columbiabasin.edu/bastuition for program specific tuition and fees.

The above schedule of tuition and fees includes comprehensive, instructional support and technology fees as well as special fees levied by the Associated Student Body of Columbia

Basin College. Special course and/or laboratory fees may apply to certain courses and result in additional charges. See course materials.

Refund Policy

CBC will refund tuition and refundable fees if official withdrawal from the College or course(s) occurs within the specified time frame listed below. Certain fees are non-refundable or refundable only if withdrawal occurs prior to the first day of instruction. The first day of instruction is defined as the first day of scheduled classes for the quarter. Instruction days are Monday through Friday. Calendar days are all days including weekend days and holidays.

REFUNDS	CBC will refund tuition & refundable fees if official withdrawal occurs:	
Full Sessions	up to 100% REFUND (on or before)	up to 50% REFUND (on or before)
Fall, Winter, Spring	5th day of the quarter	6th day of the quarter and within first 20 calendar days
Summer	3rd day of the quarter	4th day of the quarter and within first 15 calendar days
Mini-Sessions	up to 100% REFUND (on or before)	up to 50% REFUND (on or before)
Half-quarter courses	2nd day of the session	3rd day of the session and within first 10 calendar days
Four-week courses	2nd day of the session	3rd day of the session and within first 7 calendar days
Three-week courses	1st day of the session	2nd day of the session and within first 5 calendar days
Two-week courses	1st day of the session	2nd or 3rd day of the session
One-week or less courses	Before 1st day of the session	On 1st day of the session

Refund Exceptions

Non-Refundable Fees

The Admission application fee is non-refundable. The Auditorium/HUB/Safety & Security/Recreation Center fee, per-credit comprehensive fee and lab fees are not refundable unless withdrawal occurs prior to the first day of instruction.

Small Balance Refund Amount

No refund checks will be processed for credit balances that are less than \$5. These refunds may be applied to future CBC charges or redeemed in cash from Hawk Central (cash balances permitting).

Financial Information

Special Courses

The refund policy may not apply to contract classes, continuing education classes, workshops or other courses on special schedules.

Student Balance and Collections Process

All student accounts are required to be paid in full each quarter by tuition deadline or within 24 hours if enrollment takes place after tuition deadline. It is the student's responsibility to ensure that their account is current and that payments are made by the published deadlines. Registration for subsequent quarters will be restricted and transcripts/diplomas will be held if previous balance is not paid in full.

If a student fails to make acceptable payments and their balance is 120 days past due, their account may be forwarded to an outside collection agency.

Financial Aid

Financial Aid personnel assist Columbia Basin College students and their parents with finding funding for basic educational costs. Consumer information is available at columbiabasin.edu/consumer.

Financial aid programs at CBC follow policies and philosophies established nationally, statewide and institutionally. They are based on the assumption that the family is primarily responsible for paying educational costs. Financial aid is intended only to fill the gap between the family's contributions and the student's yearly academic expenses.

Students receiving any type of financial aid should visit Hawk Central for specific questions about adding, dropping or withdrawing from classes before taking any such action. Federal and State regulations supersede CBC's refund policy. Warning: withdrawal from the College may result in the student owing amounts to Federal and State financial aid programs AND to CBC.

How to Apply

Students apply for financial aid by completing a Free Application for Federal Student Aid (FAFSA) at fafsa.gov. FAFSA applicants must be U.S. Citizens or eligible non-citizens (i.e. permanent residents). Students who cannot complete a FAFSA due to not meeting citizenship requirements, but who are Washington residents, may apply for Washington state financial aid funding by completing the WA Application for State Financial Aid (WASFA) at readysatgrad.org/wasfa. FAFSA/WASFA applications are available every year on October 1. Students are encouraged to apply between October and January prior to the school year they wish to attend. To allow for processing time and financial aid funds to be available by

the tuition due date, the FAFSA/WASFA and any other required financial aid forms must be submitted to Financial Aid/Hawk Central by:

Fall Quarter April 15

Winter Quarter October 15

Spring Quarter January 15

Summer Quarter April 15

Eligibility Requirements

FAFSA applicants must:

- Be a U.S. citizen or an eligible non-citizen
- Be determined to have financial need based upon congressional methodology (except for Unsubsidized Federal Direct Loan and PLUS loans)
- Have a high school diploma, GED® certificate or meet home school requirements
- Be seeking one of the eligible degrees or certificates available at CBC
- Not owe a repayment on a previous federal student grant or be in default on a federal student loan
- Be enrolled for eligible number of credits and be maintaining satisfactory progress according to the Financial Aid Satisfactory Academic Progress Policy available at columbiabasin.edu/sap. Previous academic progress at CBC will be considered even if the student was not receiving financial aid at that time
- Not be receiving financial aid at another institution at the same time
- Be registered with Selective Service, if required
- Sign a statement on the Free Application for Federal Student Aid (FAFSA) stating that student aid will be used only for educational purposes
- Have satisfied federal guidelines regarding any conviction of illegal drug offense, if applicable

WASFA applicants must:

- Have graduated from a Washington state high school with a diploma, earned a GED® or earned a diploma equivalent
- Be a Washington state resident—lived in Washington for at least three consecutive years immediately before, and continuously since, earning a high school diploma (or equivalent)
- Be determined to have financial need based upon information provided on the WASFA
- Be seeking one of the eligible degrees or certificates available at CBC
- Not owe a repayment on a previous Washington state student grant
- Be enrolled for the eligible number of credits and be maintaining satisfactory progress according to the Financial Aid Satisfactory Academic Progress Policy available at columbiabasin.edu/sap. Previous academic progress at CBC will be considered even if the

student was not receiving financial aid at that time

- Not be receiving financial aid at another institution at the same time

Financial Aid Programs

Students will be considered for all aid programs for which they are eligible and for which funding is available. Financial aid programs fall into four categories: grants, scholarships, employment and loans.

Gift Aid

Pell Grant

Federal grant program for undergraduate students with financial need.

Supplemental Education Opportunity Grant

Federal aid program for students with exceptional need. Must be eligible for a Pell Grant.

Washington State Need Grant

Washington state program for resident students who meet financial criteria and are enrolled in at least three credits.

College Bound Scholarship

Washington state program that guarantees state financial aid for resident students who applied for this scholarship in middle school and currently meet financial need and academic criteria and are enrolled in at least three credits.

Columbia Basin College Grant

A state-funded institutional grant for resident students with demonstrated need.

Opportunity Grant

A state-funded grant for residents who are enrolled in an eligible program of study and meet the financial need criteria. For more information, visit columbiabasin.edu/opportunity.

Early Achiever's Opportunity Grant

A state-funded grant for eligible residents who are enrolled in the Early Childhood Education program.

Scholarships

Scholarships are awarded by organizations based on a variety of criteria. Visit columbiabasin.edu/scholarships for details.

Employment

(refer to Human Resources' Student Employment for more details)

Federal Work Study

Federal program to provide jobs on campus to financially qualified students. Must be enrolled in at least six degree-required credits at CBC.

Financial Information

Washington State Work Study

Washington state program to provide career-related employment off campus to financially qualified students. Must be enrolled in at least six degree-required credits at CBC.

Loans

Federal Direct Subsidized Loan

Federal need-based loan program with deferred payment and low interest (rate is set annually). Must be enrolled in at least six credits. Currently, maximum amount is \$3,500 for first-year students and \$4,500 for second-year students. If accepted into a CBC applied bachelor's program, the maximum amount for third- and fourth-year students is \$5,500.

Federal Direct Unsubsidized Loan

Non-need-based loan for students. Must be enrolled in at least six credits. Interest is charged from the time the loan is disbursed.

Federal Plus Loan

Non-need-based federal loan program for parents of undergraduate, dependent students.

Alternative Loan

Non-need-based private loans based on criteria determined by individual lending institutions.

Types of Student Employment at CBC

On-Campus

- Federal Work Study
- CBC Non-Work Study
- Athletic Scholarships through the Athletic Department
- Summer Student Employment

Off-Campus

- State Work Study

While State Work Study is non-CBC employment, it is an opportunity for CBC students to work off-campus for employers in the community, and in jobs related to the student's major and/or career goals. The Financial Aid Office assists student workers interested in placement for off-campus employment, though students apply through the CBC online application system on the Student Jobs @ CBC web page.

Criteria for Work Study

(Refer to Financial Aid Programs for more detail)

Student workers under Federal or State Work Study must be enrolled in at least six degree-required credits during each quarter of employment (fall, winter and spring). Student workers must be enrolled in at least five degree-required credits during summer quarter.

Worker Retraining

A state-funded tuition assistance program for eligible students. See the Worker Retraining section under Student Resources in this catalog for specific details or go to columbiabasin.edu/workerretraining to determine eligibility.

Veterans Benefits

A veteran eligible to use educational benefits from the Department of Veterans Affairs must meet with the Veterans coordinator located in the H building on the Pasco campus. To schedule an appointment, call 509.542.4880.

Columbia Basin College does not and will not provide any commission, bonus or other incentive payment based directly or indirectly on success in securing enrollment or financial aid to persons or entities engaged in any student recruiting or admissions activities or in making decisions regarding the award of student financial assistance.

Admissions

General Admission to CBC

Admission Information

Columbia Basin College maintains an open-door admission policy and grants admission to applicants who are at least 18 years of age and/or have graduated from high schools accredited by a regional accrediting association or have a GED® certificate. Home school graduates and graduates from non-accredited high schools are admitted based on their placement test scores.

Students between the ages of 16-18 who are juniors or seniors in high school may be eligible to attend CBC through the Running Start program. For more information and eligibility requirements, please visit columbiabasin.edu/runningstart.

Applicants who are younger than 16 years of age may be admitted through a special admission process. Contact the Student Records office for the special admissions policy and procedure.

Admission to CBC does not guarantee admission to all degree or certificate programs. In addition, some programs have special applications and admission procedures and limited entry dates. Students should consult the individual program and/or department for admission requirements.

How to Apply for General Admission

Applicants must complete and submit an Application for Admission by the quarterly deadline. The Application for Admission may be filled out online at columbiabasin.edu/apply. When an applicant's file is complete, the applicant will receive notification of acceptance via email with further enrollment instructions.

Applicants transferring from another college must submit an official transcript from each accredited college attended. Processes such as financial aid or admission to certain programs may be delayed without transcripts from prior schools.

High school transcripts generally are not required from applicants 18 years of age or older. However, some degree programs require a high school transcript as part of the admission criteria and for evaluation of prerequisites. Refer to the individual program and/or department for specific program requirements.

Placement Tests

Placement testing is required for degree and certificate seeking students. Additionally, it is required for placement in English and math courses. Students who have prior college-level English or math classes may submit an official transcript(s) to Student Records to waive the testing requirements. For more information, please visit columbiabasin.edu/assessment.

Candidates requiring accommodations for the GED® examination are encouraged to contact the Pearson Vue Accommodations Team at 1.877.392.6433 or email accommodations@GEDtestingservice.com. Individuals participating in GED® classes at CBC who require accommodations, may contact the Resource Center at 509.542.4412 or the Washington Relay services for the Deaf and Hard of Hearing at 1.800.833.6384.

Admission to Applied Bachelor's Degree Programs

Applicants who wish to pursue a Bachelor of Applied Science degree must satisfy one of the following conditions at the time of program start date to become eligible:

- Have earned at least an associate (AA, AS, AAS) degree from a regionally accredited institution
- Have completed a minimum of 90 college-level credits from a regionally accredited institution

Applicants who wish to pursue a Bachelor of Science in Nursing (RN-BSN) degree must have completed an associate degree in Nursing.

Check with the program for specific admission requirements and prerequisites. Program information is available at columbiabasin.edu/BAS.

International Student Admission

Columbia Basin College welcomes qualified international students.

Admission requirements:

- International Student Admission Application and additional documentation
- Official language proficiency scores
- Copy of High School Diploma
- Official College/University Transcripts, if applicable

In addition to the above requirements, international students transferring from another school in the United States must also submit the following:

- Official College/University Transcripts
- Copy of all previously issued I-20 forms
- CBC F-1 Transfer-In form

If all the admission requirements are satisfied and the student is admitted to CBC, an I-20 for F-1 student status will be issued.

CBC has four quarters: fall, winter, spring and summer. Students may begin any quarter. International students must enroll for 12 credits each quarter and maintain a 2.0 GPA or better. International students are allowed to take one quarter off per academic year, once they have completed three consecutive quarters.

All international students are required to have health insurance. Students must purchase insurance through Washington State Colleges or provide proof of equivalent insurance from their own country.

International students are not eligible for federal/state student financial assistance. They may be eligible for some scholarships and private loans. Opportunities for on-campus employment are extremely limited.

International students are not eligible to work off-campus except in some very special circumstances; they should assume no money or employment will be available from the College while they are attending CBC.

Further information and appropriate forms may be obtained at columbiabasin.edu/internationalstudent.

Admission to ELA (English Language Acquisition)

The English Language Acquisition (ELA) program provides six levels of English language instruction to immigrants and refugees for a tuition fee of \$25 per quarter. Students are tested to determine their speaking, listening, reading and writing skills prior to being placed into an appropriate class. Depending on levels and time of day, classes are held on the main Pasco campus, at Columbia Basin Access Center (CBAC) in Pasco and at various sites around our service district. CBC offers courses focused on workplace skills and provides support to ELA students enrolled in vocational programs. Students under 19 years of age are required to obtain permission from their high school in order to participate in ELA classes at CBC. For more information, contact the Transitional Studies Division at 509.542.4701.

Admission to High School Programs

Admission to Running Start

Running Start is a program created by the Washington State Legislature to provide high school juniors and seniors an opportunity to enroll in college classes that will meet high school graduation requirements, as well as apply toward a college degree. Students are not charged tuition if the student doesn't exceed the enrollment combination of 1.2 FTE. They are, however, required to pay lab and comprehensive fees, books, supplies and transportation costs. Students who take classes below college level are charged full tuition and fees.

To participate in the program, students are required to complete the placement test and/or submit Smarter Balance scores. Students must qualify for reading at college level and qualify for either math or English composition at college

Admissions

level. Students who qualify should meet with their high school counselors to determine high school graduation requirements.

Eligible Running Start students must complete and submit:

- A CBC Running Start admission application (after student qualifies)
- A Running Start Enrollment Verification form

After the initial enrollment, students will be required to complete a Running Start Enrollment Verification form each quarter prior to registration.

Admission to High School Completion Program

The High School Completion program is offered for individuals 19 years or older and for those whose high school class has graduated. The purpose of this program is to help students complete their high school education by earning a diploma.

Applicants must submit a completed Application for Admission with all official high school transcripts attached and take the placement test. For more information and to access the application, visit columbiabasin.edu/highschoolcompletion.

Anyone whose high school class has not graduated, who has not earned a GED® or who is between 16 and 18 years of age, must submit a High School Release form.

CTE Dual Credit & College in the High School

CTE Dual Credit and College in the High School programs allow high school students the opportunity to earn college credit while meeting a high school graduation requirement at the same time. Students participate in approved classes in their home high school or at Tri-Tech Skills Center. The courses are taught by qualified high school teachers who work closely with faculty mentors to ensure the high school curriculum is of college rigor and aligns to a similar course taught on campus.

Columbia Basin College currently offers the CTE Dual Credit program locally and accepts transfer credit from other community colleges and universities who offer the College in the High School program. Students can accelerate their academic and career pathways through the use of these programs. CTE Dual Credit-approved courses are career and technical education courses and College in the High School courses are academic. Both programs offer students rigorous and challenging coursework that will assist them in their transition to postsecondary education and training.

Upon successful completion of meeting all CTE Dual Credit eligibility requirements, the equivalent CBC course will be transcribed to the students' transcript with the College's course title and number, just as it appears in the catalog. Grades will be awarded for college credit (and posted to the college transcript)

using CBC's grading scale and may be slightly different than the high school grade awarded. For students transferring credit earned through College in the High School from other institutions, their credit will be evaluated by the Student Records office and posted to their CBC transcript.

For more information about either dual credit program, please contact the Director of CTE Dual Credit at 509.542.4559.

Admission to ABE/GED®

(Adult Basic Education or General Educational Development)

The Adult Basic Education or General Educational Development (ABE/GED®) program offers classes to qualifying students who left high school without receiving a diploma, or are in need of improved skills prior to enrollment in college-level classes for a tuition fee of \$25 per quarter. Students are assessed and attend a program orientation prior to being placed in a class. Classes are held on the main Pasco campus and at various sites around our service district. Students under 19 years of age are required to obtain permission from their high school in order to participate in ABE/GED® classes at CBC. For more information, contact the Transitional Studies Division at 509.542.4701.

Candidates requiring accommodations for the GED® examination are encouraged to contact the Pearson Vue Accommodations Team at 1.877.392.6433 or email accommodations@GEDtestingservice.com. Individuals participating in GED® classes at CBC who require accommodations, may contact the Resource Center at 509.542.4412 or the Washington Relay services for the Deaf and Hard of Hearing at 1.800.833.6384.

Admission to High School Academy

The High School Academy (HSA) program is offered for students ages 16 to 20 years of age who have dropped out of high school or are at risk of dropping out. HSA is a re-engagement program for at-risk/drop-out youths who seek to complete a high school diploma.

Interested students must submit a completed HSA referral packet to the participating school district of Kennewick, Richland, Pasco, Finley or Columbia. Included in the packet is a CBC Application for Admission which must also be completed.

Once the student referral packet is processed and approved, the student will be expected to:

- Attend an interview with the HSA Director
- Submit an official transcript
- Meet with the HSA Director to complete a transcript evaluation
- Complete the placement test for placement purposes
- Attend a mandatory orientation

For general information about the High School Academy program, contact the HSA office at 509.542.4442.

Admission to High School Enrichment Program

Eligible high school students may take courses at Columbia Basin College for enrichment or to meet high school graduation requirements. The program is designed to provide students additional learning opportunities not currently available through school district resources. To be eligible for this program, high school students must be 16 years or older and a Junior or Senior in high school.

Admission process:

- Complete and submit an Application for Admission
- Submit an official high school transcript
- Submit the High School Enrichment Release Form signed by parent or legal guardian and by an appropriate high school official
- Complete the College Placement test (if applicable)

High School Enrichment students are eligible to enroll in two courses per quarter and will be responsible to pay full tuition, student/class fees and to purchase other course materials (i.e. books).

Admission to HEP

(High School Equivalency Program)

The High School Equivalency Program (HEP) is funded by the U.S. Department of Education and implemented through the Transitional Studies Division of the College. It is a secondary migrant education program designed to meet the special needs of migrant and seasonal farm workers in pursuit of the GED®, a certificate of high school equivalency. The intent of the program is to assist qualified students in preparing for the GED® test and to help them place in a post-secondary education/training program, a career position or the military.

Admission to the program is open to migrant or seasonally-employed agricultural workers and their families who:

- Within the past 24 months, have worked a minimum of 75 days in migrant/seasonal farm work; or been eligible or have participated in a migrant education program or in a JTPA Section 402 program (now WIA Section 167)*
- Are 16 years of age or older
- Are not currently enrolled in high school
- Have not earned a high school diploma or its equivalent
- Demonstrate a willingness to study in preparation for the GED® exam
- Pass entrance exams
- Demonstrate a willingness to conform to the rules of the program

*Applies only to the migrant or seasonally-employed agriculture worker. However, immediate family members of migrant and seasonally-employed agriculture workers are also eligible.

For more information, call 509.542.4775 or 509.542.4558.

Admissions

Admission to HS21+

(High School 21+)

High School 21+ (HS21+) is a competency-based school equivalency program for adult learners 21 and older who do not have a high school diploma or equivalency. For the quarterly tuition of \$25, students work to demonstrate competencies in reading, writing and math, and complete needed credits.

To participate in the program, students must submit their official high school transcripts to the Transitional Studies Division and complete the required assessments. Students also complete an intake interview prior to admittance. For more information, contact the Transitional Studies Division at 509.542.4701.

Gold Card Admission

A reduced tuition rate is available to individuals 60 years or older who wish to take classes without credit (audit). Registration is available at Hawk Central.

Registration:

- Gold Card members may register on the third day of the quarter on space available basis and may not overload a class.
- Gold Card members may not register for class(es) at the state tuition rate in order to reserve a space and then change to the reduced Gold Card tuition rate. Gold Card members registering at the state tuition rate will be charged full tuition and WILL NOT qualify for the Gold Card tuition rate for the course ID that was reserved for the current quarter.
- Gold Card members shall register for no more than two courses per quarter.
- Gold Card members must be Washington state residents.

Fees:

- Gold Card members will pay all applicable course fees, lab fees and other charges as appropriate.

Gold Card members enrolling in Fitness Center need to obtain a student photo ID card.

For more information, please visit Hawk Central in the H building.

Registration

Registration Procedures

The registration process includes course selection, enrollment and payment of tuition and fees. Currently enrolled and returning CBC students register prior to the beginning of each quarter based on the number of cumulative credit hours they have earned (a maximum of 60 credit hours transferred from another institution may be applied). New students to CBC will be assigned a registration time after completing the admission and getting started process. Students must be registered in classes in order to attend. The maximum number of credits a student may enroll in is 18 per quarter. Registration for more than 18 credits requires approval.

Any degree-seeking student or any student wishing to register for a math or English course or a course with a math or English prerequisite must complete a placement test. Contact the Assessment Center to schedule an appointment. Transfer students who have completed math and English from an accredited college will not be required to complete a placement test, provided an official college transcript is submitted that documents the necessary prerequisites.

Students may rearrange their class schedule within the first three days* of Fall, Winter or Spring quarter. Schedule changes made on the second or third day of the quarter do require instructor approval. Students may withdraw from a class through the 40th day* of the quarter. Students must complete a registration form and submit it to Hawk Central or use web registration.

**For summer session and classes scheduled for less than a full quarter, students should contact Student Records for deadline dates.*

If you need accommodations for placement testing based on a disability, please contact the Resource Center at 509.542.4412 or the Washington State Relay Service for the Deaf and Hard of Hearing at 1.800.833.6384.

Priority Registration for Veterans

CBC provides current and new student veterans, service members and spouses using dependent benefits the ability to register for classes one day before the general student population. This is based on military status documentation provided to the School Certifying Official in the V.E.T.S. Center.

Student Orientations

All new, degree and certificate seeking students, students who have earned zero credits and transfer students are required to complete Student Orientation to Advising and Registration (SOAR) as part of the Getting

Started process. SOAR is offered prior to each quarter. Students learn about various resources on campus, general information about CBC degrees and how to register for classes.

First Year Introduction (FYI)

First Year Introduction (FYI) is a one-credit course required for all degree and certificate seeking students. Running Start students complete Workshop 090 in place of the one-credit course. FYI assists new students entering CBC who have earned zero credits (credits must be from a regionally-accredited college or university to count) by providing a thorough introduction to college and to CBC. Students are required to complete FYI at the start of their first quarter at CBC. Students register for this course while registering for their first quarter classes.

Student Identification Card

Students enrolled at Columbia Basin College should obtain a student identification card. A student ID card is required for checking out library materials, including laptops, and using the Fitness Center. Student ID cards may also be used to participate in College and community activities. Students are required to be enrolled, show photo ID and have paid tuition and fees in full (or enrolled in STEPP).

MyCBC Information System

columbiabasin.edu/mycbc

MyCBC is an online student information system where students may perform the following actions:

- Check registration access times
- Register for classes
- Make schedule changes
- Update address and phone numbers
- Access class schedules, degree audits, financial aid data, grades and transcripts
- Pay tuition online

Credit Hours

In general, a lecture class that meets for one hour per week for one quarter will earn the successful student one credit; a lecture class that meets five hours per week for one quarter will earn the student five credits.

Laboratory and certain other courses vary from this pattern. The quarter hours of credit for each course are shown after the course titles in the Courses and Programs section of this catalog.

Students earn credit only for courses in which they are officially registered for credit. If a course is audited, credit will not be earned.

Withdrawal Policy & Procedures

Student-Initiated Withdrawals (W)

If a student wishes to withdraw from all or individual courses, it is their responsibility to do so by the deadline published in the Academic Deadlines calendar. Students must submit a registration form to Hawk Central or withdraw online by the published deadline to guarantee the accuracy of their permanent records. Students may withdraw from full-term courses with no record on their transcripts if the withdrawal has been processed on or before the 10th day* of the quarter. Students withdrawing from full-term courses after the 10th day but on or before the 40th day* of the quarter shall have a W recorded on their transcripts.

**For summer quarter and all alternative class schedules such as Fast Track courses, students should contact Student Records for withdrawal deadlines.*

Students are encouraged to meet with a Counselor or Completion Coach and to inform instructors prior to withdrawing. Students receiving Financial Aid are strongly advised to speak with a specialist in Hawk Central prior to withdrawing, as withdrawals may negatively impact their ability to receive financial aid in the future and/or may require repayment of money received from a financial aid award. It is the responsibility of the student to be fully aware of the effects of withdrawing and the College assumes no liability for financial or other adverse actions as a consequence of withdrawing.

Final withdrawal deadlines are based upon 75 percent of the scheduled class meetings. Students who stop attending classes without officially withdrawing will be issued a grade based on the work completed and any other assessments provided by instructors. However, exceptions to the withdrawal deadline can be made by the Registrar but only for extenuating circumstances and must be accompanied by appropriate and qualified documentation. Refer to the Petition for Exception to Deadline Policy (PED) for further information at columbiabasin.edu/ped.

College-Initiated Withdrawals (WA)

On rare occasions, a student may be withdrawn at the recommendation of the appropriate Dean or Vice President for the following reasons: disciplinary actions, academic performance decisions and health or safety issues. Additionally, students may be withdrawn for excessive absences when initiated by a faculty member and recommended by the appropriate Dean. In these cases, the faculty member must have included an attendance policy statement in the class syllabus and the conditions under which students will be administratively withdrawn. College-initiated withdrawals will be posted on the transcript as a WA.

Transfer Information

Transcripts

Transferring Credits to CBC

An official transcript is a record of a student's permanent academic work at Columbia Basin College. It bears the Washington state seal and the Registrar's signature. In compliance with the Family Education Rights and Privacy Act of 1974 (FERPA), a transcript of grades will be sent to a college, university or other agency only upon the student's written request. Students may order and pay for official transcripts via the College's website at columbiabasin.edu/transcripts. Transcripts will not be released to a third party without written permission of the student. Unofficial transcripts are available at no cost on the College's website at columbiabasin.edu/mycbc. Holds on permanent records resulting from non-payment of financial obligations, failure to return College equipment or material or failure to complete financial aid exit counseling, must be cleared by the student before unofficial or official transcripts will be released. CBC does not release transcripts from high schools or other educational institutions. Transcripts submitted during the admissions process are part of the student's official file and will not be returned to the student.

Transfer Evaluation Policy & Procedure

Columbia Basin College subscribes to the statewide policy on Inter-Collegiate Transfer and Articulation, as endorsed by the public and private colleges and universities of Washington and the State Board for Community and Technical Colleges, and adopted by the Washington Student Achievement Council. The policy addresses the rights and responsibilities of students and the process for review and appeal in transfer credit disputes.

- All credits are subject to approval by the Student Records office based on credit equivalency, applicability to the degree or certificate and the transfer institution's accreditation. The College reserves the right to accept or reject credits earned at other institutions.
- In general, it is CBC policy to accept credits transferred from regionally accredited institutions, provided the credit is essentially equivalent in academic level and content to courses offered at CBC. Credits earned at institutions during their candidacy for accreditation by a regional accrediting association are accepted if accreditation was granted three years subsequent to the candidacy. Credits earned while an institution was not in candidacy or accredited will not be accepted.
- Prior to evaluating transfer credits, students must submit a completed Application for Admission. The evaluation will be completed when official transcripts from all previously attended institutions have been received by the Student Records office. A transcript is official if it is sent directly from the sending institution to CBC. Official transcripts can

be sent via electronic transmission directly to CBC from any community college in the state of Washington or electronically through an authorized, online service provider. A transcript may be hand delivered to CBC only if it is sealed in an official envelope from the sending institution. Transcripts are evaluated based on the quarter/year the student plans to start and the order in which they are received.

- All official transcripts from other colleges must be received by the end of the student's second quarter at CBC.
- When the evaluation has been completed, students will receive a Worksheet for Evaluation of Transfer Credit showing a course-by-course equivalency and the total number of credits accepted. The evaluation will be sent via U.S. mail and CBC email.
- International transcripts must be translated into English and evaluated on a course-by-course basis by a current member of NACES®. Students may use the list of recognized international transcript evaluation agencies at columbiabasin.edu/transcripts under Transfer of Credit Process.
- It is recommended that students make an individual appointment with a CBC advisor to review how transfer credits will apply to CBC degrees and certificates. If students need clarification on an evaluation, they are encouraged to contact the Student Records office.
- In lieu of an official transcript evaluation, an unofficial transcript may be used one quarter only for purposes of advising and registration. Students are required to have an official evaluation on file for subsequent advising appointments.

Reciprocity Agreement

Washington Community and Technical Colleges (CTCs) offer reciprocity to students transferring within the CTC system who are pursuing the Associate in Arts and Sciences degree (AA-DTA). Students who completed an individual course that met distribution degree requirements or fulfilled an entire area of their degree requirements at one college will be considered to have met those same requirements if they plan to complete the same degree when they transfer to another community or technical college in Washington. To earn a degree and/or certificate, students must initiate the review process and must be prepared to provide necessary documentation to both the sending and receiving institution. Students must meet the graduation residency requirement and must be continuously enrolled, as defined under the Catalog Option Policy.

Transferring to a College/University

Transfer Intent Students

Students who intend to transfer to a bachelor's institution to complete a four-year degree are strongly recommended to work closely with Columbia Basin College Counselors, Completion Coaches and Retention Specialists when planning their course selection. Additionally, students should familiarize themselves with the requirements and procedures of the institution to which they wish to transfer as soon as possible in their college experience. These are generally found in the baccalaureate institution's catalog or on their website.

The following tips may be helpful to transfer intent students:

- Students should know the admission requirements for transfer
- Students should know the general graduation requirements and the recommended courses for the first two years of college in their field of interest or major
- Courses numbered 100 and above will usually transfer to most baccalaureate institutions. However, acceptance of CBC courses, academic credits for prior learning, credits by examination and transfer GPA computation remain a prerogative of the receiving baccalaureate institution. Most professional-technical courses are not designated for transfer and are subject to the 15-credit limitation within the Associate in Arts and Sciences degree
- Any change in major or choice of baccalaureate institution may necessitate adjustment of a student's curriculum to meet the admission and/or course transfer requirements of the different baccalaureate institution. Students should meet with their CBC Counselor, Completion Coach or Retention Specialist as soon as possible to discuss the impact of any change in their curricula
- Students should attend CBC transfer workshops when they are offered
- Students should schedule meetings with representatives of the institution to which they wish to transfer whenever they may be on the CBC campus to meet with prospective students
- Apply to the baccalaureate institution according to the institution's procedures and deadlines. Students should provide their official CBC transcript as requested to the baccalaureate institution
- Before transferring, students should arrange to visit the campus of the baccalaureate institution which allows students to see the facilities and visit with an advisor in their major. Students should take a CBC transcript of their grades with them to facilitate the advisory meeting

Transfer Information

Reverse Transfer

Students who leave CBC without a degree may transfer the required remaining credits from an accredited college/university back to CBC to have their degree* posted. Students must complete the following:

- Update contact information with Student Records.
- Complete a graduation application with a CBC Counselor, Completion Coach or Retention Specialist.
- Submit official transcript from the college/university to CBC for evaluation of transference of credits.

**Please see Catalog Option Policy to determine which degree requirements students must meet.*

Transfer Rights & Responsibilities

1. Students have the right to clear, accurate and current information about their transfer admission requirements, transfer admission deadlines, degree requirements and transfer policies that include course equivalencies.
2. Transfer and freshman-entry students have the right to expect comparable standards for regular admission to programs and comparable program requirements.
3. Students have the right to seek clarification regarding their transfer evaluation and may request the reconsideration of any aspect of that evaluation. In response, the College will follow established practices and processes for reviewing its transfer credit decisions.
4. Students who encounter other transfer difficulties have the right to seek resolution. Each institution will have a defined process for resolution that is published and readily available to students.
5. Students have the responsibility to complete all materials required for admission and to submit the application on or before the published deadlines.
6. Students have the responsibility to plan their courses of study by referring to the specific published degree requirements of the college or academic program in which they intend to earn a bachelor's degree.
7. When a student changes a major or degree program, the student assumes full responsibility for meeting the new requirements.
8. Students who complete the general education requirements at any public four-year institution of higher education in Washington, when admitted to another public four-year institution, will have met the lower division general education requirements of the institution to which they transfer.

College & University Rights & Responsibilities

1. Colleges and universities have the right and authority to determine program requirements and course offerings in accordance with their institutional missions.
2. Colleges and universities have the responsibility to communicate and publish their requirements and course offerings to students and the public, including information about student transfer rights and responsibilities.
3. Colleges and universities have the responsibility to communicate their admission and transfer related decisions to students in writing (electronic or paper).

Specialized Transfer Assistance

Washington State University Tri-Cities at Columbia Basin College

Columbia Basin College students and staff seeking information about transferring to Washington State University Tri-Cities through the BRIDGES program can meet with WSU Tri-Cities advisors located in the Transfer University office. BRIDGES is a coordinated bachelor's degree program partnership between CBC and WSU Tri-Cities offering students a continuous pathway to one of 21 bachelor's degree programs. An important component of this program is the integrated advising that occurs between CBC students, Counselors and WSU Tri-Cities academic advisors utilizing Plans of Study to keep students on track toward a bachelor's degree. On the CBC campus, academic advisors share transfer information via office visits, campus information tables, Future Cougs FYI modules and collaborative workshops.

To meet with a CBC advisor about your CBC degree options and requirements or to schedule an appointment with a visiting WSU Tri-Cities academic advisor about BRIDGES, contact CBC Counseling/Advising Center, 509.542.5505. To learn more about the BRIDGES program, visit columbiabasin.edu/bridges.

Eastern Washington University

Columbia Basin College has an articulation agreement with Eastern Washington University, a partnership created to help students transfer into specific programs or degrees and bring a block of credit. This partnership helps facilitate the transference of credits earned toward an associate degree at CBC to credits leading toward a bachelor's degree at EWU. Articulation agreements are generally facilitated by faculty in conjunction with the Office of Articulation and Transfer Policy.

Heritage University at Columbia Basin College

Heritage University offers rigorous, relevant and responsive academic programs in the Tri-Cities through a convenient evening and weekend model. With a strong liberal arts environment that stresses academic excellence, cross-cultural learning and the development of the whole person, Heritage University provides professional and career-oriented programs to prepare students for life and work.

Program advisors are available to meet with interested students at the Heritage at CBC office in the Thornton Center.

For more information:

Heritage at CBC office
Thornton Center, room T347
2600 N. 20th Ave., Pasco, WA
509.542.5506 or tricitie@heritage.edu

Academic Information

Attendance

Students who choose to attend Columbia Basin College also choose to participate actively in the learning process offered by the College. Students are expected to attend all class sessions; a student may be officially withdrawn from a course by the instructor for excessive absences. Please refer to the course syllabus or addendum for attendance requirements.

Attendance in online distance learning classes is determined by engaging in academic activity required for the course. This may include participating in an online discussion, taking a quiz or viewing a lecture. Solely logging in to Canvas or asking a logistical question of the instructor does not count as attending the online class. If, after 10 days, a student has not engaged in academic activity, the student will be removed from the class upon notification by the instructor to Student Records.

In a hybrid class, attendance can count as either attending the face-to-face class sessions or participating in academic activity in the online portion of the class.

Students should consult individual instructors and course syllabi for specific attendance requirements regarding online portions of courses.

Grading Policy

Grades are available on the CBC website at columbiabasin.edu/mycbc approximately one week after the end of the quarter.

CBC uses a decimal grading system for all lecture and laboratory courses numbered 100 and above, and for MATH 040, 050, 060, 062, 070 and 072.

Numerical grades may be considered equivalent to letter grades as shown below.

Decimal Grades	Letter Grade
4.0 - 3.8	A
3.7 - 3.5	A-
3.4 - 3.2	B+
3.1 - 2.9	B
2.8 - 2.6	B-
2.5 - 2.3	C+
2.2 - 2.0	C
1.9 - 1.6	C-
1.5 - 1.3	D+
1.2 - 1.0	D
0.9 - 0.7	D-
0.0	F

Note: Each instructor determines individual course grading procedures. Grading information is contained in course syllabi presented at the beginning of each course. Please refer to individual degrees for specific graduation grade requirements.

Letter Grades

Letter grades are awarded in the following categories:

- I** - Incomplete - no grade points (see statement on incomplete grade policy)
- N** - Audit* - enrollment under non-credit status
- P** - Passing** - has no grade point value and is not used in grade calculations
- W** - Student-Initiated Withdrawal - not calculated in grade point average
- WA** - College-Initiated Withdrawal
- Y** - No grade reported
- Z** - No credit award*

**A student enrolled in a non-credit or audit course does not receive credit for the course and does not receive a grade. Students must pay regular tuition and fees for the non-credit or audit course and may not be required to do the assigned work or take examinations. Students may change from audit to credit on or before the 10th day of instruction. A change, however, from credit to audit requires instructor permission and must be made on or before the 40th day of instruction. Contact the Student Records office for the proper procedures.*

***All buy-time options, cooperative work education programs, supervised employment, practica, workshops, FYI and all courses numbered below 100 will be graded in either the P or Z category, except MATH 040, 050, 060, 062, 070 and 072.*

P (Passing) Grades

Columbia Basin College issues a P (passing) grade in certain predesignated courses or experience-related evaluations for college-level credit. A P grade is earned when performance is certified at a 2.0 grade point minimum. A P grade in a course may satisfy a prerequisite requirement if the performance level is certified at the established minimum defined in the course description.

Students receiving a P grade may use a maximum of 10 credits* earned through classroom instruction from a regionally accredited college. These credits will be applied towards degree requirements as follows:

- Associate in Arts and Sciences and Associate in Science Transfer Degrees: electives
- Associate in Applied Science: Major and Major Support (consult with program advisor for approval)
- Experiential learning credit, CLEP and DANTES is limited to use within the restricted electives

*With the exception of College Board Advanced Placement (AP), International Baccalaureate (IB) and Cambridge.

Students who earn credit via Academic Credit for Prior Learning (ACPL) and receive a P grade should refer to the ACPL section of this catalog for more information regarding how credits are applied toward degree requirements.

Students planning to transfer to a four-year institution are advised to consult with their transfer institution regarding how P grades are applied toward requirements.

Incomplete Grades

An incomplete grade (I) indicates work in progress. Incomplete grades are subject to instructor's discretion. An incomplete grade will be changed to a failing grade if the work is not completed within the first 20 calendar days of the succeeding quarter. The exception is when the incomplete is given in the spring quarter. In this case, the succeeding quarter is the following fall quarter, not the summer quarter.

Computation of Grade Point Averages (GPA)

Grade point averages (GPA) are calculated by dividing grade points earned at Columbia Basin College by the credit hours attempted. Classes numbered 100 and above, not graded with an I, N, P, W, WA, Z or Y are included in the GPA. Credits/GPA earned at previous institutions may be factored into the evaluation of graduation requirements.

Grade Appeal Process

Students are responsible for reading and understanding Columbia Basin College's academic policies and practices as found in the *Washington Administrative Code*, *CBC Catalog*, course syllabi and course policies as established by the individual faculty members. Students are also responsible for meeting the standards of academic performance established by each instructor in course syllabi and addenda. Evaluations will represent the instructor's professional judgment of the student's performance in meeting these standards. At the same time, students are protected from academic evaluations that are arbitrary, prejudiced or capricious.

If a student has documentary evidence that an end-of-course grade was assigned incorrectly, he or she may initiate an appeal of that grade. Students should understand, however, that a grade appeal may result in a higher grade, a lower grade or no change to the grade. Students may not use the grade appeal process as a means of voicing non-specific or unsubstantiated complaints about grades, grading policies or grading standards, nor will the college act on such complaints. Students may not appeal a final grade by contesting the grades on individual assignments after the fact or by objecting to the published grading standards after the course has ended. (Questions about grades or grading criteria should be raised as assignments are graded and returned.)

A grade appeal must be initiated within the first 20 calendar days of the academic term succeeding the term in which grade in question was assigned.

A student who wishes to appeal a grade will take the following steps:

1. The student will gather all relevant documentation regarding the assigned grade, including copies of the course grading policies and standards, all graded

Academic Information

assignments that bear on the appeal (with comments, scores, rubrics or other instructor feedback) and copies of correspondence with the instructor relevant to the student's grade, especially attempts to clarify or correct the grade.

2. The student will meet with the instructor to discuss the course grade. If the instructor is no longer employed by CBC or is otherwise unavailable, the student will meet with the appropriate division dean. Deans will not take action on a grade appeal unless the student has been unable to meet the instructor and has made a good-faith effort to do so during the specified time period.
3. The student will explain the specific basis for the grade appeal and provide the supporting documentation.

A faculty member who receives a grade appeal will take the following steps:

1. If the student has evidence of an error, the instructor will meet with the student within the first 30 days of the term succeeding the term in which the grade was assigned.
2. The instructor will review the evidence and discuss the basis of the student's appeal; if an error is verified, he or she will recalculate the student's grade as appropriate.
3. If the recalculation results in a different grade, the instructor will submit a grade change eform to correct the grade.

At his or her discretion, the instructor may resolve a grade issue informally in discussion with the student.

After this process is followed, students may request a meeting with the dean. The dean will gather and review all relevant information including meeting with the faculty member. The decision made by the dean will be considered final.

Grade appeals may involve final examinations, term papers or other end-of-course assignments that are graded and returned to students in the last week of classes or after the last day of class, for which, as a result of timing, the student does not have time to seek clarification or redress before the term ends.

Grade Forgiveness Policy

Students may petition to have grade records forgiven for courses taken at CBC. This does not remove records from a student's transcript, rather, a set aside notation is marked on the transcript to identify course(s) that will be disregarded when calculating a new cumulative grade point average. Federal Financial Aid regulations do not recognize grade forgiveness. Some transfer institutions may not accept grade forgiveness and may require the original grades be reposted since each institution interprets transcripts according to its own policies.

Grade forgiveness petitions are available in the Counseling Advising Center. Students must meet with an advisor no later than one quarter before graduation. Students may use this petition provided:

- They are currently enrolled at CBC.
- The grade records to be forgiven are at least three years old and the student has not attended CBC during that three-year period.
- They have earned a minimum of 30 credits consecutively with at least a 2.5 cumulative GPA at CBC following the three-year period.

The set aside notation begins at the last quarter completed prior to the three-year absence and includes all courses prior to the notation. Students may not choose specific courses or quarters to be set aside.

Grade records will:

- Not be reinstated once grade forgiveness is granted.
- Not have been used toward a previously earned degree or certificate.
- Be forgiven only once toward a degree or certificate.

Course Repeat Policy

Courses (except those earning the grade letters P, Z, W, WA, N or Y, which are not used in grade point calculations) at CBC may be repeated to improve the grade earned. A grade identifier of R will be posted next to the lowest graded course on the permanent transcript. Credit will be given only once and the highest grade earned will be used to compute the GPA. Students receiving financial aid or veterans benefits should consult the respective office prior to repeating a course as financial penalties may be imposed. Other colleges and universities may include repeated course grades in their eligibility for admissions and/or graduation.

To request a course repeat, a student must complete the intended course, which must be equivalent in credit and content to the initial course, and then submit the Repeated Course Request form found at columbiabasin.edu/studentforms.

A student who takes a course at CBC and repeats the course at another fully accredited college or university shall be granted a repeat, upon request, with the following conditions:

- The student must be enrolled at CBC.
- The course must be evaluated by CBC and verified as substantially equivalent in credit and content via official transcript.
- All courses and earned grades will remain on the transcript. An R will be posted next to the lowest grade and that grade will be removed for the GPA computation.
- A notation will be entered on the CBC transcript indicating the course was repeated via transfer.

Contact Student Records for further information.

Quarterly Honors Designations

Students who earn 12 credits in courses within the quarter and achieve a quarterly college-level GPA of 3.50-3.84 will be named to the Deans' Honor Roll.

Students who earn 12 credits in courses within the quarter and achieve a quarterly college-level GPA of 3.85-4.00 will be named to the President's Honor Roll. Pass/Fail graded classes are not included in the 12 credit requirement.

Graduation Honors Designations

Students who earn an applied bachelor's degree, an associate degree or a one-year certificate from CBC are eligible to receive scholastic honors as established by the College. The cumulative college-level grade point average for all credits earned at CBC is used to calculate eligibility for honors. The honors grade point average calculation is based on the last quarter in which all degree requirements have been completed. Credits and grades transferred to CBC from other colleges and universities are not included in the calculation for the honors designation.

Students who earn an associate degree or one-year certificate according to the standards above are eligible to receive honors. The honors designation will be noted on the official transcript and on the diploma or certificate.

Honors 3.50 – 3.84

High Honors 3.85 – 4.00

For purposes of the Commencement program and ceremony regalia, the honors designation will be based not on the final quarter completed for degree or certificate requirements, but on the GPA as established from the winter quarter transcript for the graduating year.

Students who earn an applied bachelor's degree from CBC are eligible to receive scholastic honors as established by the College. The cumulative college-level GPA for all credits earned at CBC is used to calculate eligibility for honors. The honors GPA calculation is based on the last quarter in which all degree requirements have been completed. Credits and grades transferred to CBC from other colleges and universities are not included in the calculation for the honors designation.

Cum Laude (with honors) 3.50 – 3.69

Magna Cum Laude (with high honors) 3.70 – 3.89

Summa Cum Laude (with highest honors) 3.90 – 4.00

Academic Information

Standards of Academic Progress & Performance

A student's enrollment at Columbia Basin College is a partnership among the student, the College and the state of Washington. CBC has a responsibility to each student, but also to the state that helps fund each student's college education, to develop standards of academic progress and performance. The College utilizes various resources and support programs to assist students toward successful academic performance and program completion.

The College provides detailed information about degree and certificate requirements at mandatory advising, registration and orientation programs for new degree and certificate seeking students. The College monitors student progress and academic performance throughout enrollment and intervenes when expectations are not being met.

CBC does not intend to discourage or penalize students who are sincerely trying to make good use of the College's resources. Nevertheless, there may be instances when the College may determine that a student is not benefiting from continued enrollment. In such cases, the College may take steps to do either of the following:

- Limit or deny future enrollment to that student
- Allow continued enrollment but limit state funding support

Academic Performance Policy

Columbia Basin College's Academic Performance Policy includes both grade performance and credit completion components. Students in a degree or certificate program must maintain a minimum cumulative grade point average of 2.0. Additionally, excessive withdrawals from classes are problematic as they delay students' completion and decrease the College's ability to efficiently manage class enrollment.

Early Warning Signs of Academic Difficulty

Students are strongly encouraged to seek advice from a CBC Counselor, Completion Coach or Retention Specialist as well as use College resources when they first begin to show signs of academic difficulty. These signs include, but are not limited to:

- Failing FYI
- Class instructor concerns about their academic performance
- Students' own acknowledgement they are not understanding class material or doing well in their coursework
- Quarterly GPA below 2.0

Academic Sanctions

Students who have a cumulative GPA below 2.0 will be placed on academic probation that could progress to academic dismissal if subsequent academic performance does not improve. CBC may block students' ability to register for future

classes until they have met specific intervention requirements. When students improve their cumulative GPA to 2.0 or higher, they will be removed from unsatisfactory performance status. However, the College reserves the right to continue to monitor student progress and performance as it deems appropriate.

Probation - This sanction applies to the first quarter a student receives a cumulative GPA below 2.0. A block will be placed on the student's ability to register until the student has successfully completed the online Distress to Success workshop. For further information, contact the Counseling/Advising Center.

Subject to Dismissal - This sanction applies to the second consecutive quarter a student receives a cumulative GPA below 2.0. The student will receive a warning letter that the next academic sanction is academic dismissal. The student is strongly encouraged to meet with a CBC Counselor, Completion Coach or Retention Specialist so that s/he can begin to address whatever issues or barriers may be impeding his/her academic success. The student will remain in the subject to dismissal status as long as s/he receives quarterly GPAs of 2.0 or higher and until the cumulative GPA reaches 2.0.

Academic Dismissal - CBC will academically dismiss the student who is in subject to dismissal status when his/her subsequent quarterly GPA is under 2.0 and the cumulative GPA remains below 2.0. During Academic Dismissal, the student may not register for any classes and may not participate in any events or activities reserved for students.

Academically dismissed students may re-enroll in one of three ways: 1. appeal the academic dismissal (see Appeal of Academic Dismissal section); 2. complete an Academic CPR (HDEV 110) course; or 3. petition for reinstatement.

- If the student wishes to return earlier than the four quarter sanction, s/he may do so by completing CBC's Academic CPR workshop. Workshops are offered each quarter. After passing the workshop, the student may return to CBC the subsequent quarter. Contact the Counseling/Advising Center to schedule an appointment to meet with a Counselor.
- Students also have the option to sit out four quarters and petition for reinstatement. The student will be scheduled to meet with a Reinstatement Committee who will decide if the student will be allowed to be re-admitted to CBC and/or set conditions to be met upon return.
- Students who have been previously dismissed will not be allowed to repeat Academic CPR. Students have the option to appeal the dismissal or submit a petition for reinstatement.

Conditional Enrollment & Financial Penalty

Students reinstated after completing the Academic CPR workshop or through the Reinstatement Committee will be placed on conditional enrollment status and must maintain a minimum 2.0 quarterly GPA. Those who do not fulfill the performance standards via Academic CPR or while on conditional enrollment status may continue to attend CBC, but will be assessed a financial penalty and no further state funds will be used to support their education.

Appeal of Academic Dismissal

Students may appeal the academic dismissal based on extraordinary circumstances that affected his/her performance during the quarter leading to the academic dismissal. The student must submit an Appeal of Academic Dismissal form to the Vice President for Student Services no later than 10 calendar days from the date of the dismissal. Documentation to support a statement of extenuating circumstances is required. The Vice President may request a meeting with the student prior to making a decision.

- If the appeal is granted, the student will be allowed to register at the start of the next quarter. Students who fail to maintain the academic standards for Subject to Dismissal (above) will be academically dismissed for a period of one year without the right to a second appeal.
- If the appeal is not granted, the student will not be allowed to re-enroll at CBC until either completing an Academic CPR workshop or sitting out for four consecutive quarters and petitioning for reinstatement (see Academic Dismissal above).

Academic Credit for Prior Learning (ACPL) & Dual Credit

Columbia Basin College acknowledges opportunities for mastering specific skills and competencies that can be gained outside of a formal classroom experience. Prior learning can be achieved through education, work or life experiences, and students may earn credit and/or advanced placement.

Currently enrolled students may earn college credit when they demonstrate by examination or evaluation that their professional experience or substantial prior learning meets the specific outcomes of a CBC course. Not all courses at CBC are designated appropriate for credit by examination or evaluation and each department determines the evaluation method required for students to demonstrate mastery of the course content. Academic credit for prior learning can be awarded through one of the following options:

Academic Information

- Experiential Learning
- Course Challenge
- Military Credit and Experience
- College Level Examination Program (CLEP)
- DANTES Subject Test

Dual credit can be awarded through one of the following options:

- College Board Advanced Placement
- International Baccalaureate Cambridge

The following restrictions apply to the awarding of academic credit for prior learning (ACPL) and dual credit:

- Students must be currently enrolled at CBC and have a CBC academic record before credits will be awarded. Regardless the type of prior learning, students must have transcribed courses before CBC will post to their transcript.
- For course challenge and experiential learning, students must be currently enrolled at CBC and have an academic record of 15 or more credits with a 2.0 or better cumulative college-level GPA before credits will be awarded.
- Credits may be awarded only if the learning experiences fall within the courses CBC offers.
- Prior learning credits cannot duplicate credits that have already been awarded.
- One-fourth of the total credits required for a CBC associate degree/certificate or one-fourth of the minimum upper-level course credits required for an applied bachelor's degree may be earned through the prior learning process.
- Prior learning credits do not count toward the minimum residency requirement.
- With the exception of course challenge, for which a decimal grade is awarded, credits for prior learning will be recorded with a P grade.
- With the exception of a College Board Advanced Placement course, a P graded course is limited to use within the restricted electives of the Associate in Arts and Sciences degree.
- A non-refundable fee per each credit must be paid for the experiential learning and course challenge assessment.

For further information about process and fees for prior learning credits, visit columbiabasin.edu/ACPL.

Experiential Learning

Columbia Basin College grants credit for learning that ties prior experiences to the theories, data and skills in the discipline for which the student is seeking credit. Assessment of prior experiential learning for credit is the responsibility of faculty who are content specialists. Each department that offers credit for prior experiential learning establishes specific evaluation methods.

Prior experiential learning credit is granted only for classes that fall within the regular curriculum of the College. No credit will be awarded if the student has earned credit in a similar course.

The application and procedure for Experiential Learning credits is available at columbiabasin.edu/ACPL.

Course Challenge

If a student has established a transcript record at CBC, and believes their previous experience has provided the student with competencies essential for passing a course, the student may request a course challenge. The course challenge may only be completed during the term in which the course is being offered. If the student is enrolled in a course for which they wish to challenge, the course challenge process must be completed within the first week of the course. Individual departments determine which, if any, of the courses offered may be challenged. The application and procedure for a course challenge is available at columbiabasin.edu/ACPL.

Military Credit & Experience

Columbia Basin College recognizes learning acquired in the military by accepting the credit recommendations of the Guide to the Evaluation of Educational Experiences in the Armed Services. In addition, a student may earn credits awarded by institutions listed in the ACE National Guide to Educational Credit for Training Program and the Directory of the National Program on Non-collegiate Sponsored Instruction, provided that the courses are at the college level.

Credits will be evaluated only from official military documents requested by the student and based on the American Council on Education's Registry of Credit Recommendations. Official military transcripts must be received by the end of the student's second quarter at CBC.

College Level Examination Program (CLEP)

A score of 50 in the specific examination will grant credit in selected subjects. Students must submit their score report to the Student Records office for evaluation. For further information about CLEP credits, visit columbiabasin.edu/ACPL.

DANTES Subject Test

Washington state community and technical colleges will award unrestricted Elective Only credit for an Advanced Placement (AP) score of 3 or higher. Credit will be awarded on the basis of official AP results, not transcript notation. Credits granted for general education or major requirements will be specified by the receiving institution's AP credit policies; otherwise, Elective Only credit will be granted. Students must submit their score report to the Student Records office for evaluation. For further information about DANTES credits, visit columbiabasin.edu/ACPL.

College Board Advanced Placement

A score of three or higher will grant credit for a specific course and credit. Students must contact CollegeBoard to request their score report be sent to the CBC Student Records office for evaluation. For further information about AP credits, visit columbiabasin.edu/ACPL.

International Baccalaureate/ Cambridge

International Baccalaureate (IB)

Washington community and technical colleges will grant a minimum elective credit for an International Baccalaureate (IB) Higher Level (HL) exam score of 5 or higher. Credit will be awarded on the basis of official IB results, not transcript notation.

Cambridge International (CI)

Washington community and technical colleges will grant a minimum elective credit for each Cambridge International Examination for A-level exam with a passing grade or above for approved examinations. Credit will be awarded on the basis of official Cambridge International Examination results, not transcript notation. Duplicate credit for the same subject taken on different exams will not be granted. No grades are posted for A-level exams.

Education Records

Confidentiality of Student Records

The Family Educational Rights and Privacy Act (FERPA) afford students and the College certain rights with respect to education records.

They are:

1. **The right of the student to inspect and review their education records within 45 days of the day Columbia Basin College (hereinafter referred to as the College) receives a request for access.**

Students should make a written request to the College Registrar, identifying the records they wish to inspect. The Registrar will notify the student of the time and place where the records may be inspected. If the records the student wishes to inspect are not maintained by the Registrar, the Registrar will forward the request to the appropriate College official who will notify the student of the time and place where the records may be inspected.

Student records will be maintained according to the retention policy set out by the State Board for Community and Technical Colleges.

The College reserves the right to refuse to permit the inspection and review of:

- Financial statements of the student's parents
- Confidential letters and confidential statements of recommendation placed in the education record if the student has waived

Academic Information

his or her right to inspect and review those letters and statements and the letters and statements related to the student's admission to a program, an application for employment or receipt of an honor or honorary recognition

- Confidential letters and statements placed in the education record except when these documents have been used for any purpose other than that for which they were originally intended
- Records that contain information about other students
- Documents excluded from the FERPA definition of education records

2. The right of the student to request the amendment of his/her education records that the student believes is inaccurate, misleading or otherwise in violation of the student's privacy or other rights.

Students may request that the College amend a record that they believe is inaccurate, misleading or otherwise inappropriate. They should submit their request in writing to the appropriate College official responsible for the record, clearly identifying the part of the record they want changed and specifying why the record is inaccurate, misleading or otherwise inappropriate.

The College will provide a written response to student requests, either demonstrating the change in the record which has been made or the decision not to amend the record as requested. In the latter case, the College will notify the student of his/her right to a hearing regarding the request for the amendment as well as provide additional information regarding the hearing procedures.

3. The right of the College to release personally identifiable information contained in a student's education records, except to the extent that FERPA authorizes disclosure without consent (section 4).

One exception, which permits disclosure without consent, is disclosure to College officials with legitimate educational interests. College officials include parties who contract with the College or are required by law to provide services to the College and have a legitimate educational interest in a student's education records.

A College official has a legitimate educational interest if the official is:

- Performing a task or service specified in the official's position description or contract
- Performing an instructional task directly related to the student's education
- Performing a task related to the discipline of a student
- Performing as a faculty advisor, program director or dean
- Providing a service or benefit related to the student or student's family, such as

healthcare, counseling, job placement, financial aid or health and safety emergency

- Providing legal services to the College

4. The right of the College to release directory information without student consent.

The College considers the following to be directory information that may be disclosed without consent if it is determined the party requesting the information has a legitimate need for the information: name, address, phone number, date of birth, email address, dates of attendance, degrees/awards received, participation in activities or sports and weight and height of members of athletic teams. Additionally, per the Solomon Act, the College is required to provide military recruiters with name, address, phone number, age and degree program for enrolled students over age 17.

Columbia Basin College may disclose personally identifiable information designated as directory information from a student's education records without prior consent. Students who do not wish to have any or all of such directory information published without their prior consent, must submit a Disclosure of Directory Information form to the Registrar within 15 calendar days after the beginning of the quarter. If a student places this hold on their account, it will remain in effect until otherwise notified. This request will prevent any release of information to a third party without a signed release from the student. In addition, the electronic record will be annotated preventing the electronic release of information, with the words privacy block in the student records. This certification does not preclude the verification of degrees awarded for graduation purposes.

5. The right of the College to release educational records without student consent.

Institutions may disclose to parents or legal guardians the educational records or components thereof without written consent by the student if it is determined that the student violated any federal, state or local law or any institutional policy or rule governing the use of alcohol or controlled substances (refer to Article X of the CBC Code of Student Rights and Responsibilities) and the student is under the age of 21 at the time of the disclosure to the parent. FERPA allows higher educational institutions to share information as necessary in a crisis or in situations where students are a potential harm to themselves or others.

6. The right to file a complaint with the U.S. Department of Education concerning alleged failures by Columbia Basin College to comply with the requirements of FERPA.

The name and address of the office that administers FERPA is:

Family Policy Compliance Office
U.S. Department of Education
400 Maryland Avenue SW
Washington, DC 20202-4605

Record Retention

Columbia Basin College academic records will be maintained according to the state retention guidelines. For further information, contact the Registrar.

General Policies

Student Rights & Responsibilities

All students at Columbia Basin College are expected to comply with College policies, procedures and regulations. Students are also provided with certain rights, including due process. These rights and responsibilities are fully outlined in student policies and the Student Code of Conduct. The Code is administered by the Vice President for Student Services and is available in the Library, the Office of the Vice President for Student Services and the ASCBC offices. For further information, please contact the Assistant Dean for Student Conduct.

Alcohol & Drug Free Schools/Workplace

In compliance with the Federal Drug-Free Workplace Act of 1988 and the Drug-Free Schools and Communities Act of 1989, Columbia Basin College has adopted and implemented a drug and alcohol prevention program. Unlawful possession, use or distribution of alcohol and illicit drugs is disciplinable for students under the Student Conduct Code and employees under applicable policies. Please note: marijuana remains an illicit drug on CBC's campuses, despite the change in Washington law. Information regarding CBC's drug and alcohol prevention program under these laws can be found at columbiabasin.edu/DFSCA.

Non-Discrimination & Harassment Policy and Grievance Procedure

Columbia Basin College recognizes its responsibility for investigation, resolution, implementation of corrective measures and monitoring the educational environment and workplace to stop, remediate and prevent discrimination on the basis of race, color, national origin, age, perceived or actual physical or mental disability, pregnancy, genetic information, sex, sexual orientation, gender identity, marital status, creed, religion, honorably discharged veteran or military status, or use of a trained guide dog or service animal, as required by Title VI of the Civil Rights Act of 1964, Title VII of the Civil Rights Act of 1964, Title IX of the Educational Amendments of 1972, Sections 504 and 508 of the Rehabilitation Act of 1973, the Americans with Disabilities Act and ADA Amendment Act, the Age Discrimination Act of 1975, the Violence Against Women Reauthorization Act and Washington State's Law Against Discrimination, Chapter 49.60 RCW and their implementing regulations. To this end, Columbia Basin College has enacted policy prohibiting discrimination against and harassment of members of these protected classes. Any individual found to be in violation

of policy will be subject to disciplinary action up to and including dismissal from the College or from employment. The policy, grievance process and complaint form can be found at columbiabasin.edu/nondiscrimination.

The College takes complaints about harassment and discrimination very seriously. Depending on the facts of the individual situation, the College may proceed with actions consistent with its due process procedures, Office for Civil Rights guidance, personnel policies, collective bargaining agreements and Code of Student Conduct. If the behavior may be criminal, the complainant has the right to file a criminal complaint with local law enforcement. This will not delay the College in doing its own work to address the complaint promptly and equitably.

Employee, student, applicant or visitor complaints of harassment including sexual assault and misconduct, and discrimination based on an individual's protected class status or gender are handled by the Vice President for Human Resources & Legal Affairs/ Title IX Coordinator who can be reached at 509.542.5548 or the Human Resources Office in the A building. A Deputy Title IX Coordinator may also be contacted at 509.542.4407.

Retaliation by, for, or against any participant (including complainant, respondent, witness, Title IX/EEO Coordinator or investigator) is expressly prohibited. Retaliatory action of any kind taken against individuals as a result of seeking redress under the applicable procedures or serving as a witness in a subsequent investigation, or any resulting disciplinary proceedings is prohibited, and is conduct subject to discipline.

Additional College policies can be found online at columbiabasin.edu.

Student Resources

Academic Success Center

The Academic Success Center provides CBC students free drop-in instructional support in subject areas for which there is high demand. The Center is equipped with computers and printers for student use, as well as whiteboards and group study areas. The Academic Success Center is located in the Thornton Center, room T433 on the Pasco campus. For more information, contact the Academic Success Center at 509.542.4676 or visit the website at columbiabasin.edu/asc.

Tutoring Services

The Center's services include drop-in and online tutoring and academic success workshops. Tutors can help students with a particular area of difficulty in a one-on-one or small group setting. Contact the Center for updated drop-in tutoring subject hours and availability. eTutoring is available to all CBC students in a variety of subjects. eTutoring provides both synchronous and asynchronous instructional support for students enrolled in live and online courses at CBC. Students may access e-Tutoring from the Academic Success Center website.

Math Center

Math tutors are available all hours the Academic Success Center is open for most math courses offered at CBC. Students visit the Math Center to study and work productively on assignments, projects and homework. The Math Center offers a study space for all students. There are group, individual and silent study areas where students can work on the computer, at a desk and on a whiteboard, chalkboard or touchscreen.

Writing Center

For writing assistance, tutors offer advice and assistance with revising, reorganizing and elaborating drafts of papers, as well as with syntax, usage, mechanics, citations and documentation. Students also come in to receive assistance with prewriting-related tasks such as brainstorming ideas, outlining and locating research information, while others come in to receive help with developing writing skills in general. Appointments can be scheduled by contacting the Academic Success Center or online through the Center's web page.

Assessment Center

Assessment

In addition to standardized testing of skills in English, reading and math for appropriate college course placement, the Assessment Center evaluates multiple measures used for course placement.

GED® Exams

Adults who have not graduated from high school may obtain a Certificate of Educational Competency by passing mathematics, social studies, science and literature tests administered by the Assessment Center. Students seeking

assistance in preparing for these exams should contact Adult Basic Education in the Transitional Studies department.

Other Testing

The Assessment Center proctors several CBC program exams in addition to remote testing. We also offer proctor services to the surrounding communities.

Assistive Technology Center

The Assistive Technology Center (ATC) ensures students with a disability are given equal access to education with the help of adaptive technology. In the spirit of Section 508 and the Americans with Disabilities Act (ADA), these technologies can support a range of disabilities including, but not limited to, deaf, hard of hearing, blind/low vision, learning disabilities and mobility impairments. ATC provides a number of adaptive technologies: printed materials in alternate formats such as braille, audio or enlarged print text, captioned visual and audio content and more. ATC works collaboratively with faculty to promote a Universal Design for Learning (UDL) atmosphere for all students whether they have a disability or not. We are located in the Thornton Center, room T422 and can be reached at 509.542.5529 or by email atc@columbiabasin.edu.

Athletics

CBC is a member of the Northwest Athletic Conference. Men's teams represent Columbia Basin College in intercollegiate competition in baseball, basketball, golf and soccer. Women's teams compete in basketball, soccer, softball, golf and volleyball.

Athletic scholarships are available for participants. Participants must be enrolled in at least 12 credits per quarter. Second-year participants must maintain a 2.0 grade point average (GPA).

Basic Food, Employment, & Training (BFE&T)

Students enrolled in a professional/technical program who are currently receiving or are eligible to receive food benefits from the state of Washington, are eligible for these additional benefits and resources through BFE&T:

- Maintaining eligibility for food stamps while attending school
- DSHS' Child Care Subsidy Programs
- Academic/career planning
- Referrals to on-campus and off-campus resources
- Tuition and other support assistance (according to documented need)

For more information, please call the BFE&T office at 509.542.4719.

Bookstore

The Columbia Basin College Bookstore is located in the Hawk Union Building (HUB). Store hours during fall, winter and spring quarters are 7:30 a.m. - 6:00 p.m. Monday through Thursday and 7:00 a.m. to noon on Friday. The Bookstore is closed weekends and student holidays. Please call for hours during student non-attendance breaks (i.e. summer, winter, spring).

The Bookstore is owned and operated as a service by CBC for our students and the community. The store sells required and recommended textbooks, as well as general reading materials and study aids, school supplies, art and engineering supplies, emblematic clothing, greeting cards and gift items. We welcome opportunities to serve you.

There are established refund, exchange and buyback policies. These are available in the Bookstore and on our website. Current quarter textbook information is available online at cbcbookstore.com.

College Assistance Migrant Program (CAMP)

The College Assistance Migrant Program (CAMP) is a unique educational program designed for students from migrant and seasonal farm worker backgrounds. The program is funded by the U.S. Department of Education at just over \$2.1 million over five years.

Our mission is to provide students with the foundation they need to successfully reach their educational and career goals, which at a minimum, is to include a bachelor's degree. CAMP will provide students with proactive academic, career, financial and support services throughout their first year of college. For more information, please contact the CAMP office at 509.542.4602.

Counseling/Advising Center

The primary responsibility of the Counseling/Advising Center is to assist students in their personal, educational and professional growth and planning. The Center provides a variety of services:

Educational Planning

Counselors, Completion Coaches and Retention Specialists assist students in their transition to CBC by providing information about the College's processes, procedures and policies. They participate in College orientation and initial registration activities and, most importantly, assist students in developing educational plans to meet individual goals.

Academic and Transfer Advising

Although a variety of individuals at CBC provide academic advice to students, Counselors, Completion Coaches and Retention Specialists are primarily responsible for assisting students

Student Resources

in making decisions about academic or occupational goals. They provide specific information about CBC courses and programs, as well as specialized training options and transfer requirements for other educational institutions.

Career Counseling

Counselors help students and members of the community identify educational interests and assist in career exploration. They interpret interest and personality inventories to aid individuals who are making career and educational decisions or are undecided about a major or program. Career, transfer, job search and personal/professional development workshops are scheduled throughout the year. They provide information and referrals to a wide range of resources both on- and off-campus.

Human Development Courses

The Counseling/Advising Center faculty teaches a variety of human development courses. Please refer to the Courses & Programs section of this catalog for course descriptions.

Personal Counseling

Counselors are registered by the state of Washington to provide personal counseling and assist students with issues that may affect their academic performance or progress in meeting their educational goals. They offer workshops and other interventions aimed at improving student educational success and personal development. Counselors provide short-term personal counseling and refer students to community mental professionals if needed.

To schedule an appointment with a Counselor, please call the Counseling/Advising Center at 509.542.5505.

Hawk Central

Hawk Central, located in the H building, is centralized within Student Services to offer students an opportunity to meet face-to-face with a friendly customer service specialist. In individual walk-in sessions, the staff in Hawk Central answer student questions, assist with problem-solving and provide information regarding key student services processes (getting started, financial aid, registration, cashiering and general college information). Please visit columbiabasin.edu/hawkcentral or email your questions to hawkcentral@columbiabasin.edu.

Human Resources' Student Employment

The Student Employment Office (SEO) is coordinated through the Human Resources Office. The SEO provides on-campus student employment information to CBC students and normally has more than 150 students per quarter working in departments across campus. Information outlining the hiring process can

be found on the Student Employment website: columbiabasin.edu/studentemployment. The website also provides tools and resources for students wanting to work on-campus or off-campus through the State Work Study program.

Types of Student Employment at CBC

On-Campus

- Federal Work Study
- CBC Non-Work Study
- Athletic Scholarships through the Athletic Department
- Summer Student Employment

Off-Campus

- State Work Study

While State Work Study is non-CBC employment, it is an opportunity for CBC students to work off-campus for employers in the community, and in jobs related to the student's major and/or career goals. The Financial Aid Office assists student workers interested in placement for off-campus employment, though students apply through the CBC online application system on the Student Jobs @ CBC web page.

Criteria for Work Study

(Refer to Financial Aid Programs for more detail)

Student workers under Federal Work Study or State Work Study must be enrolled in at least six degree-required credits for the Academic Year and five degree-required credits for Summer Quarter.

Library Services

The CBC Library is located in the L building on the Pasco campus and is open to students, faculty, staff and the public. The Benton-Franklin County Regional Law Library is also located in the L building. The Health Sciences Library is located on the third floor of the CBC Health Science Center in Richland.

The Pasco and Richland libraries provide a wide range of resources, both on-site and online, to support students' research and other information needs. Both facilities provide desktop computer access and laptops for checkout; scanning, printing and copying equipment; and contain individual, group and collaborative study spaces. Databases providing full text access to articles, videos and e-books are available for use on and off campus. The library also maintains collections of print books and videos for educational and recreational purposes.

Librarians are available during scheduled hours or by appointment to provide research assistance; an online reference chat service is available 24/7. Librarians also work with instructional faculty to provide students with information on effectively finding and using library resources to complete course-related research. The Circulation Desk assists students with borrowing services and access to reserve

textbooks for use in the library; note that not all textbooks are available. The Student HelpDesk is also located in the CBC Library in Pasco and offers students assistance with a variety of computer networking, software and hardware issues.

Visit either Library in person, online at columbiabasin.edu/library, or call 509.542.4887 (Pasco) and 509.544.8336 (Richland) for information about the libraries' hours, resources and services.

MESA

Funded by the Washington State Board for Community and Technical Colleges (SBCTC), the MESA Community College program aims to increase the number of traditionally underrepresented students receiving a bachelor's degree in a Science, Technology, Engineering or Mathematics (STEM) discipline. CBC is one of 12 participating community colleges in the state of Washington to fully implement all six components of the program. Each year, the MESA program recruits and retains a cohort of 100 students from the time they enroll in the program to the time they graduate and transfer to a four-year university. The students that MESA serves must have the intent to transfer to a four-year university, come from a traditionally underrepresented group in the STEM fields, be pursuing their first bachelor's degree in a STEM field and be financially and educationally disadvantaged. For more information, please call the MESA program office at 509.542.4538.

Office of Student Activities

The CBC staff members of the Office of Student Activities supervise and serve as daily advisors to the ASCBC Student Leaders. Student Activities works with student groups to develop and plan cultural, social, recreational and celebration events to meet the needs of the student body. Student-funded activities include intercollegiate athletics, game room access, music, drama and various interest clubs.

Associated Students of Columbia Basin College (ASCBC)

ASCBC is thrilled to have you as a member of our student population! Your student government officers are available to help you during your college experience. Stop by our office (upstairs in the HUB) to learn about starting a club, sign up for Leadership Council and hear about upcoming student events. We want to make sure that you get the most out of your college experience. Have a great year!

ASCBC Clubs & Organizations

CBC has approximately 26 clubs and 12 athletic and fine arts organizations focusing on sports, arts, diversity, fun, travel and more!

Student Resources

Performing Groups

The Music department offers a number of vocal and instrumental groups that students are encouraged to participate in. Some of the ensembles are: Jazz Ensemble, Concert Band, CBC Symphony Orchestra, FreeForm (a vocal jazz group), Concert Choir and Chamber Choir. Participation in these groups may require an audition. For detailed information, please contact the Music department at 509.542.5531.

The Theatre Arts department presents several plays during the school year. All students are encouraged to try out for parts in the plays or for positions on the production staff.

Planetarium

The Bechtel National Planetarium on the Pasco campus is the largest planetarium theater in Washington. The Planetarium uses one of the Northwest's most advanced projection systems to share the wonder of science, technology and the universe. Our goal is to enrich education, research and outreach in astronomy, physics and many other sciences for communities in the lower Columbia Basin.

The Planetarium is used for all of CBC's astronomy courses as well as for other student events, including club ceremonies and movie nights. Field trips for local K-12 classes are offered free of charge every weekday, and other private organizations may rent the facility for educational visits. Shows for the public are held every Friday evening and Saturday afternoon.

Public show schedules, ticket sales and other information can be found on the website at columbiabasin.edu/planet.

Resource Center

The Resource Center is dedicated to assisting students and community members in reaching their personal and educational goals. The Resource Center is open to those who want to begin college but are not sure how to get started, as well as, to currently enrolled students who need assistance to overcome obstacles that make reaching their educational goals more difficult.

The Center offers support to qualified students with disabilities, as well as financial resources and support to low income students.

Services are offered in three major areas: disability services, family services and student assistance.

Disability Services

The Resource Center ensures that students and community members with disabilities are given an equal access to the educational opportunities our college provides. Prospective and current students, as well as community members needing accommodations, should contact the Resource Center to request services.

Auxiliary Aids and reasonable accommodations will be determined based on each individual's unique situation.

Contact us at 509.542.4412 or by email at rcdesk@columbiabasin.edu. Relay Service for the Deaf and Hard of Hearing: 1.800.833.6384.

The Center also serves as the test site for a number of standardized educational exams, certification exams and proctored exams for other colleges.

If you need accommodations for placement testing based on a disability, please contact the Resource Center at 509.542.4412 or the Washington State Relay Service for the Deaf and Hard of Hearing at 1.800.833.6384.

Family Services

These are services available to low-income students with families attending our college. Services include:

- Childcare Assistance
- Holiday Adopt a Family Program
- Community Referrals

Student Assistance

Financial assistance is available to students attending CBC. These services include:

- Short-term emergency book and tuition loans
- Travel assistance
- Night taxi service
- Dial-a-Ride passes
- Emergency personal assistance
- GED® testing waivers

The Resource Center is located in the Thornton Center, room T402 on the Pasco campus. Contact us at 509.542.4412.

Student Housing

Student Housing is located across the street from the Pasco campus on the corner of 20th Avenue and Argent Road providing a walkable commute to classes. The Student Housing facility offers furnished rooms with kitchens and bathrooms for full-time students. Student Housing is committed to providing a safe, comfortable and academic environment where students can live, learn and grow together. For additional information, please visit housing.columbiabasin.edu or or contact the Student Housing Office at housing@columbiabasin.edu or 509.542.4550.

Student Support Services

Student Support Services/TRIO (SSS) is a federally funded project to help students graduate and transfer to a university. Students may be eligible for SSS if they are a first generation college student (neither parent has earned a bachelor's degree), are financially limited or have a documented disability. SSS provides the following support:

- Academic advising
- Transfer planning

- Major and career planning
- Financial literacy and scholarship information
- Campus visits
- Coordination with the Resource Center
- Tutoring in math and science

Upward Bound

The mission of CBC's Upward Bound program is to academically prepare low-income high school students to become first-generation graduates of post-secondary programs. Upward Bound students participate in both summer and academic-year programs. After graduation from high school, students are eligible to enroll in the BRIDGE program for their first summer of college course work.

Program Components:

- Tutoring
- Mentoring
- Advising
- Cultural Events
- College Visitations
- Pre-college Workshops
- Community Service
- Summer Instruction

Who is Eligible?

Students are eligible if:

- They are potential first-generation college graduates
- They are attending one of the following high schools: Connell High School, Pasco High School and Chiawana
- Their family income meets federal guidelines
- They are preferably in the ninth or tenth grade and not yet in the twelfth grade
- They received no Fs on their last semester's grades
- They have a strong desire for a college degree

The CBC Upward Bound project is 100 percent federally funded to serve 83 students from three high schools.

Veterans Education & Transition Services

The Veterans Education and Transition Services (V.E.T.S.) Center is dedicated to supporting military connected students in their transition to CBC, through academic advising, education benefits certification, navigating the college system, workshops tailored to veteran student success and access to a VA VITAL counselor, among countless others. The Center also offers a study space, access to computers and free coffee daily. To learn more about services for military connected students at CBC, visit columbiabasin.edu/veterans or speak to a member of the V.E.T.S. staff at 509.542.4404.

Veterans Benefits Approval Statement: Selected programs of study at Columbia Basin College are approved by the Workforce Training and Education Coordinating Board's State Approving

Student Resources

Agency (WTECB/SAA) for enrollment of those eligible to receive benefits under Title 38 and Title 10, USC.

CBC does not and will not provide any commission, bonus or other incentive payment based directly or indirectly on success in securing enrollment or financial aid to any persons or entities engaged in any student recruiting or admissions activities or in making decisions regarding the award of student financial assistance.

Compliance with VA's 85/15 Rule: Schools should limit student enrollment to 85 percent veteran enrollment per cohort. In the event that a veteran wishes to enroll in a class that has already reached the 85 percent cap, he or she may do that but will not be eligible for VA funding. Chapter 35 and 31 students may still enroll even if the 85 percent has been realized.

In accordance with Title 38 US Code 3679 subsection (e), this school adopts the following additional provisions for any students using U.S. Department of Veterans Affairs (VA) Post 9/11 G.I. Bill® (Ch. 33) or Vocational Rehabilitation and Employment (Ch. 31) benefits, while payment to the institution is pending from the VA. This school will not:

- Prevent the students enrollment;
- Assess a late penalty fee to;
- Require student secure alternative or additional funding;
- Deny their access to any resources (access to classes, libraries, or other institutional facilities) available to other students who have satisfied their tuition and fee bills to the institution.
- However, to qualify for this provision, such students may be required to:
- Produce the Certificate of Eligibility by the first day of class;
- Provide written request to be certified;
- Provide additional information needed to properly certify the enrollment as described in other institutional policies

Virtual Campus/eLearning

The Virtual Campus/eLearning department supports students, faculty and staff in using and implementing educational technologies. This includes support of online and blended (hybrid) classes, as well as use of technology in face-to-face classes. The main technologies supported are Canvas (learning management system), Panopto (lecture capture, video recording) and Zoom (webinar, virtual office). To find out more about online classes and eLearning at CBC, visit columbiabasin.edu/eLearning. The eLearning department can be reached at 509.542.4468 or via email at eLearning@columbiabasin.edu.

Worker Retraining

Tuition assistance and book loans may be available if you meet one of the following criteria:

- You are currently receiving or have exhausted unemployment benefits within the last 48 months.
- You have become a displaced homemaker, meaning you were dependent on another family member's income, that income is no longer available to you and you are either unemployed or underemployed.
- You honorably discharged from the U.S. Armed Services within the last 48 months or are going to be released from active duty within the next 18 months.
- You are a dislocated worker who is currently working a temporary stop-gap job with an income loss of 20 percent or more.
- You are currently employed but at risk for unemployment, meeting **two of the following criteria:**
 1. Your job is listed as not in demand;
 2. You need training to remain working for your current employer;
 3. And/or you have less than 45 college credits.
- You have been self-employed and experienced a lack of work due to the economy.

For more information about program eligibility, call Columbia Basin College Worker Retraining at 509.542.4446 or visit columbiabasin.edu/workerretraining.

WorkFirst

The WorkFirst program provides services and funds to eligible parents currently receiving Temporary Assistance to Needy Families (TANF). WorkFirst services include:

- Career and educational planning assistance
- Registration assistance
- First quarter financial assistance for tuition, fees and books for basic skills, vocational, technical and professional training programs

For more information, please contact WorkFirst, 509.542.4719 or 509.542.4531.

Safety & Security Information

Campus Safety & Security

Columbia Basin College strives to provide a safe and secure environment for students, staff and visitors. The Campus Security department enforces College parking and traffic regulations, provides escorts, jump-starts vehicles, retrieves keys locked in vehicles, maintains lost and found articles and assists local, state and federal law enforcement agencies.

In an emergency, 911 is called. On-campus emergency assistance is available by calling 509.542.4819 or ext. 7777. Security personnel routinely conduct patrols of CBC facilities and parking lots and provide emergency assistance as necessary. Security officers have authority to request identification and to determine whether individuals have lawful business at CBC.

Coordination With Law Enforcement

CBC maintains close coordination with local law enforcement agencies at all CBC locations and activities. CBC's security officers have the same arrest capability as a citizen. Criminal incidents are referred to the local police who have jurisdiction on the CBC campus. All College personnel and students should immediately report any crime, suspicious circumstance/person or emergency to the 911 Dispatch Center or to the CBC Security department at 509.542.4819 or via the Crime Incident Report form located on the CBC website at columbiabasin.edu/asafercbc. Prompt reporting will assure timely warning notices on campus and timely disclosure of crime statistics.

Contact Campus Security if you:

- Are a victim of a crime that has occurred on campus
- See a suspicious activity or a suspicious vehicle on campus
- Have information about a theft of property
- Have been involved in an auto accident or have witnessed one
- Smell smoke or fumes inside a building
- See smoke or flames inside a building
- Have been injured and/or need first aid
- Notice any other safety or security related problems

Campus Security Act

The Department of Education and the Jeanne Clery Act require all colleges to provide information to students and employees about its campus safety policies, procedures and statistics on certain crimes in an Annual Security Report. CBC has developed a protocol with area law enforcement agencies to report and obtain data for the Annual Security Report that is required for both on-campus and off-campus locations owned or operated by the College and occurring on adjacent public property. These statistics can be located at the following website: columbiabasin.edu/safety.

Printed copies of this report are available by request from CBC Security. The report on safety and crime statistics also is available by contacting: Columbia Basin College Vice President for Administrative Services, 2600 North 20th Avenue, MS-A13, Pasco, WA, 99301, 509.542.4408.

Safety Alerts

In the event that a situation arises, either on- or off-campus, that, in the judgment of the President's Cabinet and the Campus Security office, constitutes an ongoing or continuing threat, a campus wide timely warning will be issued. The notification could be in the form of media alerts (TV/radio), social media posts (Facebook/Twitter), email, text messages, posters/flyers and/or notices in the student bulletin. Sign up for emergency notifications via email and/or text message at columbiabasin.edu/ens.

Disciplinary Action

Any student who commits an act in College facilities, which is punishable as a misdemeanor or a felony, such as sexual assault, under Washington state law, may be subject to appropriate disciplinary process procedures outlined within the Student Code of Conduct. These proceedings may include the opportunity of the accused and accuser to have others present during a disciplinary proceeding and notification of the final determination resulting from the proceeding.

Sexual Offender Notification

Sexual offenders, Level I, II and III, are required by law to register with the county sheriff in the county where they reside. The law requires that they also inform the county sheriff if they register for school. The county sheriff, in turn, is required to notify the school of any Level II or III sex offender who may have registered to attend classes. Any sex offender who wants to enroll at CBC must meet with the Assistant Dean for Student Conduct prior to the start of their first classes. These notifications are intended to inform the campus community and to promote personal safety rather than create panic.

CBC is bound by state law to be an open door admission institution and only in those situations where a prospective or enrolled student is determined to be disruptive to the educational environment or would not benefit from enrollment will admission be denied or revoked.

Notifications of sex offenders enrolling at CBC are received from the Franklin or Benton County Sheriff's Department and are sent to CBC's Campus Security office or the Vice President of Student Services and the Assistant Dean for Student Conduct. Notification to the College community will be made pursuant to CBC's Sexual Offender Notification Procedure which can be located at columbiabasin.edu/safety.

Title IX

CBC is committed to fostering a safe, productive learning environment. Title IX and our Non-Discrimination & Harassment Policy prohibit discrimination on the basis of sex, including sexual misconduct, harassment, domestic and dating violence, sexual assault and stalking. We understand that sexual violence can undermine students' academic success and we encourage students who have experienced any form of sexual misconduct to talk to someone about their experience, so they can get the support they need. The College offers information and referrals for victims of sexual misconduct. Victims of sexual misconduct are encouraged to report the incident as soon as possible to the Title IX Coordinator or Deputy Coordinator in the Human Resources Office in the A building or at 509.542.4407. More information is available at columbiabasin.edu/titleix.

Severe Weather

Although it is rare, if you suspect that CBC may be closed, please check one of these resources:

- CBC Emergency Notification System (ENS): sign up (columbiabasin.edu/ens) to receive emergency notifications via email and text messaging
- Local media outlets (radio stations and television news)
- Flash Alert: f1shalertnewsire.net
- CBC homepage: columbiabasin.edu
- CBC Facebook: facebook.com/columbiabasincollege
- CBC readerboards
- CBC main line: 509.547.0511; if the College is closed, the message will state that CBC is closed

Information will only be posted or announced if CBC should close. That determination is made before 6 a.m., after area roads have been driven and information obtained from weather reporting services. Employees and students are expected to use reasonable judgment regarding traveling in inclement weather/adverse road conditions.

Graduation Information

Graduation

Students must submit a graduation application in order to be awarded a degree or certificate upon the fulfillment of the completion requirements. Students are encouraged to meet with their appropriate advisor (Counselor, Completion Coach, Retention Specialist or program advisor) one quarter before they plan to complete all their requirements to graduate. Please note that one graduation application must be filed for each degree or certificate. Graduation applications are available online at columbiabasin.edu/gradapps and must be completed and signed by the student and appropriate advisor. Students may graduate at the end of any quarter. Students participating in graduation in June will have completed their degree/certificate during the most recent fall, winter or spring quarters or the summer following graduation.

In order to receive a degree or certificate from CBC, students must fulfill the following requirements:

- Complete all degree/certificate requirements as stated in the College catalog (refer to the Catalog Option Policy for more information regarding catalog degree requirements). No one course can fulfill two distribution requirements.
- Complete at least one-third of the total credits required for an associate degree/certificate or 45 credits for an applied bachelor's degree in residence at CBC.
- Earn a cumulative college-level* grade point average (GPA) of 2.0 or above in course work completed at CBC.
- Students transferring credit from an accredited institution: earn a combined cumulative college-level* GPA of 2.0 or above in courses completed at CBC and transferred-in college-level course work.

**College-level courses are numbered 100 and above at CBC. Course numbering at other colleges may vary. For questions regarding transfer credit, please contact Student Records.*

Catalog Option Policy

Students applying for graduation must comply with the requirements of the College catalog. Students may apply for graduation under the catalog in effect at the time of enrollment or any subsequent catalog, provided the student does not drop out from CBC for a period of more than four consecutive quarters (including summer quarter). Students who drop out for a period of more than four consecutive quarters (including summer quarter) have the option to apply for graduation under the catalog in effect at the time of re-enrollment or any subsequent

catalog. They may not apply for graduation under any catalog that was in effect prior to the re-enrollment. There is a one-year limitation of completing a degree under the catalog in effect at the time they last attended CBC for students transferring back credits from another college to complete a degree at CBC.

Expanding options for students to earn high school diplomas, Bill Number: HB 1714

CBC may issue a high school diploma or certificate when one of the following criteria is met:

- An individual satisfactorily completes the requirements for high school completion
- An individual enrolls through the Running Start program and satisfactorily completes an associate degree including an Associate in Arts and Sciences degree, Associate of Science degree or Associate in Applied Science degree. Students must indicate this request on their graduation application. (These individuals are not required to complete the State Board of Education's graduation requirements.)
- An individual, 16 years or older, satisfactorily completes an associate degree, including an Associate in Arts and Sciences degree, Associate in Science degree or Associate in Applied Science degree. Students must indicate this request on their graduation application. (These individuals are not required to complete the State Board of Education's graduation requirements.)

Degree and Certificate Overview

Baccalaureate Degrees

Minimum 180 credits (60 credits must be from 300 and 400 courses)

Columbia Basin College offers two baccalaureate degree types: Bachelor of Applied Science (BAS) and Bachelor of Science in Nursing (BSN). The BAS degrees are offered in Applied Management (with optional concentrations in Agriculture or Healthcare Administration), Cyber Security, Dental Hygiene, Information Technology and Project Management (with an optional concentration in Construction).

Many two-year (AA, AS, AAS) degree-holders have reached a plateau in their career, unable to advance because they cannot meet the bachelor's degree requirements needed for many supervisory positions. The Washington State Legislature authorized the community college baccalaureate program to increase access to bachelor's degrees for Washington citizens. In particular, AAS graduates whose credits are generally non-transferable to four-year institutions can pursue these degrees without having to start their college education from scratch, allowing full-time students to complete the upper-level degree in approximately two years.

All BAS and BSN degrees offered at CBC are approved by the Northwest Commission on Colleges and Universities and the Washington State Board for Community and Technical Colleges.

Students pursuing a BAS or BSN degree must complete a minimum of 180 college-level course credits which includes a minimum of 60 upper-level (300 and 400) course credits and a minimum of 60 general education course credits.

Associate Degrees

Upper-level (300 and 400) course credits may not be used to satisfy associate degree requirements

Associate in Applied Science Degree (AAS)

Minimum 90 credits

The Associate in Applied Science (AAS) degree is earned by students who complete a prescribed two-year professional/technical program. Thirty-three percent of required degree credits must be earned at Columbia Basin College. The AAS degree is not designed for transfer, although some classes may be accepted for transfer by baccalaureate degree institutions. For degree requirements, students should work closely with their program advisor.

Associate in Arts and Sciences Degree (AA/DTA)

90 credits

The Associate in Arts and Sciences (AA) degree is a direct transfer agreement (DTA) designed for students who plan to transfer to a four-year institution after completing the first two years of study at CBC. This degree meets the Inter-college Relations Commission (ICRC) guidelines for direct transfer degrees. If admitted to an institution subscribing to these guidelines, the degree holder will be granted junior status and will have fulfilled most of the lower-division general education requirements of baccalaureate degree programs offered by many public and independent colleges and universities in Washington State. Students are encouraged to meet with their advisors early in their academic planning to review the degree options listed below and design a plan that best fits their educational and transfer goals.

Associate in Business Degree (MRP/DTA)

90 credits

As a result of the work by members of the Washington community and technical college system and public baccalaureate institutions, the Major Related Program (MRP) agreements were developed. These direct transfer agreements (DTA) place transfer students from community colleges on comparable footing with direct entry counterparts at four-year institutions within Washington State. Students who complete the requirements for an MRP will have satisfied the lower division general education (or core) requirements and lower division math and science requirements to the same extent as direct-entry university students pursuing similar goals.

Associate in Math Education Degree (AA/DTA)

90 to 92 credits

The Associate in Math Education degree is a direct transfer agreement, created to aid students interested in careers as secondary math or science teachers. Future secondary teachers must pursue a major in their field as well as fulfill entrance requirements into a school of education. As a result, there is little room for electives. This degree is intended to ensure that graduates of Columbia Basin College are as well-prepared as their counterparts at four-year colleges. The transferability of this degree is backed by a statewide articulation agreement with teacher-training universities. This degree will fulfill the general education requirements at the public Washington State transfer institutions. Apart from the requirements embedded within the degree, it is recommended that students check specific requirements of their intended transfer schools. This is especially true for the area of

field experience, since teacher certification institutions vary in terms of the quality and quantity of experience required.

Associate in Science-Transfer Degree (AS-T)

Minimum 90 credits

The Associate in Science Transfer (AS-T) degree is based upon an agreement between CBC and many colleges and universities in the state of Washington. This degree is an efficient, pre-designed educational path for students who wish to complete a baccalaureate program in several of the science fields. The AS-T will not substitute for many of the general university requirements, but will allow CBC students to enter a participating four-year college or university with 90 credits, junior standing and the majority of major prerequisites completed. Students completing the degree must be prepared to complete any remaining general education requirements along with remaining program or graduation requirements during their junior or senior year of academic study.

There are two tracks to this degree. One track is for students majoring in biological sciences, chemistry, environmental science, geology or earth science. The second track is designed for students majoring in engineering, computer science, physics or atmospheric sciences. Both tracks are part of a transfer agreement, which includes priority admission for resident transfer students to any of the state-funded baccalaureate institutions.

Certificates

One-Year Certificate

45 to 89 credits

Certificate programs are designed to provide recognition for students who have not completed an Associate in Applied Science degree but are interested in training and instruction in specialized areas. One-Year Certificates incorporate specific general education requirements, as well as the core course content. Students earning a One-Year Certificate with 45 to 89 credits are eligible to participate in the commencement ceremony and may qualify for honors designation.

Certificate

20 to 44 credits

Certificate programs are designed to provide recognition for students who have not completed an Associate in Applied Science degree but are interested in training and instruction in specialized areas. Certificates contain the core course content but do not contain the requisite number of general education credits. Students earning a Certificate with 20 to 44 credits do not participate in the commencement ceremony or qualify for honors designation.

Degree and Certificate Overview

Short-Term Certificate

0 to 19 credits

Short-term certificates recognize students' mastery of information and skills important to employment and career advancement. Students earning a Short-Term Certificate with 0 to 19 credits do not participate in the commencement ceremony or qualify for honors designation.

Instructional Divisions

At Columbia Basin College, as at most colleges and universities, instructional departments offer areas of study (e.g., English, sociology and physics). Related departments are combined into larger divisions (e.g., Arts & Humanities, Health Sciences, Math & Science). The outline below shows CBC's division structure. Students who have questions about the subject matter, requirements, permission to register, etc., for a particular course or program of study are encouraged to contact the appropriate department or the division office.

Agriculture & Culinary Arts

Division Office: D110

Phone: 509.544.2265

Email: llivingston@columbiabasin.edu

Associate Dean: Laird Livingston

Instructional Programs

- Agricultural Food Systems
- Agriculture
- Culinary
- Horticulture
- Hospitality

Arts & Humanities

Division Office: P100

Phone: 509.542.5531

Email: bmckay@columbiabasin.edu

Dean: Bill McKay

Instructional Programs

- Communication Studies
- English
- Music
- Reading
- Theatre
- Visual Arts

Business & Computer Science

Division Office: B119

Phone: 509.542.4863

Email: hstewart@columbiabasin.edu

Dean: Hansen Stewart

Instructional Programs

- Accounting
- Applied Management
- Business
- Computer Science
- Computer Science Information Technology
- Cyber Security
- Economics
- Healthcare Administration
- Project Management

Career & Technical Education

Division Office: CTE 101

Phone: 509.542.4804

Instructional Programs

- Administrative Office Technology
- Apprenticeships
- Automotive Technology
- Blueprint Reading
- Commercial Driver's License
- Computer Applications
- Electronics
- Industrial Drawing
- Industrial Health & Safety Technology
- Industrial Hygiene Technology
- Industrial Technology
- Instrumentation and Control
- Maintenance
- Manufacturing Technology
- Non-Licensed Operator
- Nuclear Technology
- Radiation Protection Technician
- Technical Education
- Welding Technology

Health Sciences

Division Office: HSC 210

Phone: 509.544.8302

Email: mhoerner@columbiabasin.edu

Dean: Mary Hoerner

Instructional Programs

- Dental Hygiene
- Diagnostic Ultrasound Technology
- Emergency Medical Technician
- Fire Science
- Firefighter I
- Health Sciences
- Healthcare Central Service Technology
- Medical Assistant
- Medical Imaging Technology
- Medical Records & Healthcare Information
- Medical Simulation
- Nuclear Medicine Technology
- Nursing
- Nursing Assistant
- Paramedic
- Perioperative Nursing
- Phlebotomy
- Radiologic Technology
- Surgical Technology

Math & Science

Division Office: T202

Phone: 509.543.1481

Email: rtaylor@columbiabasin.edu

Dean: Roderick Taylor

Instructional Programs

- Astronomy
- Biology
- Chemistry
- Engineering Technology
- Environmental Science
- Exercise Science
- General Engineering
- Geology
- Health Education
- Mathematics
- Nutrition & Food Science
- Physical Education
- Physical Education Professional
- Physical Geography
- Physics

Student Services

Division Office: HN-146

Phone: 509.542.4595

Email: lschumacher@columbiabasin.edu

Associate Dean: Lane Schumacher

Instructional Programs

- First Year Introduction
- Human Development

Social Sciences, World Languages, & Assessment

Division Office: SWL 201N

Phone: 509.542.4614

Email: mhansen@columbiabasin.edu

Dean: Monica Hansen

Instructional Programs

- Anthropology
- Arabic
- Chinese
- Criminal Justice and Forensics
- Cultural Geography
- French
- Hebrew
- History
- Intercultural Studies
- International Studies
- Japanese
- Latino & Latin American Studies
- Philosophy
- Political Science
- Psychology
- Race, Ethnicity, & Immigration
- Russian
- Social Science
- Social Work
- Sociology
- Spanish
- Women's Studies

Transitional Studies

Division Office: A227

Phone: 509.542.4562

Email: dlarios@columbiabasin.edu

Dean: Daphne Larios

Instructional Programs

- Adult Basic Education/GED®
- Early Childhood Education
- Education
- English as a Foreign Language (EFL)
- English Language Acquisition (ELA)
- High School Equivalency Program (HEP)
- High School Academy (HSA)
- High School Completion
- High School 21+ (HS21+)
- Integrated Basic Education Skills Training (I-BEST)

WKSP	Workshop

College Survival Guide

academic concentration

Specialization in one academic discipline or field of study. See also major.

academic year

Usually this refers to the September–June school year. In some cases it refers to the entire year.

accreditation

Certification that a school or an instructional program meets standards set by an outside reviewing organization. Many forms of financial aid are available only to students attending accredited institutions.

admission

Approval for a student to attend an educational institution. The admission process usually involves an application and may require transcripts or other supporting documents.

application

The first step in requesting admission to an institution of higher education. Usually there is a form to fill out by a certain deadline; sometimes there is an application fee to pay.

articulation

A formal agreement between high schools and colleges or between community/technical colleges and bachelor's institutions, designed to make it easy for students to move from one educational level to the next without any gaps or repetition in their coursework.

assessment

A method of determining a student's knowledge or skill level, such as an exam, often taken to find his or her best placement or starting level in a series of courses in English, world languages, math or science. At CBC, assessment also refers to determining skills and abilities as learning outcomes in the college's general education program.

associate's degree

A diploma earned after successfully completing a required program of study in a community or technical college. It typically requires 90 or more credits and takes two years of full-time study. Some associate degrees enable students to continue on to bachelor's degrees, others prepare students to go directly into the workforce in a professional/technical field.

audit

A student who audits a course formally registers for it and attends class sessions but earns no credit and has no obligation to complete homework projects or take tests.

baccalaureate or bachelor's degree

A college degree which can often be earned by following a four-year instructional program. It typically requires 180 or more credits.

basic skills

Usually refers to a level of competency—specifically in reading, writing and mathematics—which is required for successful college-level work in all fields of study.

campus

The land and buildings that a college or university uses for instruction or student services.

catalog

A comprehensive resource published which lists college regulations, program and course descriptions, degree and graduation requirements, transfer requirements and other essential information.

certificate

A document granted by a college or university indicating that a student has successfully completed specified courses and requirements (compare with degree, which usually requires more time and coursework).

class

(1) A specific group of students meeting for specific instructional purposes. It can mean the whole series of scheduled meetings (Dr. Owen is teaching two English Composition classes this quarter) or just one session (we had a guest speaker in my Economics class today).

(2) Often means the same as course (she's taking classes in Welding Technology).

(3) A group of students who start at a school together and expect to complete their studies at the same time (he's in the graduating class of 2019).

class schedule

(1) A publication listing detailed course and section information (days, times, room numbers, etc.) for a specific semester or quarter.

(2) The specific courses that an individual student is taking or plans to take for a given semester or quarter.

college-level study

Curricula and instruction that assume the student has already mastered certain skills and abilities and has the level of commitment needed for postsecondary school work. Compare to developmental-level study. At CBC, college-level courses are numbered 100 or above.

commencement

The ceremony at the end of an academic year when students receive their degrees or diplomas (compare to graduation).

common course numbering

The Common Course Numbering system identifies courses that are commonly shared among Washington community and technical colleges. Visit columbiabasin.edu/ccn for more information.

competency

In competency-based courses or instructional programs, students must demonstrate certain skills and abilities (instead of just earning passing grades in classes) before moving from one level to the next or earning the final certificate or degree.

completion coach

A member of the college faculty or staff who assists students with planning quarter or semester schedules as well as their overall programs of study. Completion Coaches may also help with career planning. See also counselor.

counselor

A member of the college faculty who has special training in guidance and who assists students in academic or personal matters. See also completion coach.

course

(1) Often means the same as class.

(2) A planned sequence of instruction in a particular topic; may include class meetings, lectures, readings, demonstrations, exercises, assignments, examinations, etc.; offered repeatedly to different groups of students.

credit

A unit of measure for college work. Generally speaking, one credit hour represents one hour of classroom instruction each week for one term, plus the study time, homework, etc. that go along with it.

credit load

The total credit value of the courses a student is currently enrolled in.

curriculum (plural: curricula)

(1) An established sequence of information to be learned, skills to be acquired, etc. in a specific course or in a complete instructional program.

(2) Collectively, all the courses offered by a department, division or college.

dean

An academic administrator or official at a school, college or university, especially one with responsibility for students or faculty.

degree

A rank conferred by a college or university and earned by a student who has successfully completed specified courses and requirements (compare with certificate, which usually requires less time and coursework).

department

An organizational unit within a college or university, offering courses about closely related topics (at a small school there may be one world languages department, at a large school there may be separate departments for Spanish, French, Japanese, etc).

developmental-level study

Instruction that helps students improve their English and math abilities and prepare them for college-level study. At CBC, developmental-level courses are numbered 99 or below.

diploma

An official document issued by a college or university indicating that a student has earned a certain degree or certificate.

discipline

(1) A subject; field; branch of knowledge or learning (he teaches in the related disciplines of physics and astronomy)

(2) Orderly behavior (instructors are responsible for maintaining discipline in their classrooms)

(3) Correction or punishment for disorderly behavior (she disrupted the class repeatedly, so the college will begin disciplinary action).

distance learning or distance education

Instruction which does not require students to come to the campus; can include correspondence courses, televised or videotaped lectures, online courses (Internet and email), etc.

College Survival Guide

distribution requirements

Course requirements included in an instructional program to make sure that the student is well-rounded and gains some perspective outside his or her specific focus or major.

division

An organizational unit within a college or university consisting of two or more related departments.

drop

To cancel registration in a course after enrolling into it. Students often add and drop courses before settling on a class schedule for a particular quarter. See also withdrawal.

ELA (English Language Acquisition)

Usually refers to developmental-level instruction in English language skills for non-native speakers.

elective

A course that is not required for a particular instructional program. Many programs require a certain number of elective credits, and many recommend certain electives for students to choose from.

enrollment

- (1) The process of signing up and paying for courses. See also registration.
- (2) The total number of registered students attending classes in a particular instructional program or the whole school.

entry code

The five-digit number students get from the division office allowing them to register for a class that requires prerequisites or permission of instructor at a school.

evaluation

- (1) The process and standards by which an instructor judges a student's work and assigns a grade.
- (2) At CBC, the process of determining that a student has met all requirements to complete a degree or certificate and is ready to graduate.

faculty

The instructors or teaching staff at a school. At CBC, librarians and counselors are considered faculty members along with classroom instructors.

final exam or finals

Final exams are held the last week of each quarter for credit students. The final examination shall make up no more than 33% of the course grade.

finals week

The last week in the academic quarter in which final exams are given. Normal class schedules often vary during finals week. Exam schedules are published in the academic calendar every quarter.

financial aid

Money available from various sources to help students pay college expenses. These funds come as loans, grants or scholarships from the state or federal government or other organizations. Work Study is also a form of financial aid.

FAFSA (Free Application for Federal Student Aid)

The application required for students to be considered for federal student financial aid. The FAFSA is processed free of charge and is used by most state agencies and colleges. A new electronic application is required for each academic year.

FAFSA applications are available at fafsa.gov.

freshman

A student in the first year of a typical four-year bachelor's degree program (or one who has earned fewer than 45 quarter credits or 30 semester credits so far).

GED® (General Education Development)

A certificate representing the equivalent of a high-school diploma.

general education

At CBC, a set of requirements designed to help every graduating student achieve competence in a variety of learning outcome areas.

grade

A formal indicator of a student's overall performance in a course, recorded on the official transcript. Traditional letter grades are A for outstanding achievement, B for high achievement, C for satisfactory achievement, etc.

grade-point average (GPA)

The GPA is computed by multiplying the number value of the grade earned in each course (generally, A=4, B=3, C=2, D=1, F=0) times the number credits for each course, then dividing the result by the total number of credits taken.

graduation

The formal completion of an instructional program or course of study. Students graduate after successfully meeting all credit and course requirements and other criteria set by the college or university (compare to commencement).

grant

A type of financial aid that does not have to be paid back after the student leaves school. Grants are available through the federal government, state agencies and educational institutions.

Health Science Center (HSC)

Many of CBC's Health Sciences classes are located in a facility in Richland at 891 Northgate Drive. See also Richland campus.

hybrid course

A course that is partially held on campus and partially online.

incomplete

A temporary grade given to a student who is doing satisfactory work but is forced by illness or other emergency to miss an exam or a major assignment. The instructor and student arrange how and when the student will complete the work and have the I changed to a final letter grade. At CBC, the student must finish the incomplete work within one academic quarter.

independent study

An arrangement that allows a student to earn college credit through individual study and research, usually planned with and supervised by a faculty member.

internship

A supervised short-term apprenticeship or temporary job in a real world setting closely related to a student's field of study. The student may or may not be paid but earns college credit for the work experience. See also practicum.

junior

A student in the third year of a typical four-year

bachelor's degree program (or one who has earned 90-135 quarter credits or 60-90 semester credits so far).

late start classes

Classes that begin after the official first week of the quarter.

learning outcomes

What students are expected to know and to be able to do as a result of their experience at the college and, more specifically, as a result of completing their general education requirements.

loans

A type of financial aid that must be repaid to the government agency or other lending organization when the student leaves school.

lower division

The courses students are generally expected to complete during the first two years of a typical four-year bachelor's degree program.

major

Specialization in one academic discipline or field of study. Also called academic concentration in a particular subject.

Medical Science Center (MSC)

Many of CBC's Health Sciences classes are located in a facility in Richland at 940 Northgate Drive. The Kadlec Regional Medical Center Family Residency Clinic is co-located at the MSC. See also Richland campus.

no-show

A student who registers into a course but never attends class. A no-show student will receive a failing grade on his or her transcript, or may be administratively withdrawn at the discretion of the College.

noncredit

Courses or instructional programs which do not require extensive homework or examinations and which do not offer college credit. Students frequently take noncredit courses for basic skills improvement, job training or career enhancement, or personal enrichment.

once-a-week classes

Instruction which only requires students to come to the campus one day a week.

online courses

A course that is conducted primarily through the Internet and/or email. Students may also be required to make occasional visits to campus.

open admissions

The policy of some colleges to admit nearly all applicants, regardless of high school grades and admission test scores. It means different things at different schools. Community and technical colleges in Washington state admit anyone who is over 18 or has a high school diploma or GED®.

pass/passing

At most schools, a student will earn credit and pass a class with a grade of A through D. A student who earns an F grade fails the class and earns no credit. Different schools have different standards, so a student who passes a class with a D may or may not be able to use that class to meet prerequisites or fulfill requirements.

College Survival Guide

placement

The appropriate level to enter a series of courses, based on the student's skills (since she learned so much Spanish in high school, she can place into Spanish 201 in her first year at college); often used in the context of basic skills subjects such as mathematics or English composition. See also assessment.

postsecondary

Refers to all educational programs for students past high-school age; it includes community and technical colleges and job training programs as well as bachelor's colleges and universities.

practicum

A course that includes job-related activities and stresses the practical application of theory in a field of study. See also internship.

prerequisite

A course that must be completed (often with a minimum grade) or a skill that must be demonstrated before a student can enroll in a more advanced course (for example, first-year French is a prerequisite for second-year French).

professional/technical

A course or instructional program that emphasizes job skills training for a particular field of work; often called occupational or vocational education and often contrasted with academic or transfer education.

program

A very general term used in many ways in a college or university:

- (1) The courses that an individual student plans to take (the academic advisors can help you plan your program each year).
- (2) The courses required to complete a particular degree or certificate (he's almost finished with the Diagnostic Ultrasound program).
- (3) The courses that make up a department or the departments that make up a division within the college organization (the Social Science Division at CBC offers instructional programs in many fields).
- (4) Organized activities with a specific function (CBC offers support programs and services for students of color).

quarter

Some schools (including CBC) organize the academic year into three main periods—fall, winter and spring quarters—plus a shorter summer quarter (compare to semester).

records

Refers to all the information the college might keep regarding a student; it includes registration activity (enrollment, withdrawal, etc.), grades, payments, awards received, financial aid applications and award notices and notes on disciplinary actions, as well as address, phone number and student identification number.

refund

Tuition and fees that are paid back to a student who has withdrawn from a course. At CBC, the amount to be refunded depends on how many credits the student is taking and exactly when the student dropped the course(s). The refund policy is published in the catalog. Refund deadlines are published each quarter in the academic calendar.

register/registration

To enroll in a course or courses. Registration activity includes enrolling, dropping/withdrawing, making payments, etc.

requirements

Minimum standards defined by the college, for example for admission or graduation. See also prerequisite; distribution requirements; general education.

resident

For purposes of calculating a student's tuition and fees, someone who has lived in the state for a specified length of time as shown by specified types of evidence.

Richland Campus

Many of CBC's Health Sciences classes are located at facilities on Northgate Drive in Richland. See also Health Science Center and Medical Science Center. A variety of classes are offered in the RA building at 901 Northgate Drive.

scholarship

A type of financial aid. Organizations may give scholarships according to academic achievement, financial need or any other basis. Usually there is a competitive application process.

section

A specific class with its own unique days, hours, location and instructor.

A number of sections of a certain course may be offered during a quarter or semester, each with different days, times, locations and instructors but presenting the same curriculum.

self-paced

Start and complete competencies, assessments and assignments at the student's own pace. Learning is not tied to the pace of other students or due dates.

semester

Some schools organize the academic year into two main periods, fall and spring semesters, plus a shorter summer semester (compare to quarter).

senior

A student in the fourth year of a typical four-year bachelor's degree program (or one who has earned 135-180 quarter credits or 90-120 semester credits so far).

sophomore

A student in the second year of a typical four-year bachelor's degree program (or one who has earned 45-90 quarter credits or 30-60 semester credits so far).

syllabus

An outline plan for a particular class, including textbook requirements, class meeting dates, reading assignments, examination dates, the instructor's grading standards, etc.

term

A unit of time that can refer to either a quarter or a semester, depending on which system the college or university follows.

TOEFL (Test of English as a Foreign Language)

A standardized test which assesses the English language abilities of students who are not native English-speakers.

trip reduction classes

Courses scheduled in two-day and four-day time blocks to help students reduce trips to campus, saving time and reducing their carbon footprint.

transcript

An official record of the courses and quarter credits a student has taken at a college or university, the grades and degrees or certificates earned and any awards and honors received.

transfer

To move from one college or university to another and have the second institution recognize and accept some or all of the courses taken and credits earned at the first.

tuition & fees

Tuition is a student's basic payment towards the cost of instruction at a college or university. Most institutions also charge fees for laboratory equipment and materials, computer use, parking and other miscellaneous costs.

undergraduate

A student who has not yet earned a bachelor's degree; also refers to the courses and instructional programs such a student enrolls in.

upper division

The courses students are generally expected to complete during the last two years of a typical four-year bachelor's degree program.

wait list

A wait list offers students who sign up a fair and consistent method of being enrolled in a full class if openings occur.

waiver

To waive a right or a claim is to voluntarily give it up. (1) If a student meets specific criteria, the college may waive some of his or her tuition and fees (that is, some of the money owed to the college will be forgiven).

(2) If a student demonstrates certain knowledge and abilities, the college may waive a course prerequisite (that is, allow the student to take the class even though he or she hasn't completed the listed requirements for it).

WASFA (Washington Application for State Financial Aid)

The application required for undocumented individuals, who are not eligible for federal financial aid through FAFSA, to be considered for state student financial aid. The WASFA is processed free of charge and is used by most Washington state colleges and universities. A new electronic application is required for each academic year. WASFA applications are available at readysetgrad.org/WASFA.

withdrawal

The process of formally dropping a class or classes after the quarter has started.

work study

A type of financial aid earned, paying students to work part time, often on campus, during the academic year.

workshop

A type of class offered by a variety of academic departments throughout the year; many are exploratory or one time options. Most often they are zero credits.

TRANSFER

2019-2020 Degree Requirements

Department	Course Number	Course Credits	Quarter Completed	Notes (see Course Selection Worksheet for list of appropriate classes)
Communication		13 Credits		<ul style="list-style-type: none"> ENGL& 101 (5 credits required). Select either ENGL& 102 or 235 (5 credits required). Select at least 3 credits from Communication Studies courses* (refer to list on Course Selection Worksheet). *Credit not granted for both CMST 104 and CMST& 220. Credit not granted for both CMST 110 and CMST& 210.
English	101	5		
English				
Communication Studies				
Quantitative/Symbolic Reasoning		5 Credits		<ul style="list-style-type: none"> Select one class from the Quantitative Reasoning or Symbolic Reasoning courses (refer to list on Course Selection Worksheet).
Humanities		15 Credits		<ul style="list-style-type: none"> Courses must be selected from at least two of the three groups (refer to list on Course Selection Worksheet). At least one course must be selected from Group A. Only one course may be selected from Group C.
Social & Behavioral Sciences		15 Credits		<ul style="list-style-type: none"> Courses must be selected from two different subject areas (refer to list on Course Selection Worksheet).
Mathematical & Natural Science		15 Credits		<ul style="list-style-type: none"> At least 10 credits must be from Natural Science courses. Courses must be selected from two different subject areas (refer to list on Course Selection Worksheet). One course must be a laboratory science. A single Math course cannot be counted for both a Natural Science and Quantitative/Symbolic Reasoning requirement.
Health & Physical Education		3 Credits		<ul style="list-style-type: none"> Three credits of Health lecture or PE activity courses required (refer to list on Course Selection Worksheet). A maximum of three PE credits may be applied to the degree (consult with advisor about this rule).
Electives		24 Credits		<ul style="list-style-type: none"> Courses must be numbered 100 or above. A maximum of 15 credits from restricted electives may be applied. Please consult with an advisor/counselor for appropriate course selection.

NOTICE: For transferring students, 75 of the 90 credits must be fully transferable as defined by the Intercollege Relations Commission (ICRC) guidelines for the Direct Transfer Agreement to be honored by four-year institutions in Washington. A maximum of 15 elective credits may be professional/technical courses numbered 100 or above. Due to the specialized nature of many of the listed courses, students should consult their advisor and the catalog of the four-year institution to which they plan to transfer for specific degree requirements.

DISCLAIMER: During the period this guide is in circulation, there may be curriculum revisions and program changes. Students are responsible for consulting the appropriate academic unit or advisor for current and specific information. The information in this guide is subject to change and does not constitute an agreement between the College and the student.

NOTE:

- Required minimum 90 credits.
- Required minimum cumulative GPA 2.0.
- Minimum grade per course 1.0.
- At least one-third of the college-level, degree applicable credits must be taken at CBC.
- Depending on your major, some course choices may be more appropriate than others. Consult with your counselor or faculty advisor.
- Maximum three credits of PE may be applied.

Associate in Science Transfer (AS-T1) Biology/Environmental Science/Chemistry/Geology/Earth Sciences 2019-2020 Degree Requirements

Department	Course Number	Course Credits	Quarter Completed	Notes (see reverse side for list of appropriate classes)
Communication		5 Credits		
English				♦ Select either: ENGL& 101 or 102 (5 credits required).
Math		10 Credits		
				♦ Two courses at or above calculus.
				♦ Select from: MATH& 151, 152, 153, 254, MATH 243, 255
Humanities & Social/ Behavioral Sciences		15 Credits		
				♦ Complete at least one course from each of the two groups listed on the reverse side.
				♦ Courses must be selected from three different subject areas with a total of 15 credits required.
				♦ No more than 5 credits in any World Languages.
Pre Major Courses 1. Chemistry		15 Credits		
CHEM&	161			
CHEM&	162			
CHEM&	163			
Pre Major Courses 2. Math		5 Credits		
				♦ Select either: MATH& 146 or 153 (5 credits required).
Pre Major Courses 3. Science		15 Credits		
				♦ BIOL& 211, 212, 213 or
				♦ PHYS& 134/124, 135/125, 136/126 or
				♦ PHYS& 241/231, 242/232, 243/233
Pre Major Courses 4. Additional Science		10 Credits		
				♦ 10-15 credits in Physics, Geology, Organic Chemistry, Biology or Mathematics, consisting of courses normally taken for science majors (not for general education), preferably in a two- or three-quarter sequence. Refer to list on reverse side.
Electives (Program Specific Under Advisement)		10-15 Credits		
				Sufficient additional college-level credits so that total credits earned are at least 90 credits. These remaining credits may include prerequisites for major courses (e.g. pre-calculus), additional major coursework or specific general education or other university requirements, as approved by the advisor.
				**Some baccalaureate programs require physics with calculus.
				*** A single course cannot count in two areas.
				Select courses based on the requirements or the specific discipline at the baccalaureate institution you plan to attend.

NOTICE: For transferring students, 75 of the 90 credits must be fully transferable as defined by the Intercollege Relations Commission (ICRC) guidelines for the Direct Transfer Agreement to be honored by four-year institutions in Washington. A maximum of 15 elective credits may be professional/technical courses numbered 100 or above. Due to the specialized nature of many of the listed courses, students should consult their advisor and the catalog of the four-year institution to which they plan to transfer for specific degree requirements.

DISCLAIMER: During the period this guide is in circulation, there may be curriculum revisions and program changes. Students are responsible for consulting the appropriate academic unit or advisor for current and specific information. The information in this guide is subject to change and does not constitute an agreement between the College and the student.

Degree & Certificate Requirements

Associate in Science Transfer (AS-T1)

Biology/Environmental Science/Chemistry/Geology/Earth Sciences
2019-2020 Course Selection Worksheet

Communication (5 credits)

- ◆ **ENGL&** 101 or 102

Math (10 credits)

- ◆ **MATH&** 151, 152, 153, 254, **MATH** 243, 255

Humanities / Social & Behavioral Science (15 credits)

Complete at least one course from each of the following groups.
Courses must be selected from three different subjects.

Group 1:

- ◆ **ART&** 100, **ART** 116, 117, 118, 119, 120, 121
- ◆ **CMST** 221, 246
- ◆ **DRMA&** 101, **DRMA** 215
- ◆ **EFL** 101, 111
- ◆ **ENGL&** 111, 220, 236, 237, 244, 245, 246, 254, 255, 256, **ENGL** 140, 160, 180, 195, 203, 210, 257, 264, 265, 266, 275, 280
- ◆ **HIST&** 126, 127, 128
- ◆ **ICS** 120, 125, 130, 135, 222
- ◆ **MUSC&** 105, **MUSC** 116
- ◆ **PHIL&** 101, **PHIL** 106, 131, 150
- ◆ **WS** 155, 160
- ◆ World Languages numbered 121 and above (excluding conversational classes). All World Languages courses count as a single subject.

Group 2:

- ◆ **ANTH&** 100, 204, 206, 234
- ◆ **CJ&** 101
- ◆ **CMST&** 102
- ◆ **ECON&** 201, 202, **ECON** 110, 291
- ◆ **GEO** 150
- ◆ **HIST&** 146, 147, 148, **HIST** 107, 108, 110, 111, 112, 113, 115, 233
- ◆ **ICS** 220, 255
- ◆ **POLS&** 201, 202, 203, 204, **POLS** 104, 205
- ◆ **PSYC&** 100, 200, 220, **PSYC** 201, 209
- ◆ **SOC&** 101, 201, **SOC** 110, 115, 150, 220, 269
- ◆ **SSCI** 290/291

Pre Major Courses (45-50 credits)

Pre major 1 (15 credits)

- ◆ **CHEM&** 161, 162, 163

Pre major 2 (5 credits)

- ◆ **MATH&** 146 or **MATH&** 153

Pre major 3 (15 credits)

- ◆ **BIOL&** 211, 212, 213 or
- ◆ **PHYS&** 134/124, 135/125, 136/126 or
- ◆ **PHYS&** 241/231, 242/232, 243/233

Pre major 4 (10-15 credits)

10-15 quarter credits in Physics, Geology, Organic Chemistry, Biology or Mathematics, consisting of courses normally taken for Science majors (not for general education), preferably in a two- to three- quarter sequence.

Electives (Program Specific Under Advisement)

Sufficient additional college-level credits so that total credits earned are at least 90 credits. These remaining credits may include prerequisites for major courses (e.g. pre-calculus), additional major coursework or specific general education or other university requirements, as approved by the advisor.

**Some baccalaureate programs require physics with calculus.

*** A single course cannot count in two areas.

Select courses based on the requirements or the specific discipline at the baccalaureate institution you plan to attend.

The Associate in Science degree does NOT guarantee that the student has met the general education requirements at the transfer baccalaureate institution.

NOTE:

- ◆ Required minimum credits 90.
- ◆ Required minimum cumulative GPA 2.0.
- ◆ At least one-third of the college-level, degree applicable credits must be taken at CBC.
- ◆ Depending on your major, some course choices may be more appropriate than others.
- ◆ Consult with your counselor or faculty advisor.

Degree & Certificate Requirements

Associate in Arts & Sciences in Business (AA/DTA/MRP)

TRANSFER

2019-2020 Degree Requirements

Some colleges/universities have requirements for admissions to the business major that go beyond those specified below. Students can possibly meet these requirements by careful selection of distribution and additional elective courses. Students should work with a counselor or academic advisor and the catalog of the four-year institution to which they plan to transfer for further guidance specific to their goals. Early in the program, students should check with their intended transfer university/college advisor for specific admissions and business program requirements for course choices where options are listed for Humanities, Mathematical & Natural Science, Social & Behavioral Science, and electives. A cumulative college GPA of 2.0 is required. Some transfer institutions require a higher overall GPA, a higher GPA in a subset of courses, or a specific minimum grade in one or more courses. Check with your planned transfer institution for these requirements.

Communication

Course	No.	Course Title	Credits	Qtr. Completed	Comments/Substitution
ENGL&	101	English Composition I	5

Elective⁷ (Computer Science Course⁷ or other appropriate elective)

Course	No.	Course Title	Credits	Qtr. Completed	Comments/Substitution
BUS	250	Management Information Systems (recommended)	5		

Subtotal **5**

Total Credits Required **90**

¹ Second English Composition course must be equivalent to Eastern Washington University (EWU)'s English 201 Composition course.

² Students intending an international business major should consult their potential transfer institutions regarding the need for world language. Only 5 credits of world language will count for humanities credits.

³ Washington State University (WSU) business students should complete CMST& 220 which for the Business DTA/MRP will count as a humanities class.

⁴ Check with transfer institution for best selection for third social science course.

⁵ Students intending the manufacturing management major at Western Washington University (WWU) should consult WWU regarding the selection of natural science courses required for admission to that major.

⁶ EWU, Central Washington University (CWU), UW, WSU, WWU, Gonzaga, and Seattle Pacific University (SPU) students should enroll in BUS& 201. A lower division business law class is not required at Heritage, Pacific Lutheran University (PLU), SU, and Walla Walla University. International students who completed a business course specific to their home country must take a business law course at a U.S. institution in order to demonstrate proficiency in U.S. business law.

⁷ Gonzaga, Heritage, PLU, WSU, and SPU have requirements for admission to the business major that goes beyond the above specified courses. Check with other transfer institutions for best elective selection. Students can meet these extra requirements by careful selection of the elective University Course Equivalent to:

- WSU all campuses: Management Information Systems MIS 250
- Gonzaga: Management Information Systems BMIS 235
- PLU: Computer applications CSCE 120, either an equivalent course, or skills test
- WWU: Introduction to Business Computer Systems MIS 220

Students should contact their potential transfer institution(s) for advice on which general elective course to take.

Associate in Science Transfer (AS-T2) Engineering/Computer Science/Physics/Atmospheric Sciences 2019-2020 Degree Requirements

Department	Course Number	Course Credits	Quarter Completed	Notes (see reverse side for list of appropriate classes)
Communication		5 Credits		
English				♦ Select either: ENGL& 101 or 102 (5 credits required).
Math		10 Credits		
				♦ Two courses at or above calculus.
				♦ Select from: MATH& 151, 152, 153, 254, MATH 243, 255
Humanities & Social/ Behavioral Sciences		15 Credits		
				♦ Complete at least one course from each of the two groups listed on the reverse side.
				♦ Courses must be selected from three different subject areas with a total of 15 credits required.
				♦ No more than 5 credits in any World Languages.
Pre Major Courses 1. Science		5 Credits		
				Refer to the reverse side.
				♦ Any Science based on program requirements or CHEM& 161 for Engineering majors.
Pre Major Courses 2. Math		5 Credits		
				♦ Select either: MATH& 146 or 153 (5 credits required).
Pre Major Courses 3. Computer Programming Language		5 Credits		
				♦ As advised for specific discipline/institution.
Pre Major Courses 4. Physics		15 Credits		
				Select one of the following sequences:
				♦ PHYS& 134/124, 135/125, 136/126 or
				♦ PHYS& 241/231, 242/232, 243/233
Electives (Program Specific Under Advisement)		30 Credits		
				The remaining 30 quarter credits should be planned with the help of an advisor based on the requirements of the specific discipline at the baccalaureate institution the student selects to attend. For Engineering disciplines, these credits should include a design component consistent with ABET accreditation standards.
				**Some baccalaureate programs require physics with calculus.
				*** A single course cannot count in two areas.

NOTICE: For transferring students, 75 of the 90 credits must be fully transferable as defined by the Intercollege Relations Commission (ICRC) guidelines for the Direct Transfer Agreement to be honored by four-year institutions in Washington. A maximum of 15 elective credits may be professional/technical courses numbered 100 or above. Due to the specialized nature of many of the listed courses, students should consult their advisor and the catalog of the four-year institution to which they plan to transfer for specific degree requirements.

DISCLAIMER: During the period this guide is in circulation, there may be curriculum revisions and program changes. Students are responsible for consulting the appropriate academic unit or advisor for current and specific information. The information in this guide is subject to change and does not constitute an agreement between the College and the student.

Degree & Certificate Requirements

Communication (5 credits)

- ◆ ENGL& 101 or 102

Math (10 credits)

- ◆ MATH& 151, 152, 153, 254, MATH 243, 255

Humanities / Social & Behavioral Science (15 credits)

Complete at least one course from each of the following groups. Courses must be selected from three different subjects.

Group 1:

- ◆ ART& 100, ART 116, 117, 118, 119, 120, 121
- ◆ CMST 221, 246
- ◆ DRMA& 101, DRMA 215
- ◆ EFL 101, 111
- ◆ ENGL& 111, 220, 236, 237, 244, 245, 246, 254, 255, 256, ENGL 140, 160, 180, 195, 203, 210, 257, 264, 265, 266, 275, 280
- ◆ HIST& 126, 127, 128
- ◆ ICS 120, 125, 130, 135, 222
- ◆ MUSC& 105, MUSC 116
- ◆ PHIL& 101, PHIL 106, 131, 150
- ◆ WS 155, 160
- ◆ World Languages numbered 121 and above (excluding conversational classes). All World Languages courses count as a single subject.

Group 2:

- ◆ ANTH& 100, 204, 206, 234
- ◆ CJ& 101
- ◆ CMST& 102
- ◆ ECON& 201, 202, ECON 110, 291
- ◆ GEO 150
- ◆ HIST& 146, 147, 148, HIST 107, 108, 110, 111, 112, 113, 115, 233
- ◆ ICS 220, 255
- ◆ POLS& 201, 202, 203, 204, POLS 104, 205
- ◆ PSYC& 100, 200, 220, PSYC 201, 209
- ◆ SOC& 101, 201, SOC 110, 115, 150, 220, 269
- ◆ SSCI 290/291

Associate in Science Transfer (AS-T2)

Engineering/Computer Science/Physics/Atmospheric Sciences
2019-2020 Course Selection Worksheet

Pre Major Courses (45-50 credits)

Pre major 1 (15 credits)

Any Science based on program requirements *or* CHEM& 161 for Engineering majors.

Pre major 2 (5 credits)

- ◆ MATH& 146 or MATH& 153

Pre major 3 (5 credits)

As advised for specific discipline/institution.

Pre major 4 (15 credits)

- ◆ PHYS& 134/124, 135/125, 136/126 *or*
- ◆ PHYS& 241/231, 242/232, 243/233

Electives (Program Specific Under Advisement)

The remaining 30 quarter credits should be planned with the help of an advisor based on the requirements of the specific discipline at the baccalaureate institution the student selects to attend. For Engineering disciplines, these credits should include a design component consistent with ABET accreditation standards.

******Some baccalaureate programs require physics with calculus.

******* A single course cannot count in two areas.

Sequences of courses should be completed at one institution. Select courses based on the requirements or the specific discipline at the baccalaureate institution you plan to attend.

The Associate in Science degree does NOT guarantee that the student has met the general education requirements at the transfer baccalaureate institution.

NOTE:

- ◆ Required minimum credits 90.
- ◆ Required minimum cumulative GPA 2.0.
- ◆ At least one-third of the college-level, degree applicable credits must be taken at CBC.
- ◆ Depending on your major, some course choices may be more appropriate than others.
- ◆ Consult with your counselor or faculty advisor.

Note: Students apply to and enroll at Big Bend Community College for core courses.

For specific questions, contact Andrea Elliott at andreae@bigbend.edu, 509-793-2125.

Degree & Certificate Requirements

Associate in Applied Science in Multi-Occupational Trades

PROFESSIONAL TECHNICAL
2019-2020 Degree Requirements

Major Courses

1. Completion of an apprenticeship program of at least 5,200 (equivalent to 95 credit hours) OJT hours certified by JATC.
2. Completion of 450 hours (equivalent to 34 credit hours) of related training certified by JATC.

Subtotal 5650 hours/129 credits

Major Support

Select one of the following with approval from JATC:

Course	No.	Course Title	Credits	Qtr. Completed	Comments/Substitution
BUS&	101	Introduction to Business	5		
BUS	262	Management Principles	5		
CA	100	Introduction to Microcomputers	4		
SPAN&	121+	Spanish 121 or above	5		

Subtotal 4-5

General Education

Course	No.	Course Title	Credits	Qtr. Completed	Comments/Substitution

Subtotal 50

Total Credits Required 114-116

*Course selections must meet the distribution requirements for the AA degree.

It is understood an instrumental music major will complete more electives than the minimum 24 required for an AA degree. In addition to the above required coursework, it is extremely important to stay in close contact with your faculty advisor. It is possible your faculty advisor will recommend additional coursework within the Music department.

NOTE:

- Required minimum 90 credits.
- Required minimum cumulative GPA 2.0.
- Minimum grade per course 1.0.
- At least one-third of the college-level, degree applicable credits must be taken at CBC.
- Depending on your major, some course choices may be more appropriate than others. Consult with your counselor or faculty advisor.
- Maximum three credits of PE may be applied.

Subtotal 26-38

Total Credits Required 92-104

It is understood that a theatre major will acquire more credits than are transferable to complete this degree.

*Course selections must meet the distribution requirements for the AA degree.

NOTE:

- Required minimum 90 credits.
- Required minimum cumulative GPA 2.0.
- Minimum grade per course 1.0.
- At least one-third of the college-level, degree applicable credits must be taken at CBC.
- Depending on your major, some course choices may be more appropriate than others. Consult with your counselor or faculty advisor.
- Maximum three credits of PE may be applied.

Courses & Programs

Course descriptions are provided for all classes that may be offered at CBC at various times throughout the year(s). A quarterly class schedule is available in advance of each quarter to help students plan class schedules for that quarter and includes days, times, locations, and instructors for each class being offered that quarter.

Courses & Programs

Accounting

columbiabasin.edu/accounting

Department Overview: Columbia Basin College offers transfer accounting courses, a two-year occupational degree, and a one-year occupational certificate in accounting. The Accounting program is designed to provide students with knowledge in accounting, business, computers, and general education to become employed in entry-level accounting positions. The main goal of the program is to provide students with both the theory of accounting and practical experience to perform computerized accounting functions.

Knowledge of Accounting

Upon completion of the Program, students will be able to:

- Understand the fundamental principles of accounting
- Understand the regulatory environment of business

Accounting Skills

Upon completion of the Program, students will be able to:

- Apply fundamental accounting process to properly record ordinary business transactions.
- Use practical skills and knowledge to understand and prepare basic accounting and business reports for internal and external users.
- Apply accounting and/or business concepts in a variety of business situations and business structures including corporations, partnerships, and small businesses
- Apply information tools and resources within business organizations.

Communications Skills

- Upon completion of the Program, students will be able to: Demonstrate proficiency in communications skills necessary in a business environment.
- Apply accounting and/or business concepts in a variety of business situations and business structure including corporation, partnerships, and small businesses

Apply information tools and resources within business organizations

- Develop an understanding of the regulatory environment of business
- Demonstrate proficiency in communication skills necessary in a business environment

ACCT&201 (Formerly BA 251)

Principles of Accounting I • 5.0 Credits

Fundamentals of accounting as applied to actual business situations. Introduction to the accounting cycle for service and merchandising firms controlling to purchases and sales with business papers, special journals, and subsidiary ledgers.

ACCT&202 (Formerly BA 252)

Principles of Accounting II • 5.0 Credits

The theory and practice of accounting, including financial statements. Emphasis on partnership and corporate accounting. **Prerequisite:** ACCT& 201 or instructor permission.

ACCT&203 (Formerly BA 253)

Principles of Accounting III • 5.0 Credits

A continuation of ACCT& 202. Introduction of manufacturing and cost accounting. Analysis of financial statements, budgeting, and cost volume analysis. **Prerequisite:** ACCT& 202.

Administrative Office Technology

columbiabasin.edu/aot

Department Overview: Administrative Office Technology (AOT) provides students with coursework to support positions in various and often specialized types of office environments.

AOT 117 (Formerly AOT 1170)

Office Orientation • 4.0 Credits

This class encompasses business ethics, personal values, human relations, and effective communication in an office environment. This course focuses on attaining and retaining entry-level employment.

AOT 142 (Formerly AOT 1420)

General Office Procedures • 5.0 Credits

This class bridges the gap between the classroom and the office by prioritizing work and managing time, preparing realistic office assignments, filing office documents; managing personal information (PIM software); and conducting online research. **Prerequisite:** concurrent enrollment in AOT 117 or instructor permission.

AOT 156 (Formerly AOT 1952)

Supervised Employment • 2.0 Credits

This is a supervised work experience involving the application and practice of skills and principles learned in the classroom. The student will be placed with an employer where the environment will build on the student's area of career interest and prepare them to be productive employees. **Prerequisite:** AOT 117 and 142, or instructor permission.

AOT 172

Word Processing I • 4.0 Credits

This class develops employable word processing skills and implements effective application in a business environment using word processing software, currently Microsoft Word. Topics covered include all major functions of Word, including margins, tabs, tables, columns, document enhancement, graphics, styles, outline, tables of contents, and templates.

Adult Basic Education

columbiabasin.edu/abe

Department Overview: Adult Basic Education (ABE) consists of three main areas of focus: GED® test preparation, High School 21+ coursework, and ABE classes. These classes serve the adult community and are available at the Transition Center on the Pasco campus.

We offer classes in reading, writing, math, and content areas. Each student is assessed for reading, writing, and math levels and placed into an appropriately leveled class environment.

Our courses serve the needs of adult students seeking a high school equivalency degree and preparing for college coursework. GED® is a registered trademark of the American Council on Education (ACE) and administered exclusively by GED® Testing Service LLC under license. This material [or content] is not endorsed or approved by ACE or GED® Testing Service.

ABE 009

LOC Ed Interviewing • 1.0 - 3.0 Credits

The purpose of this course is to improve learner retention, persistence, and performance through research-proven goal setting, problem-solving, and evaluation, intervention, and self-awareness strategies.

Courses & Programs

ABE 010

ABE Level 1 • 1.0 - 15.0 Credits

Math instruction in adding and subtracting of simple whole numbers. Reading instruction in phonics, language patterns, and using context to understand written material. Writing instruction for basic survival needs and for personal communication.

ABE 020

ABE Level 2 • 1.0 - 15.0 Credits

Math instruction in place value, whole number operations, and problem-solving. Reading instruction in phonics, language patterns, and using context to understand written material. Writing instruction for basic survival needs and for personal communication.

ABE 030

ABE Level 3 • 1.0 - 15.0 Credits

Math instruction in decimals, fractions, and problem-solving. Reading instruction in word meanings, structure in word meanings, structure of paragraphs, identification of main idea, distinguishing between fact and opinion and comprehension strategies for a variety of reading materials. Writing instruction in sentence composition and paragraph construction.

ABE 040

ABE Level 4 • 1.0 - 15.0 Credits

Math instruction in percent, ratio, proportion, measurement, tables, and graphs. Reading instruction in organization and main idea, as well as in evaluation, comprehension, and making inferences using a variety of intermediate level reading materials. Writing instruction in writing connected paragraphs with correct punctuation, capitalization usage, spelling, and more complex sentence structure.

ABE 050

Basic GED(R) Prep • 1.0 - 15.0 Credits

Individualized instruction to prepare students to pass the four official GED® tests with a total score of 600 points or better. The GED® test consists of a battery of four individual tests. The four tests include Language arts-writing, Science, Social Studies, Mathematical Reasoning, and Reasoning Through Language Arts.

ABE 060

Advanced GED(R) Prep • 1.0 - 15.0 Credits

Individual instruction to enable students to successfully complete all four of the GED® tests. Students may already have completed two of the tests and need to pass the two remaining tests. Or the student could have passed all four GED® tests but needs to accumulate more points to reach the necessary total score of 600 points.

ABE 070

GED(R) Math • 1.0 - 5.0 Credits

Individualized instruction to prepare students to pass the official Mathematics Reasoning GED® tests.

ABE 090

I-Best Studies • 1.0 - 10.0 Credits

This course integrates Washington Adult Basic Education ABE level 5 and 6 reading, writing, math, and listening standards and indicators with a college-level course. Example: Child Development Associate certificate, Nursing Assistant Certified, or Phlebotomy.

Agricultural Food Systems

columbiabasin.edu/afs

Department Overview: Agri-Food Systems give you a broad, interdisciplinary understanding of agriculture systems and allow you to develop specialized knowledge of business management in agriculture and related areas. The program prepares not only aspiring growers of crops, but also students who are interested in related industries, such as global marketing, direct marketing, or food production to contribute to the changing field of agriculture.

AFS 101

Introduction to Agricultural Systems • 5.0 Credits

Introduction to the disciplines, history, philosophy, theory, and integration of fields of agriculture, food production, manufacturing and distribution, and rural society to define and solve real-world problems. Provides an increased awareness of emerging agriculture in the Columbia Basin including crop management, sustainable agriculture, niche and specialty markets, organic crop and animal production, water management, global issues, technology innovations, financial management, global issues, technology innovations, financial management, bioterrorism, crop insurance programs, emerging commodities, biotechnology, and crop innovations.

AFS 199

Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

AFS 201

Agricultural & Food Systems w/ Lab • 5.0 Credits

Introduction to the development of tools and skills in building, evaluating, and applying systems in agricultural production, food manufacturing and distribution, rural society, and society as a whole. Focus is on the types of systems, construction, and analysis including the history, philosophy, and theory of different agricultural systems. **Recommended prerequisite:** AFS 101.

Agriculture

columbiabasin.edu/agriculture

Department Overview: Agriculture is the science of the food and fiber industry. Courses are designed to provide the student with a deeper understanding of the foundational science of modern agriculture. Students will develop their ability to think critically and communicate through both spoken and written media. See also Biology, Horticulture, Agricultural Food Systems and Animal Science for courses required to earn an Associate in Arts and Sciences with an emphasis in Agriculture, an Associate in Arts and Sciences with an emphasis in Crop and Soil Science and an Associate in Applied Science in Agribusiness.

A Bachelor of Applied Science (BAS) in Applied Management with a concentration in Agriculture is also available. The BAS degree is designed for those who have earned an Associate in Applied Science (AAS) degree but lack the broader business-related education needed to move into leadership positions. Many AAS holders have reached a plateau in their career, unable to advance because they cannot meet the bachelor's degree requirements for many supervisory positions. Recent two-year graduates who wish to continue their education may also find this degree a good alternative. The BAS degree will broaden career opportunities and help graduates climb the career ladder leading to improved chances for promotion to management positions. The Agriculture concentration focuses on management strategies and technologies specific to the agriculture industry.

AG 102

Introduction to Animal Science w/ Lab • 5.0 Credits

Introductory Animal Science including the history, philosophy, and theory of animal husbandry. Types and breeds of livestock, terminology, methods, management systems, techniques of animal and poultry production, and consumer impact are discussed.

Courses & Programs

AG 106

Introductory Soils • 0.0 Credits

A general background and understanding of soils, soil formation processes, soil origins with an emphasis on soil origins in the Pacific Northwest, soil taxonomy, organic matter, soil fertility, water relationships, pH, and biological relationships.

AG 199

Special Studies • 1.0 - 20.0 Credits

A class used to explore new coursework.

AG 201

Soils w/ Lab • 5.0 Credits

A general background and understanding of soils, soil formation processes, soil origins with an emphasis on soil origins in the Pacific Northwest, soil taxonomy, organic matter, water relationships, pH, and biological relationships.

Prerequisite: CHEM& 110 or CHEM& 140 or instructor permission. This course is cross-listed with BIOL 201. Students completing AG 201 may not receive graduation credit for BIOL 201.

AG 210

Applied Agriculture Research • 2.0 Credits

In the lab, students are directly involved in conducting agricultural research as a member of a research team led by a faculty member. Students have the opportunity to collect and analyze agricultural and environmental data that will be used to make management decisions. Upon completion of this course, students prepare a research paper summarizing their results and present this paper at a scientific meeting or seminar. The lab provides an opportunity for students to be directly involved in a research project.

AG 252

Insects of Economic Importance w/ Lab • 5.0 Credits

A study designed to introduce students to the breadth and diversity of the science of entomology and an in-depth study of insects including: their diversity; the basics of systematic entomology; insect societies; insect physiology and structures; their ecological relationships with their physical and biotic environments; their population and community level ecology; their effects on human welfare through applied disciplines of medical and agricultural entomology; and the methods by which humans attempt to manage insect populations. **This course is cross-listed with BIOL 252. Students completing AG 252 may not receive graduation credit for BIOL 252.**

AG 289

Agriculture Business Concepts • 5.0 Credits

Designed to address issues pertinent to the agricultural community including global competition for markets, water rights and the environment, agricultural co-ops, immigration, foreign trade, fiscal policy, and working with government agencies. It is intended as a capstone course to bring together several concepts related to agriculture business. **Prerequisite:** BUS& 101 and AFS 101.

AG 299

Special Studies • 1.0 - 20.0 Credits

A class used to explore new coursework.

AG 310

Ag Operations and Supply Chain Management • 5.0 Credits

This course is an introduction to agriculture operations and supply chain management. Fundamental topics include supply chain characteristics specific to agriculture, vertical integration, and import and export markets. This course also helps students develop an understanding of the ethical implications of decision-making in business as well as build an appreciation for the value of diverse thinking and perspectives. **Prerequisite:** meets the criteria for acceptance into a BAS/BSN program, completion of a two-year degree or equivalent, or instructor approval.

AG 340

Ag Information Technology and Applications • 5.0 Credits

This course encompasses technology innovation and strategy for managers and entrepreneurs including understanding technological change, innovations, and strategies specific to agriculture. Topics include technology evolution, adoption, competitive advantage, costs and benefits, and collaborative strategies such as GIS and GPS, crop modeling, and more. Each student develops and presents a technology plan for a company or business as a final project. **Prerequisite:** meets the criteria for acceptance into a BAS/BSN program, completion of a two-year degree or equivalent, or instructor approval.

AG 430

Fundamentals of Agriculture Financial Management • 5.0 Credits

This course covers basic financial tools and principles including short-term and long-term financial and investment decisions. Topics include financial statement analysis, the time value of money, capital budgeting and capital rationing, the cost of capital, dividend policies, analysis of risk and return, business valuation, and working capital management. Students also learn financial management practices specific to agriculture including enterprise budgeting, depreciation schedules for farm operations, and production efficiency indicators. **Prerequisite:** meets the criteria for acceptance into a BAS/BSN program, completion of a two-year degree or equivalent, or instructor approval, and AMGT 400.

AG 470

Agriculture Management Internship • 1.0 - 10.0 Credits

This course is designed to provide students with major-related, supervised, evaluated practical training work experiences which may be paid or voluntary. Students are graded on the basis of documented learning acquired through hands-on new experiences in an actual work setting. This course is cross listed with AGMT 470. Students completing AG 470 may not receive graduation credit for AGMT 470. **Prerequisite:** meets the criteria for acceptance into a BAS/BSN program, completion of a two-year degree or equivalent, or instructor approval, and AMGT 400.

AG 480

Agriculture Management Capstone • 5.0 Credits

This course provides the opportunity for students to demonstrate that they have learned the material and concepts from the program and can apply it in the real world. Students complete a comprehensive analysis of an on-going business that is part of the agriculture sector of the economy. Students also develop a long range, strategic plan including implementation and recommendations for change. This course is cross listed with AGMT 480. Students completing AG 480 may not receive graduation credit for AGMT 480. **Prerequisite:** completion of all BAS core courses or instructor approval.

Anthropology

columbiabasin.edu/anthropology

Department Overview: The department features introductory courses in Anthropology designed to acquaint students with the study of humans, their natural history, their present day variation and their cultural development. Students are expected to develop an understanding of human biological and sociocultural evolution through research, critical thinking and writing.

ANTH 197 (Formerly ANTH 1972)

Field Experience • 1.0 - 3.0 Credits

A lab class which incorporates methods and techniques used in excavating archaeological and paleontological sites. Students are able to participate on an excavation site dealing with the Ice Age Floods and a mammoth.

ANTH 199

Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

Courses & Programs

ANTH 214

Biological Anthropology Lab [M/S] • 1.0 Credit

Biological Anthropology focuses on the use of empirical evidence to place humans in perspective within our historical and biological world. The Biological Anthropology laboratory is designed to allow students, through examples and hands-on exercises, to understand the evolutionary processes that have produced modern humans. This course is designed to complement the Biological Anthropology course (ANTH& 205). **Prerequisite:** have taken or concurrently taking ANTH& 205.

ANTH 299

Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

ANTH&100 (Formerly ANT 101)

Survey of Anthropology [S/B] • 5.0 Credits

The field of anthropology is the scientific study of people from all periods of time and in all areas of the world. Anthropology, as a discipline, focuses on both the biological and cultural characteristics of our species (*Homo sapiens*). In this course, students explore this discipline by looking at how each of the major branches of anthropology attempts to answer the basic question: What does it mean to be human?

ANTH&204 (Formerly ANT 130)

Archaeology [S/B] • 5.0 Credits

Archaeology is the study of the cultural past of humankind and ANTH& 204 provides an introduction to the field of anthropological archaeology. In this course, students examine the major concepts, theories, and methods of anthropological archaeology that contribute to an understanding of the human past. This course also includes surveys of past cultures from the Americas, Africa, Asia, and Europe.

ANTH&205 (Formerly ANT 111)

Biological Anthropology [M/S] • 5.0 Credits

Physical Anthropology is the study of human beings from an evolutionary and biological perspective and ANTH& 205 provides an introduction to this sub-field of anthropology. In this course, students examine our own species (*Homo sapiens*) by looking at the biological basis of life, the processes of evolution, our primate relatives both living and extinct, and the variation seen in modern human populations.

ANTH&206 (Formerly ANT 120)

Cultural Anthropology [S/B] • 5.0 Credits

Cultural Anthropology is the branch of anthropology that studies the species *Homo sapiens* from a cultural perspective. This course examines and attempts to explain the diversity and similarity of cultures and peoples throughout the world.

ANTH&234 (Formerly ANT 128)

Religion & Culture [S/B] • 5.0 Credits

The cross-cultural study of the relationship between humans and the supernatural world. Unlike other religious studies scholars, anthropologists are more concerned about the relationship and interconnections between people's religious traditions and beliefs, and other aspects of society. The objective of this course is familiarizing students with certain aspects that are common to many of the world's religions. This course explores and analyzes the meaning of myth systems, the importance and meaning of religious symbols, rituals, religious specialists, how different societies organize supernatural powers and entities, and then finally a quick survey of the world's religions. We will do this in order to come to appreciate the significance all religions hold for the people who follow them, and develop a broad definition of religion that enables us to examine myriad systems of belief on equal terms.

Applied Management

columbiabasin.edu/bas

Department Overview: Applied Management (AMGT) is a course prefix designated for upper level (300-400) courses.

The core purpose of the Bachelor of Applied Science in Applied Management (BAS-AM) is to increase the academic credentials of its student population in the field of management and related studies in order to benefit the community served by the institution. The BAS-AM degree seeks to accomplish this mission by imparting curricula that is relevant, up-to-date, focused, and applicable. Additionally, it offers flexible concentrations in general management, healthcare administration (HCAD) and Agribusiness (AG).

Student success is supported by ensuring effective content, materials, activities/assignments, and learning outcomes are routinely assessed and align with the demands of the careers of the present and future. It is the hope that students who successfully complete the BAS-AM program will possess greater opportunities for career and academic advancement after graduation.

The BAS-AM program supports the college mission of successful credential completion by providing an avenue for students of varying academic backgrounds (i.e., through the prior completion of a two-year degree in any field) to complete a Bachelor's degree in a generalizable field of study (i.e., Management). As a Bachelor's degree is often the cost of entry to certain positions in a variety of fields, this particular program provides a valuable opportunity for students to expand their career arcs through promotion and/or new job placements.

As the discipline of management significantly involves collaboration, understanding and utilizing diverse skill sets, and a broad level of engagement between people, the program supports the college outcomes of diversity, equity, and inclusion. Furthermore, as the program is constantly focused on addressing modern local, regional, national, and global needs, the concepts of sustainability, emotional wellbeing, and ethics are embedded in every aspect of the curriculum.

The Program Learning Outcomes for the AMGT program are as follows:

1. Analyze and apply managerial functions, roles, styles, and effective strategies for stability and change, to be used in various managerial and leadership situations
2. Analyze workplace scenarios to show how careful attention to members of a diverse population can result in significant competitive advantages
3. Develop and demonstrate an understanding of the four primary resources of management (human, capital, informational, and material)
4. Apply the four primary functions of management (planning, organizing, leading, and controlling) through a variety of situations
5. Demonstrate critical operations, tactical, and strategic managerial thoughts in a variety of scenarios

AMGT 300

Management & Organization Theory • 5.0 Credits

This is a survey course in the fundamental principles of management and organization. The course covers the various roles of the manager and the basic managerial functions. It also looks at the fundamentals of organizations from a macro (overall) perspective. The final project is a comprehensive analysis of a real organization (profit or non-profit). Class must be passed with a 2.0 or better to count for BAS-Applied Management degree. **Prerequisite:** meets the criteria for acceptance into a BAS/BSN program, completion of a two-year degree or equivalent, or instructor approval.

AMGT 310

Operations Management • 5.0 Credits

This course helps students understand the role of operations management in an organization. Students will understand how the operations function transforms inputs to outputs in an efficient manner. The course covers the role of the operations manager in the design, implementation, and control of the organization's transformation processes, as well as the key role that issues of quality play in those processes. As a final project, each student applies techniques of operations management to a real business problem. Class must be passed with a 2.0 or better to count for BAS-Applied Management degree. **Prerequisite:** meets the criteria for acceptance into a BAS/BSN program, completion of a two-year degree or equivalent, or instructor approval.

Courses & Programs

AMGT 317

BAS Special Topics • 1.0 - 5.0 Credits

An opportunity to participate in a class dealing with special topics related to applied management that are not covered in depth in the existing curriculum. Topics chosen relate to emerging issues in management/business or topics of regional interest within the management/business arena. Class must be passed with a 2.0 or better to count for BAS-Applied Management degree. **Prerequisite:** meets the criteria for acceptance into a BAS/BSN program, completion of a two-year degree or equivalent, or instructor approval.

AMGT 320

Leadership & Organization Behavior • 5.0 Credits

This course examines the theory and practice of leadership and organization behavior as it relates to all types of organizations. The course looks at the organization from the micro perspective of groups and teams. The final project requires each student to conduct a complete analysis of their own leadership style and philosophy, and how their leadership style could impact their organization and its members. Class must be passed with a 2.0 or better to count for BAS-Applied Management degree. **Prerequisite:** meets the criteria for acceptance into a BAS/BSN program, completion of a two-year degree or equivalent, or instructor approval.

AMGT 330

Legal Issues for Business & Managers • 5.0 Credits

This course explores the state and federal laws that affect management behavior and organizational practices including contracts, business organizations, employment law, products liability, safety issues, and environmental regulation. This course pays special attention to issues surrounding business start-up and intellectual property. Each student develops a portfolio/notebook of topics related to their career choice. Class must be passed with a 2.0 or better to count for BAS-Applied Management degree. **Prerequisite:** meets the criteria for acceptance into a BAS/BSN program, completion of a two-year degree or equivalent, or instructor approval.

AMGT 340

Information Technology and Applications • 5.0 Credits

This course encompasses technology innovation and strategy for managers and entrepreneurs including understanding technological change, innovations, and strategy. Topics include: technology evolution, adoption, competitive advantage, costs and benefits, and collaborative strategies including Web 2.0. Each student develops and presents a technology plan, using software, for a company or business as a final project. Class must be passed with a 2.0 or better to count for BAS-Applied Management degree. **Prerequisite:** meets the criteria for acceptance into a BAS/BSN program, completion of a two-year degree or equivalent, or instructor approval.

AMGT 350

Marketing for Managers • 5.0 Credits

This course helps develop the marketing knowledge and skills necessary for the successful manager of a profit or not-for-profit organization, including business start-ups. Topics include understanding marketing concepts, including the development of and the execution of a marketing strategy. The course focuses on niche, business-to-business and business-to-government marketing as well as the marketing of services. The final project is to develop a marketing plan. Class must be passed with a 2.0 or better to count for BAS-Applied Management degree. **Prerequisite:** meets the criteria for acceptance into a BAS/BSN program, completion of a two-year degree or equivalent, or instructor approval.

AMGT 360

Business Planning and Strategy • 5.0 Credits

This course provides the fundamentals of strategic planning and business strategy for practicing managers. Topics include the nature and importance of formal planning, strategy formulation and implementation. The final project is completion of a strategic plan for a real organization/business. Class must be passed with a 2.0 or better to count for BAS-Applied Management degree. **Prerequisite:** meets the criteria for acceptance into a BAS/BSN program, completion of a two-year degree or equivalent, or instructor approval.

AMGT 389

BAS Independent Study • 1.0 - 5.0 Credits

A class designed to explore a specific topic of special interest. Students are required to work 55 hours to earn one credit hour. Class must be passed with a 2.0 or better to count for BAS-Applied Management degree. **Prerequisite:** meets the criteria for acceptance into a BAS/BSN program, completion of a two-year degree or equivalent, or instructor approval.

AMGT 400

Financial and Managerial Accounting • 5.0 Credits

This course covers accounting theory, application, and language, with an emphasis from a manager's perspective. Topics include: balance sheets, income statements, and statements of cash flows, financial statement analysis, cost behavior, and capital budgeting. Each student completes an accounting project designed to integrate course topics into a business project. Class must be passed with a 2.0 or better to count for BAS-Applied Management degree. **Prerequisite:** meets the criteria for acceptance into a BAS/BSN program, completion of a two-year degree or equivalent, or instructor approval.

AMGT 417

BAS Special Topics • 1.0 - 5.0 Credits

An opportunity to participate in a class dealing with special topics related to applied management that are not covered in depth in the existing curriculum. Topics chosen relate to emerging issues in management/business or topics of regional interest within the management/business arena. Class must be passed with a 2.0 or better to count for BAS-Applied Management degree. **Prerequisite:** meets the criteria for acceptance into a BAS/BSN program, completion of a two-year degree or equivalent, or instructor approval.

AMGT 420

Human Resource Management • 5.0 Credits

This course examines the major trends in human resources management, including problems and issues faced by organizations and individuals in times of change. Students learn the responsibilities of the human resources department and the roles that that every manager plays, both as a supervisor and as a client of the human resources department. Each student selects a class topic and plans how to apply that to a business/company project. Class must be passed with a 2.0 or better to count for BAS-Applied Management degree. **Prerequisite:** meets the criteria for acceptance into a BAS/BSN program, completion of a two-year degree or equivalent, or instructor approval.

AMGT 430

Fundamentals of Financial Management • 5.0 Credits

This course covers basic financial tools and principles including short-term and long-term financial and investment decisions. Topics include: financial statement analysis, the time value of money, capital budgeting, the cost of capital, dividend policies, and working capital. A final project is to apply course concepts to a business related to their career choice. Class must be passed with a 2.0 or better to count for BAS-Applied Management degree. **Prerequisite:** AMGT 400 with a minimum grade of 2.0 or ACCT& 203 with a minimum grade of 2.0 and meets the criteria for acceptance into a BAS/BSN program, completion of a two-year degree or equivalent, or instructor approval.

AMGT 470

BAS Internship • 1.0 - 5.0 Credits

This course is designed to provide students with major-related, supervised, evaluated practical training work experiences which may be paid or voluntary. Students are graded on the basis of documented learning acquired through hands-on new experiences in an actual work setting. **Prerequisite:** meets the criteria for acceptance into a BAS/BSN program, completion of a two-year degree or equivalent, or instructor approval.

Courses & Programs

AMGT 480

Business Strategy Capstone • 5.0 Credits

This course provides the opportunity for students to demonstrate that they have learned the material and concepts from the program and can apply it in the real world. It provides students the opportunity to do a comprehensive analysis of an on-going business and develop a long range, strategic plan including implementation and recommendations for change. Class must be passed with a 2.0 or better to count for BAS-Applied Management degree. **Prerequisite:** AMGT 300, 310, 320, 330, and 400. **Additionally, you must have taken or be concurrently taking AMGT 340, 360, and 430. All prerequisites must be passed with a 2.0 or better.**

AMGT 489

BAS Independent Study • 1.0 - 5.0 Credits

A class designed to explore a specific topic of special interest. Students are required to work 55 hours to earn one credit hour. Class must be passed with a 2.0 or better to count for BAS-Applied Management degree. **Prerequisite:** meets the criteria for acceptance into a BAS/BSN program, completion of a two-year degree or equivalent, or instructor approval.

AMGT 490

Small Business Start-up Capstone • 5.0 Credits

This course is designed to examine strategies for effectively embarking on new business ventures and focuses on the many phases of entrepreneurship. Students begin thinking about and planning a new business start-up from the first day of class. Included is business plan writing using software such as BizBuilder. Students have access to worksheets, templates, and example plans to assist in their planning. The final project is an individually prepared, professionally written business plan. Class must be passed with a 2.0 or better to count for BAS-Applied Management degree. **Prerequisite:** AMGT 300, 310, 320, 330, and 400. **Additionally, you must have taken or be concurrently taking AMGT 340, 360, and 430. All prerequisites must be passed with a 2.0 or better.**

Apprenticeships

columbiabasin.edu/apprenticeships

Department Overview: Apprenticeships provide ways to acquire the experience and training needed to get established in a career in the trades. CBC, in conjunction with labor unions, offers nine registered apprenticeship programs. Upon completion of a prescribed program of technical classes and on-the-job training, through the labor union, the worker receives a completion certificate which can be applied towards an AAS in Multi-Occupational Trades.

Arabic

columbiabasin.edu/arabic

Department Overview: Our Arabic classes offer student-centered instruction that focuses on communicating effectively in Arabic, appreciating the culture of Arab countries of the Middle East and Northern Africa and recognizing linguistic and cultural connections between Arabic-speaking parts of the world and the United States.

ARAB 121

Arabic I [H] • 5.0 Credits

Introduction to the modern, standard Arabic language including conversational skills, reading, writing and grammar, and the culture of Arab countries of the Middle East and Northern Africa including geography, customs, daily life, and heritage. Designed for the novice learner of Arabic, with little or no proficiency in the Arabic language. **Recommended prerequisite:** successful completion of at least ENGL 099.

ARAB 122

Arabic II [H] • 5.0 Credits

Introduction to the modern, standard Arabic language including conversational skills, reading, writing and grammar, and the culture of Arab countries of the Middle East and Northern Africa including geography, customs, daily life, and heritage. **Prerequisite:** ARAB 121 or instructor permission.

ARAB 123

Arabic III [H] • 5.0 Credits

Introduction to the modern, standard Arabic language including conversational skills, reading, writing and grammar, and the culture of Arab countries of the Middle East and Northern Africa including geography, customs, daily life, and heritage. **Prerequisite:** ARAB 122 or instructor permission.

Art, Visual

columbiabasin.edu/art

Department Overview: The Art department offers a wide range of learning opportunities so students can:

- Satisfy degree requirements
- Transfer to four-year colleges or universities
- Develop professionally
- Find personal enrichment
- Enhance their appreciation of the visual arts

The Visual Arts curriculum is designed to prepare artists, arts educators and non-art majors with a foundation of skills for further growth in the field of art. We also provide educational opportunities for local artists to work with MFA art instructors for further development of their own work by experiencing new approaches to art making.

The level I and level II studio art courses place emphasis on the development of skills in material usage, design concepts and the formal and thematic aspects of art. The art appreciation and the survey art history courses provide understanding of the various themes in art, historical and cultural perspectives, art language and terminology. Students will experience the formal and conceptual analysis of works of art through written and verbal communication.

For art majors, the CBC art curriculum affords an opportunity to build a portfolio of work in a variety of media and disciplines. It is recommended for students preparing for transfer into programs in the fine arts, art education, art history, digital art/graphic design, architecture, illustration or other commercial art areas, museum studies, or arts management.

ART 111

2D Design • 5.0 Credits

Introduction to the formal elements and principles of design common to all two-dimensional media. Students examine the formal elements of line, shape, form, space, pattern, texture, and color and applies the principles of unity and variety, balance, focus, repetition, rhythm, movement, and proportion. Students are introduced to spatial and ordering strategies through a sequence of design and color theory problems which emphasize creative problem-solving using a variety of media and techniques. Recommended for all art, design, photography, and architecture students, and for anyone with a general interest in art.

Courses & Programs

ART 112 (Formerly ART 1121)

3D Design • 5.0 Credits

This course of study is an introduction to the visual and tactile elements and principles that relate to three-dimensional forms in space. Students have the opportunity to work with various materials to create three-dimensional forms in space. Students execute various aesthetic design problems that focus on arriving at a better understanding of a three-dimensional dialogue, applicable to sculpture, architecture, and ceramics, and provides a better understanding of three-dimensionality related to digital art and design.

ART 113 (Formerly ART 1131)

Drawing I • 3.0 Credits

A basic studio course that focuses on the fundamental skills: observation, composition, development of forms, and personal expression. Surveys a wide range of media and techniques and examines master works of drawing.

ART 114 (Formerly ART 1141)

Drawing II • 3.0 Credits

A continuation of ART 113 with emphasis on individual direction, composition, color, expanded technique, and media experiences. **Prerequisite:** ART 113 or instructor permission.

ART 115 (Formerly ART 1151)

Life Drawing • 3.0 Credits

A continuation of ART 114 with emphasis on human figures and the rendering of the human face; includes structural anatomy, proportion, composition, and abstraction of these subjects for purposes of individual expression. **Recommended prerequisite:** ART 113 or instructor permission.

ART 116

Art History Ancient World [H] • 5.0 Credits

A comparative study of architecture, sculpture, and pictorial arts from the ancient cultures of the world. A chronological survey of prehistoric, Mesopotamian, Egyptian, Greek, Roman, Byzantine, and Islamic arts.

ART 117

Art History Medieval-Baroque [H] • 5.0 Credits

A study of architecture, painting, and sculpture from the Middle Ages through the Gothic, Renaissance, and Baroque. Comparative studies of cross cultural traditions.

ART 118

Art History Modern Times [H] • 5.0 Credits

A chronological study of architecture, sculpture, painting, printmaking, photography, and the design arts from Romanticism to the present.

ART 119

Art History of Asia [H] • 5.0 Credits

A survey of painting, sculpture, ceramics, and architecture of India, China, Southeast Asia, and Japan with emphasis on the political, philosophical, and religious courses that shape Far Eastern art.

ART 120

Art History of the Americas [H] • 5.0 Credits

Survey of pre-Colombian art in North and South America; North American and Latin American colonial arts; modern and contemporary Latin American and Native American art and their contributions to contemporary culture.

ART 198 (Formerly ART 1991)

Special Studies • 1.0 - 15.0 Credits

An experimental class to be used to explore new approaches and applications to studio art.

ART 199

Special Studies • 1.0 - 15.0 Credits

An experimental class to be used to explore new approaches and applications to art theory.

ART 201 (Formerly ART 2011)

Photography I • 1.0 - 3.0 Credits

This course introduces students to the foundations of photography/digital photography and photographic composition through various assignments, case studies, and a final project. Students are introduced to fundamental camera controls and tools used to manipulate or enhance photographic images from image-capture to print. Emphasis is placed on how photography functions as an interpretive medium. Student supplies digital camera and materials. **Recommended prerequisite:** ART 111.

ART 202 (Formerly ART 2021)

Photography II • 1.0 - 3.0 Credits

This course further develops the advanced student's technical and interpretive understanding of digital photography. Students choose a photographic topic early in the quarter to investigate and build upon for the remainder of the course. Emphasis is placed on research of historic and contemporary trends, discussion of personal direction, and constructing a photographic portfolio. Student supplies digital camera and materials. **Recommended prerequisite:** ART 111 and 201.

ART 209

Digital Art and Design • 5.0 Credits

An introduction to the use of digital media in art. This course acquaints students with the fundamentals of using the Creative Suite program that includes Adobe Photoshop, Illustrator, and InDesign. These computer programs are used for creating graphic design layouts, working with digital imagery, or creating your own unique digitally-based works of art. **Recommended prerequisite:** ART 111.

ART 211

Graphic Design I • 5.0 Credits

An introductory class in the theory and application of layout, typography, color, and image as it is used in today's advertising and industrial graphics. The course covers the fundamentals of graphic design with an emphasis on creative problem solving through traditional and digital techniques using industry-accepted software. <Recommended prerequisite: ART 111, 113, and 209.

ART 212

Graphic Design II • 5.0 Credits

An intermediate class that expands on the use of theory and refined application of layout, typography, color, and image as it is used in today's advertising and industrial graphics. The course objective is to develop greater proficiency in graphic design processes and skills to achieve creative solutions through traditional and digital techniques using industry-accepted software. **Prerequisite:** ART 211.

ART 213 (Formerly ART 2131)

Printmaking I • 1.0 - 3.0 Credits

A study of traditional and contemporary printmaking techniques with emphasis on technical exposure and its effect on drawing and graphic design. Contains problems in relief, intaglio, and serigraphy (silk screen). Recommended for commercial and graphic art majors.

ART 214 (Formerly ART 2141)

Printmaking II • 1.0 - 3.0 Credits

A continuation of ART 213 with special emphasis on one of the following: Intaglio, the collagraph screen printing, or lithography. **Prerequisite:** ART 213.

ART 215 (Formerly ART 2151)

Painting I • 1.0 - 3.0 Credits

An introduction to techniques of painting in oil or acrylic; preparation of wood, canvas, and paper supports; color mixing and application methods. Traditional and experimental approaches to subject matter, composition, and expression.

Courses & Programs

ART 216 (Formerly ART 2161)

Painting II • 1.0 - 3.0 Credits

Continuation of ART 215 with greater emphasis on individual development of subject matter, technique, and personal expression. Oil, acrylic, or mixed media. **Prerequisite:** ART 215.

ART 217 (Formerly ART 2171)

Watercolor I • 1.0 - 3.0 Credits

An introduction to traditional watercolor painting with media explorations of transparent and opaque media. Recommended for fine arts, illustration, and graphic art majors.

ART 218 (Formerly ART 2181)

Watercolor II • 1.0 - 3.0 Credits

A continuation of ART 217 with emphasis on contemporary composition and illustrative techniques. Recommended for fine arts, illustration, and graphic art majors. **Prerequisite:** ART 217.

ART 220 (Formerly ART 2201)

Sculpture I • 1.0 - 3.0 Credits

A study of three-dimensional form with emphasis on the inter-relationships between space and form through the techniques of modeling, mold-making, and casting. **Recommended prerequisite:** ART 111 and 112.

ART 221 (Formerly ART 2211)

Sculpture II • 1.0 - 3.0 Credits

A continuation of ART 220 with emphasis on the techniques of casting, construction, and carving. **Prerequisite:** ART 220.

ART 222 (Formerly ART 2221)

Ceramics I • 1.0 - 3.0 Credits

A basic introduction to ceramic forms with emphasis on production by hand methods. Consideration of the nature and possibilities of clay, clay body formulation, and introductory glaze testing, as well as loading and firing procedures for bisque and glaze kilns.

ART 223 (Formerly ART 2231)

Ceramics II • 1.0 - 3.0 Credits

A continuation of ART 222 with special emphasis on wheel technique, glaze formulation, and design of clay forms. **Prerequisite:** ART 222.

ART 224 (Formerly ART 2241)

Ceramic Sculpture • 1.0 - 3.0 Credits

A studio course designed to focus on using clay as a sculptural medium. Students develop projects that explore either large scale slab construction, large scale coiling, building effective armatures and supports, and working solid. Other fabricating processes such as mold-making for slip-casting and using forms made on the potter's wheel for sculptural construction are introduced. Students also apply various glazing techniques and firing processes that are appropriate to their sculptural work.

ART 225 (Formerly ART 2251)

Metals I • 1.0 - 3.0 Credits

An introduction to the broad range of materials, techniques, and formats characteristic of metal art and jewelry. **Recommended prerequisite:** ART 111.

ART 226 (Formerly ART 2261)

Metals II • 1.0 - 3.0 Credits

A continuation of ART 225 with emphasis on advanced fabrication techniques, casting, and contemporary metal art and jewelry design. This course explores form as a means of expression for both functional and nonfunctional work. It is designed to develop skill, craftsmanship, and sensitivity to design in working with metal. **Prerequisite:** ART 225.

ART 230

Professional Practices • 1.0 - 2.0 Credits

This course focuses on preparing the art major for admission into an accredited art program as well as exploring the business aspects of being a professional artist.

ART 241 (Formerly ART 2411)

Illustration I • 1.0 - 3.0 Credits

A studio course that applies the elements of design and drawing to a variety of illustration formats. Focus is on technical skills, application of a wide range of media, and illustrative concepts. **Recommended prerequisite:** ART 111 and 113.

ART 242 (Formerly ART 2421)

Illustration II • 1.0 - 3.0 Credits

A continuation of Illustration I with emphasis on individual development of subject, technique, and concept. A variety of illustration styles and applications are explored further. **Prerequisite:** ART 241.

ART 243 (Formerly ART 2431)

Illustration III • 1.0 - 3.0 Credits

A continuation of ART 242 with emphasis on the use of mixed media, color, and graphic techniques applied to illustration. **Prerequisite:** ART 241 and 242.

ART 250 (Formerly ART 2501)

Studio Problems • 1.0 - 3.0 Credits

Individual, contracted, advanced study in visual arts theory and practice. **Prerequisite:** completion of all available studio art within desired area of study and instructor permission.

ART 251 (Formerly ART 2511)

Studio Problems - Design • 1.0 - 3.0 Credits

Individual, contracted, advanced study in design. Studio and seminar.

ART 252 (Formerly ART 2521)

Studio Problems - Graphic • 1.0 - 3.0 Credits

Individual, contracted, advanced study in computer graphics. Studio and seminar. **Recommended prerequisite:** ART 209, 211, and 212.

ART 253 (Formerly ART 2531)

Studio Problems - Drawing • 1.0 - 3.0 Credits

Individual, contracted, advanced study in drawing. Studio and seminar.

ART 254 (Formerly ART 2541)

Studio Problems - Painting • 1.0 - 3.0 Credits

Individual, contracted, advanced study in painting. Studio and seminar.

ART 255 (Formerly ART 2551)

Studio Problems - Sculpture • 1.0 - 3.0 Credits

Individual, contracted, advanced study in sculpture. Studio and seminar.

ART 256 (Formerly ART 2561)

Studio Problems - Metals • 1.0 - 3.0 Credits

Individual, contracted, advanced study in metal arts. Studio and seminar.

ART 257 (Formerly ART 2571)

Studio Problems - Ceramics • 1.0 - 3.0 Credits

Individual, contracted, advanced study in ceramic arts. Studio and seminar.

ART 258 (Formerly ART 2581)

Studio Problems - Watercolor • 1.0 - 3.0 Credits

Individual contracted advanced study in water color. Studio and seminar.

ART 259 (Formerly ART 2591)

Studio Problems - Photography • 1.0 - 3.0 Credits

Individual, contracted, advanced study in photography, studio and seminar.

ART 298 (Formerly ART 2991)

Special Studies Lab • 1.0 - 15.0 Credits

An advanced experimental class to be used to explore new approaches and applications to studio art.

ART 299

Special Studies • 1.0 - 15.0 Credits

An advanced experimental class to be used to explore new approaches and applications to art theory.

Courses & Programs

ART& 100 (Formerly ART 110) Art Appreciation [H] • 5.0 Credits

A general survey of fine and applied arts with brief media encounters in various areas of art. The class emphasis is on building a general appreciation of the techniques, styles, themes in art, and the history of art.

Astronomy

columbiabasin.edu/astronomy

Department Overview: The Astronomy program is offered to give science students a choice in how they integrate and apply math and science skills in their learning process. Currently, Introductory Astronomy is taught as the primary astronomy class. This includes: understanding the basics of observational astronomy, the solar system, stars, galaxies and the universe. Our Robert and Elisabeth Moore Observatory gives students the opportunity for hands-on learning by observing in a research-grade facility right on campus. The use of the scientific process, math skills and critical thinking are emphasized as the basis for moving forward in a technologically challenging world.

ASTR 102 Intro to Astronomy - Part II w/ Lab [M/S] • 5.0 Credits

The second course of an introductory survey of astronomy including star formation, planetary systems formation, star birth and death, Einstein's special relativity model of the universe, galaxies and their evolution, cosmology and current topics. Several night observation sessions are held at the on-campus Moore Observatory. **Prerequisite:** MATH 050, 060, 062, 096 or instructor permission. **ASTR& 101 recommended.**

ASTR 199 Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

ASTR 299 Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

ASTR&101 (Formerly AST 101) Intro to Astronomy w/ Lab [M/S] • 5.0 Credits

A survey of astronomy including history of astronomy, the solar system, galaxies, cosmology, and current topics. Several night observation sessions are held. Lecture and lab must be taken concurrently. **Prerequisite:** grade of 2.0 or better in MATH 050, 060, 062, or 096.

Automotive Technology

columbiabasin.edu/automotive

Department Overview: The Automotive Technology program is a comprehensive two-year course combining classroom instruction and hands-on training. The program is based on the eight Automotive Service Excellence (A.S.E.) topics in the National Technicians Certification Program to prepare students for the A.S.E. mechanic certification tests.

CBC's Automotive faculty aim to bring innovative technology into the classroom and the lab. Automotive Tech students learn the basics of computer diagnosis as well as traditional tool usage as they participate in the entire repair process, evaluating, repairing and maintaining vehicles.

For more information, call 509.542.4746.

The department requires students achieve a minimum grade of 2.0 to be able to continue enrollment in major courses. The Associate in Applied Science degree also requires a minimum grade of 2.0 for each major course. A student who achieves a grade of 1.9 or lower in any required major courses may repeat that course once to attempt to achieve a grade of 2.0 or higher. Exceptions to this policy must be approved by the Dean of the program prior to enrollment and must be based on extenuating circumstances.

At the end of the program, successful students will be able to:

- Troubleshoot and repair front and rear wheel drive manual and automatic transmissions, transaxles and differentials
- Diagnose and repair electrical and electronic automotive circuits
- Troubleshoot and repair engine mechanical, cooling and lubrication systems
- Diagnose and repair brake and electronic braking systems
- Troubleshoot and repair steering and suspension systems
- Diagnose and repair heating, ventilation and air conditioning systems
- Troubleshoot and repair engine performance related issues and drivability concerns
- Review, interpret and convey written, verbal and graphic information to communicate effectively with co-workers, management and customers
- Act responsibly and ethically as an employee by being punctual, following industry accepted practices, adhering to company policies and interacting positively and appropriately with co-workers, supervisors and customers

AMT 100 Basic Automotive Maintenance • 2.0 Credits

An introduction to general automotive systems and service procedures. This course is designed to familiarize students with the automotive industry learning how to properly service and maintain today's vehicles, knowing how to understand what a service repair facility is saying to them when they are having a vehicle repaired, and the requirements to continue on becoming an automotive repair technician if desired. Class time consists of lecture on theory of preventative maintenance procedures and systems, basic operation of automotive tools, shop safety, computerized online information systems, written assignments, and basic automotive repair techniques. Lab time consists of students applying concepts learned with hands-on experience while working on student owned vehicles and school mockups.

AMT 104 Diesel Engine Theory • 2.0 Credits

This course provides basic knowledge and theory of operation of automotive diesel engines including ignition and fuel systems. **Prerequisite:** AMT 107, 109, 113, and 114 or instructor permission.

AMT 105 (Formerly AMT 1001) Basic Automotive Maintenance Lab • 1.0 - 3.0 Credits

Lab to be taken concurrently with AMT 100.

AMT 107 Parts, Systems, and Components • 4.0 Credits

This course prepares students to apply technical knowledge and skills to perform tasks and services that facilitate the movement and sale of parts and materials. Students will learn the identification of individual parts in vehicle systems and demonstrate an understanding of parts' relationships to various systems. **Prerequisite:** enrollment in the Automotive Technology program, or CASAS 221+ or equivalent, or instructor permission.

AMT 108 Parts Logistics Practicum • 1.0 Credit

This class provides field experiences that allow a student to observe and document how working professionals perform their job duties. Students will also participate in performing tasks to a limited extent allowed by on-site staff in an environment that will build on the students' area of career interests and prepare them to be productive employees. **Prerequisite:** AMT 107 and INT 130, or instructor permission.

Courses & Programs

AMT 109

Tools and Hardware • 3.0 Credits

This is an entry-level course that provides basic tool and hardware safety, use, and storage. It will cover the tools, hardware, fasteners, and basic equipment commonly used in maintenance shop environments.

AMT 112

Electrical Systems • 2.0 Credits

A class covering electrical basics, electronics, test equipment, wiring circuitry, and basic diagnosis of starting and charging systems. Students in the lab diagnose and repair light circuits, wiring systems, and basic starting and charging systems. This course is designed for automotive students.

AMT 113

Maintenance Publications and Records • 2.0 Credits

This course provides students with knowledge to utilize maintenance publications, service bulletins, and maintenance directives for service and maintenance of vehicles. It also includes the correct procedures and information for completing work orders and creating maintenance log entries.

AMT 114

Preventive Maintenance • 5.0 Credits

This course provides students with basic knowledge and understanding of automotive procedures for maintaining vehicles by following recommendations for preventive care. This course provides the background science and physics for understanding the unique needs and attributes of automotive materials and systems including lubrication, hydraulic, pneumatic, metallurgical, gaseous, power, and fuels.

AMT 115

Basic Damage Repair • 3.0 Credits

This course is an introduction to basic metal repair and metal straightening techniques. It includes shop safety and the proper use of power and hand tools.

AMT 116

Corrosion Protection • 3.0 Credits

This course provides an introduction to identifying damage and non-damage corrosion. Various methods of corrosion protection are presented as well as metal treatments and primers. **Prerequisite:** AMT 107 or instructor permission.

AMT 117

Introduction to Paint Application • 3.0 Credits

This course provides basic knowledge and practice in correcting defects in vehicle finishes. Students will learn to distinguish among the various types of paint equipment, use various paint codes and specifications, identify various paint systems, and explore paint defects. **Prerequisite:** AMT 107 or instructor permission.

AMT 118

Glass and Plastic Adhesive Repair • 3.0 Credits

This course provides an introduction to the basics of glass and plastic adhesive repair. Topics include glass repair, fiberglass and composite repair, and applying body plastic filler.

AMT 119

Suspension and Steering Systems Theory • 2.0 Credits

This class is designed to give students an understanding of the theory of automotive steering and suspension systems. The emphasis will be on the mechanical portion of those systems. **Prerequisite:** AMT 107, 109, 113, and 114 or instructor permission.

AMT 120

Basic Electrical Systems • 4.0 Credits

This course provides students with a basic understanding of the theory, diagnosis, and service of automotive electrical systems. Subjects covered will include basic electrical principles and how malfunctions affect the proper functioning of vehicles. **Prerequisite:** MATH 111 or instructor permission.

AMT 121

Suspension and Steering Systems Servicing • 5.0 Credits

This lab is designed to familiarize students with the operation, diagnosis, repair, and service of automotive steering and suspension systems, with the emphasis on the mechanical portion of these systems. **Prerequisite:** AMT 107, 109, 113, and 114 or instructor permission.

AMT 123

Brake Systems I • 5.0 Credits

This class provides a basic understanding of the theory, diagnosis, and service of automotive brake systems. Emphasis will be placed on the mechanical portion of the brakes systems and the principles behind their operation. **Prerequisite:** AMT 120 with a minimum 2.0 GPA or instructor permission.

AMT 129

Engine Theory • 3.0 Credits

This course introduces students to the theory of internal combustion engines. Students will explore the fundamentals of fuel system theory, ignition theory, and identify engine mechanical integrity and operation. **Prerequisite:** AMT 107, 109, 113, and 114 or instructor permission. Minimum grade of 2.0 is required to advance in the program.

AMT 130

Engine Servicing • 4.0 Credits

This class provides students a basic understanding of the diagnosis, service, and operation of internal combustion engines with an emphasis on servicing, failure analysis, and correct parts replacement. **Prerequisite:** AMT 107, 109, 113, and 114 or instructor permission. Minimum grade of 2.0 is required to advance in the program.

AMT 133

Engine Repair • 4.0 Credits

Students will learn to inspect and repair engine lubrication systems, cooling systems, cylinder heads, and valve trains, as well as how to perform advanced level engine diagnosis. Emphasis will be placed on failure analysis and demonstrating proper parts replacement. **Prerequisite:** AMT 129 and 130 or instructor permission. Minimum grade of 2.0 is required to advance in the program.

AMT 134

Engine Rebuild • 3.0 Credits

Students will learn how to remove and install an automotive engine; inspect and troubleshoot internal combustion engines; demonstrate the ability to reassemble engine components into a working condition, including engine conformity inspections; and perform advanced level engine diagnosis. **Prerequisite:** AMT 129, 130, and concurrently enrolled in AMT 133 or instructor permission. Minimum grade of 2.0 is required to advance in the program.

AMT 135

Vehicle Maintenance & Lab • 7.0 Credits

This combination class/lab is designed to give students basic knowledge and understanding of common automotive maintenance procedures, minor parts replacement, the importance of maintenance, and to work in a manner which exhibits pride, cleanliness, work ethic, and professionalism. Minimum grade of 2.0 is required to advance in program. **Prerequisite:** AMT 121, valid driver's license, reliable transportation, and social security card.

AMT 140

Automotive Internship • 7.0 Credits

This summer internship program is designed to prepare students for actual shop employment. Students spend a minimum of eight weeks working in an automotive repair facility gaining experience with genuine automotive shop working conditions. This hands-on practice enables students to be more prepared for their second year advanced studies and allows them to have verifiable employed experience when searching for employment at completion of year two. The internship work site must be instructor approved. The instructor performs on-site visits after students are employed to gather data on the performance of the students. Students work in a manner which exhibits pride, cleanliness, work ethic, and professionalism. Minimum grade of 2.0 is required to advance in program. **Prerequisite:** AMT 135, valid driver's license, reliable transportation, and social security card.

Courses & Programs

AMT 193

Independent Study • 1.0 - 15.0 Credits

A class used to explore new coursework or for a specific topic of special interest.

AMT 199

Special Studies • 1.0 - 10.0 Credits

A class used to explore new coursework.

AMT 210

Automotive Electronics • 4.0 Credits

This course covers the concepts of electrical fundamentals and electronics including series, parallel, and compound circuits; motors, relays, switches, inverters, converters; power distribution, wiring and routing; and logic diagrams and circuits. **Prerequisite:** AMT 120 or instructor permission.

AMT 220

Advanced Electrical & Electronics & Lab • 7.0 Credits

This combination class/lab is designed to give students a highly developed understanding of the theory, diagnosis, and service of the advanced automotive electrical and electronic operating systems. Students work in a manner which exhibits pride, cleanliness, work ethic, and professionalism. Minimum grade of 2.0 is required to advance in program. **Prerequisite:** AMT 140, valid driver's license, reliable transportation, and social security card.

AMT 223

Brakes Systems II & Lab • 5.0 Credits

This combination class/lab is designed to give students a highly developed understanding of the theory, diagnosis, and service of the advanced brake systems with a heavy emphasis on the electronic side of those systems. Students work in a manner which exhibits pride, cleanliness, work ethic, and professionalism. Minimum grade of 2.0 is required to advance in program. **Prerequisite:** AMT 220, valid driver's license, reliable transportation, and social security card.

AMT 230

Automatic Transmission • 5.0 Credits

Students will gain a basic understanding of the theory, diagnosis, rebuilding, and servicing of automatic automotive transmissions, including an understanding of their internal hydraulic, electrical, and mechanical operations.

AMT 233

Manual Transmissions & Lab • 7.0 Credits

This combination class/lab is designed to give students a basic understanding of the theory, diagnosis, and service of automotive manual transmissions. Students work with a manual transmission and gain knowledge of internal gear transfer paths. In addition, study of clutches, drive axles, and differentials round out this course of study. Students work in a manner which exhibits pride, cleanliness, work ethic, and professionalism. Minimum grade of 2.0 is required to advance in program. **Prerequisite:** AMT 230, valid driver's license, reliable transportation, and social security card.

AMT 240

Drivability Diagnostics & Lab • 7.0 Credits

This combination class/lab is designed to give students a highly developed understanding of the theory, diagnosis, and service of the drivability automotive systems. Emphasis is on power train computer systems, sensors and outputs, and the proper diagnostic strategies to locate potential problems in these systems. Minimum grade of 2.0 is required to advance in program. **Prerequisite:** AMT 233, valid driver's license, reliable transportation, and social security card.

AMT 243

Heating, Ventilation & Air Conditioning Systems • 7.0 Credits

This combination class/lab is designed to give students a basic understanding of the theory, diagnosis, and service of automotive heating, ventilation, and air conditioning (HVAC) systems. Emphasis is on proper air conditioning recharging techniques and the electrical portion of the HVAC systems. Minimum grade of 2.0 is required to advance in program. **Prerequisite:** AMT 240, valid driver's license, reliable transportation, and social security card.

AMT 250

Automotive Technology Systems Review • 3.0 Credits

This combination class/lab is designed to give students a review of basic knowledge and understanding of vehicle systems including: electrical, engines, brakes, heating and air conditioning, automatic transmissions, and engine performance.

AMT 251

Hybrid Operations and Safety • 3.0 Credits

This combination class/lab is designed to give students an overview of hybrid/high voltage vehicles. The class covers safety, driving characteristics, environmental concerns, and hybrid/high voltage energy principles.

AMT 252

High Voltage Basic Operations • 3.0 Credits

This combination class/lab is designed to give students an overview of high voltage batteries, transformers, high voltage wiring, dc-dc converters, safety circuitry, three-phase motors, and high voltage control systems.

AMT 253

Basic Maintenance and Servicing of Hybrids • 3.0 Credits

This combination class/lab is designed to give students the theory and hands-on experience to perform basic preventive maintenance of hybrid vehicles.

AMT 254

High Voltage Diagnostics • 3.0 Credits

This combination class/lab is designed to give students theories and strategies for diagnosing high voltage and hybrid specific systems.

AMT 255

Component Replacement • 3.0 Credits

This combination class/lab is designed to give students theory and hands-on experience of proper removal and replacement of hybrid components.

Biology

columbiabasin.edu/biology

Department Overview: The Life Sciences department offers courses in Biology & Science to:

- Fulfill graduation requirements for the non-science major to obtain an Associate in Arts and Sciences degree or Certificate of General Study (BIOL& 100, BIOL& 175, BIOL 140, BIOL 148, ENV& 101)
- Meet the entrance or support course requirements for the Health Sciences (Nursing, Dental Hygiene, Physical & Occupational Therapy, Paramedic/EMT, etc.) programs (BIOL& 160, BIOL& 211, BIOL& 241, BIOL& 242, BIOL& 260)
- Prepare the science major and pre-professional (pre-med, pre-vet, pre-chiropractic, pre-optometry, pre-pharmacy, etc.) transfer student for upper-level biology courses (BIOL& 211, BIOL& 212, BIOL& 213)
- Meet the need for elective and/or general interest to the community (BIOL 140, BIOL 148, BIOL 201, BIOL 252, BIOL 253, ENV& 174)

Lab & lecture must be taken concurrently in all class offerings.

BIOL 140 (Formerly BIO 140)

Fundamentals of Botany w/ Lab [M/S] • 5.0 Credits

An introductory course in the plant sciences. Includes structure and function of plant cells, tissues, organs; growth, reproduction, diversity, evolution, and ecology. Emphasis on local flora and ecology. Primarily for non-science or agriculture majors.

Courses & Programs

BIOL 148 (Formerly BIO 148)

Plant Identification w/ Lab [M/S] • 5.0 Credits

Spring wildflowers of eastern Washington with emphasis on the Columbia Basin Region. Techniques in identification, collection, preservation, mounting of preserved specimens, and ecological principles. During the latter part of the quarter, attendance at all-day Saturday field trips is required.

BIOL 199

Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

BIOL 201 (Formerly BIO 201)

Soils w/ Lab [M/S] • 5.0 Credits

A course offering students a general background and understanding of soils, soil formation processes, soil origins with an emphasis on soil origins in the Pacific Northwest, soil taxonomy, organic matter, water relationships, pH, and biological relationships. **Prerequisite:** CHEM& 110 or CHEM& 140 or instructor permission. **This course is cross-listed with AG 201. Students completing BIOL 201 may not receive graduation credit for AG 201.**

BIOL 252 (Formerly BIO 252)

Insects of Economic Importance w/ Lab [M/S] • 5.0 Credits

A study designed to introduce students to the breadth and diversity of the science of entomology and an in-depth study of insects including: their diversity; the basics of systematic entomology; insect societies; insect physiology and structures; their ecological relationships with their physical and biotic environments; their population and community level ecology; their effects on human welfare through applied disciplines of medical and agricultural entomology; and the methods by which humans attempt to manage insect populations. **This course is cross-listed with AG 252. Students completing BIOL 252 may not receive graduation credit for AG 252.**

BIOL 253 (Formerly BIO 253)

Plant Pathology w/ Lab [M/S] • 5.0 Credits

An introduction to the organisms causing plant diseases, their identification, and control technologies. Material presented covers the basic principles necessary to develop an adequate understanding of plant disease processes in natural, urban, commercial, and industrial situations. Emphasis is placed on diseases encountered in the Pacific Northwest. **This course is cross linked to AG 253. Students completing BIOL 253 may not receive graduation credit for AG 253.**

BIOL 299

Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

BIOL&100 (Formerly BIO 100)

Survey of Biology w/ Lab [M/S] • 5.0 Credits

An introductory course in basic biological principles and processes. The lab illustrates the basic concepts discussed in lecture and acquaints students with general laboratory procedures. Primarily for non-science majors.

BIOL&160 (Formerly BIO 105)

General Biology w/ Lab [M/S] • 5.0 Credits

An introduction to basic cell structure and physiology with emphasis on: function and structure of cell membranes; metabolism and enzyme function; genetics and protein synthesis; genetics of viruses, prokaryotes, and eukaryotes; cell signaling and communication. The use of models, microscope slides, and physiological experiments illustrate cellular structure and function. **Strongly recommended: high school chemistry, or CHEM& 121 or higher, or concurrent enrollment. This course does not satisfy the prerequisite for BIOL& 212 or 213.**

BIOL&175 (Formerly BIO 110)

Human Biology w/ Lab [M/S] • 5.0 Credits

The biology of the human organism. Evolution, ecology, the functioning of cells, tissues, and the major organ systems form the core of the class. Emphasis is placed on providing students with sufficient background to make informed decisions relating to the biological aspects of the human species. Primarily for non-science majors.

BIOL&211 (Formerly BIO 111)

Majors Cellular w/ Lab [M/S] • 5.0 Credits

An introductory cell biology lecture and lab course for biology majors, pre-medical, pre-dental, pre-pharmacy, pre-physical therapy, and other pre-professional students planning to transfer to a four-year university. This is the first of a three-quarter series with an emphasis on cell chemistry, structure, metabolism, energetics, cell division, cell signaling, the molecular basis of inheritance and development, and the basis of genetic engineering. Health Science majors are advised to take BIOL& 160. **Prerequisite: a grade of 2.0 or better in CHEM& 121 or higher.**

BIOL&212 (Formerly BIO 112)

Majors Plant w/ Lab [M/S] • 5.0 Credits

Includes the concept of evolution; the origin of life; a survey of prokaryotes, protists, plants, and fungi; plant anatomy and function. Primarily for science majors. **Prerequisite: a grade of 2.0 or better in BIOL& 211 and CHEM& 140 or higher.**

BIOL&213 (Formerly BIO 113)

Majors Animal w/ Lab [M/S] • 5.0 Credits

A survey of the invertebrate and vertebrate animals covering their diversity, structure, and function of organ systems, and the interactions between organisms and the environment. Primarily for science majors. **Prerequisite: a grade of 2.0 or better in BIOL&212.**

BIOL&241 (Formerly BIO 221)

Human A&P 1 w/ Lab [M/S] • 6.0 Credits

The structure and functions of systems of the human body; integumentary, skeletal, muscular, and nervous. The use of human models and animals illustrate the systems. **Prerequisite: a grade of 2.0 or better in BIOL& 160 or 211. Recommended: CHEM& 121.**

BIOL&242 (Formerly BIO 222)

Human A&P 2 w/ Lab [M/S] • 6.0 Credits

Continuation of BIOL& 241: endocrine, digestive, respiratory, circulatory, lymphatic, urinary, and reproductive systems. **Prerequisite: a grade of 2.0 or better in BIOL& 241.**

BIOL&260 (Formerly BIO 260)

Microbiology w/ Lab [M/S] • 6.0 Credits

Basic principles, concepts, and techniques in the study of bacteria, protists, fungi, and viruses. Concepts of immunity and the role of micro-organisms in medicine. **Prerequisite: a grade of 2.0 or better in BIOL& 160 or BIOL& 211. Strongly recommended: CHEM& 121, BIOL& 241 and BIOL& 242 (for nursing majors) or BIOL& 212 and BIOL& 213 (for biology majors).**

Blueprint Reading

columbiabasin.edu/blueprint

Department Overview: Columbia Basin College offers several Blueprint reading courses. Some are tailored specifically for the Machine Technology and Welding programs.

BPR 105

Blueprint Reading • 3.0 Credits

The Blueprint Reading course is a comprehensive guide to interpreting drawings commonly found in manufacturing. This course is intended as an introduction to understanding blueprints and being able to visualize and understand the intent of the designer or draftsman as presented in a blueprint. The first step in making quality parts or assemblies is interpreting the drawing correctly and applying the given information to the final product. This is the short course of need to know information for blueprint reading in machine trades.

Courses & Programs

BPR 106

Blueprint Reading I (WT) • 3.0 Credits

This course is designed to introduce the welding student to the world of blueprint symbols, facts, and figures. BPR 106 is the first of a two-part series in which students learn the various methods of presenting to the fabricator what the designer wants in the final product. Symbolism for welding structural shapes, types of fittings, their physical make up, material, and dimensioning are covered in the class. The successful student will be an asset to any fabrication shop or when working for the ironworkers or millwrights. **Prerequisite:** DRW 106.

BPR 110

Basic Blueprints and Drawings • 3.0 Credits

This course is intended to provide students with information about how to read and interpret information from blueprints, drawings, exploded views, illustrated parts catalogs, assembly drawings, flow diagrams, and schematics.

BPR 204

Blueprint Reading II (MT) • 3.0 Credits

This course is designed to give students skills and knowledge necessary to read, understand tolerances, and apply geometric dimensioning to machine shop drawings. **Prerequisite:** MT 102.

BPR 206

Blueprint Reading II (WT) • 3.0 Credits

The second course in the series with the emphasis on pipe isometrics. The course is designed to provide students with the ability to read, draw, and dimension pipe isometrics for fabrication. The successful student will be an asset to any fabrication shop or when working for or with pipefitters or entry level. **Prerequisite:** BPR 106.

Business

columbiabasin.edu/business

Department Overview: The variety of business courses offered are designed to meet many different needs. Students can complete the AA in Business and transfer to a four-year college, can choose among the courses to build specific skills, and/or can select courses that will lead to a certificate or two-year degree in Business Administration or Entrepreneurship and Innovation.

Upon successful completion of the program, students will be able to:

- Use critical thinking skills to analyze business problems
- Communicate effectively and apply interpersonal skills and cultural awareness to business situations
- Understand how human resources are organized into systems and solve problems within those systems
- Apply information tools and resources within organizations
- Reason quantitatively and apply accounting and financial knowledge to business practices

BUS 103 (Formerly BA 103)

Principles of Sales • 5.0 Credits

A study in consumer motivation, buyer benefits, overcoming sales resistance, and closing of sales supplemented by sales demonstrations developed and presented in the classroom.

BUS 105 (Formerly BA 105)

Business & Payroll Tax Accounting • 5.0 Credits

A study of the various aspects of federal, state, and local taxes levied upon business. Emphasis placed on Federal Income and Social Security tax withholding, sales tax requirements, and various state regulations regarding employee health, safety, unemployment insurance, and business and occupation tax. Students practice completion of various tax reports and maintenance of accurate tax-related records. Offered spring quarter only. **Prerequisite:** ACCT&201 or instructor permission.

BUS 107 (Formerly BA 107)

Federal Income Taxes • 5.0 Credits

This course emphasizes tax planning and tax recognition, not tax expertise. Students will be aware of the many issues and general solutions in taxation, including tax considerations in business decision-making, tax effects of business transactions; taxation of compensation; fringe benefits; capital gains; fixed asset transactions; tax credits; alternative minimum tax and passive activity rules, but leaving the detailed tax planning or compliance work for other tax courses. Offered fall quarter. **Recommended prerequisite:** ACCT&201.

BUS 111 (Formerly BA 111)

Computerized Accounting • 5.0 Credits

This course requires students to use QuickBooks to account for service and merchandising businesses. The different modules include Accounts Receivable, Accounts Payable, Payroll, and integration of Microsoft Excel and Word. **Prerequisite:** ACCT&201 and ACCT&202 or concurrent enrollment in ACCT&202.

BUS 120 (Formerly BA 120)

Personal Finance • 5.0 Credits

In this introductory course students learn a basic foundation of personal finance knowledge and how to apply it to their life. Students learn the fundamentals of planning, analyzing, managing, and investing personal financial resources. This includes practical knowledge and strategies for many real-life scenarios such as purchasing a home, deciding on a credit card, and buying a car. Other important topics include understanding how credit scores work, budgeting, and insurance, as well as a basic overview of investment tools and strategies. Additionally, students learn how to create a budget and a balance sheet and calculate their net worth. Students are challenged to apply this information to their own life situations by developing a personal financial plan.

BUS 134 (Formerly BA 134)

Public Relations • 5.0 Credits

A critical study of the theory, principles, and practices of organizational public relations in the complex social, technical, and political climate of the era. The class is writing and speaking intensive, culminating in student oral presentations, and a portfolio of media examples.

BUS 150 (Formerly BA 150)

Advertising Principles • 5.0 Credits

Study of when and how to use the major advertising mediums, with emphasis on local advertising. The course includes media buying, copywriting, layouts, production, market research, and sales promotion.

BUS 165 (Formerly BA 165)

Investments • 5.0 Credits

Fundamentals of investing and investment alternatives, including a study of traditional investment vehicles such as stocks, bonds, mutual funds, and more speculative strategies such as options and futures. The course examines investment decision-making within the framework of investment goals including safety, risk, growth, and income. The mechanics of various financial markets are also discussed.

BUS 170

Introduction to Event Planning • 5.0 Credits

Introduction to event planning including learning about the types of meetings and events, awareness of site location and suitability, logistics of the planning process, importance of market and sales research, and careers options in the event planning industry.

BUS 171

Event Planning Internship • 1.0 - 6.0 Credits

To obtain experience in event planning by assisting or being the lead in the completion of an event planning project(s).

Courses & Programs

BUS 179

Introduction to Entrepreneurship • 5.0 Credits

This is a survey course in entrepreneurship and business development. This course focuses on starting and developing a new business. Topics include evaluating opportunities and testing the feasibility of creative ideas, selecting and dealing with partners; examining alternative methods of financing, developing the initial competitive strategy, structuring and managing the business through the early survival months, and locating sources of outside help.

BUS 195 (Formerly BUS 1952)

Supervised Employment • 1.0 - 5.0 Credits

A supervised paid work experience in a community agency, business, or industrial firm involving the application and practice of skills and principles learned in the classroom. **Prerequisite:** instructor permission.

BUS 196

Employment Seminar • 1.0 - 5.0 Credits

Designed to provide students with insight into the many aspects of the world of work through discussions of their personal work environments, encompassing actual on-the-job training and observations. May be repeated to a maximum of six credits. **Prerequisite:** concurrent enrollment in BUS 195.

BUS 199 (Formerly BA 199)

Special Studies • 1.0 - 5.0 Credits

A class used to explore new coursework.

BUS 210

Managing Personal Finance • 5.0 Credits

This course explores how and why individuals make the financial choices and decisions they do. Individual attributes and relationships from a financial perspective are explored. Emergency funds, goals, and financial statements are covered, as well as basic retirement information. Money problems and solutions illustrate real life problems. Careers, mindfulness, and life balance topics round out a holistic approach to finances. A term paper is required to reflect upon individual learning in managing personal finances.

BUS 220 (Formerly BA 220)

Personal Finance • 5.0 Credits

This advanced personal finance course is for the mature individual who is seeking in-depth information and discussion on retirement, tax, and estate planning. The specifics of retirement trends and strategies, life goals, IRAs, pension plans, distributions, insurance, and wills are researched culminating in a retirement and estate plan. **Prerequisite:** BUS 120 or instructor permission.

BUS 250 (Formerly BA 250)

Management Information Systems • 5.0 Credits

This course is designed to introduce business majors to Management Information Systems (MIS) and demonstrate how these systems are used throughout organizations in theory and application. This course focuses on organizational information systems, including managerial support systems and acquisition, and application of information systems. Topical coverage consists of a web-based, global environment, and how to manage it through a competitive advantage and strategic information system. Ethics and privacy, network communications, E-commerce, mobile commerce, and contemporary topics are explored. The software deliverables include a PowerPoint presentation and a Word document from the student's fictional or real business, followed by an Excel spreadsheet and Web 2.0 Google Docs. As a result of taking this course, students will obtain valuable information technology knowledge and skills required for success in business.

BUS 255 (Formerly BA 255, POLS&200)

Legal Institutions & Processes in Am. Business • 5.0 Credits

An examination of U.S. governmental roles and processes that affect business and our socio-economic systems. Provides an in-depth look at the U.S. legal structure and legal reasoning of substantive law and procedural and regulatory processes, focusing on legal analysis in facilitating conflict resolution.

BUS 257 (Formerly BA 257)

Governmental Accounting • 5.0 Credits

Accounting practices for the growing nonprofit segment of the economy (governmental units, educational institutions, hospitals, etc.) with a comparison to accounting for profit-making organizations. Includes a practice set to be used on microcomputer. **Prerequisite:** ACCT& 201.

BUS 261 (Formerly BA 261)

Human Resources Management • 1.0 - 5.0 Credits

A critical inquiry into the theory, principles, and practices of human resource management in the global work place of the 21st century. Emphasis is on the shift from large-scale business to the practices needed to sustain and nourish world-class standards and practices in small and start-up enterprises.

BUS 262 (Formerly BA 262)

Management Principles • 5.0 Credits

A study of the essentials of management in merchandising, manufacturing, agriculture, agrichemical business, and service businesses.

BUS 263 (Formerly BA 263)

Principles of Finance • 5.0 Credits

An examination of the analytical tools used to manage and control finances. Concepts include: acquisition and oversight of working capital; intermediate and long-term financing; and the cost of capital and capital budgeting.

BUS 264 (Formerly BA 264)

Fraud & Accounting Information Systems • 5.0 Credits

This course provides a perspective of Accounting Information Systems through the examination of fraud including various schemes, skimming, and check tampering. Accounting and legal principles provide a context for the big picture of occupational fraud and abuse. The behavioral theory and social factors that motivate perpetrators of fraud are explained. The Systems Understanding Aid (SUA) is an accounting practice set supported with documents to enhance understanding an accounting system. **Prerequisite:** ACCT& 201, ACCT& 202, or ACCT& 203.

BUS 265 (Formerly BA 265)

Marketing Principles • 5.0 Credits

Study of marketing functions from the viewpoint of the manager covering such topics as marketing, distribution channels, price market grid, transportation, and consumer behavior.

BUS 267 (Formerly BA 267)

Marketing Special Projects • 1.0 - 5.0 Credits

A practical and student-centered project oriented class, utilizing marketing skills to develop marketing plans for the Tri-Cities area business and charitable organizations. The use of primary and secondary data collection, research, business start-up planning, profitable business decision-making, and business communication skills as they relate to a final project.

BUS 268 (Formerly BA 268)

Marketing Special Projects II • 1.0 - 5.0 Credits

A continuing practical and student-centered marketing project course utilizing material provided by proposing clients. Included in this project is the development of a marketing promotional plan for-profit and not-for-profit companies. This special project is designed to help students use marketing skills related to primary and secondary data collecting and added researched data, business startup planning, making a business more profitable, and decision-making as they relate to the final promotion of a product or business. As in course BUS 267, more advanced projects are assigned and above skills are expanded.

Courses & Programs

BUS 269 (Formerly BA 269)

Marketing Special Projects III • 1.0 - 5.0 Credits

A continuing practical and student-centered marketing project course utilizing material provided by proposing clients, student researched data. Included in this project is the development of a marketing promotional plan for-profit and not-for-profit companies. This special project is designed to help students use marketing skills related to effective business promotion and/or product development. Selling skills, creative planning, and implementation training will be utilized for the client's benefit. As in course BUS 268, more technical and advanced projects and research are assigned and the above skills are expanded to client specifications.

BUS 271 (Formerly BA 271)

Human Relations Business • 5.0 Credits

Study of the individual and his or her growth and development. Course is designed to enable students to establish goals and lead others in the accomplishment of those goals. It is aimed at heightening the student's awareness of leadership and management.

BUS 272 (Formerly BA 272)

Organization Development • 3.0 Credits

A critical study of theory, principles, and practices in the development of contemporary business organizations. The focus is on diagnosis in a problem-solution approach. Key issues are triggering, managing, and nourishing change in a turbulent and highly competitive global business environment. Systems understanding, resource, and technology applications are considered.

BUS 279

Intermediate Entrepreneurship • 5.0 Credits

Students will learn the principles and skills needed for implementation of a business plan to own and operate a successful venture. The principles and skills of the entrepreneur are utilized in the decision making process. Topics covered in this course include: The appropriate business structure and organization, developing plans and strategies for the entrepreneurial venture, financing strategies, exploration of growth opportunities, and successful managing of scarce resources. **Prerequisite:** BUS 179.

BUS 280

Innovation & Design Thinking 1 • 5.0 Credits

This course combines theory and individual and group assignments to introduce students to the main concepts of innovation creativity and design thinking. Students learn various tools to promote creativity within themselves and others, processes to increase innovation, how to contribute to a creative team, how to manage creativity, and how to establish a culture of creativity within an organization. Students will develop an understanding of and appreciation for the creative/innovative processes and will be prepared to contribute in a unique and productive way to today's entrepreneurial and organizational demands.

BUS 281

Innovation & Design Thinking 2 • 5.0 Credits

Students complete a comprehensive project including the concept, design, formal proposal, implementation, presentation, and report phases. Students participate in design teams to solve a design challenge based on the IDEO deep dive concept. The emphasis in Innovations 2 is on brainstorming, project evaluation, team formation, careers, business, intellectual property, professional organizations, and professional ethics, detailed design and rapid prototyping, including research and development of a prototype and presenting the final product. **Prerequisite:** BUS 280.

BUS 282

Innovation Capstone • 5.0 Credits

Students integrate theory, concepts, and skills from the previous two innovation courses and apply them in real world situations. Students also demonstrate a comprehensive analysis of on-going innovation needs for an organization/business and then work directly with team(s) and client(s) to apply innovation concepts. Students also assist in the operation of an open innovation center that CBC and the larger business/organization community can engage with and participate in innovation activities for the purpose of research, teaching, and the sharing of innovation and design knowledge, thinking, and applications. **Prerequisite:** BUS 281.

BUS 295 (Formerly BUS 2952)

Supervised Employment • 1.0 - 5.0 Credits

A supervised, paid work experience in a community agency, business, or industrial firm involving the application and practice of skills and principles learned in the classroom. **Prerequisite:** instructor permission.

BUS 296

Employment Seminar • 1.0 - 2.0 Credits

Designed to provide students with insight into the many aspects of the world of work through discussions of their personal work environment, encompassing actual on-the-job training, and observations. May be repeated to a maximum of six credits. **Prerequisite:** concurrent enrollment in BUS 295.

BUS 299 (Formerly BA 299)

Special Studies • 1.0 - 5.0 Credits

A class used to explore new coursework.

BUS& 101 (Formerly BA 101)

Introduction to Business • 5.0 Credits

A critical survey of the theory, principles, and practices of modern business. The theme is building world class employees who produce and distribute world class goods and services in an increasingly competitive global marketplace. Critical thinking, systems understanding, resource allocation, human relations, and technology application are emphasized.

BUS& 201 (Formerly BA 254)

Business Law • 5.0 Credits

An introduction to the American legal system including its social, political, and ethical impacts on international and domestic business. The court system and judicial procedures are examined. Class focuses on business and personal liability in the areas of torts, crimes, and contracts, including its application of the Uniform Commercial Code, emphasizing on contractual relations and implications in business forms, employment, agency, regulation, and property.

Chemistry

columbiabasin.edu/chemistry

- Department Overview: CHEM& 110 is a chemical concepts course intended for non-science majors who want a lab science course that gives a good introduction to chemical topics important in our technological society.
- CHEM& 121, 122, 123 is the allied health sequence (introduction to general, organic and biochemistry) and is required for health science students and certain agriculture career tracks. CHEM& 121 is a pre-admission requirement for CBC Dental Hygiene program. Pre-nursing students intending to apply to a four-year program should plan to take either the three-quarter sequence (121, 122, 123) or the two-quarter sequence (121, 131).
- CHEM& 131 provides an overview of organic chemistry and biochemistry for health science students that do not need the level of detail provided by CHEM& 122 and 123. This course is accepted for the baccalaureate degree in nursing at some four-year institutions.

Courses & Programs

- CHEM& 140 is a chemistry prep course intended for science majors who have not had chemistry in high school and need the chemical and mathematical preparation required for the CHEM& 161, 162, 163 series. It can also be used to fulfill the lab science requirement for other majors.
- CHEM& 161, 162, 163 is the general chemistry sequence for science and engineering majors and pre-professional majors such as pre-med, pre-dental, pre-veterinary, pre-optometry, pre-pharmacy, medical technology, physical therapy and forensic science. An honors tract in general chemistry is also offered for students with a strong chemistry background.
- The organic chemistry sequence (CHEM& 241, 242, 243) and accompanying labs (CHEM& 251, 252, 253) are second-year chemistry courses for students majoring in chemistry, chemical engineering, biochemistry, biology, environmental science and the pre-professional majors listed above.
- Undergraduate research (CHEM 281-286 and 291-296) are offered as technical electives for students majoring in the sciences.

CHEM 199

Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

CHEM 254 (Formerly CHM 251)

Quantitative Analysis [M/S] • 2.0 Credits

Introduction to analytical chemistry. Sampling, statistics, and spreadsheets. Acid-base, precipitation, complexation, and redox equilibria. Activity coefficients and systematic treatment of equilibrium. Volumetric, gravimetric, potentiometric, environmental, and clinical methods of analysis taught in the lab. **Prerequisite:** CHEM& 163.

CHEM 255 (Formerly CHM 252)

Instrumental Analysis [M/S] • 2.0 Credits

Electrochemistry, potentiometry, coulometry, voltammetry, spectrophotometry, atomic spectroscopy, chromatography, capillary electrophoresis, and mass spectrometry. Ion-selective electrode, coulometric, spectrophotometric, atomic spectrometric, solvent extraction, chromatographic, and mass spectrometric methods of analysis taught in the lab. CHEM 255/265 has a heavy emphasis on instrumental methods of chemical analysis. Computer-interfaced instrumentation included in the lab. **Prerequisite:** grade of 2.0 or better in CHEM 254/264.

CHEM 264 (Formerly CHM 2511)

Quantitative Analysis Lab [M/S] • 3.0 Credits

Lab to be taken concurrently with CHEM 254.

CHEM 265 (Formerly CHM 2521)

Instrumental Analysis Lab [M/S] • 3.0 Credits

Lab to be taken concurrently with CHEM 255.

CHEM 281 (Formerly CHEM 2861)

Undergraduate Research, Special Topics [M/S] • 1.0 - 3.0 Credits

Designed for students who want to expand their knowledge of chemistry beyond the basics offered in their regular courses. By arrangement with the instructor, students can pursue a special topic of interest, design and carry out a project, or participate in undergraduate research (either alone or with other students) in the areas of natural product chemistry, or organic analytical chemistry. Note: credits earned in this course cannot be used as a substitute for required credits in other CBC chemistry courses. **Prerequisite:** instructor permission and CHEM& 140 with a grade of 2.0 or better or high school chemistry with a grade of B or better.

CHEM 282 (Formerly CHEM 2862)

Undergraduate Research, Special Topics [M/S] • 1.0 - 3.0 Credits

Designed for students who want to expand their knowledge of chemistry beyond the basics offered in their regular courses. By arrangement with the instructor, students can pursue a special topic of interest, design and carry out a project, or participate in undergraduate research (either alone or with other students) in the areas of natural product chemistry, or organic analytical chemistry. Note: credits earned in this course cannot be used as a substitute for required credits in other CBC chemistry courses. **Prerequisite:** instructor permission and CHEM& 140 with a grade of 2.0 or better or high school chemistry with a grade of B or better.

CHEM 283 (Formerly CHEM 2863)

Undergraduate Research, Special Topics [M/S] • 1.0 - 3.0 Credits

Designed for students who want to expand their knowledge of chemistry beyond the basics offered in their regular courses. By arrangement with the instructor, students can pursue a special topic of interest, design and carry out a project, or participate in undergraduate research (either alone or with other students) in the areas of natural product chemistry, or organic analytical chemistry. Note: credits earned in this course cannot be used as a substitute for required credits in other CBC chemistry courses. **Prerequisite:** instructor permission and CHEM& 140 with a grade of 2.0 or better or high school chemistry with a grade of B or better.

CHEM 284 (Formerly CHEM 2864)

Undergraduate Research, Special Topics [M/S] • 1.0 - 3.0 Credits

Designed for students who want to expand their knowledge of chemistry beyond the basics offered in their regular courses. By arrangement with the instructor, students can pursue a special topic of interest, design and carry out a project, or participate in undergraduate research (either alone or with other students) in the areas of natural product chemistry, or organic analytical chemistry. Note: credits earned in this course cannot be used as a substitute for required credits in other CBC chemistry courses. **Prerequisite:** instructor permission and CHEM& 140 with a grade of 2.0 or better or high school chemistry with a grade of B or better.

CHEM 285 (Formerly CHEM 2865)

Undergraduate Research, Special Topics [M/S] • 1.0 - 3.0 Credits

Designed for students who want to expand their knowledge of chemistry beyond the basics offered in their regular courses. By arrangement with the instructor, students can pursue a special topic of interest, design and carry out a project, or participate in undergraduate research (either alone or with other students) in the areas of natural product chemistry, or organic analytical chemistry. Note: credits earned in this course cannot be used as a substitute for required credits in other CBC chemistry courses. **Prerequisite:** instructor permission and CHEM& 140 with a grade of 2.0 or better or high school chemistry with a grade of B or better.

CHEM 286 (Formerly CHEM 2866)

Undergraduate Research, Special Topics [M/S] • 1.0 - 3.0 Credits

Designed for students who want to expand their knowledge of chemistry beyond the basics offered in their regular courses. By arrangement with the instructor, students can pursue a special topic of interest, design and carry out a project, or participate in undergraduate research (either alone or with other students) in the areas of natural product chemistry, or organic analytical chemistry. Note: credits earned in this course cannot be used as a substitute for required credits in other CBC chemistry courses. **Prerequisite:** instructor permission and CHEM& 140 with a grade of 2.0 or better or high school chemistry with a grade of B or better.

Courses & Programs

CHEM 291 (Formerly CHEM 2901)

Undergraduate Research, Special Topics [M/S] • 1.0 - 3.0 Credits

Designed for students who want to expand their knowledge of chemistry beyond the basics offered in their regular courses. By arrangement with the instructor, students can participate in undergraduate research (either alone or as part of a team with other students), design and carry out a project, or pursue a special topic of interest in the fields of analytical chemistry, atmospheric science, or chemical education. Note: credits earned in this course cannot be used as a substitute for required credits in other CBC chemistry courses. **Prerequisite:** instructor permission and CHEM& 140 with a grade of 2.0 or better or high school chemistry with a grade of B or better.

CHEM 292 (Formerly CHEM 2902)

Undergraduate Research, Special Topics [M/S] • 1.0 - 3.0 Credits

Designed for students who want to expand their knowledge of chemistry beyond the basics offered in their regular courses. By arrangement with the instructor, students can participate in undergraduate research (either alone or as part of a team with other students), design and carry out a project, or pursue a special topic of interest in the fields of analytical chemistry, atmospheric science, or chemical education. Note: credits earned in this course cannot be used as a substitute for required credits in other CBC chemistry courses. **Prerequisite:** instructor permission and CHEM& 140 with a grade of 2.0 or higher or high school chemistry with a grade of B or better.

CHEM 293 (Formerly CHEM 2903)

Undergraduate Research, Special Topics [M/S] • 1.0 - 3.0 Credits

Designed for students who want to expand their knowledge of chemistry beyond the basics offered in their regular courses. By arrangement with the instructor, students can participate in undergraduate research (either alone or as part of a team with other students), design and carry out a project, or pursue a special topic of interest in the fields of analytical chemistry, atmospheric science, or chemical education. Note: credits earned in this course cannot be used as a substitute for required credits in other CBC chemistry courses. **Prerequisite:** instructor permission and CHEM& 140 with a grade of 2.0 or higher or high school chemistry with a grade of B or better.

CHEM 294 (Formerly CHEM 2904)

Undergraduate Research, Special Topics [M/S] • 1.0 - 3.0 Credits

Designed for students who want to expand their knowledge of chemistry beyond the basics offered in their regular courses. By arrangement with the instructor, students can participate in undergraduate research (either alone or as part of a team with other students), design and carry out a project, or pursue a special topic of interest in the fields of analytical chemistry, atmospheric science, or chemical education. Note: credits earned in this course cannot be used as a substitute for required credits in other CBC chemistry courses. **Prerequisite:** instructor permission and CHEM& 140 with a grade of 2.0 or higher or high school chemistry with a grade of B or better.

CHEM 295 (Formerly CHEM 2905)

Undergraduate Research, Special Topics [M/S] • 1.0 - 3.0 Credits

Designed for students who want to expand their knowledge of chemistry beyond the basics offered in their regular courses. By arrangement with the instructor, students can participate in undergraduate research (either alone or as part of a team with other students), design and carry out a project, or pursue a special topic of interest in the fields of analytical chemistry, atmospheric science, or chemical education. Note: credits earned in this course cannot be used as a substitute for required credits in other CBC chemistry courses. **Prerequisite:** instructor permission and CHEM& 140 with a grade of 2.0 or higher or high school chemistry with a grade of B or better.

CHEM 296 (Formerly CHEM 2906)

Undergraduate Research, Special Topics [M/S] • 1.0 - 3.0 Credits

Designed for students who want to expand their knowledge of chemistry beyond the basics offered in their regular courses. By arrangement with the instructor, students can participate in undergraduate research (either alone or as part of a team with other students), design and carry out a project, or pursue a special topic of interest in the fields of analytical chemistry, atmospheric science, or chemical education. Note: credits earned in this course cannot be used as a substitute for required credits in other CBC chemistry courses. **Prerequisite:** instructor permission and CHEM& 140 with a grade of 2.0 or higher or high school chemistry with a grade of B or better.

CHEM 299

Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

CHEM&110 (Formerly CHM 100)

Chemical Concepts w/ Lab [M/S] • 5.0 Credits

Basic introduction to chemical principles as they apply to the structure and behavior of matter. Illustrations from everyday life, environmental topics, medicine, and biochemistry are used to illustrate chemical principles. Topics include: measurement in science, atoms, molecules, nuclear chemistry, and current chemical issues such as energy, polymers, or foods and drugs among others. Assumes no previous chemistry background. Course intended for non-science majors and may be used to fulfill the general science requirement for the AA degree. **Prerequisite:** grade of 2.0 or better in MATH 050, 060, 062, 096 or higher.

CHEM&121 (Formerly CHM 110)

Intro to Chemistry w/ Lab [M/S] • 5.0 Credits

Fundamentals of inorganic chemistry with special emphasis on the application of principles to the health sciences. Topics covered include: measurements, energy, atomic structure, chemical bonding, nomenclature, mole concept, stoichiometry, gas laws, liquid and solid states, solutions, equilibrium, acid/base chemistry, oxidation-reduction, and nuclear chemistry. Course intended for students who plan to pursue an associate degree or enter a four-year baccalaureate program in the Health Sciences. May also be used to fulfill the general science requirement for the AA degree. **Prerequisite:** grade of 2.0 or better in MATH 050, 060, 062, 094, 097 or higher.

CHEM&122 (Formerly CHM 120)

Intro to Organic Chemistry w/ Lab [M/S] • 5.0 Credits

Fundamentals of organic chemistry with special emphasis on the application of principles to the health sciences. Topics covered include: saturated, unsaturated, aromatic hydrocarbons, alcohols, thiols, phenols, ethers, aldehydes, ketones, carboxylic acids, esters, amines, and amides. Each family of compounds are studied with respect to its structure, behavior, and function. Biochemical applications are integrated into this approach. **Prerequisite:** grade of 2.0 or better in CHEM& 121.

CHEM&123 (Formerly CHM 130)

Intro to Biochemistry w/ Lab [M/S] • 5.0 Credits

Topics covered include: optical isomerism; structure and function of carbohydrates, lipids, proteins, and nucleic acids; protein synthesis, enzymes, hormones; biochemical energetics and metabolism of carbohydrates, lipids, and proteins. **Prerequisite:** grade of 2.0 or better in CHEM& 122.

CHEM&131 (Formerly CHM 135)

Intro to Organic/Biochemistry w/ Lab [M/S] • 5.0 Credits

The course provides the fundamental chemistry of organic compounds in molecules and reactions of living systems. Topics covered include: hydrocarbons, alcohols and thiols, carbonyl compounds, carboxylic acids, esters, amines, amides, carbohydrates, proteins, lipids, and nucleic acids. Universal metabolic pathways that occur in both simple and complex organisms are covered, including: glycolysis, gluconeogenesis, citric acid cycle, electron transport chain, oxidative phosphorylation, fatty acid biosynthesis and degradation, amino acid transamination, and all aspects of the storage and expression of genetic information. This course is designed for students that need a laboratory science class that has a depth of both organic chemistry and biochemistry. **Prerequisite:** grade of 2.0 or better in CHEM& 140 or CHEM& 121.

Courses & Programs

CHEM&140 (Formerly CHM 101)

General Chemistry Prep w/ Lab [M/S] • 5.0 Credits

Introduction to chemical principles, chemical measurements, matter and energy, atomic theory, periodic properties, mole concept, molecules, compounds and chemical bonding, nomenclature and chemical equations, stoichiometry and chemical calculations, gas laws, solids, liquids, phase changes, oxidation-reduction reactions, solutions, reaction rates and chemical equilibrium, and acids/bases. The course is directed toward students needing a knowledge of the fundamentals of inorganic chemistry and planning to obtain a degree in the physical/life science/engineering disciplines. Excellent preparation for CHEM& 161. **Prerequisite:** grade of 2.0 or better in MATH 070, 072, 095 or 098.

CHEM&161 (Formerly CHM 111)

General Chemistry I w/ Lab [M/S] • 5.0 Credits

Fundamental concepts, stoichiometry, atomic structure and chemical bonding, nomenclature, periodic table trends, reactions, oxidation-reduction, and gas laws. Problem-solving techniques stressed. An honors version of this course is also available. **Prerequisite:** high school chemistry with a grade of B or better, or CHEM& 140 with a grade of 2.0 or better.

CHEM&162 (Formerly CHM 112)

General Chemistry II w/ Lab [M/S] • 5.0 Credits

Liquids, solids, solutions, colloids, acids, bases, salts, kinetics, molecular and ionic equilibria, thermodynamics, oxidation-reduction, electrochemistry, and nuclear chemistry. Theory and problem-solving are given vigorous emphasis. An honors version of this course is also available. **Prerequisite:** grade of 2.0 or better in CHEM& 161.

CHEM&163 (Formerly CHM 113)

General Chemistry III w/ Lab [M/S] • 5.0 Credits

Nonmetals, metalloids, metals, coordination chemistry, and an introduction to organic and biochemistry. Laboratory includes a basic introduction to the qualitative analysis of common cations and anions. An honors version of this course is also available. **Prerequisite:** grade of 2.0 or better in CHEM& 162.

CHEM&241 (Formerly CHM 221)

Organic Chemistry I [M/S] • 3.0 Credits

Stresses nomenclature, structure, stereochemistry, and introduces conceptual material needed to understand reaction mechanisms and synthesis. **Prerequisite:** CHEM& 163, and concurrent enrollment in CHEM& 251.

CHEM&242 (Formerly CHM 222)

Organic Chemistry II [M/S] • 3.0 Credits

Deals with the major classes of organic compounds with respect to preparations, mechanisms of reactions, syntheses and identification. **Prerequisite:** grade 2.0 or better in CHEM& 241/251, and concurrent enrollment in CHEM& 252.

CHEM&243 (Formerly CHM 223)

Organic Chemistry III [M/S] • 3.0 Credits

Advanced reaction mechanisms and syntheses. Polymers, macromolecular and biochemical applications, spectroscopy, chromatography, and identification of organic compounds. **Prerequisite:** grade of 2.0 or better in CHEM& 242/252, and concurrent enrollment in CHEM& 253.

CHEM&251 (Formerly CHM 2211)

Organic Chemistry I Lab [M/S] • 3.0 Credits

Lab to be taken concurrently with CHEM& 241.

CHEM&252 (Formerly CHM 2221)

Organic Chemistry II Lab [M/S] • 3.0 Credits

Lab to be taken concurrently with CHEM& 242.

CHEM&253 (Formerly CHM 2231)

Organic Chemistry III Lab [M/S] • 3.0 Credits

Lab to be taken concurrently with CHEM& 243.

Chinese

columbiabasin.edu/chinese

Department Overview: Our Chinese classes offer student-centered instruction that focuses on communicating effectively in Chinese, appreciating the Chinese culture and recognizing linguistic and cultural connections between the Chinese-speaking part of the world and the United States.

CHIN&121 (Formerly CHIN 101)

Chinese I [H] • 5.0 Credits

Introduction to the Chinese language including speaking and listening skills, reading, writing, and grammar, and Chinese culture including geography, customs, daily life, and heritage. Designed for the novice learner of Chinese, with little or no proficiency in the Chinese language. **Recommended prerequisite:** successful completion of at least ENGL 099.

CHIN&122 (Formerly CHIN 102)

Chinese II [H] • 5.0 Credits

Introduction to the Chinese language including speaking and listening skills, reading, writing, and grammar and Chinese culture including geography, customs, daily life, and heritage. **Prerequisite:** CHIN& 121 or instructor permission.

CHIN&123 (Formerly CHIN 103)

Chinese III [H] • 5.0 Credits

Introduction to the Chinese language including speaking and listening skills, reading, writing, and grammar and Chinese culture including geography, customs, daily life, and heritage. **Prerequisite:** CHIN& 122 or instructor permission.

Commercial Driver's License

columbiabasin.edu/cdl

Department Overview: The Commercial Truck Driving program stresses the basic knowledge and skills needed to operate trucks. Includes instruction in safe operation of a trailer, including loading, unloading and specialized docking. Students also receive instruction on federal, state and local laws.

CDL 101

Commercial Driver's License • 5.0 Credits

This course provides an overview of the safety, mechanical components, control systems, and operation overview of the trucks. The basics of the safe operation of a commercial vehicle including defensive driving techniques, managing speed effectively, responding to road and weather conditions, and accident scene management. Also, federal DOT rules and regulations and CDL requirements are covered. **Prerequisite:** must be 18 years of age or older, valid Washington state driver's license, must have clean/clear DMV 5-year abstract, DOT physical, and valid CDL permit for Washington state.

CDL 110

Range Operations and Maneuvers • 1.0 Credit

Classroom instruction on such topics as safety, vehicle control, starting, shifting, proper cornering, straight backing, docking, and braking. **Prerequisite:** CDL 101 or concurrent enrollment.

CDL 111

Range Operations and Maneuvers Lab • 3.0 Credits

Students practice backing and maneuvering skills. **Prerequisite:** CDL 101 or concurrent enrollment.

CDL 115

Backing Maneuvers • 1.0 Credit

This course provides theory and practice of backing skills. **Prerequisite:** CDL 101 or concurrent enrollment.

Courses & Programs

CDL 120

On Street Driving • 1.0 Credit

On the street practice including space and speed management, up and down hills maneuvers, highway and city driving maneuvers, lane changes, and defensive driving. **Prerequisite:** CDL 101 with a 2.0 or better.

CDL 130

Driving Proficiency • 1.0 Credit

Students practice advanced backing and maneuvering skills such as 45 degree blind sight backing, 90 degree sight backing, 90 degree blind sight backing and S backing. **Prerequisite:** CDL 101 with a 2.0 or better.

CDL 140

Transportation Customer Service Skills • 2.0 Credits

This course helps identify the external and internal customers in the transportation industry and focuses on building effective customer service, public relations, listening, conflict resolution, and communication skills. **Prerequisite:** CDL 101 or concurrent enrollment.

CDL 145

Preventive Maintenance • 1.0 Credit

This course is intended to provide truck driving students with information on how to confirm proper operating levels, evaluate wear, identify symptoms, troubleshoot problems, and effectively communicate with maintenance operations. **Prerequisite:** CLD 101 or concurrent enrollment.

CDL 150

Cooperative Work Experience • 1.0 Credit

This course is intended to provide the student with on-the-job driving and navigating experience. Gain experience with cargo loading, securing loads and documentation, map reading, DOT logbooks, and trip planning. **Prerequisite:** CDL 101, 110, 111, 115, 120, 130, and 140 with a 2.0 or better.

Communication Studies

columbiabasin.edu/communication

Department Overview: Communication Studies is a discipline that focuses on the ability of individuals to communicate effectively in a variety of environments. Students will explore both the theory and practice of fundamental communication skills and strategies. They will examine the human, social, political, institutional and mediated dimensions of human communications. This department offers instruction in a wide range of communication areas including Public Speaking, Mass Media, Interpersonal Communication and Multicultural Communication, Oral Interpretation and Small Group Discussion. Students on the Communication Studies Pathway prepare themselves for a multitude of career opportunities. Those may include advertising, business, education, journalism, electronic media production, marketing, law and public relations.

CMST 103 (Formerly SPE 103)

Workplace Communication • 3.0 Credits

Students in the workforce are able to develop a toolbox of communication strategies and techniques. These tools include interviewing, customer service, cultural diversity, and resolving conflicts topics.

CMST 104 (Formerly CMST 101)

Speech Essentials [C] • 3.0 Credits

This is a basic course in public speaking. The goal of this course is to introduce, practice, and become comfortable speaking in front of people in the workplace and in the community. This course is recommended for students with no previous speech experience. Students are taught different forms of public speaking, learn to be more effective communicators, and learn how to organize their ideas for effective and efficient oral communication. Credit not granted for both CMST 104 and CMST& 220.

CMST 108 (Formerly SPE 108)

Voice and Articulation • 3.0 Credits

An introduction to problems of pronunciation and enunciation. Through voice and articulation techniques and the use of the international phonetic alphabet, students gain basic knowledge of phonetics and anatomy of speech. Individual attention is given to minor speech problems.

CMST 110 (Formerly SPE 110)

Communication Behavior [C] • 3.0 Credits

An introduction to the basic elements that impact our communication with each other. The course is designed to illustrate the reasons for communication failures in two-party and small group situations. Among other areas, active listening, conflict communication, self-esteem, and assertiveness are covered. Credit not granted for both CMST 110 and CMST& 210.

CMST 141 (Formerly SPE 141)

Debate I • 2.0 Credits

Provides investigation and practice in oral problem-solving through debate format and impromptu speaking. Includes principles of argumentation and analysis of propositions; use of tests of evidence, reasoning, and logic; detection of fallacies, structure of arguments, and methods of refutation and rebuttal. Students are expected to attend a minimum of two debate tournaments. **Recommended prerequisite:** CMST 101 or equivalent.

CMST 142 (Formerly SPE 142)

Debate II • 2.0 Credits

Provides investigation and practice in oral problem-solving through debate format and persuasive speaking. Includes principles of argumentation and analysis of propositions; use of tests of evidence, reasoning, and logic; detection of fallacies, structure of arguments, and methods of refutation and rebuttal. Students are expected to attend a minimum of two debate tournaments. **Recommended prerequisite:** CMST 101 or equivalent.

CMST 143 (Formerly SPE 143)

Debate III • 2.0 Credits

Provides investigation and practice in oral problem-solving through debate format and extemporaneous speaking. Includes principles of argumentation and analysis of propositions; use of tests of evidence, reasoning, and logic; detection of fallacies, structure of arguments, and methods of refutation and rebuttal. Students are expected to attend a minimum of two debate tournaments. **Recommended prerequisite:** CMST 101 or equivalent.

CMST 198 (Formerly CMST 199)

Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

CMST 201

Studies in Media & Culture: Rotating Genre Study • 5.0 Credits

Introduces students to genre-based narrative theories in mass media studies. Each quarter a particular genre of media is selected and students critically analyze a given set of mass media artifacts, possibly including films, television shows, video games, advertisements, books, music videos, or toys. Based on this analysis, students learn to criticize and practically engage the ideologies inherent in their surrounding media environments.

CMST 221 (Formerly SPE 220)

Communication Skills for Conflict Resolution [H] • 5.0 Credits

This course is highly recommended for those majoring in a number of disciplines including Business, Human Resources, Human Services, Criminal Justice, Pre-Law, Psychology, and those interested in improving their skills in resolving personal and work-related conflict. Employers value those with conflict resolution skills, as interpersonal dispute is cited as the major reason for termination of employees and disruptions to business. Students study conflict theory, practice communication skills, and utilize a basic mediation process plus a face-to-face negotiation technique to engage in active and constructive problem-solving and conflict resolution.

Courses & Programs

CMST 240 (Formerly SPE 240)

Leadership Development • 5.0 Credits

A study in theory and practice to develop individual leadership skills for the students' personal, professional, and academic lives. Includes substantial experiential learning opportunities to practice leadership in action. **Prerequisite:** ENGL& 101 or instructor permission.

CMST 241 (Formerly SPE 241)

Applied Leadership I • 2.0 Credits

This course explores leadership skills, concepts, and theories as it relates to student involvement on campus. **Prerequisite:** instructor permission.

CMST 242 (Formerly SPE 242)

Applied Leadership II • 2.0 Credits

A continuation of CMST 241, this course explores leadership skills, concepts, and theories as it relates to student involvement on campus. **Prerequisite:** instructor permission.

CMST 243 (Formerly SPE 243)

Applied Leadership III • 2.0 Credits

A continuation of CMST 242, this course explores leadership skills, concepts, and theories as it relates to student involvement on campus. **Prerequisite:** instructor permission.

CMST 246 (Formerly SPE 246)

Oral Interpretation [H] • 5.0 Credits

Students are taught to use their voices more effectively for character interpretation and presentation. Demonstrations, class exercises, and oral reading assignments are employed.

CMST 256 (Formerly SPE 253)

PARL Procedures • 1.0 - 2.0 Credits

The theory and study of parliamentary procedures.

CMST 260 (Formerly SPE 260)

Multicultural Communication [C] • 5.0 Credits

Multicultural Communication teaches students culturally-sensitive methods of identifying basic problems involving communication failures across ethnic and racial settings. Students also learn to apply various multicultural approaches to behavior modification, racism, sexism, the valuing of cultural diversity, collaboration, and the move toward inherent pluralism. **Prerequisite:** ENGL& 101.

CMST 298 (Formerly CMST 299)

Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

CMST&101

Introduction to Communication Studies [C] • 5.0 Credits

Students in this survey course will explore the theory and practice of fundamental communication skills and strategies. This course emphasizes investigation and understanding in three core settings: public speaking communication, small group communication and interpersonal communication. Ancillary fields of multicultural communication and mass media will be examined. Students will also learn to prepare, deliver and critique effective presentations.

CMST&102 (Formerly JOR 100)

Intro to Mass Media [S/B] • 5.0 Credits

This course offers an overview of historical, cultural, economic, and social issues affected by the development and continued evolution of mass media. Media products analyzed will be both traditional (print, audio, film, etc.) and evolving (digital). Upon completing this course, students will be conscious of how viewpoints are shaped by the media and be more critical consumers of media products.

CMST&210 (Formerly SPE 111)

Interpersonal Communication [C] • 5.0 Credits

This course is recommended for students seeking to improve their communication with friends, family, and co-workers. It is designed to heighten the students' awareness of personality styles and communication behaviors, and their respective impact on interpersonal and group communication. Credit not granted for both CMST 110 and CMST& 210.

CMST&220 (Formerly SPE 102)

Public Speaking [C] • 5.0 Credits

This is a basic course in speech that expands beyond the three-credit requirement for an AA degree. The goal of this course is to introduce, practice, and become comfortable speaking in front of people in the workplace and in the community. This course is recommended for students with no previous speech experience. Students are taught different forms of public speaking. Students learn to be more effective communicators and organize their ideas for effective and efficient oral communication. Credit not granted for both CMST 101 and CMST& 220.

Community Education

columbiabasin.edu/communityed

Department Overview: The Community Education department offers a variety of opportunities for the lifelong learner to take courses for professional development or personal enrichment.

CSRE 002

Traffic Control • 0.0 Credits

CBC offers the Evergreen Flagger Training Certification program, which is the most recognized course for flagger training in Washington state. The handbook and instructor's manual are constantly updated and contain all the timely information and requirements. This program is approved by the Washington State Traffic Control Oversight Committee. This is a one-day class in which Evergreen-certified instructors are authorized to issue a Washington State Certified Flagging card upon successful completion of the class and test. This card, which is recognized in Washington, Oregon, and Idaho, is required for flaggers working on WSDOT construction projects. It meets Dept. of Labor & Industries requirements for WAC 296-155-305, Flagger Training Requirements for Washington state. Class is held at the Pasco campus from 8:30 a.m. to 4 p.m. The cost is \$60. Pre-registration and pre-payment is required and students are asked to bring their payment receipt to class. CBC does not refer positions.

CSRE 003

Traffic Control Recertification • 0.0 Credits

Columbia Basin College offers the Evergreen Flagger Training Certification program which is the most recognized course for Flagger Training for Washington state. This Flagger card is accepted in Oregon and Idaho as well. The handbook and instructor's manual are constantly updated and contain all the timely information and requirements. Recertification class must meet certain criteria mandated by Evergreen Safety Council. Please call 509-542-4804 for more information.

CSRE 095

Orientation to Correctional Careers • 1.0 Credit

Introduces students to a basic understanding of how important communicating professionally is to the correctional environment. It introduces four areas that are identified as crucial when working in the corrections profession, and provides a basic understanding of how important observation, listening, verbal, and written communications are for correctional employees and correctional facility smooth operations. This course also provides a basic understanding of being able to communicate clearly and professionally with co-workers. **Prerequisite:** criminal background check acceptable to the Department of Corrections.

Courses & Programs

CSRE 096

Communication in Corrections • 1.0 Credit

Introduces students to a basic understanding of how important communicating professionally is to the correctional environment. It introduces four areas that are identified as crucial when working in the corrections profession, and provides a basic understanding of how important observation, listening, verbal, and written communications are for correctional employees and correctional facility smooth operations. This course also provides a basic understanding of being able to communicate clearly and professionally with co-workers. **Prerequisite:** criminal background check acceptable to the Department of Corrections.

CSRE 097

Supervision/Human Relations in Corrections • 1.0 Credit

Introduces students to the diverse workforce and offender population, and helps them understand the very basics of supervising offenders in a correctional environment. It also provides a basic understanding of how a corrections employee deals with the day-to-day duties in managing a diverse ethnic offender population, while being a positive and professional team member. **Prerequisite:** criminal background check acceptable to the Department of Corrections.

Computer Applications

columbiabasin.edu/ca

Department Overview: These courses are offered for students wishing to enhance their knowledge of current software programs. Completing CA 120, CA 140, CA 150 and CA 160 is equivalent to completing CS 101. Students can only receive graduation credit for CS 101 or CA 120, CA 140, CA 150 and CA 160.

CA 100

Introduction to Microcomputers • 4.0 Credits

Introduces hardware and software concepts, operating systems and/or interface systems, Internet access, basic word processing, and spreadsheet software through hands-on experience. **Recommended prerequisite:** keyboarding experience.

CA 101

Keyboarding I • 2.0 Credits

Introduces the fundamentals of touch typing of letters, numbers, symbols, and operational keys using a computer.

CA 102

Keyboarding II • 2.0 Credits

Reinforces keyboarding skills. Introduces appropriate formatting of business letters, personal letters, memos, reports, and tables using word processing software. **Prerequisite:** CA 101 (formerly AOT 101) with a 2.0 or better or instructor permission.

CA 103

Presentations Graphics Applications • 2.0 Credits

Introduces the fundamentals of Microsoft PowerPoint. Students learn how to create and modify a slide presentation, insert clip art, add slide transition effects, as well as more advanced operations such as creating graphic objects. Preparation for Microsoft Office User Specialist, Microsoft PowerPoint Expert Certification. **Prerequisite:** CA 100.

CA 120 (Formerly CA 1002)

Intro to Computer & Info Tech - Concepts • 2.0 Credits

Emphasizes the cognitive aspects of dealing with Information Technology (IT): evaluating information, learning practical IT skills, solving problems, and dealing with information related issues such as privacy, security, and ethics. Topics also include: navigating the Internet, using Windows, computer hardware and software concepts, identification of system board parts, input/output devices, and types of storage.

CA 130 (Formerly CA 1003)

Windows Operating System • 1.0 Credit

Introduces students to the current Windows operating system. Topics include: screen identification, using Help and Support, arranging and sizing windows, personalizing your PC, and file management.

CA 140 (Formerly CA 1004)

Intro to Computer & Info Tech - MS Word • 1.0 Credit

Introductory class to Microsoft Word, a word processing software application that enables you to easily create both simple and complex documents.

CA 150 (Formerly CA 1005)

Intro to Computer & Info Tech - MS Excel • 1.0 Credit

Introductory class to Microsoft Excel, a spreadsheet application typically used to display and manipulate numerical data.

CA 160 (Formerly CA 1006)

Intro to Computer & Info Tech - MS PowerPoint • 1.0 Credit

Introductory class to Microsoft PowerPoint, a presentation software application that allows you to combine text and graphics for on-screen presentations.

CA 170 (Formerly CA 1007)

Microsoft Outlook • 1.0 Credit

Basic concepts of learning how to become more effective in your communication through understanding of email features and working with messages; how to view and manage your calendar, create/group contacts, schedule appointments, events, and tasks, and use of reminder options.

CA 180 (Formerly CA 1008)

Microsoft Access • 1.0 Credit

Basic concepts of database management systems: creating a new database, sorting and filtering records, using table wizards, creating forms, working with queries, and designing a report.

CA 199

Special Studies • 1.0 - 5.0 Credits

A class used to explore new approaches to software applications.

CA 299

Special Studies • 1.0 - 5.0 Credits

A class used to explore new approaches to software applications.

Computer Science

columbiabasin.edu/computerscience

Department Overview: The Computer Science (CS) department is committed to providing students and the community with the training, academic studies and valuable hands-on experience necessary for employment in the Information Technology industry. To ensure current and relevant curriculum in this dynamic field and further its commitment to excellence, the department actively pursues partnerships with state and area employers, other colleges and baccalaureate institutions and advisory committee members from IT-related fields.

Students may earn the following:

Certificate:

- Computer and Information Technology

Two-year Associate in Applied Science (AAS) degrees:

- Cyber Security
- Database Administrator
- Information Technology
- IT Support Technology
- Network Administrator
- Programming and Software Development

Courses & Programs

Four-year Bachelor of Applied Science (BAS) degrees:

- Cybersecurity
- Information Technology

Many courses are designed to help students prepare for industry certifications. Please note that the certification exams are difficult to pass. The Computer Science classes provide the students with an opportunity to obtain technical knowledge and product experience, but passing any certification exam requires extra study, work and initiative on the student's part.

New students may apply to CBC and begin taking Computer Science classes any quarter of the year. Classes are offered in several formats, day night, online and hybrid. Many classes can be completed at an accelerated pace.

The Columbia Basin College Computer Science department acknowledges that students may have mastered specific skills and competencies outside of the formal classroom experience. For example, you may have gained work-place experience or may be self-taught. Both CBC and the Computer Science department recognize various non-traditional programs and will possibly award a student college credit and/or placement in advanced classes. In accordance with the CBC Non-traditional Credit Policy, the Computer Science department provides two methods for earning nontraditional credit and/or placement: passing a challenge test or presenting proof of a current industry certification.

The Computer Science department has also developed articulation agreements with several of the local school districts. These articulation agreements grant students college credit for taking relevant high school classes. Students in the local K-12 school districts should check with their advisors for the availability of these classes.

Computer Science Program Outcomes:

- Graduates will be able to analyze a problem, identify and define the computing tools and techniques relevant to its solution.
- Graduates will be able to develop an efficient algorithm to solve a given problem.
- Graduates will be able to recognize and define concepts of computer systems, database systems, security, hardware, software, programming languages and networks.
- Graduates will understand the professional, ethical and societal issues and responsibility.
- Graduates will be able to write, present and use interpersonal skills to effectively communicate with customers, supervisors and co-workers.

CS 101

Intro to Computers & Information Technology • 5.0 Credits

CS 101 is a five-credit introductory class designed to meet the needs of all students as defined in CBC's Using Information Technology & Tools Student Learning Outcome. The class emphasizes the cognitive aspects of dealing with Information Technology (IT): evaluating information, learning practical IT skills, solving problems, and dealing with information-related issues such as privacy, security, ethics, etc. Students also learn computer basics using Windows, Word, Excel, PowerPoint, email, and Internet skills to locate, present, and report information. **Prerequisite:** MATH 084 with a grade of 2.0 or better, or MATH 084 with a grade of P if taken before spring 2016, or MATH 040 or MATH 050 with a grade of 2.0 or better or concurrent enrollment.

CS 102

Programming Fundamentals [M/S] • 5.0 Credits

An introduction to programming using current technologies. It is designed for those with little or no programming experience. Topics include: program development cycle, fundamentals of programming and logic, decisions, repetitions, controls, functions, and procedures. **Prerequisite:** MATH 094 or MATH 095 or MATH 098 with a 2.0 or better or appropriate placement or MATH 050 or MATH 070 or MATH 072 with a 2.0 or better or appropriate placement.

CS 106

Database Systems • 5.0 Credits

This is a beginning database course in which students create, modify, and implement relational databases using Microsoft Access. Topics include: tables, queries, forms, reports, sharing information with other programs, data access pages, advanced queries, managing database objects, and creating macros and navigation forms. **Recommended prerequisite:** CS 101 with a 2.5 or better. **Prerequisite:** MATH 084 with a grade of 2.0 or better, or MATH 084 with a grade of P if taken before spring 2016, or MATH 040 or MATH 050 with a grade of 2.0 or better or test placement.

CS 107

Intermediate Word Processing • 2.0 Credits

Students learn to create documents using the current version of Microsoft Word. Students learn the principles of word processing to produce and revise a variety of business documents including brochures, flyers, and memoranda. These documents include tables, graphics, and custom formatting to effectively convey written information. **Prerequisite:** CS 101.

CS 108

Intermediate Spreadsheets • 2.0 Credits

Students learn to develop spreadsheets using the current version of Microsoft Excel. Students learn how to use the principles of spreadsheet applications to solve a variety of financial, marketing, manufacturing, and business problems. This course includes hands-on instruction regarding how to use formulas to analyze data and generate documents using charts and graphs focusing on appearance and effectiveness of conveying information. **Prerequisite:** CS 101.

CS 117

Computer Ethics • 2.0 Credits

Covers essential topics of information and technology ethics. Students will understand what to do and what not to do as a user and an employee. Topics include: ethics and information technology, IT configured societies, information flow, privacy and surveillance, digital intellectual property, and professional ethics in computing. Students work in small groups to discuss important issues based on scenarios given. **Prerequisite:** CS 101 or concurrent enrollment and ENGL 099 or appropriate placement. All CS prerequisites must be passed with a 2.5 or better.

CS 118

Customer Service • 3.0 Credits

Helps students develop the skills needed to present a professional image and to communicate effectively in everyday customer service transactions, as well as in difficult situations. Students learn about various types of customers and develop strategies for dealing with each. Emphasis is placed on verbal and nonverbal communication, listening to the customer, customer service in a diverse world, managing stress and time, encouraging customer loyalty, and recovering customers after a breakdown in service. **Prerequisite:** MATH 084 with a grade of 2.0 or better, or MATH 084 with a grade of P if taken before spring 2016, or MATH 040 or MATH 050 with a grade of 2.0 or better or appropriate placement.

CS 123

PC Hardware • 5.0 Credits

Students gain the knowledge, skills, and abilities essential to become a successful computer service technician as defined by experts from companies across the industry. Students learn how to troubleshoot and repair hardware problems and install components. Hardware topics include: power supply, CPUs and motherboards, memory, I/O busses, removable and fixed drives, optical drives, graphics and sound, and networking and printers. Other topics include: the DOS operating system, number systems, working safely and professionally, and the customer relations skills necessary for the industry. **Prerequisite:** CS 101 or concurrent enrollment. All CS prerequisites must be passed with a 2.5 or better.

Courses & Programs

CS 127

Windows Configuration • 5.0 Credits

Prepares students to develop the skills needed to deploy and manage a Windows desktop operating system. Students learn about hardware management, network configuration, application management, Windows installation, mobile computing, and system monitoring and maintenance. **Prerequisite:** CS 101 or concurrent enrollment. All CS prerequisites must be passed with a 2.5 or better.

CS 140

SharePoint • 5.0 Credits

Provides students with the knowledge and skills that are needed to use and manipulate fundamental features of SharePoint Server. Students are introduced to core functions of SharePoint Server to gain a deeper insight of the capabilities and use of these functions and features. This information will assist students in effectively applying and securing SharePoint in a business environment. **Prerequisite:** CS 101 and CS 228, both with a 2.5 or better.

CS 150

Computer Security • 5.0 Credits

This class covers the basics of computer security. Students learn about virus protection, installing security patches, using firewalls to protect networks, cryptography and Public Key Infrastructure (PKI), and legal issues. **Prerequisite:** CS 101 with a 2.5 or better and MATH 096 with a 2.0 or better or MATH 050 or MATH 060 with a 2.0 or better or appropriate placement.

CS 162

C++2 [M/S] • 5.0 Credits

This is an intermediate C++ course that provides students an understanding of key object-oriented programming (OOP) theories and concepts, and how to create and manipulate objects in a GUI environment. Students learn advanced features of C++ including: arrays, strings, file processing, classes, inheritance, composition, pointers, virtual functions, templates, and introduction to linked lists. **Prerequisite:** CS& 131 with a 2.5 or better.

CS 199

Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework. **Prerequisite:** as needed.

CS 202

Programming Fundamentals 2 [M/S] • 5.0 Credits

This is an intermediate programming course using current technologies. Students learn to write, design, and debug Windows applications using a variety of controls and events, procedures, functions, arrays, structures, files, classes/Object Oriented design, database programming, and calculations to solve problems. Class projects involve writing games and business applications. **Prerequisite:** CS 102 with a 2.5 or better.

CS 206

Database Design • 5.0 Credits

An advanced course designed to help students understand concepts including: SQL, relational algebra, integrity constraints, relational database design, normalization, and physical database design. Students will gain hands-on experience designing a functional relational database. **Prerequisite:** CS 106 with a 2.5 or better and MATH 094 or MATH 095 or MATH 098 or MATH 050 or MATH 070 or MATH 072 with a 2.0 or better or appropriate placement.

CS 207

Word Implementation • 5.0 Credits

This class teaches application-specific skills that enable students to effectively implement, support, and troubleshoot Microsoft Word within a corporate environment. There is a strong emphasis on the skills required for supporting users of Microsoft Word in a workgroup. This class is designed to help prepare students for the MOUS Word Expert Certification test. (Extra study and product experience are typically required to pass a certification exam.) **Prerequisite:** CS 107 with a 2.5 or better.

CS 208

Advanced Spreadsheets • 5.0 Credits

An advanced spreadsheets course with topics including: integrating Excel with other Windows programs and the World Wide Web, working with multiple worksheets, data tables and scenario management, using solver for complex problems, importing data into Excel, exchanging Excel with Visual Basic, and installation and troubleshooting user's problems. **Prerequisite:** CS 108 with a 2.5 or better and MATH 096 or MATH 050 or MATH 060 with a 2.0 or better or appropriate placement.

CS 221

SQL Server Administration • 5.0 Credits

This course provides students with the knowledge and skills to install, configure, administer, and troubleshoot Microsoft SQL Server client/server database management systems. It helps prepare students for the MCDBA Certificate. **Prerequisite:** CS 106 and CS 228, both with a 2.5 or better, and MATH 094 or MATH 095 or MATH 098 or MATH 050 or MATH 070 or MATH 072 with a 2.0 or better or appropriate placement.

CS 223

UNIX/Linux • 5.0 Credits

This course helps prepare students for working with other operating systems. Students learn how to use UNIX/Linux, which is an industry standard, and widely used on the Internet. Covers basic user commands, customizing the user shell, the vi editor, and basic scripting. **Prerequisite:** CS 101 with a 2.5 or better and MATH 094 or MATH 095 or MATH 098 or MATH 050 or MATH 070 or MATH 072 with a 2.0 or better or appropriate placement.

CS 225

SQL Server Programming • 5.0 Credits

This course provides students with the knowledge and skills to implement a database solution using Transact SQL and Microsoft SQL Server. Topics include: manipulating data using Transact SQL, enforcing referential integrity, managing relationships, and implementing a physical database ensuring data integrity. **Prerequisite:** CS 106 with a 2.5 or better and MATH 094 or MATH 095 or MATH 098 or MATH 050 or MATH 070 or MATH 072 with a 2.0 or better or appropriate placement.

CS 228

Windows Server • 5.0 Credits

This course prepares students to work with Windows Server. This course covers topics related to installation, configuration, troubleshooting, and optimization of a Windows Server. Students learn to set up and maintain users, groups, and file systems. Students learn how to use critical thinking and troubleshooting tools to troubleshoot the server, printers, and workstations. This class helps to prepare students to pass one of the Windows exams. **Recommended prerequisite:** CS 127 with a 2.5 or better. **Prerequisite:** MATH 094 or MATH 095 or MATH 098 or MATH 050 or MATH 070 or MATH 072 with a 2.0 or better or appropriate placement.

CS 230

Active Directory • 5.0 Credits

This course is designed to provide students with the knowledge and skills necessary to install, configure, and administer Microsoft Windows Active Directory. The course also focuses on implementing Group Policy and performing the Group Policy-related tasks that are required to centrally manage users and computers. **Prerequisite:** CS 228 with a 2.5 or better and MATH 094 or MATH 095 or MATH 098 or MATH 050 or MATH 070 or MATH 072 with a 2.0 or better or appropriate placement.

CS 231

Network Infrastructure • 5.0 Credits

This course prepares students to install, manage, monitor, configure, and troubleshoot DNS, DHCP, Remote Access, Network Protocols, IP Routing, and WINS in a Windows network infrastructure. In addition, this class prepares students to manage, monitor, and troubleshoot Network Address Translation and Certificate Services. It also prepares students to pass one of the MCSA/MCSE exams. **Prerequisite:** CS 228 with a 2.5 or better and MATH 094 or MATH 095 or MATH 098 or MATH 050 or MATH 070 or MATH 072 with a 2.0 or better or appropriate placement.

Courses & Programs

CS 232

Network Security • 5.0 Credits

This course builds on the experience users gain in previous network and security classes. The class is designed around the layered security framework concept including setting up perimeter defenses down to protecting your data. The class teaches how to implement the proper security measure at each layer to protect the network from a myriad of threats. **Prerequisite:** CS 150 and CS 228, both with a 2.5 or better, and MATH 094 or MATH 095 or MATH 098 or MATH 050 or MATH 070 or MATH 072 with a 2.0 or better or appropriate placement.

CS 236

Advanced Object Oriented Programming [M/S] • 5.0 Credits

An advanced course in Java programming in which students create applications to solve problems using common algorithms and Object Oriented Design. Topics include: classes, methods, interfaces, inheritance, exceptions, stacks, queues, linked lists, recursion, and binary trees. **Prerequisite:** CS& 141 with a 2.5 or better.

CS 250

HTML5-JavaScript/JQuery • 5.0 Credits

An introduction to dynamic client-side website development using JavaScript and JQuery. Students learn JavaScript to manipulate HTML and CSS elements, adding rich features to websites and mobile devices. Other topics include: JSON, HTML DOM, PHP, and Ajax. **Prerequisite:** CS 102 or CS& 131 or CS& 141 with a 2.5 or better.

CS 260

Data Structures in C++ • 5.0 Credits

This course is the third in a series of three in which students learn the C++ programming language and how to implement and use different types of data-structures. This leads students to create data-driven programs and algorithms. Students also learn more about linked lists, stacks, queues, binary trees, and binary search, recursion, and sorting. The course starts at a level that assumes a good working knowledge of C++. **Prerequisite:** CS 162 with a 2.5 or better.

CS 262

Game Programming Design and Development • 5.0 Credits

Helps students understand important fundamentals of how to develop game applications using object-oriented development techniques. Course projects involve developing, debugging, and optimizing games for multiple hardware platforms. **Prerequisite:** CS 102 or CS& 131 or CS& 141 or instructor permission. **All prerequisites must be passed with a 2.5 or better.**

CS 299

Special Studies • 1.0 - 5.0 Credits

A class used to explore new coursework.

CS& 131 (Formerly CS 161)

Computer Science I C++ [M/S] • 5.0 Credits

This class is the first in a series of three in which students learn the C++ programming language. C++ is an extension of C language, which includes both procedural and object-oriented programming. It is the basis for most PC-based windows programs. Students learn C++ keywords, control structures, functions, arrays, strings, and introduction to classes and objects. **Prerequisite:** MATH 094 or MATH 095 or MATH 098 or MATH 050 or MATH 070 or MATH 072 with a 2.0 or better or appropriate placement.

CS& 141 (Formerly CS 215)

Computer Science I Java [M/S] • 5.0 Credits

Java is an object-oriented programming language that is widely used to enhance information delivery on the web. Topics include: compiling and running a Java program, use of selection, loop structures, arrays, file processing, and introduction to classes and objects. Students learn how to write and debug Java programs with and without graphical user interfaces. **Prerequisite:** MATH 094 or MATH 095 or MATH 098 or MATH 050 or MATH 070 or MATH 072 with a 2.0 or better or appropriate placement.

Computer Science Information Technology

columbiabasin.edu/computerscience

Department Overview: Computer Science Information Technology (CSIT) is a course prefix designated for upper level (300-400) courses. Currently, the CSIT courses are required for the Bachelor of Applied Science in Information Technology (BAS IT) degree.

Information forms the backbone of nearly every modern enterprise. The ability to manipulate this information, using the software, is essential to the success of modern enterprises. The BAS IT prepares students to design and develop software and database solutions in the ever changing information technology industry. Upon completion of the program, successful students will be able to:

- Protect an organization's critical information systems and assets by ethically integrating best practices in security, risk management and business continuity throughout an enterprise.
- Design, develop and implement database solutions.
- Understand data retrieval, communication and security issues dealing with data assurance.
- Recognize problems and manipulate data using programming techniques, software tools and technologies to solve problems.
- Formulate, update and communicate short- and long-term organizational strategies and policies.

CSIT 301

Information Systems • 5.0 Credits

The course is designed to help students understand the importance and elements of today's information technology (IT) systems. Topics include actual and contemporary examples to clearly illustrate how they can be applied to improve and strengthen IT organizations, IT security, and hands-on scenarios for class projects. **Prerequisite:** CS 206 and CS 250 and meets the criteria for acceptance into a BAS/BSN program and completion of a two-year degree or equivalent.

CSIT 306

Intro to Big Data and Analysis • 5.0 Credits

The course provides a comprehensive view on computing architectures in data analytics and data mining. Topics include big data characteristics and algorithms, analyzing tools, data mining techniques, massive databases processing, implementation of machine learning algorithms, and analytics environments. Students learn to conceptualize an analytic environment that is suited to the challenges of today's analytics demands. **Prerequisite:** CSIT 311 and meets the criteria for acceptance into a BAS/BSN program and completion of a two-year degree or equivalent.

CSIT 311

Python for Data Processing • 5.0 Credits

This course is designed for students who have an object-oriented programming background. Students learn to use built-in data structures in Python computer language to perform complex data analysis. Students also learn to work with HTML, XML, and JSON data in Python to do basic data visualization. **Prerequisite:** CS 250 and (CS 236 or CS 260) and meets the criteria for acceptance into a BAS/BSN program and completion of a two-year degree or equivalent.

Courses & Programs

CSIT 316

Cloud Computing HTML5 and PHP • 5.0 Credits

This course in database-driven websites gives students an understanding of HTML5 with PHP (Hypertext Preprocessor). Students acquire web development techniques that use databases to create content with HTML form objects, database connections, and server side programming. Use of HTML5, MySQL, and PHP5 for programming turns simple static websites into dynamic, database-driven web applications. Course projects involve developing, debugging, PHP, and SQL. **Prerequisite: CS 206 and CS 250 and meets the criteria for acceptance into a BAS/BSN program and completion of a two-year degree or equivalent.**

CSIT 401

Information Systems Analysis and Design • 5.0 Credits

This course covers web development, service-oriented architecture, traditional, UML, and object-oriented approaches to information technology systems analysis and design. Real world case projects and technologies are provided throughout the course for hands-on exercises. Students apply the concepts learned to develop a conceptual, technical, and managerial foundation for systems analysis design and implementation as well as project management principles for systems development. **Prerequisite: PROJ 100 with a 2.0 or better and meets the criteria for acceptance into a BAS/BSN program and completion of a two-year degree or equivalent.**

CSIT 411

Agile Methodology & ePortfolio Planning • 5.0 Credits

This course represents the integration of previous coursework and practical experience with a focus on authentic demonstration of competencies outlined by the program. This course also covers Agile Methodology practices for teamwork using Scrum techniques. Students use an open source ePortfolio to collect information on performance-based artifacts combined with metacognitive reflection and a professional statement of purpose that reflects their ability to make globally, socially, and ethically responsible information technology and systems decisions that are aligned with the legal and organizational policy requirements. Students also reflect on a previous project and describe in writing how Scrum techniques could have been used to make their project more successful. **Prerequisite: PROJ 100 and CSIT 401 and meets the criteria for acceptance into a BAS/BSN program and completion of a two-year degree or equivalent.**

CSIT 416

Data Visualization • 5.0 Credits

This course introduces a data analytics tool used to prepare and analyze data for effective visualizations. Students learn theory and concepts of data analytics and how to display and share data in a meaningful way. Students also learn the principles of preparing, analyzing, and processing data to create desired data visualizations. **Prerequisite: CSIT 306 and meets the criteria for acceptance into a BAS/BSN program and completion of a two-year degree or equivalent.**

CSIT 421

IT Capstone • 5.0 Credits

This course integrates all IT knowledge and skills learned in previous courses into a project. Emphasis is placed on secure information system design, process planning, procedure definition, business continuity, and systems security architecture. Students design and implement a comprehensive information system from the planning and design phase through execution. **Prerequisites: CSIT 411 or concurrent enrollment and meets the criteria for acceptance into a BAS/BSN program and completion of a two-year degree or equivalent.**

Criminal Justice and Forensics

columbiabasin.edu/criminaljustice

Department Overview: This program focuses upon the need for a broad background of educational experience. The highly complex and constantly changing lifestyle of our society demands that the Criminal Justice person understands the principles of human behavior and communication as well as the nature of law enforcement's function.

The Associate degree program is designed to prepare the individual for a career in Criminal Justice by providing the students with the background necessary to function at the entry-level and to advance to the limits of their ability. A large number of related Criminal Justice career fields and programs are open to graduates of this program.

Students must obtain an overall average GPA of 2.3 or higher in the Criminal Justice Major Course section of the degree, and students must also obtain an overall average GPA of 2.0 or higher for successful degree completion.

Students not expressly interested in careers in law enforcement, but interested in learning more about individual rights, the law and the Criminal Justice system are encouraged to examine the introduction to Criminal Justice, Criminal Law and Constitutional Law classes.

At the end of the program successful students will be able to:

- Compete for entry-level jobs in Criminal Justice
- Apply Criminal Justice theories to contemporary policy and practice
- Resolve conflict in a variety of situations
- Identify cultural differences and how those differences affect decisions and behavior
- Apply high ethical standards to Criminal Justice case studies and simulations
- Apply criminal laws as a Criminal Justice worker in a variety of case studies or simulations

CBC's Criminal Forensic Science program combines both the field of Science and the field of Criminal Justice. The Forensic Science degree prepares the student for a career as a scientist in a Forensic laboratory. CBC's Forensic Science program offers a two-year degree for students who plan to obtain a Chemistry or Bio/Chemistry degree from a four-year university. The Forensic Science degree combines courses of investigation, evidence, criminal law and procedures with science courses of chemistry, calculus, analytic geometry and quantitative analysis. Upon completion of a four-year degree in Chemistry or Bio/Chemistry from an accredited university, the student will be able to apply for entry-level positions in forensic laboratories that specialize in both criminal and civil evidence analysis.

Degrees:

- Associate in Applied Science in Forensics Associate in Applied Science in Criminal Justice

The program prepares students for a career in criminal justice by providing them with the background needed to function in entry-level positions, develop professionally, or continue their education at a four-year institution. Instruction includes traffic control, criminal investigation, criminal justice, criminal law, organization and administration, constitutional law, alcohol/drug pharmacology, criminal evidence, delinquent behavior and administration of justice.

Transferability: The Associate in Applied Science degree is designed for students planning to enter their chosen career upon graduation. Often only selected credits are considered transferable to public or private baccalaureate institutions in Washington state. Selected universities maintain agreements providing for full credit transfer of some AAS degrees.

CJ 104

Introduction to Policing • 5.0 Credits

This course examines the role of policing in American society. Theories and practices of policing from contemporary and historical perspectives are covered. This course also identifies political, social, organizational, and legal environments where the police perform their roles.

CJ 134

Organization/Administration • 5.0 Credits

The principles of organization and administration of the modern law enforcement agency. Principles of management and operation of a law enforcement agency.

Courses & Programs

CJ 135

Traffic Control • 5.0 Credits

A study of the history of traffic control, routine and emergency traffic procedures. Fundamentals of traffic accident investigation are covered.

CJ 137

Constitutional Law • 5.0 Credits

A study of the provisions of the U.S. Constitution with primary emphasis on the Bill of Rights and the 14th Amendment and the application to law enforcement and the criminal justice system.

CJ 197

Internship • 1.0 - 5.0 Credits

A supervised, individual learning experience for students in the law enforcement environment. The experience shall consist of a minimum of six hours per week. The experience assignment is at the discretion of the agency where the student is placed. The agency will make an effort to give the student a well-rounded experience; the assignment may be terminated by either party at any time. **Prerequisite:** instructor permission.

CJ 198

Special Projects • 1.0 - 3.0 Credits

A supervised, individual learning experience for students in the law enforcement environment. The experience shall consist of a minimum of six hours per week. The experience assignment is for the student to conduct a research project that will benefit the student in the criminal justice field. **Prerequisite:** instructor permission.

CJ 199

Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

CJ 222

Alcohol/Drug Pharmacology/Physiology • 3.0 Credits

Physical responses of the human body to alcohol and other drugs, current research findings, basic information, and terminology essential for working in the criminal justice field.

CJ 232

Criminal Investigation • 5.0 Credits

The fundamentals of criminal investigation, criminalistics, and investigative techniques. An overview of investigations of crimes against people and property, and the role of science in crime detection. **Prerequisite:** CJ& 101 or instructor permission.

CJ 234

Criminal Evidence • 5.0 Credits

This course relates to the rules of evidence affecting the admissibility of evidence into court in criminal or civil cases as they pertain to the law enforcement officer or other members of the criminal justice system. This course will focus on court proceedings as they pertain to evidence, witnesses, report writing, exclusionary rule, and search and seizure under the Fourth Amendment. **Prerequisite:** CJ& 101 or instructor permission.

CJ 290

Basic Reserve Officer Law Enforcement Academy • 1.0 - 9.0 Credits

An overview of the fundamental subjects associated with the position of Reserve Law Enforcement Officer. Washington Criminal Justice Training Commission approved. A law enforcement agency sponsorship required.

CJ 299

Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

CJ& 101 (Formerly CJ 131)

Introduction to Criminal Justice [S/B] • 5.0 Credits

This course provides an overview of the criminal justice system discussing law enforcement, the courts, corrections, juvenile justice, and current issues. This course examines the Constitutional requirements, historical development of the system, the agencies, processes, and theories within the criminal justice system. Emphasis is placed on how the various systems interrelate and interact with each other to attain the goal of an equitable delivery of crime-related public service.

CJ& 105

Introduction to Corrections • 5.0 Credits

This course will examine the historical context, philosophical concepts, and major theories that have shaped corrections in the United States. Various sentencing options, correctional approaches and programs, the role of corrections in the larger criminal justice system, and contemporary correctional issues are discussed. Emphasis is placed on the effects of the corrections system on the individuals, families, and society.

CJ& 106 (Formerly CJ 136)

Juvenile Justice • 5.0 Credits

This course will cover the history and philosophy of juvenile justice in America and the impact of present societal reforms on the juvenile justice system. This course will discuss the theories which support the creation, development, and continuance of juvenile justice systems, practices, and procedures in the United States.

CJ& 110 (Formerly CJ 132)

Criminal Law • 5.0 Credits

This course is designed as an introduction into the study of criminal law and will review the difference between crimes against property, crimes against the public, and crimes against a person. This course will study the various mental states required for criminal responsibility and those defenses used in a criminal trial, along with definitions, classifications, elements, and penalties of crime and criminal responsibility.

CJ& 240 (Formerly CJ 242)

Intro to Forensic Science • 5.0 Credits

An overview of the role of the forensic scientist in criminal investigation. Course subject matter focuses on the crime laboratory, instruments, and methods used by the forensic scientist in analyzing criminal evidence. Specialized careers in forensic science are reviewed.

Culinary

<https://www.columbiabasin.edu/culinary>

Department Overview: The culinary program courses help prepare students for entry-level culinary positions in the food industry and food truck business and provide preparation for advanced education in the fields of food science or hospitality. The program provides basic skills in food preparation and production, service and management and provides internship opportunities with local businesses to gain hands-on training.

CUL 116 (Formerly BUS 116)

Food Truck Academy I • 10.0 Credits

This course is designed to offer students and entrepreneurs an introduction to the components necessary to start and operate mobile vending/food trucks in the Mid-Columbia region. Students will learn how to evaluate menu planning; create menu options; determine staffing and inventory needs; apply proven event planning methods; equipment needs; safe food handling and serving; and the general basics of operating a food truck.

Courses & Programs

CUL 117 (Formerly BUS 117)

Food Truck Academy II • 8.0 Credits

This course is designed to offer students and entrepreneurs additional tools and skills needed to establish a mobile vending/food truck business. Students will learn how to develop a brand identity, identify their brand logo, and develop promotional tools; and create a marketing and promotional plan. Additional topics include finances, insurance and laws, codes, and permits and licensing requirements. **Prerequisite:** CUL 116 or instructor permission.

Cyber Security

columbiabasin.edu/cybersecurity

Department Overview: Computer Science Information Assurance (CSIA) is a course prefix designated for upper level (300-400) courses. Currently, the CSIA courses are required for the Bachelor of Applied Science in Cyber Security.

Cybercrime is increasing at a rapid pace thus creating the need for trained cyber security professionals. The BAS Cyber Security degree focuses on the techniques, policies, and procedures that prepare students to secure and defend critical assets. Courses include network fundamentals, ethics, computer forensics, and security. This degree provides the technical skills and knowledge for students who plan to enter the field of information security. The BAS Cyber Security degree also provides a foundation for many industry certifications such as Network+, Security+, CCNA, SSCP, and CEH. CBC also has a cooperative agreement with the University of Washington which allows limited cross-enrollment in UW Cyber Security courses.

Upon completion of the program, successful students will be able to:

- Protect an organization's critical information and assets by ethically integrating cybersecurity risk management and business continuity best practices throughout an enterprise.
- Implement continuous network monitoring and provide real-time security solutions.
- Analyze advanced persistent threats and deploy countermeasures and conduct risk and vulnerability assessments of planned and installed information systems.
- Formulate, update, and communicate short- and long-term organizational cybersecurity strategies and policies.

CSIA 200

Computer Forensics Fundamentals • 5.0 Credits

This course provides students with the fundamentals of computer forensics, cyber crime scene analysis, and electronic discovery, along with associated investigation tools and techniques. Students explore computer forensic theory and focus on various forensic skills including conducting security incident investigations, file system and storage analysis, and data hiding techniques. Students also learn about legal issues and standards. **Prerequisite:** CS 150 with a 2.5 or better and MATH 094 or MATH 095 or MATH 098 or MATH 050 or MATH 070 or MATH 072 with a 2.0 or better or appropriate placement.

CSIA 250

Networking Fundamentals • 5.0 Credits

This course focuses on implementing, managing, protecting, and troubleshooting small to medium size enterprise branch networks. Topics covered include OSI model, Cisco devices, wireless networks, switching, IP routing, troubleshooting routing, and advanced TCP/IP configuration. This course prepares students for the Cisco Certified Network Associate (CCNA) exam. **Prerequisite:** CS 228 and 231. CS 231 can be taken concurrently.

CSIA 300

Cyber Security and Information Assurance • 5.0 Credits

This course provides students with the tools and resources needed to develop an understanding of the CISSP certification body of knowledge. Using a variety of pedagogical features, students learn security basics such as security laws, access control, cryptography, and security architecture and design. **Prerequisite:** CS 150, CS 231, CSIA 250 and meets the criteria for acceptance into a BAS/BSN program and completion of a two-year degree or equivalent.

CSIA 310

E-Commerce Security • 5.0 Credits

This course provides students with tools and resources they need to develop a thorough understanding of four major aspects of security: policies and procedures, technology orientation, computer and network security, and managing organizations securely. **Prerequisite:** CS 150, CS 206, CS 232 and meets the criteria for acceptance into a BAS/BSN program and completion of a two-year degree or equivalent.

CSIA 320

Ethical Hacking • 5.0 Credits

This course provides students with the tools and resources needed to develop an understanding of ethical hacking. Students are taken through an interactive environment where they are shown how to scan, test, hack, and secure information systems. **Prerequisite:** CS 232, CSIA 300 and meets the criteria for acceptance into a BAS/BSN program and completion of a two-year degree or equivalent.

CSIA 330

Wireless Security • 5.0 Credits

This course provides students with the conceptual knowledge and hands-on skills needed to work with wireless technology. Topics include planning, designing, installing, and configuring wireless LANs with an emphasis on security. It also details common wireless LAN uses including maintenance, security, and business applications. It is designed to help students pass the Certified Wireless Network Administrator (CWNA) exam, as well as the new IEEE 802.11 standard. **Prerequisite:** CS 150, CS 250, CSIA 300 and meets the criteria for acceptance into a BAS/BSN program and completion of a two-year degree or equivalent.

CSIA 410

Cryptology • 5.0 Credits

This course provides students with an operational understanding of basic cryptographic systems. Students learn about symmetric cryptography, block ciphers and secure hash functions, asymmetric cryptography, key exchange and public-key systems, and authentication and encryption in an adversarial model. **Prerequisite:** CS 150, CS 231, CSIA 250 and meets the criteria for acceptance into a BAS/BSN program and completion of a two-year degree or equivalent.

CSIA 420

Cyber Crime and Terrorism • 5.0 Credits

This class begins with a broad introduction to the field of computer crime, discussing the history of computer crime, basic criminal techniques, and the relevant laws. It walks students through forensics, litigation, depositions, expert reports, trials, and how to select an appropriate expert witness. This class also covers specific techniques and tricks that hackers use and how to defend against such attacks. **Prerequisite:** CSIA 250, CS 232, CSIA 300, CSIA 320 and meets the criteria for acceptance into a BAS/BSN program and completion of a two-year degree or equivalent.

CSIA 430

UNIX Administration and Security • 5.0 Credits

Students study UNIX and Linux system administration and security. System administration topics include installation, kernel configuration and customization, user administration, package management and backup, automating and scheduling tasks, file system management and maintenance, and system initialization and services. Students also learn how to assess security on UNIX and Linux systems, take appropriate actions to correct security deficiencies, and prepare administrative reports. **Prerequisite:** CS 250, CS 232, CSIA 300, CSIA 320 and meets the criteria for acceptance into a BAS/BSN program and completion of a two-year degree or equivalent.

Courses & Programs

CSIA 440

Cyber Testing and Penetration - 5.0 Credits

This course covers a broad base of topics in advanced penetration testing and information security analysis. Students are exposed to techniques and tools to perform a thorough penetration test along with legal requirements, rules of engagement, how to plan and schedule a test, how to perform vulnerability analysis, external and internal penetration testing, and techniques to produce a professional report from the engagement. **Prerequisite: CSIA 300, CSIA 320, CSIA 330 and meets the criteria for acceptance into a BAS/BSN program and completion of a two-year degree or equivalent.**

CSIA 450

Cyber Security Capstone - 5.0 Credits

This course integrates all the various cyber security knowledge and skills learned in previous courses into a project. Emphasis is placed on security policy, process planning, procedure definition, business continuity, and systems security architecture. Upon completion, students should be able to design and implement comprehensive information security architecture from the planning and design phase through implementation. **Prerequisite: Must be taken Senior year or after 25 credits of CSIA classes are taken and meet the criteria for acceptance into a BAS/BSN program and completion of a two-year degree or equivalent.**

Dental Hygiene

columbiabasin.edu/dentalhygiene

Department Overview: The Dental Hygiene degree is a four-year baccalaureate degree that consists of two years of prerequisite coursework and two years of Dental Hygiene professional training. Following completion of all prerequisites, students may make an application to the Dental Hygiene program. Applications and due dates are posted on the website. The program has limited enrollment. The educational objective of the program is to prepare students who, upon graduation and successful completion of the NBDHE (National Board Dental Hygiene Examination) and regional clinical board exams (Local Anesthetic, Restorative and Clinical dental hygiene procedures), will be licensed to practice as dental hygienists.

Program Prerequisites and Costs

There are two years of undergraduate prerequisite courses (65-68 credits). Tuition costs can be found on the website and are determined by how many credits are taken each quarter. The tuition costs change when students are accepted into the baccalaureate program of Dental Hygiene. The tuition costs for BAS degrees can also be found on the website. The credit number per quarter varies from 14 to 19 credits per quarter during the two-year professional program. In addition to tuition costs, student fees, supplies and equipment costs occur each quarter. **There are separate costs for the NBDHE and regional clinical exams that are not included in the program fees.**

Equipment, fees, supplies, uniforms, etc. are approximately \$13,000 to \$15,000 during the two years of professional training. During the summer quarter orientation, each student must have approximately **\$6,000 of this amount available to them** for ordering equipment, uniforms, instruments and supplies that will be purchased prior to beginning the first week of fall quarter.

Prerequisites must be completed with a **2.0 GPA in each class with an overall cumulative GPA of 2.6 for the science courses (A&P I and II, Microbiology and Chemistry)** prior to admission to the program. A total of two prerequisite courses can be retaken, each retake one time only to be applied towards admission to the program.

Prerequisites:

- Intro to Sociology: SOC& 101
- Nutrition: NUTR& 101
- Human A&P 1 w/ Lab: BIOL& 241
- Human A&P 2 w/ Lab: BIOL& 242
- Microbiology w/ Lab: BIOL& 260

- Intro to Chemistry w/ Lab: CHEM& 121
- Intro to Organic Chemistry w/ Lab: CHEM& 122
- English Composition I: ENGL& 101
- Introduction to Stats: MATH& 143
- General Psychology: PSYC& 100
- Social Psychology: PSYC 201
- Two Communication Studies Courses: CMST& 210 or CMST& 220 or CMST 260

Course Substitutions:

The only course substitutions accepted are:

- CHEM& 140 or CHEM& 161 may be substituted for CHEM& 121
- CHEM& 131 may be substituted for CHEM& 122

Additional Considerations:

Students are accepted into the program on a point total basis. Additional points may be earned in the application process for the following:

- GPA of 2.6-3.3 or higher in all prerequisite courses, extra points may be earned with a GPA of 3.4-4.0
- The completion of an AA, AS, BA, BS, or higher degree prior to the application deadline
- The final score on the HESI A2 Standardized test (can only be taken once in a 12 month period)
- Veterans in current military service or honorably discharged from the military
- Volunteer work (see application for further details)
- Additional sciences courses completed with a 2.6 GPA or higher prior to application deadline (see application for further details)
- Bi-literacy in a language other than English -- test required to demonstrate this ability

Candidates for acceptance will be invited to a mandatory interview (see website for dates). Final selection will be made at that time and applicants will be notified of acceptance or alternate status by letter and email to confirm their acceptance for the fall quarter.

Prior to the beginning of fall quarter, students accepted into the program will complete a national criminal history background check by the approved vendor of the College and complete and supply verification of current vaccination/immunization records.

DHYG 101 (Formerly DHYG 1121)

Oral Radiology I Lab • 1.0 Credit

First in a series of oral radiology labs. Application of protection, film placement, and proper exposure and developing techniques are introduced. Identification of oral structures present in radiographs is introduced. **Prerequisite: acceptance and enrollment in the CBC Dental Hygiene program. Required concurrent enrollment in DHYG 112.**

DHYG 102 (Formerly DHYG 1131)

Clinical Dental Hygiene Techniques I Lab • 3.0 Credits

Introduces basic skills used in the practice of dental hygiene, including infection control, patient assessment, and treatment. Skills are practiced in a pre-clinical setting on dental models and student partners. **Prerequisite: acceptance and enrollment in the CBC Dental Hygiene program. Required concurrent enrollment in DHYG 113.**

DHYG 103 (Formerly DHYG 1151)

Dental Materials Lab • 1.0 Credit

First in a series of lab courses of restorative dentistry skills as practiced by a dental hygienist in the state of Washington. Provides laboratory experience in performing common dental laboratory procedures and prepares for the clinical practice of expanded functions. **Prerequisite: concurrent enrollment in DHYG 115. Due to the nature of the program curriculum, each quarter builds on the knowledge and skills gained in previous quarters. Continuing enrollment is contingent upon successful completion of quarterly Dental Hygiene program courses.**

Courses & Programs

DHYG 104 (Formerly DHYG 1221)

Oral Radiology II Lab • 1.0 Credit

Practices oral radiology skill on dental manikin and student partner in a clinical setting. Application of knowledge, radiographic technique, and evaluation of films for diagnostic effectiveness is the focus. **Prerequisite:** concurrent enrollment in DHYG 122. Due to the nature of the program curriculum, each quarter builds on the knowledge and skills gained in previous quarters. Continuing enrollment is contingent upon successful completion of quarterly Dental Hygiene program courses.

DHYG 105 (Formerly DHYG 1231)

Clinical Dental Hygiene Techniques II Lab • 4.0 Credits

Second in a series on clinical practice of dental hygiene. Basic skills of dental hygiene practice, including patient assessment, instrumentation, and treatment are introduced and practiced on manikins, student partners, and clients in a clinical setting. **Prerequisite:** concurrent enrollment in DHYG 123. Due to the nature of the program curriculum, each quarter builds on the knowledge and skills gained in previous quarters. Continuing enrollment is contingent upon successful completion of quarterly Dental Hygiene program courses.

DHYG 106 (Formerly DHYG 1251)

Restorative Dentistry I Lab • 1.0 Credit

Second in a series of courses in restorative dentistry. Provides laboratory experience in performing the clinical practice of expanded functions including amalgam manipulation and placement techniques. **Prerequisite:** concurrent enrollment in DHYG 125. Due to the nature of the program curriculum, each quarter builds on the knowledge and skills gained in previous quarters. Continuing enrollment is contingent upon successful completion of quarterly Dental Hygiene program courses.

DHYG 107 (Formerly DHYG 1261)

Pain Control in Dentistry Lab • 2.0 Credits

Includes effective techniques in the delivery of anesthetic to the oral cavity and appropriate selection of anesthetic and the safe and effective delivery of Nitrous oxide sedation as part of the expanded functions for dental hygienists in the state of Washington. Skills are practiced on student partners. **Prerequisite:** concurrent enrollment in DHYG 126. Due to the nature of the program curriculum, each quarter builds on the knowledge and skills gained in previous quarters. Continuing enrollment is contingent upon successful completion of quarterly Dental Hygiene program courses.

DHYG 108 (Formerly DHYG 1341)

Clinical Dental Hygiene Techniques III Lab • 4.0 Credits

Third in a series on clinical practice of dental hygiene. Basic skills of dental hygiene practice, including client assessment, instrumentation, and treatment are practiced on clients in a clinical setting. Expands on the procedures and techniques introduced in previous clinical courses. **Prerequisite:** concurrent enrollment in DHYG 134. Due to the nature of the program curriculum, each quarter builds on the knowledge and skills gained in previous quarters. Continuing enrollment is contingent upon successful completion of quarterly Dental Hygiene program courses.

DHYG 109 (Formerly DHYG 1351)

Restorative Dentistry II Lab • 2.0 Credits

Third in a series of courses dealing with restorative dentistry skills. Preclinical laboratory exercises in the expanded functions of the placement and finishing of amalgam and composite restoration on model teeth. Includes application of knowledge of dental materials, tooth anatomy, and clinical skills. **Prerequisite:** concurrent enrollment in DHYG 135. Due to the nature of the program curriculum, each quarter builds on the knowledge and skills gained in previous quarters. Continuing enrollment is contingent upon successful completion of quarterly Dental Hygiene program courses.

DHYG 110

Dental Anatomy • 1.0 Credit

This course is an introduction to the anatomy of crown and root structures of the teeth. Builds on basic sciences, prepares for the study of additional dental sciences, and how these structures relate to the clinical practice of dental hygiene. **Prerequisite:** enrollment in the CBC Dental Hygiene program.

DHYG 111

Histology/Embryology • 2.0 Credits

This course is an introduction to the embryology and histology of the head and neck region. Builds on basic sciences, prepares for the study of additional dental sciences, and how these structures relate to the clinical practice of dental hygiene. **Prerequisite:** enrollment in the CBC Dental Hygiene program.

DHYG 112

Oral Radiology I • 1.0 Credit

First in a series on oral radiology. Focuses on radiation physics, biology, protection, recognition of anatomical landmarks, and evidence of pathologies. **Prerequisite:** acceptance and enrollment in the CBC Dental Hygiene program. Required concurrent enrollment in DHYG 101.

DHYG 113

Clinical Dental Hygiene Techniques I • 2.0 Credits

Introduces basic principles used in the practice of dental hygiene, including infection control, patient assessment, and treatment. **Prerequisite:** acceptance and enrollment in the CBC Dental Hygiene program. Required concurrent enrollment in DHYG 102.

DHYG 114

Dental Health Education • 1.0 Credit

This course covers the principles and practices of prevention and control of dental disease with emphasis on biofilm control, motivation, and personal and patient oral hygiene education and techniques. **Prerequisite:** acceptance and enrollment in the CBC Dental Hygiene program.

DHYG 115

Dental Materials • 1.0 Credit

First in a series of courses in restorative dentistry. Presents the history, composition, chemical and physical properties, and use of materials commonly utilized in the dental laboratory and dental operator. **Prerequisite:** concurrent enrollment in DHYG 103. Due to the nature of the program curriculum, each quarter builds on the knowledge and skills gained in previous quarters. Continuing enrollment is contingent upon successful completion of quarterly Dental Hygiene program courses.

DHYG 116

Head and Neck Anatomy • 2.0 Credits

Study of the head and neck regions, and oral anatomy. Identification of nerves, bones, and muscles associated with the head, neck, and oral regions. **Prerequisite:** acceptance and enrollment in the CBC Dental Hygiene program.

DHYG 120

Medical Emergencies in Dentistry • 2.0 Credits

This course is the study of commonly encountered medical emergencies in the oral setting that may involve systemic diseases and the etiology, presentation, treatment, and effect of oral treatment on patients who may present with these diseases and other medical conditions. The associated emergency procedures required to treat medical emergencies in the oral setting are covered as well as Cardio Pulmonary Resuscitation, the use of an AED, and first aid and safety training to meet the standards required for Health Sciences Division students. **Prerequisite:** current enrollment in the CBC Dental Hygiene program.

DHYG 121

General Pathology • 2.0 Credits

This course focuses on the study of commonly encountered systemic diseases: etiology, presentation, treatment, and effect on dental treatment. Emphasizes the principles of inflammation, immunology, healing, and repair. **Prerequisite:** acceptance and enrollment in the CBC Dental Hygiene program.

DHYG 122

Oral Radiology II • 1.0 Credit

Second in a series of oral radiology. Focuses on radiographic quality, techniques, film processing, mounting, and interpretation of errors. **Prerequisite:** concurrent enrollment in DHYG 104. Due to the nature of the program curriculum, each quarter builds on the knowledge and skills gained in previous quarters. Continuing enrollment is contingent upon successful completion of quarterly Dental Hygiene program courses.

Courses & Programs

DHYG 123

Clinical Dental Hygiene Techniques II • 2.0 Credits

Second in a series of clinical dental hygiene techniques. Focuses on dental hygiene treatment planning, effective communication, preventative client education, and skill development in clinical practice. **Prerequisite:** concurrent enrollment in DHYG 105. Due to the nature of the program curriculum, each quarter builds on the knowledge and skills gained in previous quarters. Continuing enrollment is contingent upon successful completion of quarterly Dental Hygiene program courses.

DHYG 125

Restorative Dentistry I • 1.0 Credit

Second in a series of courses in restorative dentistry. Presents the composition and chemical and physical properties of amalgam and its use as a dental restorative material. Amalgam safety and appropriate handling and placement of this material is practiced on typodonts in a controlled laboratory setting. **Prerequisite:** concurrent enrollment in DHYG 106. Due to the nature of the program curriculum, each quarter builds on the knowledge and skills gained in previous quarters. Continuing enrollment is contingent upon successful completion of quarterly Dental Hygiene program courses.

DHYG 126

Pain Control in Dentistry • 2.0 Credits

Covers the pharmacology and physiology of both local anesthetic agents and nitrous oxide sedation. Application of knowledge of the anatomy of nerves, physiology of nerve conduction, and the transmission of pain impulse and the use of local anesthetics and Nitrous Oxide for pain control in the delivery of dental procedures. Discussion and application of knowledge, prevention, and management of associated possible emergencies is included. Practice of local anesthetics and administration of Nitrous Oxide sedation is practiced on student partners. **Prerequisite:** concurrent enrollment in DHYG 107. Due to the nature of the program curriculum, each quarter builds on the knowledge and skills gained in previous quarters. Continuing enrollment is contingent upon successful completion of quarterly Dental Hygiene program courses.

DHYG 127

Pharmacology • 2.0 Credits

Focuses on pharmacology as it affects the clinical practice of dentistry. Emphasizes drugs commonly used in medicine that affect dental treatment. Also emphasizes drugs of choice for treatment of common systemic and oral diseases, and for emergency treatment; effects, administration, biotransformation and toxicology. Due to the nature of the program curriculum, each quarter builds on the knowledge and skills gained in previous quarters. Continuing enrollment is contingent upon successful completion of quarterly Dental Hygiene program courses.

DHYG 131

Oral Pathology • 2.0 Credits

Oral pathology for the dental hygienist. Focuses on the study of commonly encountered oral diseases; etiology, presentation, recognition, treatment, effect on dental treatment, and documentation for collaborative diagnosis and referral. **Prerequisite:** due to the nature of the program curriculum, each quarter builds on the knowledge and skills gained in previous quarters. Continuing enrollment is contingent upon successful completion of quarterly Dental Hygiene program courses.

DHYG 132

Periodontics I • 2.0 Credits

First in a series on periodontology. Focuses on the study of the healthy periodontal tissues, and the factors, recognition, and classes of periodontal disease and the oral-systemic link of periodontitis and diabetes, heart disease, pregnancy, and other medical conditions. Due to the nature of the program curriculum, each quarter builds on the knowledge and skills gained in previous quarters. Continuing enrollment is contingent upon successful completion of quarterly Dental Hygiene program courses.

DHYG 134

Clinical Dental Hygiene Techniques III • 2.0 Credits

Third in a series of courses in dental hygiene techniques. Focuses on expanding the development of clinical dental hygiene skills. **Prerequisite:** concurrent enrollment in DHYG 108. Due to the nature of the program curriculum, each quarter builds on the knowledge and skills gained in previous quarters. Continuing enrollment is contingent upon successful completion of quarterly Dental Hygiene program courses.

DHYG 135

Restorative Dentistry II • 1.0 Credit

Third in a series of courses dealing with restorative dentistry skills. Includes application of dental materials, amalgam restoration, and composite restoration materials. **Prerequisite:** concurrent enrollment in DHYG 109. Due to the nature of the program curriculum, each quarter builds on the knowledge and skills gained in previous quarters. Continuing enrollment is contingent upon successful completion of quarterly Dental Hygiene program courses.

DHYG 136

Patient Management • 2.0 Credits

This course focuses on the characteristics of individual patients, motivation, and interpersonal communication. Students are exposed to diverse cultures and their attitudes and approaches to medical and dental care. Additionally, treatment modifications for the young, geriatric, medically or mentally compromised patient, and those with transitional special needs are presented. **Prerequisite:** current enrollment in the CBC Dental Hygiene program. Due to the nature of the program curriculum, each quarter builds on the knowledge and skills gained in previous quarters. Continuing enrollment is contingent upon successful completion of quarterly Dental Hygiene program courses.

DHYG 144

Clinical Dental Hygiene Techniques IV • 1.0 Credit

Fourth in a series of clinical dental hygiene technique courses. Provides an expanded learning experience with application of knowledge of oral findings and associated clinical application. **Prerequisite:** concurrent enrollment in DHYG 147. Due to the nature of the program curriculum, each quarter builds on the knowledge and skills gained in previous quarters. Continuing enrollment is contingent upon successful completion of quarterly Dental Hygiene program courses.

DHYG 147 (Formerly DHYG 1441)

Clinical Dental Hygiene Techniques IV Lab • 5.0 Credits

Fourth in a series of clinical dental hygiene technique lab courses. Focuses on expanding dental instrumentation skills and patient care in the clinical setting. **Prerequisite:** concurrent enrollment in DHYG 144. Due to the nature of the program curriculum, each quarter builds on the knowledge and skills gained in previous quarters. Continuing enrollment is contingent upon successful completion of quarterly Dental Hygiene program courses.

DHYG 199

Special Studies • 1.0 - 12.0 Credits

A class used to explore new coursework.

DHYG 211

Nutrition in Dentistry • 1.0 Credit

The information in this class recalls and reviews the basic principles of nutrition and develops an understanding of their relationship to oral health. Emphasis is placed on the assessment of patient nutritional status and chairside nutritional counseling for optimal oral health. The class builds on basic sciences and dental sciences and prepares for the clinical practice of dental hygiene. **Prerequisite:** successful completion of the first year of the CBC Dental Hygiene program and current enrollment in the second year of the program.

Courses & Programs

DHYG 212

Advanced Clinical Topics • 1.0 Credit

Topics such as the use of lasers, advanced instrumentation techniques, endoscopy use in dentistry, the use of digital radiography, and new technologies in dentistry are included in this course. Alternative practice settings and additional educational pursuits and career tracking are included. Prepares for clinical dental hygiene practice application and expanded work venues. Due to the nature of the program curriculum, each quarter builds on the knowledge and skills gained in previous quarters. Continuing enrollment is contingent upon successful completion of quarterly Dental Hygiene program courses.

DHYG 214

Clinical Dental Hygiene Techniques V • 1.0 Credit

Fifth in a series of clinical dental hygiene technique courses. Provides an expanded learning experience through discussion case presentation, and study of clinical cases. **Prerequisite:** concurrent enrollment in DHYG 216. **Due to the nature of the program curriculum, each quarter builds on the knowledge and skills gained in previous quarters. Continuing enrollment is contingent upon successful completion of quarterly Dental Hygiene program courses.**

DHYG 215

Ethics and Jurisprudence, Practice Management • 2.0 Credits

Explores the fundamental factors necessary to practice within the ethical and legal framework of the American Dental Hygiene Association Code of Ethics and the Washington State Dental and Dental Hygiene Practice Acts. Focuses on the history of the dental profession, dental specialties, professional associations, practice management, career considerations, and stress management relating to dental hygiene practice. Due to the nature of the program curriculum, each quarter builds on the knowledge and skills gained in previous quarters. Continuing enrollment is contingent upon successful completion of quarterly Dental Hygiene program courses.

DHYG 216 (Formerly DHYG 2141)

Clinical Dental Hygiene Techniques V Lab • 6.0 Credits

Fifth in a series of clinical dental hygiene technique Lab courses. Provides progressive clinical experience, application of knowledge and skills; including restorative care for clinic patients. **Prerequisite:** concurrent enrollment in DHYG 214. **Due to the nature of the program curriculum, each quarter builds on the knowledge and skills gained in previous quarters. Continuing enrollment is contingent upon successful completion of quarterly Dental Hygiene program courses.**

DHYG 217 (Formerly DHYG 2211)

Community Oral Health I Lab • 2.0 Credits

Supervised clinical practice of dental hygiene students in a variety of community health settings. **Prerequisite:** DHYG 221. **Due to the nature of the program curriculum, each quarter builds on the knowledge and skills gained in previous quarters. Continuing enrollment is contingent upon successful completion of quarterly Dental Hygiene program courses.**

DHYG 218 (Formerly DHYG 2241)

Clinical Dental Hygiene Techniques VI Lab • 7.0 Credits

Sixth in series on clinical practice in dental hygiene. Provides comprehensive clinical experience in all phases of dental hygiene practice for patient care. Expands on the procedures and techniques introduced in previous clinical courses; includes restorative care for clinical patients. Due to the nature of the program curriculum, each quarter builds on the knowledge and skills gained in previous quarters. Continuing enrollment is contingent upon successful completion of quarterly Dental Hygiene program courses.

DHYG 219 (Formerly DHYG 2341)

Clinical Dental Hygiene Techniques VII Lab • 9.0 Credits

Seventh in a series of clinical dental hygiene lab courses. Provides an expanded learning experience of dental hygiene care through experience of dental hygiene care through performing prior learning of clinical dental hygiene techniques, and the clinical application of new concepts and skills including critical evaluation of dental hygiene care and restorative treatment. **Prerequisite:** current enrollment in DHYG 234.

DHYG 220 (Formerly DHYG 2461)

Restorative Dentistry III Lab • 2.0 Credits

Fourth in a series of courses dealing with restorative dentistry skills as practiced by a dental hygienist in the state of Washington. Laboratory exercises in the placement and finishing of amalgam and composite restorations on prepared model teeth.

DHYG 221

Community Oral Health I • 2.0 Credits

Examines the principles of community health, including: assessment indices planning, implementation, and evaluation of healthcare with an emphasis on oral health. Builds on knowledge of ethics, basic and dental sciences, and clinical dental hygiene practice. Provides the knowledge to function in a community oral health setting. Due to the nature of the program curriculum, each quarter builds on the knowledge and skills gained in previous quarters. Continuing enrollment is contingent upon successful completion of quarterly Dental Hygiene program courses.

DHYG 222

Periodontics II • 2.0 Credits

Second in a series of courses in periodontology. Provides background knowledge of the advanced treatment of periodontal disease, including concepts concerning treatment planning and evaluation of treatment options and outcomes. Intra-oral digital photography and the development of a periodontal case presentation are included. Due to the nature of the program curriculum, each quarter builds on the knowledge and skills gained in previous quarters. Continuing enrollment is contingent upon successful completion of quarterly Dental Hygiene program courses.

DHYG 224

Clinical Dental Hygiene Techniques VI • 1.0 Credit

Sixth in a series of clinical dental hygiene technique courses. Provides a learning experience for periodontally involved patients and the dental hygiene diagnosis and process of care. Case studies and advanced instrumentation techniques are taught as well as clinical application of new skills and concepts for more difficult AAP patients. Restorative care is added to the clinical portion of the class that is supported by this lecture class. Discussion of restorative care for patients is also included. **Prerequisite:** current enrollment in the CBC Dental Hygiene program and successful completion of DHYG 214 and DHYG 216.

DHYG 234

Clinical Dental Hygiene Techniques VII • 1.0 Credit

Seventh in a series of clinical dental hygiene courses. Provides an expanded learning experience through discussion and exploration of clinical technique practices. **Prerequisite:** concurrent enrollment in DHYG 219. **Due to the nature of the program curriculum, each quarter builds on the knowledge and skills gained in previous quarters. Continuing enrollment is contingent upon successful completion of quarterly Dental Hygiene program courses.**

DHYG 246

Restorative Dentistry III • 1.0 Credit

Fourth in a series of courses dealing with restorative dentistry skills as practiced by a dental hygienist in the state of Washington. Focuses on Class II amalgam and composite restorations and cusp build-ups. Based on dental sciences and previous laboratory courses in dental materials. **Prerequisite:** enrollment in the CBC Dental Hygiene program and completion of DHYG 135.

DHYG 299

Special Studies • 1.0 - 12.0 Credits

A class used to explore new coursework.

DHYG 301 (Formerly DHYG 110)

Dental Anatomy • 1.0 Credit

An introduction to the anatomy of crown and root structures of the teeth. Builds on basic sciences and prepares for the study of additional dental sciences of Restorative I, II, and III, as well as tooth identification of dentition in patients. **Prerequisite:** enrollment in the CBC Dental Hygiene program.

Courses & Programs

DHYG 302 (Formerly DHYG 111) **Histology/Embryology • 2.0 Credits**

An introduction to the embryology and histology of the head and neck region. Builds on basic sciences and prepares for the additional study of dental sciences as they relate to the clinical practice of dental hygiene. **Prerequisite:** enrollment in the CBC Dental Hygiene program.

DHYG 303 (Formerly DHYG 112) **Oral Radiology I • 1.0 Credit**

First in a two-quarter series course of oral radiology. Focuses on radiation physics, biology, and protection of the patient when radiographs are taken, recognition of anatomical landmark, evidence of pathology, and abnormalities. **Prerequisite:** enrollment in the CBC Dental Hygiene program and concurrent enrollment in DHYG 304.

DHYG 304 (Formerly DHYG 101) **Oral Radiology I Lab • 1.0 Credit**

First in a two-quarter series course of oral radiology labs. Application of patient protection, radiographic film placement, and proper exposure and developing techniques. Identification of oral structures identifiable in exposed radiographs. **Prerequisite:** enrollment in the CBC Dental Hygiene program and concurrent enrollment in DHYG 303.

DHYG 305 (Formerly DHYG 113) **Clinical Dental Hygiene Techniques I • 2.0 Credits**

Introduction of the basic principles used in the practice of dental hygiene. Includes infection control standards (OSHA), universal precautions, patient assessment, and treatment standards. **Prerequisite:** enrollment in the CBC Dental Hygiene program and concurrent enrollment in DHYG 306.

DHYG 306 (Formerly DHYG 102) **Clinical Dental Hygiene Techniques I Lab • 3.0 Credits**

The clinical practice of basic skills of infection control, patient assessment, and treatment in the clinical setting, and pre-clinical setting on dental typodont models progressing to student partners. **Prerequisite:** enrollment in the CBC Dental Hygiene program and concurrent enrollment in DHYG 305.

DHYG 307 (Formerly DHYG 114) **Dental Health Education • 1.0 Credit**

The principles and practices of prevention and control of dental disease is covered with emphasis on biofilm control, cardiology, motivation of the patient, and personal and patient oral hygiene education and techniques. **Prerequisite:** enrollment in the CBC Dental Hygiene program.

DHYG 308 (Formerly DHYG 115) **Dental Materials • 1.0 Credit**

First course in the restorative series; presents history, composition, chemical and physical properties, and use of materials commonly used in the dental laboratory and dental operator. **Prerequisite:** enrollment in the CBC Dental Hygiene program and concurrent enrollment in DHYG 309.

DHYG 309 (Formerly DHYG 103) **Dental Materials Lab • 1.0 Credit**

First in the restorative lab series; provides experiences in common dental procedures and prepares students for the practice of expanded functions as allowed by the state of Washington. **Prerequisite:** enrollment in the CBC Dental Hygiene program and concurrent enrollment in DHYG 308.

DHYG 310 (Formerly DHYG 116) **Head and Neck Anatomy • 2.0 Credits**

The study of the head and neck regions, identification of nerves, bones of the skull, and muscles associated with the head and neck region; oral anatomy and oral regions structure and function; dysfunction in swallowing and nasal pathways; and origins of sleep apnea and its resulting impact on systemic health. **Prerequisite:** enrollment in the CBC Dental Hygiene program.

DHYG 311 (Formerly DHYG 120) **Medical Emergencies in Dentistry • 2.0 Credits**

Commonly encountered medical emergencies that may occur in the dental setting; presenting signs and symptoms of systemic reactions; recommended treatment protocols and emergency procedures are covered. **Prerequisite:** enrollment in the CBC Dental Hygiene program.

DHYG 312 (Formerly DHYG 121) **General Pathology • 2.0 Credits**

The study of systemic diseases and their etiology; presentation of signs and symptoms of disease manifestation; inflammatory process, immune response and healing; current recommended treatments; morbidity, mortality, and the impact of oral inflammation and disease on systemic health. **Prerequisite:** enrollment in the CBC Dental Hygiene program.

DHYG 313 (Formerly DHYG 122) **Oral Radiology II • 1.0 Credit**

The second in a series of the study of oral radiology; focuses on radiographic quality, techniques, film processing, mounting, and interpretation of errors, including pathology and cariogenic lesions. Includes both traditional and digital techniques of exposure and processing. **Prerequisite:** enrollment in the CBC Dental Hygiene program and concurrent enrollment in DHYG 314.

DHYG 314 (Formerly DHYG 104) **Oral Radiology II Lab • 1.0 Credit**

The second in a series of oral radiology lab which includes practice of oral radiographic skill and technique on a dental manikin and student partner in a clinical setting. Application of knowledge from DHYG 304 radiographic technique and evaluation of films diagnostic quality and effectiveness. **Prerequisite:** enrollment in the CBC Dental Hygiene program and concurrent enrollment in DHYG 313.

DHYG 315 (Formerly DHYG 123) **Clinical Dental Hygiene Techniques II • 2.0 Credits**

Second in a series of clinical dental hygiene techniques; focus is on dental hygiene treatment planning, effective communication with patients, preventive dental patient education, and skill development in clinical skills. **Prerequisite:** enrollment in the CBC Dental Hygiene program and concurrent enrollment in DHYG 316.

DHYG 316 (Formerly DHYG 105) **Clinical Dental Hygiene Techniques II Lab • 4.0 Credits**

Second in a series of clinical practice of dental hygiene; skill development in patient assessment, instrumentation and treatment are introduced and practiced on a dental typodont, student partners, and patients in a clinical setting. **Prerequisite:** enrollment in the CBC Dental Hygiene program and concurrent enrollment in DHYG 315.

DHYG 318 (Formerly DHYG 125) **Restorative Dentistry I • 1.0 Credit**

Second in a series of courses in restorative dentistry; focus on composition and physical properties of amalgam and its use as a dental restorative material; amalgam safety and handling is taught to protect student clinicians. **Prerequisite:** enrollment in the CBC Dental Hygiene program and concurrent enrollment in DHYG 319.

DHYG 319 (Formerly DHYG 106) **Restorative Dentistry I Lab • 1.0 Credit**

Second in a series of laboratory courses in restorative dentistry. Laboratory experience in the safe placement and handling and manipulation of amalgam restorative materials to complete Class I restorations. Materials are used in typodonts to restore prepared typodont teeth to simulate original anatomy of the tooth. **Prerequisite:** enrollment in the CBC Dental Hygiene program and concurrent enrollment in DHYG 318.

Courses & Programs

DHYG 320 (Formerly DHYG 126)

Pain Control in Dentistry • 2.0 Credits

This course includes the pharmacology and physiology of both local anesthetic agents and nitrous oxide sedation. Application of the knowledge of the nerves of the head, the physiology of nerve conduction, and the transmission of pain impulse are studied as well as the transient blockage of nerve transmission with local anesthetics. Knowledge of prevention and management of dental emergencies is included as well as the decision making of the selection of the appropriate injection to be given and the type of local anesthetic to be used. The use of Nitrous Oxide delivery and its application as an analgesic is also included. **Prerequisite:** enrollment in the CBC Dental Hygiene program and concurrent enrollment in DHYG 321.

DHYG 321 (Formerly DHYG 107)

Pain Control in Dentistry Lab • 2.0 Credits

Effective techniques in the delivery of nerve block and infiltration injections in the oral cavity is covered as well as the safe and effective delivery of Nitrous Oxide sedation - all injections and the delivery of Nitrous Oxide are completed on student partners. These skills are part of the expanded duties allowed for dental hygienists in the state of Washington and are practiced in accordance with the Washington Regional Examining Board standards. **Prerequisite:** enrollment in the CBC Dental Hygiene program and concurrent enrollment in DHYG 320.

DHYG 322 (Formerly DHYG 127)

Pharmacology • 2.0 Credits

The study of pharmacology as it affects the clinical practice of dentistry; emphasis is on drugs commonly used to treat medical conditions and their impact on dental treatment; systemic and oral diseases are covered as well as the drugs of choice for these conditions; effects, administration, biotransformation, and toxicology as potential for emergency reactions, idiopathic reactions, and emergency treatment protocols. **Prerequisite:** enrollment in the CBC Dental Hygiene program.

DHYG 323 (Formerly DHYG 131)

Oral Pathology • 2.0 Credits

The study of commonly encountered oral diseases including their etiology, presentation, recognition, treatment chosen, their impact on dental treatment, and the need for referral for further evaluation. Extensive and correct documentation is stressed as well as collaboration with a dentist for definitive diagnosis. **Prerequisite:** enrollment in the CBC Dental Hygiene program.

DHYG 324 (Formerly DHYG 132)

Periodontics I • 2.0 Credits

The first of a two-quarter series on the health and disease states of the dental periodontal tissues; components of the gingival and periodontal structures and the contributing factors that cause gingivitis and periodontitis; the oral-systemic link and systemic disease states such as cardiovascular disease, diabetes, pregnancy, etc. that are linked to the presence of periodontal pathogens. **Prerequisite:** enrollment in the CBC Dental Hygiene program.

DHYG 325 (Formerly DHYG 134)

Clinical Dental Hygiene Techniques III • 2.0 Credits

Third in a series of courses designed to teach dental hygiene techniques and the expanded development of clinical dental hygiene skills. **Prerequisite:** enrollment in the CBC Dental Hygiene program and concurrent enrollment in DHYG 326.

DHYG 326 (Formerly DHYG 108)

Clinical Dental Hygiene Techniques III Lab • 4.0 Credits

Third in a series on clinical practice of dental hygiene; basic skills of dental hygiene practice including patient assessment, instrumentation and treatment expanding on procedures and techniques introduced in previous clinical courses. First introduction to work on patients and continued development of procedures and techniques introduced in previous clinical courses. **Prerequisite:** enrollment in the CBC Dental Hygiene program and concurrent enrollment in DHYG 325.

DHYG 327 (Formerly DHYG 135)

Restorative Dentistry II • 1.0 Credit

Third in a series of restorative dentistry lecture on skill development including dental preparation design; isolation technique, application of dental materials, amalgam restorations, and composite materials to replace Class I, II, and III prepared restorations in typodont teeth. **Prerequisite:** enrollment in the CBC Dental Hygiene program and concurrent enrollment in DHYG 328.

DHYG 328 (Formerly DHYG 109)

Restorative Dentistry II Lab • 2.0 Credits

Third in a series of laboratory courses teaching preclinical principles of the placement and finishing of Class I, II, and III prepared typodont teeth using amalgam and composite materials to duplicate the missing anatomy in prepared teeth; includes application of dental anatomy, dental materials, and clinical skill development. **Prerequisite:** enrollment in the CBC Dental Hygiene program and concurrent enrollment in DHYG 327.

DHYG 329 (Formerly DHYG 136)

Patient Management • 2.0 Credits

Lecture and student participation in study of characteristics of individual patients, motivation, and interpersonal communication; exposure to diverse cultures and their attitudes and approaches to medical and dental care; modification of treatment planning for the young, geriatric, medically, or mentally compromised patient and patients who exhibit special needs. **Prerequisite:** enrollment in the CBC Dental Hygiene program.

DHYG 330 (Formerly DHYG 144)

Clinical Dental Hygiene Techniques IV • 1.0 Credit

Fourth in a series of lectures providing expanded learning and application of knowledge of oral findings and associated clinical application; progressive dental hygiene techniques for the periodontally involved patient including use of ultrasonic scaler, advanced instrumentation techniques for root surfaces, and treatment of the pregnant patient through menopause, the elderly patient, patients with dental prostheses, and edentulous patients. Enrollment in the CBC DHYG program is required. **Prerequisite:** enrollment in the CBC Dental Hygiene program and concurrent enrollment in DHYG 331.

DHYG 331 (Formerly DHYG 147)

Clinical Dental Hygiene Techniques IV Lab • 5.0 Credits

Fourth in a series of dental hygiene technique lab courses; provides expanded learning experience of dental hygiene techniques through performing clinical dental hygiene care for a variety of patients, and the clinical application of learned skills; critical evaluation of dental hygiene treatment needs and the delivery of care on patients. **Prerequisite:** enrollment in the CBC Dental Hygiene program and concurrent enrollment in DHYG 330.

DHYG 401 (Formerly DHYG 246)

Restorative Dentistry III • 1.0 Credit

Fourth in a series of restorative dentistry skills as allowed to be practiced by dental hygienists in WA state; Class II and Class III Amalgam and Composite restorations and cusp build-up restorations and restoring anterior teeth. **Prerequisite:** enrollment in the CBC Dental Hygiene program and completion of DHYG 327.

DHYG 402 (Formerly DHYG 220)

Restorative Dentistry III Lab • 2.0 Credits

Fourth in a series of restorative labs with focus on the placement and finishing of Class II and III Amalgam and Composite restorations and cusp build-ups and restoring anterior teeth; practice is continued on typodont teeth, restorations on patients in a clinical setting. **Prerequisite:** enrollment in the CBC Dental Hygiene program.

DHYG 403

Community Oral Health Research I • 2.0 Credits

Study and evaluation of strategies to improve oral health for varying age groups; functioning as an oral health advocate in a community setting. **Prerequisite:** enrollment in the CBC Dental Hygiene program.

Courses & Programs

DHYG 404 (Formerly DHYG 211) **Nutrition in Dentistry • 1.0 Credit**

An initial recall and review of principles of nutrition with enhanced information on nutrition's relationship to oral health; emphasis is placed on assessment of a patient's nutritional knowledge and eating habits and the impact that these have on their oral health/disease. **Prerequisite:** enrollment in the CBC Dental Hygiene program.

DHYG 405 (Formerly DHYG 212) **Advanced Clinical Topics • 1.0 Credit**

Topics presented include use of lasers, advanced instrumentation techniques, endoscopy use in dentistry, use of ultraviolet light for the detection of oral lesions, etc. Alternative practice settings and additional educational pursuits and career tracking; expanded work venues, work in public health settings and the military are explored. **Prerequisite:** enrollment in the CBC Dental Hygiene program.

DHYG 406 (Formerly DHYG 214) **Clinical Dental Hygiene Techniques V • 1.0 Credit**

Fifth in a series of clinical dental hygiene technique courses; providing expanded learning experience of case presentations and study of clinical cases, advanced clinical techniques of Local Anesthesia (AMSA, Gow-Gates, The Wand, Interseptal anesthesia), etc. **Prerequisite:** enrollment in the CBC Dental Hygiene program and concurrent enrollment in DHYG 407.

DHYG 407 (Formerly DHYG 216) **Clinical Dental Hygiene Techniques V Lab • 6.0 Credits**

Fifth in the series of dental hygiene practice lab; progressive clinical experience in patient assessment, dental hygiene treatment planning, and clinical work on patients; continued development of clinical skills and knowledge, including restorative care on patients. **Prerequisite:** enrollment in the CBC Dental Hygiene program and concurrent enrollment in DHYG 406.

DHYG 408 (Formerly DHYG 215) **Ethics and Jurisprudence, Practice Management • 2.0 Credits**

Study of the ethical framework of the ADHA Code of Ethics, the Washington Dental Hygiene Practice Act; ethical problem solving and ethical decision making; history of the profession, jurisprudence, and working within the legal boundaries of the law for the profession of dental hygiene; practice management styles, insurance coding, team participation, and leadership. **Prerequisite:** enrollment in the CBC Dental Hygiene program.

DHYG 409 **Community Oral Health Research II • 2.0 Credits**

Use of public health concepts and their impact on community health research; design elements included in research; selection of research topic, and exploration of community partners to include in the pursuit of a research project; development of a research project to be field tested, evaluated, and presented to stake holders during spring quarter. **Prerequisite:** enrollment in the CBC Dental Hygiene program and DHYG 403 with a 2.0 or better.

DHYG 410 (Formerly DHYG 222) **Periodontics II • 2.0 Credits**

Second in a series of courses in the study of periodontology; background knowledge of advanced treatment of periodontal disease including assessment, diagnosis, treatment planning, evaluation of outcomes and further maintenance or retreatment needs included; use of intra oral digital photography on a selected periodontal patient for development of a case presentation; determination of referral for out of scope treatment needs; oral home care evaluation and patient compliance; exacerbating medical or systemic factors for disease progression. **Prerequisite:** enrollment in the CBC Dental Hygiene program.

DHYG 411 (Formerly DHYG 224) **Clinical Dental Hygiene Techniques VI • 1.0 Credit**

Sixth in a series of clinical dental hygiene technique courses; clinical experiences involving periodontally involved patients and assessment and evaluation of continued care needs and intervals for maintenance; discussion and determination of restorative needs and care. **Prerequisite:** enrollment in the CBC Dental Hygiene program and completion of DHYG 406 and 407.

DHYG 412 (Formerly DHYG 218) **Clinical Dental Hygiene Techniques VI Lab • 7.0 Credits**

Sixth in a series of clinical practice in dental hygiene providing comprehensive clinical experience in all phases of dental hygiene process of care for patient care; clinical work expands on the procedures and techniques introduced in prior clinical courses including placement of restorations on patients. **Prerequisite:** enrollment in the CBC Dental Hygiene program.

DHYG 413 (Formerly DHYG 234) **Clinical Dental Hygiene Techniques VII • 1.0 Credit**

Seventh in a series of clinical dental hygiene technique courses; expanded learning through discussion and exploration of clinical practice in a variety of settings; discussion and practice of accelerated scheduling of patients (Private Practice Days); work expectations in community based clinics, public health clinics, private dental practices, specialty practices, etc. **Prerequisite:** enrollment in the CBC Dental Hygiene program and concurrent enrollment in DHYG 414.

DHYG 414 (Formerly DHYG 219) **Clinical Dental Hygiene Techniques VII Lab • 9.0 Credits**

Seventh in a series of clinical practice in dental hygiene providing comprehensive dental hygiene services in a clinical setting; completing dental hygiene process of care and the implementation of patient care for a variety of patients; practice of implementing accelerated hygiene with the use of an assistant as well as working independently; placement of restorations on patients. **Prerequisite:** enrollment in the CBC Dental Hygiene program and concurrent enrollment in DHYG 413.

DHYG 415 **Community Oral Health Practicum • 2.0 Credits**

This course is the final segment (capstone) in the series that implements and evaluates an oral health program/project designed to improve the well-being of citizens and provide access to care to underserved populations. Students will present oral health program outcomes to stakeholders and the community in an effort to develop evidence-based research. This course takes place outside of the classroom in an experiential learning format. **Prerequisite:** enrollment in the CBC Dental Hygiene program and DHYG 409 with a 2.0 or better.

DHYG 416 **Educational Theory and Methodology • 2.0 Credits**

Understanding and implementing pre-assessment strategies to determine participants knowledge levels; the creation of an overview and objectives to provide learners with a context for learning; giving targeted feedback and performance evaluation to enhance continual learning goals; and selecting among direct instruction, inquiry-based learning and cooperative learning depending on the chosen outcomes. **Prerequisite:** enrollment in the CBC Dental Hygiene program.

Diagnostic Ultrasound Technology

columbiabasin.edu/ultrasound

Department Overview: The Columbia Basin College Diagnostic Ultrasound program began in 2007. As of December of 2014, 49 students have graduated with an Associate in Applied Science degree in this program.

Because of the large number of graduates from this program over the past seven years, the need for new diagnostic ultrasound technologists in the Tri-Cities area has substantially decreased. As a result, we are suspending this program and will not be accepting new students. We will continue to monitor the need for our community. Please check the website at columbiabasin.edu/ultrasound for updates and announcements regarding future openings in this program.

Courses & Programs

<p>DUTEC101 Concepts of Patient Care • 3.0 Credits</p> <p>Develops patient care and communication skills required in sonography. Students discuss legal, ethical, and psychological aspects of patient care, as well as professional issues and concerns. Prerequisite: acceptance into program.</p> <p>DUTEC105 Pathophysiology I • 3.0 Credits</p> <p>Introduces pathogenesis: the sequence of events in the development of a disease. Students focus on pathological conditions affecting the abdomen and identifiable with diagnostic imaging techniques. An extensive review of normal physiology is also presented. Prerequisite: acceptance into program or permission of program chair.</p> <p>DUTEC106 Pathophysiology II • 3.0 Credits</p> <p>Continues Pathophysiology I, with focus on the disease process and disease states relevant to obstetrics, gynecology, and neurology. Prerequisite: DUTEC 105 and acceptance into program or permission of program chair.</p> <p>DUTEC107 Human Cross-Sectional Anatomy • 2.0 Credits</p> <p>Covers the human anatomy from the cross-sectional perspective in longitudinal, transverse, coronal, and oblique planes. Students analyze correlations with clinical diagnostic imaging techniques. Prerequisite: acceptance into program or permission of program chair.</p> <p>DUTEC110 General Ultrasound I: Abdominal • 5.0 Credits</p> <p>Presents basic concepts and terminology, as well as scanning protocols for the ultrasound examination of the abdomen. Topics include both normal and pathological states. Prerequisite: acceptance into program or permission of program chair.</p> <p>DUTEC111 Echocardiography I • 5.0 Credits</p> <p>Covers basic ultrasound protocols and scanning techniques of the heart. Students focus on anatomy, physiology, pathology, and echocardiographic pattern recognition. Prerequisite: acceptance into program or permission of program chair.</p> <p>DUTEC112 Pathophysiology III • 3.0 Credits</p> <p>Continues Pathophysiology II, emphasizing the physiology and pathology of the cardiovascular and the peripheral vascular system. Prerequisite: DUTEC 105 and DUTEC 106, and acceptance into program or permission of program chair.</p> <p>DUTEC113 Pathophysiology IV • 3.0 Credits</p> <p>Continues Pathophysiology III, emphasizing the physiology and the pathology of the cardiovascular and cerebral vascular system. Prerequisite: DUTEC 105, DUTEC 106, and DUTEC 112, and acceptance into program or permission of program chair.</p> <p>DUTEC120 General Ultrasound II: Obstetrics & Gynecology • 5.0 Credits</p> <p>Presents current theory and scanning techniques for medical sonographers, focusing on obstetrics and gynecology procedures and pathologies. Prerequisite: acceptance into program or permission of program chair.</p> <p>DUTEC121 Echocardiography II • 5.0 Credits</p> <p>Continues basic echocardiography. Students concentrate on Doppler echocardiographic techniques and valvular heart disease as relating to the practice of adult echocardiography. Prerequisite: acceptance into program or permission of program chair.</p> <p>DUTEC130 General Ultrasound III: Small Parts • 5.0 Credits</p> <p>Presents the anatomy and pathophysiology of small human body parts. Intraoperative scanning focuses on surgical procedures. Prerequisite: acceptance into program or permission of program chair.</p>	<p>DUTEC131 Echocardiography III • 5.0 Credits</p> <p>Examines issues relating to the fetal development of the heart. Course also addresses structural anomalies of the heart and anomalies of cardiac location. Prerequisite: acceptance into program or permission of program chair.</p> <p>DUTEC140 General Ultrasound IV • 5.0 Credits</p> <p>Examines issues relating to the clinical practicum in abdominal and obstetrics/gynecology. Prerequisite: acceptance into program or permission of program chair.</p> <p>DUTEC141 Echocardiography IV • 5.0 Credits</p> <p>Examines issues relating to the systolic and diastolic function of the heart. Course also addresses quantification of systolic function and dysfunction through dimensions, ejection fraction, and wall scoring. Course includes comprehensive material on diagnosing diastolic function and the treatments available. Prerequisite: acceptance into program or permission of program chair.</p> <p>DUTEC160 Vascular Scanning & Techniques I • 3.0 Credits</p> <p>Presents current theory and scanning techniques for medical sonographers. Students learn Doppler techniques used to diagnose peripheral vascular and cerebral vascular disease. Prerequisite: acceptance into program or permission of program chair.</p> <p>DUTEC161 Vascular Scanning & Techniques II • 3.0 Credits</p> <p>Presents current theory and scanning techniques for medical sonographers. Students learn Doppler techniques used to diagnose peripheral venous disease of both the upper and lower extremities. Prerequisite: acceptance into program or permission of program chair.</p> <p>DUTEC162 Vascular Scanning & Techniques III • 3.0 Credits</p> <p>Presents current theory and scanning techniques for medical sonographers. Students learn Doppler techniques used to diagnose peripheral arterial disease of both the upper and lower extremities. Prerequisite: acceptance into program or permission of program chair.</p> <p>DUTEC165 Ultrasound Equipment III • 3.0 Credits</p> <p>Provides hands-on ultrasound scanning experience in the student's clinical specialty area. Competency is required before beginning the clinical practicum. Prerequisite: acceptance into program or permission of program chair.</p> <p>DUTEC170 Ultrasound Physics & Instrumentation I • 3.0 Credits</p> <p>Covers acoustical physics, including heat energy, light and sound, wave theory, reflection, refraction, resonance, tissue interaction, transducers, bioeffects, and computers in ultrasonics. Prerequisite: acceptance into program or permission of program chair.</p> <p>DUTEC171 Ultrasound Physics & Instrumentation II • 3.0 Credits</p> <p>Continues DUTEC 170. Topics include Doppler effect, Doppler techniques, acoustic power, fluid dynamics, and quality assurance procedures. Prerequisite: acceptance into program or permission of program chair.</p> <p>DUTEC180 Advanced Studies: General Ultrasound • 3.0 Credits</p> <p>Examines issues relating to the clinical practicum in abdominal and obstetrics/gynecology. Prerequisite: acceptance into program or permission of program chair.</p> <p>DUTEC181 Advanced Studies: Echo-Vascular • 3.0 Credits</p> <p>Examines issues relating to the clinical practicum in echocardiology and vascular technology. Prerequisite: acceptance into program or permission of program chair.</p>
--	--

Courses & Programs

DUTEC185

Electrocardiography (EKG) • 2.0 Credits

Recognition of ECG tracing with normal and abnormal arrhythmias; treadmill testing, holter monitoring, phonocardiography, and heart auscultation. Review of case examples for analysis and synthesis. **Prerequisite:** acceptance into program or permission of program chair.

DUTEC190

Survey of Echocardiography I • 2.0 Credits

Continues basic echocardiography. Students concentrate on Doppler echocardiographic techniques and valvular heart disease as relating to the practice of adult echocardiography. **Prerequisite:** acceptance into program or permission of program chair.

DUTEC191

Survey of General Ultrasound I • 2.0 Credits

Presents the anatomy and pathophysiology of small human body parts. Students learn basic scanning and evaluation skills which apply to thyroid, scrotal, and breast ultrasound. **Prerequisite:** acceptance into program or permission of program chair.

DUTEC192

Survey of Echocardiography II • 2.0 Credits

Examines basic issues relating to the fetal development of the heart. Course also addresses basic structural anomalies of the heart and anomalies of cardiac location. **Prerequisite:** acceptance into program or permission of program chair.

DUTEC193

Survey of General Ultrasound II • 2.0 Credits

Presents current theory and scanning techniques for medical sonographers. Students learn basic scanning and interpretive skills of the female pelvis. **Prerequisite:** acceptance into program or permission of program chair.

DUTEC194

Survey of Echocardiography III • 2.0 Credits

Examines basic issues relating to the systolic and diastolic function of the heart. Course also addresses quantification of systolic function and dysfunction through dimensions, ejection fraction, and wall scoring, as well as basic, entry-level material on diagnosing diastolic function and the treatments available. **Prerequisite:** acceptance into program or permission of program chair.

DUTEC195

Survey of General Ultrasound III • 2.0 Credits

Examines issues relating to the clinical practicum in abdominal and obstetrics/gynecology. **Prerequisite:** acceptance into program or permission of program chair.

DUTEC199

Special Studies • 1.0 - 5.0 Credits

A class used to explore new coursework.

DUTEC210

Clinical Practicum I • 12.0 Credits

Provides clinical experience in an ultrasound department under the supervision of a sonographer. **Prerequisite:** acceptance into program or permission of program chair.

DUTEC220

Clinical Practicum II • 12.0 Credits

Provides additional clinical experience in an ultrasound department under the supervision of a sonographer. **Prerequisite:** DUTEC 210 and acceptance into program or permission of program chair.

DUTEC230

Clinical Practicum III • 12.0 Credits

Provides additional clinical experience in an ultrasound department under the supervision of a sonographer. **Prerequisite:** DUTEC 210 and 220 and acceptance into program or permission of program chair.

DUTEC240

Clinical Practicum IV • 12.0 Credits

Provides additional clinical experience in an ultrasound department under the supervision of a sonographer. **Prerequisite:** DUTEC 210, 220, and 230 and acceptance into program or permission of program chair.

DUTEC250

Ultrasound Physics for Mammographers • 3.0 Credits

Covers acoustical physics, including the concepts and principles of sound transmission, and the utilization of high frequency sound to produce images for diagnostic purposes. **Prerequisite:** acceptance into program or permission of program chair.

DUTEC251

Breast Ultrasound for Mammographers • 3.0 Credits

Reviews anatomy and physiology of the breast. Includes orientation to cross-sectional imaging of the breast, correlation with mammographic images, and characterization of normal and abnormal findings from a sonographic viewpoint. **Prerequisite:** DUTEC 250 or permission of program chair.

DUTEC252

Ultrasound Equipment/Knobology for Mammographers • 2.0 Credits

Introduces the ultrasound system. Includes detailed descriptions of essential parts of the ultrasound system using a variety of ultrasound machines, classroom demonstrations of system operations and technique, and some practice on the systems. **Prerequisite:** DUTEC 251 and acceptance into program or permission of program chair.

DUTEC269

Physics Review • 2.0 Credits

Prepares student for certification exams by reviewing physics and ultrasound instrumentation. Students focus on mathematical analysis and physics theories. **Prerequisite:** acceptance into program or permission of program chair.

Early Childhood Education

columbiabasin.edu/eced

Department Overview: Early Childhood Education (ECED) is a professional technical program designed to prepare students for employment in a variety of early care and educational settings. Course content focuses on the educational and developmental needs of young children from birth to age eight. The ECED program combines theory and practical experience with emphasis placed on active student involvement. Course work includes participation, observation and practical experience. Students may enroll in the ECED program at the beginning of any quarter on either a full- or part-time basis. Most courses are offered in the evenings or on Saturdays to accommodate the varied schedules of working students. **Additional class options are listed in the Education section.**

Degrees and Certificates Offered

- Associate in Applied Science (AAS) in Early Childhood Education degree - 90-96 credits
- State Early Childhood Education One-Year Certificate - 47 credits
- State Short Early Childhood Education Certificate of Specialization - 20 credits
- State Initial Early Childhood Education Short-Term Certificate - 12 credits
- Child Development Associate (CDA) Short-Term Certificate - 10 credits

Program Goals Upon completion of the program, successful students will demonstrate both practical skills and foundational knowledge of best practices in early care and education in order to:

- Understand and apply the principles of child development and learning for children birth to age eight
- Create a nurturing child-centered environment that considers the needs of the whole child

Courses & Programs

- Design curriculum and assessments that are developmentally appropriate and responsive to the diverse needs of children
- Practice current first-aid, health and safety techniques
- Demonstrate the ability to select guidance strategies tailored to the unique needs of each child
- Utilize core knowledge of the early childhood field to demonstrate intentional decision-making about policies and practices for children
- Engage with children, families, colleagues, community and society ethically and professionally
- Enter the workforce prepared to deliver quality services to young children and their families in a variety of settings

ECED 102 (Formerly ECE 102)

Introduction to Curriculum • 3.0 Credits

Provides students with both a theoretical and practical understanding of the curriculum content in a developmentally appropriate setting for young children.

ECED 103 (Formerly ECE 103)

Art • 3.0 Credits

Provides the student with a basic understanding of the methods used for teaching visual art to young children in a developmentally appropriate manner.

ECED 110 (Formerly ECE 1172)

Preschool Seminar • 1.0 - 3.0 Credits

Provides an opportunity to participate in a short-term seminar relating to early childhood education.

ECED 112 (Formerly ECE 112)

Introduction to ELL Teaching Strategies • 3.0 Credits

Provides an overview of the philosophy and stages of language acquisition for English language learners in an early learning setting. A variety of instructional strategies are explored.

ECED 116 (Formerly ECE 116)

ECED Special Topics Symposium • 1.0 - 3.0 Credits

An opportunity to participate in a class dealing with special topics that relate to early childhood education but are not covered in depth in the existing curriculum.

ECED 117 (Formerly ECE 117)

ECED Seminar • 1.0 - 3.0 Credits

Provides an opportunity to participate in an intensive, short-term learning experience relating to early childhood education.

ECED 118 (Formerly ECE 118)

Skills Training • 1.0 - 3.0 Credits

Provides an opportunity to participate in a short-term skills training relating to early childhood education.

ECED 119 (Formerly ECE 119)

ECED Workshop • 1.0 - 3.0 Credits

An opportunity to participate in a workshop class relating to early childhood education.

ECED 122 (Formerly ECE 122)

Math & Science • 1.0 - 5.0 Credits

Provides ideas for introducing developmentally appropriate math and science and concepts to young children. Students have an opportunity to develop and experience math and science learning activities.

ECED 124 (Formerly ECE 120)

Children's Literature • 3.0 Credits

Increases awareness of various types of literature for young children and explores meaningful ways to share high quality books in early care and education settings.

ECED 127 (Formerly ECE 127)

Music & Movement • 3.0 Credits

In this interactive class, students learn the importance of providing high quality music and movement activities in an early learning setting.

ECED 141 (Formerly ECE 141)

Child Development Associate • 10.0 Credits

Provides the formal education hours required for Child Development Associate (CDA) candidates working in center-based infant & toddler, center-based preschool, or family home child care programs. Instruction focuses on CDA Competency Goals and prepares students for the National CDA assessment and credential. This course is offered on an as-needed basis.

ECED 142 (Formerly ECE 1411)

Child Development Associate • 1.0 - 10.0 Credits

Provides the formal education hours required for Child Development Associate (CDA) candidates working in center-based infant and toddler, center-based preschool, or family home child care programs. Instruction focuses on CDA Competency Goals and prepares students for the National CDA assessment and credential.

ECED 143 (Formerly ECE 1412)

Child Development Associate • 1.0 - 11.0 Credits

Provides the formal education hours required for Child Development Associate (CDA) candidates working in center-based infant and toddler, center-based preschool, or family home child care programs. Instruction focuses on CDA Competency Goals and prepares students for the National CDA assessment and credential.

ECED 144 (Formerly ECE 1413)

Child Development Associate • 1.0 - 11.0 Credits

Provides the formal education hours required for Child Development Associate (CDA) candidates working in center-based infant and toddler, center-based preschool, or family home child care programs. Instruction focuses on CDA Competency Goals and prepares students for the National CDA assessment and credential.

ECED 145 (Formerly ECE 1414)

Child Development Associate • 1.0 - 11.0 Credits

Provides the formal education hours required for Child Development Associate (CDA) candidates working in center-based infant and toddler, center-based preschool, or family home child care programs. Instruction focuses on CDA Competency Goals and prepares students for the National CDA assessment and credential.

ECED 146 (Formerly ECE 1415)

Child Development Associate • 1.0 - 11.0 Credits

Provides the formal education hours required for Child Development Associate (CDA) candidates working in center-based infant and toddler, center-based preschool, or family home child care programs. Instruction focuses on CDA Competency Goals and prepares students for the National CDA assessment and credential.

ECED 147 (Formerly ECE 1416)

Child Development Associate • 1.0 - 11.0 Credits

Provides the formal education hours required for Child Development Associate (CDA) candidates working in center-based infant and toddler, center-based preschool, or family home child care programs. Instruction focuses on CDA Competency Goals and prepares students for the National CDA assessment and credential.

ECED 148 (Formerly ECE 1417)

Child Development Associate • 1.0 - 11.0 Credits

Provides the formal education hours required for Child Development Associate (CDA) candidates working in center-based infant and toddler, center-based preschool, or family home child care programs. Instruction focuses on CDA Competency Goals and prepares students for the National CDA assessment and credential.

Courses & Programs

ECED 149 (Formerly ECE 1418)

Child Development Associate • 1.0 - 11.0 Credits

Provides the formal education hours required for Child Development Associate (CDA) candidates working in center-based infant and toddler, center-based preschool, or family home child care programs. Instruction focuses on CDA Competency Goals and prepares students for the National CDA assessment and credential.

ECED 151 (Formerly ECE 151)

Supervised Practicum • 3.0 Credits

Designed to be taken just before completion of an Early Childhood Education certificate or degree, this class must be taken in conjunction with ECED 152. In class, theory is combined with practical experience in an ECE setting. Emphasis is on improving teaching skills through self-evaluation.

ECED 152 (Formerly ECE 1511)

Supervised Practicum Lab • 1.0 - 6.0 Credits

Designed to be taken just before completion of an Early Childhood Education certificate or degree, this class must be taken in conjunction with ECED 151. The student is required to spend 33 hours working in an early childhood setting to complete class assignments.

ECED 153 (Formerly ECE 1419)

Child Development Associate • 1.0 - 11.0 Credits

Provides the formal education hours required for Child Development Associate (CDA) candidates working in center-based infant and toddler, center-based preschool, or family home child care programs. Instruction focuses on CDA Competency Goals and prepares students for the National CDA assessment and credential.

ECED 201 (Formerly ECE 201)

Multicultural Education • 3.0 Credits

Explores the theory and practice of implementing a culturally responsible early childhood program.

ECED 216 (Formerly ECE 216)

Advanced Special Topics • 1.0 - 3.0 Credits

An opportunity to participate in advanced classes dealing with special topics that relate to early childhood education but are not covered in depth in the existing curriculum.

ECED 217 (Formerly ECE 217)

Advanced Seminar • 1.0 - 3.0 Credits

Provides an opportunity to participate in an advanced short-term learning experience relating to early childhood education.

ECED 218 (Formerly ECE 218)

Advanced Skills Training • 1.0 - 3.0 Credits

Provides an opportunity to participate in an advanced short-term skills training relating to early childhood education.

ECED 219 (Formerly ECE 219)

Advanced Workshop • 1.0 - 3.0 Credits

An opportunity to participate in an advanced workshop class relating to early childhood education.

ECED 221 (Formerly ECE 221)

Strategies for Teaching Special Needs • 3.0 Credits

An introduction to teaching methods that can be used with children who have special needs in an inclusive early care & education setting. **Prerequisite:** EDUC& 203.

ECED 222 (Formerly ECE 222)

Sign Language Level 1 • 3.0 Credits

An introduction to sign language using either the Signing Exact English (SEE) or American Sign Language (ASL) method. This course provides an opportunity for students to gain a better understanding of sign language, its application, and to build a basic signing vocabulary.

ECED 223 (Formerly ECE 223)

Sign Language Level 2 • 3.0 Credits

The level two sign language course broadens a student's knowledge of either Signing Exact English (SEE) or American Sign Language (ASL) and builds fluency and communication skills. **Prerequisite:** ECED 222 or instructor permission.

ECED 224 (Formerly ECE 224)

Sign Language Level 3 • 3.0 Credits

Level three sign language broadens a student's knowledge of either Signing Exact English (SEE), or American Sign Language ASL, extending communication fluency and skills learned in the Level 1 or Level 2 sign language classes. **Prerequisite:** ECED 223 or instructor permission.

ECED 251 (Formerly ECE 251)

Advanced Supervised Practicum • 1.0 - 3.0 Credits

Designed to be taken just before completion of an Early Childhood Education certificate or degree, this class combines the Early Childhood Education content learned in previous classes with practical application for students who need further experience. Emphasis is on improving personal teaching skills while gaining on-the-job experience working with professionals in an early learning setting.

ECED 252 (Formerly ECE 2511)

Advanced Supervised Practicum Lab • 1.0 Credit

Designed to be taken just before completion of an Early Childhood Education certificate or degree, this class combines the Early Childhood Education content learned in previous classes with practical application for students who need further experience. Emphasis is on improving personal teaching skills while gaining on-the-job experience working with professionals in an early learning setting.

ECED 280 (Formerly ECE 2891)

Special Studies Lab • 1.0 - 3.0 Credits

Designed to incorporate into the curriculum special learning opportunities in the field of early childhood education.

ECED 281 (Formerly ECE 2892)

Special Studies Lab • 1.0 - 15.0 Credits

Designed to incorporate into the curriculum special learning opportunities in the field of early childhood education.

ECED 282 (Formerly ECE 2893)

Special Studies Lab • 1.0 - 15.0 Credits

Designed to incorporate into the curriculum special learning opportunities in the field of early childhood education.

ECED 283 (Formerly ECE 2894)

Special Studies Lab • 1.0 - 15.0 Credits

Designed to incorporate into the curriculum special learning opportunities in the field of early childhood education.

ECED 284 (Formerly ECE 2895)

Special Studies Lab • 1.0 - 15.0 Credits

Designed to incorporate into the curriculum special learning opportunities in the field of early childhood education.

ECED 285 (Formerly ECE 2896)

Special Studies Lab • 1.0 - 15.0 Credits

Designed to incorporate into the curriculum special learning opportunities in the field of early childhood education.

ECED 286 (Formerly ECE 2897)

Special Studies Lab • 1.0 - 15.0 Credits

Designed to incorporate into the curriculum special learning opportunities in the field of early childhood education.

ECED 287 (Formerly ECE 2898)

Special Studies Lab • 1.0 - 15.0 Credits

Designed to incorporate into the curriculum special learning opportunities in the field of early childhood education.

Courses & Programs

ECED 288 (Formerly ECE 2899)

Special Studies Lab • 1.0 - 15.0 Credits

Designed to incorporate into the curriculum special learning opportunities in the field of early childhood education.

ECED 289 (Formerly ECE 289)

Special Studies • 1.0 - 15.0 Credits

Designed to incorporate into the curriculum special learning opportunities in the field of early childhood education.

ECED 300

Social Studies for Teachers • 5.0 Credits

An overview of the main concepts in social studies for early childhood teachers including topics in history, civics, geography, economics, and global issues. **Prerequisite:** Admission into the BASTE program at CBC.

ECED 301

Inquiry Based Science for Teachers • 3.0 Credits

An overview of the main concepts in natural science for early childhood teachers including topics in earth/space science, life science, physical science, and engineering design. Lab included. **Prerequisite:** Admission into the BASTE program at CBC.

ECED 307

Health and Physical Education Learning Standards • 2.0 Credits

This course will prepare students to plan for comprehensive health and fitness education in early learning programs serving children birth to grade three who are culturally, linguistically, and ability diverse and their families, including the dimension of wellness such as physical, emotional, and social well-being. **Prerequisite:** Admission into the BASTE program at CBC.

ECED 325

Advanced Math Methods • 3.0 Credits

Student will develop a deep understanding of the development of spatial and mathematical learning across all strands: number & operations, algebra, geometry, measurement, and data analysis & probability. There will be an emphasis on the content included in the state early learning guidelines and standards for children birth through grade three and their families who are culturally, linguistically, and ability diverse. **Prerequisite:** Admission into the BASTE program at CBC.

ECED 340

Assessment and Evaluation • 5.0 Credits

This course will prepare student to select, administer, score, and interpret formal assessment tools. Evaluate students for placement into special education programs. Develop Individual Education Plans (IEPs), Individual Family Service Plans (IFSPs), and 504 plans for children birth to third grade who are culturally, linguistically, and ability diverse and their families. **Prerequisite:** Admission into the BASTE program at CBC.

ECED 365

Observations, Documentation, and Monitoring • 3.0 Credits

Students will develop skills and strategies for observing, documenting and monitoring children birth to grade three who are culturally, linguistically and ability diverse and their families. Strategies for tracking progress toward meeting Individual Education Plan (IEP) and Individual Family Service Plan (IFSP) goals will also be addressed. **Prerequisite:** Admission into the BASTE program at CBC.

ECED 370

Adaptations, Modifications and Planning • 5.0 Credits

Students will use evidence based strategies to adapt and modify curriculum and environments for individual children birth to grade three who are culturally, linguistically, and ability diverse and their families. Create lesson plans for children based on Individual Education Plans (IEP), Individual Family Services Plans (IFSP) goals, and 504 plans. **Prerequisite:** Admission into the BASTE program at CBC.

ECED 385

Advanced Language and Literacy Methods • 3.0 Credits

Students will be able to refine teaching strategies for language acquisition and literacy skill development for children who are culturally, linguistically, and ability diverse at each developmental stage birth through grade three, through the four interrelated areas of speaking, listening, writing, and reading. There will be an emphasis on strategies for teaching reading and how to support each stage of literacy development across genres and purposes. Strategies for supporting families as they assist their children in learning language and literacy will also be addressed. **Prerequisite:** Admission into the BASTE program at CBC.

ECED 395

Equity and Social Justice • 3.0 Credits

Students will develop skills needed to effectively collaborate with others including school personnel, community agency personnel, and families to support children birth to third grade who are culturally, linguistically, and ability diverse and their families. Supervision of assistants and paraprofessionals will also be addressed. **Prerequisite:** Admission into the BASTE program at CBC.

ECED 479

Fall Student Teaching • 15.0 Credits

Students will gain experience working in an education setting with children birth through grade three who are culturally, linguistically, and ability diverse and their families under the supervision of a certificated teacher with an emphasis on building relationships and guiding behavior. **Prerequisite:** Admission into the BASTE program at CBC, ECED& 105, department permission, criminal background check required.

ECED 489

Winter Student Teaching • 15.0 Credits

Students will demonstrate effective teaching practice and experience working in an education setting with children birth through grade three who are culturally, linguistically, (including English language learners), and ability diverse and their families under the supervision of a certified teacher, with an emphasis on pedagogy in accordance with instructional frameworks in Washington state. Apply the use of technology for technology for assessment, instruction, and family engagement. **Prerequisite:** Admission into the BASTE program at CBC, ECED& 105, department permission, criminal background check required.

ECED 499

Spring Student Teaching • 15.0 Credits

Students will gain experience working in an education setting, with children birth through grade three who are culturally, linguistically (including English language learners), and ability diverse and their families under the supervision of a certificated teacher, with an emphasis on using data to improve practices. Apply the use of technology for technology for assessment, instruction, and family engagement. **Prerequisite:** Admission into the BASTE program at CBC, ECED& 105, department permission, criminal background check required.

ECED&100

Child Care Basics • 3.0 Credits

This course is designed to meet licensing requirements for early learning lead teachers and family home child care providers and the STARS 30 hour basics course recognized in the MERIT system. Topics: child growth/development, cultural responsiveness, community resources, guidance, health/safety/nutrition and professional practices.

ECED&105

Intro to Early Childhood Education • 5.0 Credits

Students will explore the foundations of early childhood education. Examine theories defining the field, issues, trends, best practices, and program models. Observe children, professionals and programs in action.

Courses & Programs

ECED&107 (Formerly ECE 230)

Health/Safety/Nutrition • 5.0 Credits

Introduction to implementation of equitable health, safety and nutrition standards for the growing child in group care. Focus on federal Child Care Block Grant funding (CCDF) requirements, Washington state licensing and Head Start Performance standards. Develop skills necessary to keep children healthy and safe, report abuse and neglect, and connect families to community resources.

ECED&120

Practicum-Nurturing Relationships • 2.0 Credits

In an early learning setting students will engage in establishing nurturing, supportive relationships with all children and professional peers. Focus on children's health and safety, promoting growth and development, and creating a culturally responsive environment.

ECED&132 (Formerly ECE 205)

Infant/Toddler Care • 3.0 Credits

Students will examine the unique developmental needs of infants and toddlers. Study the role of the caregiver, relationships with families, developmentally appropriate practices, nurturing environments for infants and toddlers, and culturally retentive care.

ECED&134

Family Child Care Management • 3.0 Credits

Students will learn how to manage a family childcare program. Topics include licensing requirements, record-keeping, relationship building, communication strategies, guiding behavior, and promoting growth and development.

ECED&138

Home Visiting & Engagement • 3.0 Credits

Plan and provide home visits and group activities. Promote secure parent-child relationships. Support families to provide high-quality early learning opportunities embedded in everyday routines and experiences.

ECED&139 (Formerly ECE 215)

Administration of ECE • 3.0 Credits

Students will develop administrative skills required to develop, operate, manage and improve early childhood education and care programs. Acquire basic business management skills. Explore resources and supports for meeting Washington State licensing and professional National Association for the Education of Young Children (NAEYC) standards.

ECED&160 (Formerly ECE 202)

Curriculum Development • 5.0 Credits

Students will investigate learning theory, program planning, tools and methods for curriculum development promoting language, fine/gross motor, social-emotional, cognitive and creative skills and growth in children birth through age 8 utilizing developmentally appropriate and culturally responsive practice.

ECED&170

Environments-Young Child • 3.0 Credits

This class focuses on the adult's role in designing, evaluating, and improving indoor and outdoor environments that ensure quality learning, nurturing experiences, and optimize the development of young children.

ECED&180

Language & Literacy Development • 3.0 Credits

This course examines teaching strategies for language acquisition and literacy skill development examined at each developmental stage (birth-age 8) through the four interrelated areas of speaking, listening, writing, and reading.

ECED&190 (Formerly ECE 121)

Observation/Assessment • 3.0 Credits

Students will collect and record observation and assessment data in order to plan for and support the child, the family, the group, and the community. Practice reflection techniques, summarizing conclusions, and communicating findings.

Economics

columbiabasin.edu/economics

Department Overview: Economics is the science that studies how societies use limited resources to meet unlimited wants. It is because of the broad nature of this social science that it is subdivided into macroeconomics and microeconomics. Macroeconomics is concerned with the use of fiscal and monetary policy to stabilize the national economy. Microeconomics tries to understand the behavior of the individual components of the economy.

ECON 110 (Formerly EC 110)

Economic Trends, Issues and Policy [S/B] • 5.0 Credits

This course is intended as a non-technical, issues-orientated 100-level course in economics. This course uses economic theory to analyze economic situations and the implications for possible public policy. The economic theory is very basic and appropriate, and not geared to business and economics majors but to those students who would like an overview of economic theory. The theory includes supply and demand, aggregate supply and aggregate demand, production possibilities, and a basic description of the general macroeconomic model. Some economic history related to the formation of U.S. policy and law is included. This course includes issues of gender, race, and ethnicity.

ECON 116 (Formerly EC 116)

Economic Development of the United States • 5.0 Credits

This class is a history of the American economy. It looks at the evolution of American economic institutions, from the colonial period, early statehood, the American Civil War, westward expansion, the impact of the two world wars, and the Great Depression that was between them. It looks at the regional and occupational specialization that enables the colonial economy to grow internally and to fit itself into the world economy that nurtured it.

ECON 199

Special Studies • 1.0 - 5.0 Credits

A class used to explore new coursework.

ECON 291 (Formerly EC 291)

History of American Economic Development [S/B] • 1.0 - 5.0 Credits

Concise overview of the basic elements of microeconomics and macroeconomics. Economic analysis is used to understand the major economic forces in American history with emphasis on those factors which aided growth and development. Economic theory is applied to understand and evaluate current social and economic problems in contemporary American society.

ECON 299

Special Studies • 1.0 - 5.0 Credits

A class used to explore new coursework.

ECON 305

Managerial Economics [S/B] • 5.0 Credits

The course covers allocation of resources, economic systems, economics institutions and incentives, markets structures and prices, productivity, international economics, the global marketplace, aggregate supply and demand, and public policy towards business. As a final project, students, using information from the class, prepare a report as to how economics impacts a specific business/company. **Prerequisite: meets the criteria for acceptance into a BAS/BSN program, completion of a two-year degree or equivalent, or instructor approval.**

Courses & Programs

ECON 310

Comparative Economic System • 5.0 Credits

ECON 310 first classifies and then examines the major economic systems of the world. The course focuses on a general understanding of how economic systems work and how economic theories of growth and development interact with government policy, history, and culture to explain economic performance of different countries. Economies examined in some detail include several advanced market capitalist countries (e.g., the former Soviet Union, Poland, and China), and other East Asian economies (e.g., South Korea, Malaysia, and India). The economies in Africa and Middle East are also covered. **Prerequisite:** meets the criteria for acceptance into a BAS/BSN program, completion of a two-year degree or equivalent, or instructor approval.

ECON 315

Economics of Healthcare [S/B] • 5.0 Credits

Covers the allocation, production, and distribution of healthcare in our economy. Examines how healthcare demand differs from that of other goods. Major topics include: cost and benefit evaluation methods, the demand for medical care including the law of demand, short run and long run costs of medical care, supply and demand, market structures, and the role of government in healthcare. The various segments of the healthcare industry are also studied. **Prerequisite:** meets the criteria for acceptance into a BAS/BSN program, completion of a two-year degree or equivalent, or instructor approval.

ECON&201 (Formerly EC 202)

Micro Economics [S/B] • 5.0 Credits

Micro economic concepts are applied to business and household decision-making as well as public policy. Major topics include: scarcity and choice, production possibilities, alternative allocative mechanisms, supply and demand analysis, elasticity, consumer choice, production and costs, market structures, antitrust and regulation, and public micro economics.

ECON&202 (Formerly EC 201)

Macro Economics [S/B] • 5.0 Credits

This course introduces such important concepts as: market systems and their alternatives, supply and demand, measurement and determination of a nation's output and income, inflation and unemployment, both demand-side and supply-side aspects of fiscal and monetary policies, federal debt, and international trade and finance.

Education

columbiabasin.edu/education

Department Overview: Education courses provide students the beginning coursework in teacher education that is needed upon transfer to teacher certification programs at Washington state colleges and universities. Most courses are offered in the evenings or on Saturdays to accommodate the varied schedules of working students.

EDUC 101 (Formerly ED 101)

Introduction to Education • 4.0 Credits

Students receive an overview of the history and philosophy of education, as well as develop an awareness of current educational requirements based on legislation for K-12 schools. Students also begin to develop a personal philosophy of education. This class must be taken in conjunction with EDUC 197.

EDUC 108 (Formerly ED 108)

Paraeducator in Schools • 3.0 Credits

Explore paraeducator roles and responsibilities in the delivery of educational services to students and certified/licensed staff. Demonstrate knowledge of selected core competencies for paraeducators in order to work effectively with a diverse student population.

EDUC 111 (Formerly ED 111)

Introduction to Instructional Strategies • 5.0 Credits

An overview of instructional strategies including theory and practical application within the K-12 classroom.

EDUC 112 (Formerly ED 112)

Introduction to ELA Teaching Strategies • 3.0 Credits

Provides an overview of the philosophy and stages of language acquisition for second language learners, K-12. Models and instructional strategies are explored and language assessment tools are examined.

EDUC 117 (Formerly ED 117)

Seminar • 1.0 - 3.0 Credits

Provides an opportunity to participate in an intensive, short-term learning experience relating to the field of early childhood education.

EDUC 128 (Formerly ED 128)

Introduction to Math Instruction • 5.0 Credits

An introduction to math instruction including math reform philosophy, theory, and practical application within the K-12 system.

EDUC 153 (Formerly EDUC 1532)

Paraeducation Supervised Practicum • 4.0 Credits

Designed to be taken just before completion of the paraeducation certificate, this class combines the paraeducation course content with practical application. Emphasis is on improving personal teaching skills while gaining on-the-job experience working with professionals in the field.

EDUC 197 (Formerly EDUC 1972)

Field Experience • 1.0 - 2.0 Credits

Students have an opportunity to observe theory in action and to gain experience in the field of education. This class must be taken in conjunction with EDUC 101.

EDUC 199

Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

EDUC 299

Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

EDUC&114 (Formerly ECE 106)

Child Development • 3.0 Credits

A study of the physical, emotional, social, and cognitive development of children from conception through eight years of age and related theories. Emphasis is given to current early childhood brain development research.

EDUC&115 (Formerly EDUC 106)

Child Development • 5.0 Credits

Build a foundation for explaining how children develop in all domains, conception through early adolescence. Explore various developmental theories, methods for documenting growth, and impact of brain development. Topics addressed: stress, trauma, culture, race, gender identity, socioeconomic status, family status, language, and health issues.

EDUC&130 (Formerly ECE 104)

Guiding Behavior • 3.0 Credits

Students will examine the principles and theories promoting social competence in young children and creating safe learning environments. Develop skills promoting effective interactions, providing positive individual guidance, and enhancing group experiences.

EDUC&136

School Age Care • 3.0 Credits

Students will develop skills to provide developmentally appropriate and culturally relevant activities/care for children ages 5-12 in a variety of settings. Topics include: implementation of curriculum, preparation of environments, building relationships, guiding cognitive and social emotional development, and community outreach.

Courses & Programs

EDUC&150 (Formerly ECE 209)

Child/Family/Community • 3.0 Credits

Students will integrate the family and community contexts in which a child develops. Explore cultures and demographics of families in society, community resources, strategies for involving families in the education of their child, and tools for effective communication.

EDUC&203 (Formerly ECE 107)

Exceptional Child • 3.0 Credits

A comprehensive introduction to the field of special needs children and their families, including an examination of legislative action, Individualized Education Program (IEP), handicapping conditions, child abuse, drug and alcohol effects, and socioeconomic, societal, and cultural factors that affect family functioning.

Electronics

columbiabasin.edu/electronics

Department Overview: Electronics courses are offered in support of short-term certificate and degree programs such as Nuclear Technology. Courses are designed to offer a basic understanding of electricity and electrical components.

ELT 101

Basic Electricity • 5.0 Credits

This course provides an introduction to the basic concepts of electricity including series and parallel circuits, AC and DC currents, transformers, resistance, capacitors, multimeter use, and troubleshooting.

ELT 111

Introduction to Electricity • 5.0 Credits

Introduction to the basic concepts of electricity, electrical fundamentals, and electronics. Includes AC and DC currents, heaters and heat tracing, electrical supply and control components, and electronic systems. **Prerequisite:** grade of 2.0 or better in MATH 095 or MATH 050 or MATH 070 or satisfactory placement test score.

ELT 124

Direct Current Circuits • 5.0 Credits

Basic principles of electricity and the applications of the fundamental laws to direct current networks. A study of electrical components, magnetism, inductance, capacitance, and elementary network analysis.

ELT 134

Alternating Current Circuits • 5.0 Credits

Fundamental principles of alternating current: sinusoidal and non-sinusoidal. A study of impedance, phase shift, coupling networks, transformers, and series and parallel resonance using standard vector notation. **Prerequisite:** ELT 124.

ELT 154

Semiconductors and Op Amps • 5.0 Credits

Introduces semiconductor devices and associated circuits with diodes, special purpose diodes, and various types of transistors (BJT, FETs, Thyristors, etc.), then concludes with Operational Amplifiers (Op Amps). Circuit application and troubleshooting is applied with all components. **Prerequisite:** ELT 134.

ELT 171

Digital Fundamentals • 5.0 Credits

Builds upon basic instrumentation and control knowledge and skills from previous classes. Focuses on developing the knowledge and skills in number systems, digital logic circuits, implementation technology and logic functions, arithmetic circuits, and sequential logic circuit building blocks. **Prerequisite:** ELT 154.

ELT 199

Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

ELT 201

Basic Electronics • 5.0 Credits

This course covers the concepts of electrical fundamentals and electronics including Ohm's and Kirchoff's Laws; series, parallel, and compound circuits; motors, relays, switches, inverters, converters; power distribution, wiring and routing; soldering, terminals, splicing; and troubleshooting.

ELT 211

Applied Electronics • 5.0 Credits

Broad-based course designed to apply knowledge and skills to the maintenance and operation of electrical components related to power plant instrumentation and controls. **Prerequisite:** ELT 124.

Emergency Medical Technician

columbiabasin.edu/emt

Department Overview: The field of Emergency Medical Services (EMS) is built upon foundational levels that begin with basic CPR/First Aid and end with the advanced care provided by a paramedic. Throughout EMS, students will find various levels of education that all focus toward the chain of survival. This chain is a theoretical ideal of how patients can best be treated, whether suffering a heart attack or being involved in a motor vehicle accident.

Emergency Medical Technician-Basic (EMT-B) is the certification level that comprises the largest population of EMS responders, and is often considered the backbone of EMS. The EMT performs basic lifesaving skills which include: control of bleeding, stabilizing fractures, assisting patients with medications, providing oxygen and other necessities to avoid the development/progression of shock, as well as transport to the emergency room. The EMT-B course is 15 weeks long.

Entrance into the EMT-B class is contingent upon the successful completion of a competitive entrance process. Applications are posted on the CBC website along with detailed instructions for completion of the application. EMT classes are held in the evenings two days per week with several Saturdays as well.

The responsibilities of the Advanced Emergency Medical Technician (AEMT) are to provide basic and limited advanced emergency medical care and transportation for critical and emergent patients who access the emergency medical system. It is not necessary to take the AEMT course in order to progress to the Paramedic program. The AEMT course is offered as needed; determined by the EMS officers and fire chiefs from area rural departments.

The objectives of the AEMT courses are to prepare students to achieve certification as a National Registered Advanced EMT to serve in the rural areas of SE Washington. The courses cover application of protocols, refining EMT skills and knowledge, IV therapy and medication administration of Washington state approved medications for the AEMT, necessary psychomotor skills through breakout labs and group exercises and internships. Students must pass EMT 103 and 104 with a cumulative grade of 2.5 or better to be eligible for a short-term certificate and eligible to take the National Registry Exam.

For additional EMS information, see the Paramedic section in the catalog.

EMT 101

Emergency Medical Technician-Basic • 1.0 - 10.0 Credits

This is the entry-level course to the Emergency Medical Service (EMS) profession and is designed for those who aspire to become an Emergency Medical Technician-Basic. This course focuses on: EMT roles and responsibilities, airway management, patient assessment, medical and trauma emergencies, anatomy and physiology, documentation, lifting and moving, and communications. This course also includes practical labs and a total of 10 hours of clinical experience in the Emergency department to provide direct hands-on experience with a variety of patients. Upon successful completion of this course, students are eligible to take the National Registry Certification Exam. In order to certify as an EMT in the state of Washington, the EMT candidate must affiliate with a state approved pre-hospital care organization. For more information, please see the Washington state Department of Health website.

Courses & Programs

EMT 103

Advanced Emergency Medical Technician (AEMT) I • 9.0 Credits

This is the first course of a two-quarter sequence primarily focused on training students to the level of an Advanced Emergency Medical Technician (AEMT). The objectives of this class are to prepare students to take EMT 104 by developing an understanding of the preparatory and fundamental components of the AEMT. This class covers application of protocols, refining EMT skills and knowledge, deepening the understanding of pathophysiology as it relates to medical and trauma patients, IV therapy, and medication administration. In addition, there will be extensive skills evaluation of necessary psychomotor components through breakout labs and group exercises as well as an internship to practice the appropriate skills. **Prerequisite:** EMT for one year and actively involved and sponsored by an EMS agency. **Recommended:** eligibility for ENGL 099 or better and eligibility for MATH 094, 040, or better.

EMT 104

Advanced Emergency Medical Technician (AEMT) II • 9.0 Credits

This is the second course of a two-quarter sequence primarily focused on training students to the level of an Advanced Emergency Medical Technician (AEMT). The objectives of the class are to prepare students to achieve certification as a National Registered Advanced EMT by building on the base of knowledge previously established through experience and EMT 103. This class covers application of protocols, documentation, resuscitation, managing the trauma, and OB patients. In addition, there will be extensive skills evaluation of necessary psychomotor components through breakout labs and group exercises as well as an internship to practice the appropriate skills. **Prerequisite:** EMT 103 with a 2.0 or better.

Engineering Technology

columbiabasin.edu/ent

Department Overview: The Engineering Technology curriculum prepares the technician to assume a place on the engineering team as an assistant to the professional engineer. The program is two years in length and includes courses in engineering science, drafting and related academic subjects. Skills are learned by completing projects in a variety of settings including campus labs, the computer-aided drafting (CAD) lab and in the field completing projects in surveying.

It is the intent of the Engineering Technology department to:

- Generate an understanding of the basic principles of science and engineering and utilize that knowledge in the solution of problems
- Provide a basic education that will allow future educational growth
- Develop confidence in those skills needed for employment in the field of engineering technology

A Computer-Aided Drafting Certificate is also available. The certificate emphasizes the CAD classes, preparing students for entry into the work force.

ENT 111

Introduction to Engineering • 5.0 Credits

This course introduces students to the role of the engineer, engineering dimensions and standards, and the basic methodology of engineering problem-solving. **Prerequisite:** MATH 095 or MATH 098 or MATH 070 or MATH 072 or concurrent enrollment or instructor permission.

ENT 114 (Formerly ENT 116)

Introduction to Drafting • 4.0 Credits

Basic principles of drafting and introduction to CAD to include spatial visualization, line types, sketching, scale, orthographic projection, isometric drawings, sectional views, oblique lines and surfaces, auxiliary views and basic applications.

ENT 118

Spatial Visualization • 2.0 Credits

An overview of the techniques used to mentally manipulate 2-dimensional and 3-dimensional figures. Includes the basics of drafting such as line types, orthographic projection, isometric drawings, and basic applications.

ENT 121

Engineering Fundamentals w/ Lab • 4.0 Credits

Fundamental concepts relevant to many engineering disciplines, including: energy, vectors, force systems, free body diagrams, strength of materials, associated problem-solving, and basic design procedures. **Prerequisite:** ENT 111.

ENT 122

Materials • 3.0 Credits

An introduction to the materials which are used in the fabrication of construction projects including: foundations, wood, heavy timber frame construction, wood light frame construction, exterior finishes, interior finishes, masonry, roofing, and glass.

ENT 124 (Formerly ENT 125)

Intermediate Drafting • 4.0 Credits

Intermediate principles of drafting and CAD to include spatial visualization, line types, sketching, scale, orthographic projection, isometric drawings, sectional views, oblique lines and surfaces, auxiliary views and intermediate applications. **Prerequisite:** ENT 114 with a grade of 2.0 or higher, or ENT 118 and ENT 267 with a grade of 2.0 or higher, or instructor permission.

ENT 128

Architecture & Engineering Blueprint Reading • 2.0 Credits

An overview of the techniques used in reading construction drawings for architecture and engineering projects.

ENT 134

Surveying w/ Lab • 6.0 Credits

A course in plane surveying which includes: horizontal, vertical, and angular measurements, traversing, mapping, construction survey, land survey, and calculations. **Prerequisite:** MATH 113, MATH 142, or instructor permission.

ENT 135

Statics • 5.0 Credits

Vectors, types of forces, vector addition, moments, conditions for equilibrium, free-body diagrams and conventions, coplanar force systems, and load analysis of basic trusses and frames. **Prerequisite:** MATH 113, ENT 121, or instructor permission.

ENT 136 (Formerly ENT 1361)

Advanced Drafting • 4.0 Credits

Advanced principles of drafting and CAD to include 3D projects, plan and profile drawings, advanced views, advanced sections, and dimensioning. **Prerequisite:** ENT 124 or instructor permission.

ENT 171 (Formerly ENT 1711)

Technical Drafting • 3.0 Credits

An introductory course in mechanical drawing which includes: geometric construction, orthographic projection, sectional views, auxiliary views, isometric and oblique drawings, dimensions, threads, fasteners, and lettering.

ENT 199

Special Studies • 1.0 - 15.0 Credits

An experimental class to be used to explore new approaches and applications to engineering technology. **Prerequisite:** student must be enrolled in the ENT program and have instructor permission.

ENT 214

Strength of Materials • 5.0 Credits

A study of stress and deformation of materials. Topics include: axial and torsional loading, stress-strain relationships, shearing stresses, temperature stresses, and engineering applications. **Prerequisite:** ENT 135 or instructor permission.

Courses & Programs

ENT 216 (Formerly ENT 2161)

Mechanical Drafting & Design • 5.0 Credits

Fundamentals of design, assembly drawings, dimensioning systems, and a mechanical design/drafting project. The primary emphasis of this course is the application of CAD to mechanical and 3-D drawings using AutoCAD. **Prerequisite:** ENT 136 or instructor permission.

ENT 219 (Formerly ENT 2191)

Construction Estimating • 1.0 Credit

An overview of the techniques used in estimating material quantities in construction projects. **Prerequisite:** ENT 122 or instructor permission.

ENT 224

Structures • 5.0 Credits

Load analysis and design of basic structural members using timber and steel. **Prerequisite:** ENT 214.

ENT 226 (Formerly ENT 2261)

Architectural/Structural Drafting • 5.0 Credits

A drafting and design course covering construction techniques, architectural drawings, organization of drawing sets, and design projects. **Prerequisite:** ENT 136.

ENT 229

Construction Specifications • 2.0 Credits

A study of construction specifications using the CSI format. **Prerequisite:** ENT 219 and completion of or concurrent enrollment in ENT 226 or instructor permission.

ENT 236 (Formerly ENT 2361)

Design • 5.0 Credits

Various individual and team projects with specific criteria and constraints assigned. The completed projects are formally presented using both oral and written reporting techniques. **Prerequisite:** ENT 224, ENT 226, and enrollment in the ENT program.

ENT 238

Electricity • 5.0 Credits

An introductory course in electricity which includes: basic electrical theory and mathematical relationships, series and parallel circuits, DC and AC circuit components, power generation and distribution. **Prerequisite:** MATH& 141 and enrollment in the ENT program or instructor permission.

ENT 267

AutoCAD I w/ Lab • 3.0 Credits

This course utilizes AutoCAD for computer-aided drafting (CAD). The course shows how to use AutoCAD to set up drawings, additional draw and edit commands, dimensioning, and text. Students utilize drafting and editing techniques to efficiently produce their drawings. **Prerequisite:** ENT 116 or equivalent.

ENT 268

AutoCAD II w/ Lab • 3.0 Credits

This course goes beyond the basic fundamentals of AutoCAD and examines ways to use it in today's workplace. Emphasis is placed on advanced commands including: blocks, dimensions, attributes and extracting them, paper space/model space, xrefs, and file management. The class then customizes a menu creating: custom pulldown menus, toolbars, and macros. **Prerequisite:** ENT 267.

ENT 270

3-D w/ Lab • 3.0 Credits

The focus of this course is three-dimensional drawings using AutoCAD. After completion, students are proficient in wire line and surface 3-D modeling. There is also a brief overview of rendering and transferring of rendered information to other presentation software. **Prerequisite:** ENT 268 or instructor permission.

ENT 271

Drawing Production w/ Lab • 3.0 Credits

This course simulates actual drawing projects in a variety of disciplines such as: civil, structural, architectural, mechanical, and electrical. Students are expected to develop and manage large sets of drawings. **Prerequisite:** ENT 268 or instructor permission.

ENT 272

Advanced 3-D w/ Lab • 3.0 Credits

The focus of this course is three-dimensional solid modeling using a 3-D CAD program. After completion, students are proficient in 3-D solids modeling, mass property takeoffs, and the uses of three-dimensional media across software platforms. **Prerequisite:** ENT 268.

ENT 273

Advanced AutoCAD Applications w/ Lab • 3.0 Credits

This course covers advanced AutoCAD features, such as how AutoCAD interacts with the web, from transmitting files, reviewing, to collaborating. The class also examines AutoCAD interactions with other programs. Advanced features of attributes, xrefs, and layouts, etc. Express Tools are also covered. **Prerequisite:** ENT 268 or instructor permission.

ENT 274

Architectural Residential Drawing w/ Lab • 3.0 Credits

A drafting and design course covering architecture, residential drawings, and the organization of drawing sets incorporating design projects. **Prerequisite:** ENT 267.

ENT 280 (Formerly ENT 2801)

Extended CAD Lab • 1.0 - 3.0 Credits

This is an open lab class to support AutoCAD. It allows for intermediate and advanced skill placement. Specific projects may be assigned. It is a variable credit, continued enrollment class. **Prerequisite:** ENT 267 or instructor permission.

ENT 299

Special Studies • 1.0 - 15.0 Credits

An experimental class to be used to explore new approaches and applications to engineering technology. **Prerequisite:** student must be enrolled in the ENT program and have instructor permission.

English

columbiabasin.edu/english

Department Overview: The English department offers a wide range of writing courses designed to meet the needs of all who enroll. Offerings include review/developmental grammar and writing; expository, research and work-related writing; creative writing; and linguistics.

Career opportunities include the fields of teaching, law, speech writing, technical communication and editing, journalism and public relations, among others. In general, these courses give students the reading, writing and critical thinking skills to prepare for success in life.

ENGL 090 (Formerly ENG 090)

Writing Express • 1.0 - 3.0 Credits

An intensive composition course designed to prepare students for college reading and writing. Successful completion of this course makes the student eligible for ENGL& 101. **Prerequisite:** successful completion of ENGL 098 or ENGL 099 placement.

ENGL 091 (Formerly ENG 091)

Grammar Skills • 5.0 Credits

A review of basic grammar including sentence writing and editing, sentence structure, usage, and mechanics. Grade is pass/no credit. **Prerequisite:** appropriate placement.

ENGL 095 (Formerly ENG 095)

English Review • 5.0 Credits

A study of basic grammar and beginning paragraph writing. This is a review class to better prepare students to continue to more advanced English courses.

ENGL 097

Special Studies • 5.0 Credits

A class used to explore new coursework.

Courses & Programs

ENGL 098 (Formerly ENG 098)

Writing Prep I • 5.0 Credits

This course is designed to teach the basics of writing well-developed and grammatically correct single and multiple paragraph papers. **Prerequisite:** ENGL 098 placement or successful completion of ENGL 091.

ENGL 099 (Formerly ENG 099)

Writing Prep II • 5.0 Credits

An intensive composition course designed to prepare students for college reading and writing. Successful completion of this course makes the student eligible for ENGL& 101. **Prerequisite:** successful completion of ENGL 098 or ENGL 099 placement.

ENGL 103 (Formerly ENG 103)

Writing in the Workplace • 5.0 Credits

This course is designed to teach writing tasks encountered in the workplace including resumes, business letters, memos, reports, instructions, and policies. **Prerequisite:** successful completion of ENGL 099 or placement into ENGL& 101.

ENGL 140 (Formerly LIT 140)

The Cinema [H] • 5.0 Credits

The study of cinema and its narrative function; presentation of alternative modes of narrative structure; comparative analyses of original texts and their filmic adaptations. **Prerequisite:** ENGL 099 or concurrent enrollment.

ENGL 160 (Formerly LIT 160)

Women's Literature [H] • 5.0 Credits

This course is a study of the ways women represent female experience and question cultural norms through the literary arts. **Prerequisite:** eligible for ENGL& 101 or currently enrolled in ENGL 099.

ENGL 180 (Formerly LIT 180)

Multicultural Literature [H] • 5.0 Credits

Introduction to the multicultural literatures of the Americas (i.e., African American literature, Native American literature, Hispanic American literature, Asian American literature, etc). **Prerequisite:** eligible for ENGL& 101 or currently enrolled in ENGL 099.

ENGL 195 (Formerly LIT 195)

Bible as Literature [H] • 5.0 Credits

Readings from the Old Testament and New Testament, in appropriate cultural, historical, and literary contexts. **Prerequisite:** eligible for ENGL& 101 or currently enrolled in ENGL 099.

ENGL 199

Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

ENGL 203 (Formerly LIT 203)

Mythology [H] • 5.0 Credits

The theory of mythology and the use of Greco-Roman myths in art and literature. **Prerequisite:** eligible for ENGL& 101 or currently enrolled in ENGL 099.

ENGL 210 (Formerly ENG 210)

Intro to Linguistics [H] • 5.0 Credits

An introduction to the study of human language from the standpoint of sounds and sound patterns, word formation, and sentence structure. Students learn about the similarities and differences among the world's languages and are introduced to the various sub-disciplines of the field of linguistics. **Prerequisite:** ENGL& 101 or concurrent enrollment in ENGL& 101.

ENGL 257 (Formerly ENG 255)

English Grammar [H] • 5.0 Credits

An introduction to the terms, concepts (including phonemics, morphology, and syntax), and analytical methods of English grammar. **Prerequisite:** ENGL& 101 or concurrent with ENGL& 101.

ENGL 264 (Formerly LIT 264)

English Literature [H] • 5.0 Credits

A survey of English literature from Beowulf to 1640. **Prerequisite:** eligible for ENGL& 101 or currently enrolled in ENGL 099.

ENGL 265 (Formerly LIT 265)

English Literature [H] • 5.0 Credits

A survey of English literature from 1640 to 1800. **Prerequisite:** eligible for ENGL& 101 or currently enrolled in ENGL 099.

ENGL 266 (Formerly LIT 266)

English Literature [H] • 5.0 Credits

A survey of English literature from 1800 to the present. **Prerequisite:** eligible for ENGL& 101 or currently enrolled in ENGL 099.

ENGL 275 (Formerly LIT 275)

The Lord of the Rings [H] • 5.0 Credits

Students study J.R.R. Tolkien's trilogy and Peter Jackson's films, analyzing their literary, theological, and philosophical elements. Students read the novels in their entirety over the course of the quarter. **Prerequisite:** eligible for ENGL& 101 or currently enrolled in ENGL 099.

ENGL 280 (Formerly LIT 280)

Lesbian, Gay, Bisexual, Trans, Queer Studies [H] • 5.0 Credits

An introduction to the interdisciplinary field of lesbian/gay/bisexual/transgender/gueer studies from a historical and multicultural perspective. Works of fiction, poetry, drama, nonfiction, and film/television are used to understand connections between sexual orientation, gender identity, and the humanities. **Prerequisite:** eligible for ENGL& 101 or currently enrolled in ENGL 099.

ENGL 299

Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

ENGL 315

Writing for Health Professionals [C] • 5.0 Credits

This course provides writing instruction for students preparing for careers in the health sciences. Students develop skills needed to research health-related topics and communicate technical information in genres appropriate for diverse audiences, such as health professionals, patients, clients, and the public. **Prerequisite:** ENGL& 101 or ENGL& 102 or ENGL&235 with a grade of 2.0 or higher. Meets the criteria for acceptance into a BAS/BSN program, completion of a two-year degree, or instructor approval.

ENGL 410

Professional & Organizational Communication [C] • 5.0 Credits

A study of the skills necessary to communicate effectively in the workplace. Topics include selection of the proper channel and medium for information delivery, business etiquette, and professionalism. Students analyze and prepare correspondence, proposals, and reports. **Prerequisite:** successful completion of ENGL& 101 and acceptance into a BAS/BSN program, completion of a two-year degree or equivalent, or instructor approval.

ENGL&101 (Formerly ENG 101)

English Composition I [C] • 5.0 Credits

Study and application of the principles of writing clear exposition with emphasis on organizing unified and coherent essays. **Prerequisite:** passing grade in ENGL 090 or 099 or placement into ENGL& 101.

ENGL&102 (Formerly ENG 201)

Composition II [C] • 5.0 Credits

An advanced expository writing course focusing on research essays and other aspects of college writing. **Prerequisite:** ENGL& 101 with a 1.0 or better.

ENGL&111 (Formerly LIT 150)

Intro to Literature [H] • 5.0 Credits

This course focuses on reading and analyzing prose, poetry, and drama and is designed to help students develop a method of reading and evaluating literature. **Prerequisite:** eligible for ENGL& 101 or currently enrolled in ENGL 099.

ENGL&220 (Formerly LIT 270)

Intro to Shakespeare [H] • 5.0 Credits

Introduction to Shakespeare's artistic writings. Emphasis is on understanding the culture, language, and ideas. **Prerequisite:** eligible for ENGL& 101 or currently enrolled in ENGL 099.

Courses & Programs

ENGL&235 (Formerly ENG 205) **Technical Writing [C] • 5.0 Credits**

This course emphasizes students' technical communication skills for use in the workplace and other academic settings. Students employ various methods of analyzing and writing for different audiences and purposes. Students also use traditional and online resources for problem-solving, research, documentation, and editing. **Prerequisite:** ENGL& 101 with a 1.0 or better.

ENGL&236 (Formerly ENG 240) **Creative Writing I [H] • 5.0 Credits**

A study of creative writing, emphasizing diverse styles and techniques. **Strongly recommended:** ENGL& 101.

ENGL&237 (Formerly ENG 241) **Creative Writing II [H] • 5.0 Credits**

A continuation of ENGL& 236. **Prerequisite:** ENGL& 236.

ENGL&244 (Formerly LIT 225) **American Literature I [H] • 5.0 Credits**

A survey of American literature from the founding of Jamestown to the Civil War Era. **Prerequisite:** eligible for ENGL& 101 or currently enrolled in ENGL 099.

ENGL&245 (Formerly LIT 226) **American Literature II [H] • 5.0 Credits**

A survey of American literature from Civil War to World War I. **Prerequisite:** eligible for ENGL& 101 or currently enrolled in ENGL 099.

ENGL&246 (Formerly LIT 227) **American Literature III [H] • 5.0 Credits**

A survey of American literature from World War I to the present. **Prerequisite:** eligible for ENGL& 101 or currently enrolled in ENGL 099.

ENGL&254 (Formerly LIT 205) **World Literature I [H] • 5.0 Credits**

A survey of world literature from ancient times through the Roman Empire. **Prerequisite:** eligible for ENGL& 101 or currently enrolled in ENGL 099.

ENGL&255 (Formerly LIT 206) **World Literature II [H] • 5.0 Credits**

A survey of world literature emphasizing European Medieval and Renaissance and Enlightenment literature. **Prerequisite:** eligible for ENGL& 101 or currently enrolled in ENGL 099.

ENGL&256 (Formerly LIT 207) **World Literature III [H] • 5.0 Credits**

A survey of world literature emphasizing Romanticism, Realism, and Modernism. **Prerequisite:** eligible for ENGL& 101 or currently enrolled in ENGL 099.

English As A Foreign Language

columbiabasin.edu/ela

Department Overview: The English as a Foreign Language (EFL) program offers developmental and academic language instruction for non-native speakers of English. These courses provide support and preparation for future coursework in academic and occupational programs. Courses are designed to provide advanced practice in academic reading and writing, vocabulary development and speaking, grammar and spelling skills.

EFL 090 **Spelling & Pronunciation • 3.0 Credits**

This course is designed for non-native speakers of English to develop an understanding of the patterns in English spelling and pronunciation.

EFL 091 **Vocabulary • 5.0 Credits**

This course is designed for non-native speakers of English to increase their ability to recognize, use and learn new vocabulary through an understanding of affixes, collocations, idioms, and phrasal verbs.

EFL 092 **Grammar I • 5.0 Credits**

This course is designed for non-native speakers of English to strengthen their understanding of the parts of speech and their usage. Emphasis is on the use of nouns, verbs, articles, and prepositions and their roles in sentences.

EFL 093 **Grammar II • 5.0 Credits**

This course is designed for non-native speakers of English to strengthen their understanding of sentences, their forms, structures and usage. Emphasis is on the use of clauses, subjects and predicates, punctuation, variety and style. **Prerequisite:** successful completion of EFL 092 or instructor permission.

EFL 094 **Speaking & Listening • 5.0 Credits**

This course is designed for non-native speakers of English to strengthen their ability to speak clearly, create oral presentations, participate in academic discussions, and develop skills for taking notes from a lecture.

EFL 095 **Reading & Writing I • 5.0 Credits**

This course is designed for non-native speakers of English to strengthen their ability to effectively read basic academic texts, develop vocabulary, improve speed and comprehension, and identify relationships between ideas. The writing component focuses on the creation and use of effective sentences to express ideas in a paragraph. **Prerequisite:** additional testing required through Adult Basin Education or instructor permission.

EFL 096 **Reading & Writing II • 5.0 Credits**

This course is designed to teach non-native speakers of English the fundamentals of writing a well-developed and grammatically correct paragraph and increase their ability to read and comprehend academic texts. **Prerequisite:** additional testing required through Adult Basic Education or instructor permission.

EFL 097 **Reading & Writing III • 5.0 Credits**

This course is designed to strengthen the academic reading and writing skills of non-native speakers of English. Emphasis is on writing a well-developed and grammatically correct essay and reading academic texts. **Prerequisite:** EFL 096 or instructor permission.

EFL 101 **Written English Language I [H] • 5.0 Credits**

This course is part one of a two-step sequence dealing with written English skills. The course addresses rhetorical styles in writing essays as well as journal writing to increase fluency in writing. Students also learn to use the reader's guide to periodical literature and other research facilities in the library. Finally, English structures particularly problematical for non-native speakers are addressed, including verb tense choice, verb form, and article usage. **Prerequisite:** P grade in ENGL 098, MTLP score 70 or more, TOEFL score 500 or more, or instructor permission.

EFL 102 **Spoken English • 5.0 Credits**

This course addresses the challenges of spoken English in an academic setting. Activities are evenly divided between note-taking while listening to academic lectures, pronunciation work, and oral presentation skills. This course may be taken concurrently with either EFL 101 or EFL 111. **Prerequisite:** P grade in developmental ELA, MTLP 70 or more, TOEFL score of 500 or more, or instructor permission.

Courses & Programs

EFL 111

Written English Language II [H] • 5.0 Credits

This course is the continuation of EFL 101. This second course covers more rhetorical styles for use in academic papers written in conjunction with the reading of literature. Journal writing is continued and further research is encouraged. More problematical structures are explained. **Prerequisite:** completion of EFL 101, MTLP score of 85 or more, TOEFL score of 520 or more, or instructor permission.

EFL 199

Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

English Language Acquisition

columbiabasin.edu/ela

Department Overview: The English Language Acquisition (ELA) program at CBC offers English language instruction to non-native English speaking residents of Benton and Franklin counties. Courses help students to develop or improve their skills in reading, writing, mathematics, speaking and comprehension of the English language. Instruction focuses on developing language and communication skills through an integration of academic, interpersonal and occupational problem-solving activities.

ELA 009 (Formerly ESL 009)

ELA ED Interviewing • 1.0 - 3.0 Credits

The purpose of this course is to improve learner retention, persistence, and performance through research-proven goal-setting, problem-solving, evaluation, intervention, and self-awareness strategies.

ELA 010 (Formerly ESL 010)

ELA Level 1 • 1.0 - 18.0 Credits

For people who have had little or no formal English instruction and who have little or no ability to communicate in English. Emphasis is on basic literacy, fundamental speaking and listening skills, and an introduction to computer use.

ELA 020 (Formerly ESL 020)

ELA Level 2 • 1.0 - 18.0 Credits

For people who have had some formal English language instruction but whose ability to communicate is very limited. Emphasis is on basic survival needs, beginning reading and writing skills, and an increased familiarity with computer skills.

ELA 030 (Formerly ESL 030)

ELA Level 3 • 1.0 - 18.0 Credits

For people who read and write some English and are able to communicate with native speakers with some difficulty. Emphasis is on developing students' reading, writing, communication, and computer skills.

ELA 040 (Formerly ESL 040)

ELA Level 4 • 1.0 - 18.0 Credits

Designed for persons who are fairly literate in English, can handle their jobs using simple oral and written instructions, and can communicate with native speakers with little difficulty. Emphasis is on improving the students' speaking, listening, reading and writing skills, along with use of various computer software.

ELA 050 (Formerly ESL 050)

ELA Level 5 • 1.0 - 18.0 Credits

Designed for persons who are functionally literate in English, can handle their jobs with oral and written instructions, and can communicate with native speakers with little difficulty. Emphasis is on strengthening students' speaking, listening, reading and writing skills, and performing additional computer skills.

ELA 053 (Formerly ESL 053)

ELA Writing Workshop • 4.0 Credits

This multi-level class is designed to teach non-native speakers of English the fundamentals of good English writing. Students do a variety of writing including dialogue journals and compositions. Students may choose to practice other forms such as resumes, applications, or longer essays. The class is open to ELA Level 3 students and above.

ELA 054 (Formerly ESL 054)

ELA Civics • 2.0 Credits

A study of U.S. history and government to prepare students who wish to pass a civics test for permanent residency.

ELA 056 (Formerly ESL 056)

ELA Computer Lab • 1.0 - 6.0 Credits

A course with a computer lab setting to help non-native speakers of English transition to college-level academic or vocational courses. Coursework is individualized to fit the needs of each student. The lab may be taken in conjunction with an ELA class or independently.

ELA 057 (Formerly ESL 057)

ELA Conversation • 4.0 Credits

This course is designed to develop ELA students' listening and speaking skills and to improve their social and intercultural communication skills.

ELA 059 (Formerly ESL 059)

ELA Technology • 0.9 Credits

This course is designed to provide instruction for students who need help with technology including computer skills, computer basics, and keyboarding skills. These skills will better prepare students for transition into post-secondary education.

ELA 060 (Formerly ESL 060)

ELA Level 6 • 1.0 - 18.0 Credits

Designed for persons who are literate in English, can handle their jobs with oral and written instructions, and can communicate with native speakers. Emphasis is on speaking, listening, reading, and writing skills, with continued use of computers and other technologies.

ELA 090 (Formerly ESL 090)

I-Best Studies • 1.0 - 10.0 Credits

This course integrates Washington English Language Acquisition level 5 and 6 reading, writing, speaking, and listening standards and indicators with a college-level course. Example: Child Development Associate, Nursing Assistant Certified, or Phlebotomy.

ELA 199 (Formerly ESL 199)

Special Studies • 1.0 - 7.0 Credits

A class used to explore new coursework.

Environmental Science

columbiabasin.edu/envirosience

Department Overview: Environmental Science offers both science and non-science students the necessary background to understand the environmental problems that have arisen due to human activities. Courses deal with the interrelationships of soil, air and water as they are affected by human activities. Students are challenged to think critically about their lifestyle choices and how these choices affect their immediate environment in the short term and the biosphere in the long run. Education of students is the key that opens their minds to the possibility that humans do, in fact, cause changes to their environment by using resources at rates that exceed the system's ability to replenish them.

Courses & Programs

ENVS 174

Intro to Meteorology and the Atmosphere [M/S] • 5.0 Credits

An introduction to meteorology, weather, climate, and the atmospheric processes related to air pollution and climate change. Topics include: atmospheric structure, solar radiation, clouds, precipitation, pressure, fronts, hurricanes, air pollution, climate, and global climate change. **Prerequisite:** MATH 095 or MATH 098 or MATH 070 or MATH 072 or satisfactory placement test score.

ENVS 310

Environmental Issues [M/S] • 5.0 Credits

Basic concepts of ecology and environmental science are discussed and illustrated through lab experiences and then further elaborated through discussing environmental issues from a strategic business perspective. Discussions include how environmental pressures (e.g. sustainable development) and environmental problems (e.g. global warming, air pollution, waste-disposal), impact corporate mission, competitive strategy, technology choices, product development decisions, production processes, and corporate responsibility. **Prerequisite:** meets the criteria for acceptance into a BAS/BSN program, completion of a two-year degree or equivalent, or instructor approval.

ENVS&101 (Formerly ENVS 100)

Intro to Environmental Science w/Lab [M/S] • 5.0 Credits

A multidisciplinary course designed to provide both the non-science and science major the background necessary to understand environmental problems that have arisen due to human activities. Topics include: food chains, energy production, nutrient cycles, forest and wildlife management, population demographics, air and water pollution, ozone depletion, and global warming. Lab and lecture must be taken concurrently.

Exercise Science

Department Overview: Students studying Exercise Science build a foundation for various careers, such as becoming a personal trainer, athletic trainer, physical therapist and more! As a field of study, Exercise Science is unique because of its application of scientific knowledge and skills to human function. Our program also serves the broader student body by providing educational opportunities designed to foster lifelong physical activity.

EXSC 101

Introduction to Exercise Science • 3.0 Credits

Introduces the student to chronic disease as seen through the lens of the Exercise Science discipline. Students will examine possible employment opportunities addressing chronic disease using Exercise Science principles.

EXSC 201

Anatomical Kinesiology • 5.0 Credits

This course will introduce students to anatomical concepts and physical laws as applied to human movement emphasizing the effects of individual and environmental variables. Includes analyses of normal and pathological gait. **Prerequisite:** BIOL& 241.

EXSC 202

Personal Training • 5.0 Credits

Personal Training is a comprehensive course designed to prepare students to become certified Personal Trainers. Students learn to properly screen clients for safe participation in an exercise program, utilize different tools for assessing a clients' fitness level, and identify appropriate assessment techniques for a wide variety of clientele. Students learn components of program design for resistance training, cardiovascular training, and flexibility. **Prerequisite:** BIOL& 241. Additionally, you must have taken or be concurrently taking NUTR& 101 or have instructor permission.

EXSC 203

Exercise Science Practicum • 2.0 Credits

Students work in conjunction with Exercise Science instructors to provide individual planning and programming for a variety of populations. Students will also observe professionals in Exercise Science related fields in a variety of settings. **Prerequisite:** EXSC 202 or instructor permission.

Fire Science

columbiabasin.edu/firescience

Department Overview: Beyond any other profession, firefighting exemplifies responsibility and courage. The desire to work in this profession is fueled by a value of life and an instinct to protect it. The Fire Science offerings at CBC are designed to assist students in just beginning their journey or propelling those already employed. By building new skills and strengthening those that already exist, an education at CBC better prepares students to protect their community while giving them an edge in the well-respected, well-compensated career field.

CBC offers an Associate in Applied Science degree in Fire Science. Students enrolled in the Fire Science program will complete general education courses in industrial, social, political and economic concepts relating to the field of fire science. In addition, students will be exposed to courses in fire administration, tactics, inspection, investigation, hazardous materials and more. Firefighters possessing such a comprehensive background will increase their chances of career advancement and will be better prepared to protect the community. The updated degree requirements also provide flexibility to students preparing for multiple career options, including paramedic.

CBC Fire Science program provides a pathway to higher education with transferability to several other universities offering BS degrees in fields such as fire service administration, EMS administration or in conjunction with the Paramedic program, a BS in Paramedicine.

To earn an Associate in Applied Science degree, candidates must accumulate the required credit hours in the Fire Science program. Classes are held in the evenings on a two-year rotation.

FS 100

Introduction to Fire Service • 1.0 Credit

This course is designed to give students a broad understanding of the fire service in the United States. The course focuses on history, organization, and the primary components that make up the various forms of fire protection services in America today. This course is required for those students having no previous exposure to the fire service such as Tri-Tech Fire Science courses or experience as a firefighter.

FS 111

Fire Administration • 1.0 - 3.0 Credits

Management in the fire service explores the skills and techniques used by competent management in business, government, and voluntary organizations, with particular emphasis on their application to the fire service.

FS 121

Fire Tactics • 1.0 - 3.0 Credits

Discussion of basic firefighting tactics of company response, including size-up rescue, exposure, ventilation and fire problems, and tactics used.

FS 131

Introduction to Fire Inspections • 1.0 - 3.0 Credits

A course designed to give the new inspector a basic concept of inspections that deal with fire hazards, authority to inspect, and how to conduct a pre-fire plan.

Courses & Programs

FS 141

Chemistry of Hazardous Materials • 3.0 Credits

This course is a survey of hazardous materials, their physical properties, chemical properties, and how they relate to emergency first responders who are called to manage events related to the release of hazardous materials. This course is intended for individuals who are majoring in Fire Science or who are enrolled in the Washington State Firefighter Apprenticeship program.

FS 151

Hazardous Materials for First Responders • 3.0 Credits

An applied course covering special firefighting situations involving hazardous materials. This course is intended for individuals who are majoring in Fire Science or who are enrolled in the Washington State Firefighter Apprenticeship program.

FS 193

Fire Science Independent Studies • 1.0 - 15.0 Credits

A class used to explore new coursework or for a specific topic of special interest.

FS 199

Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

FS 211

Building Construction • 1.0 - 3.0 Credits

A course covering basic building construction, outlining the specific weaknesses of various constructions.

FS 222

Fire Tactics II • 3.0 Credits

This course includes planning, implementing, and evaluating basic and advanced fire tactics at the command officer level. **Prerequisite:** FS 121.

FS 231

Fire Protection Equipment • 1.0 - 3.0 Credits

Designed to give students a clear understanding of the principles and limitations of fire suppression and detection systems.

FS 241

Fire Investigation • 1.0 - 3.0 Credits

Includes methods of determining the area of fire origin, fire causes, fire spread, and the aspects of fire behavior; recognizing accidental and incendiary fires and securing and preserving evidence. Witness interrogation methods, arson laws, court procedures, and review of case histories are discussed.

FS 251

Fire Service Hydraulics • 3.0 Credits

This course is designed to give the firefighter an understanding of municipal water systems, principles of fluids, water in motion, formulas for calculating water flow and pressure, fire flow requirements, and basic fire stream calculations. This course prepares students, in part, for fire apparatus pump operations.

FS 293

Fire Science Independent Studies • 1.0 - 10.0 Credits

A class used to explore new coursework or for a specific topic of special interest.

FS 299

Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

Firefighter I

columbiabasin.edu/firescience

Department Overview: The Firefighter I (FCA) courses were utilized for a previous degree structure and have been replaced by courses under the Fire Protection Technology degree. For additional information, please see the Fire Protection Technology degree program.

FCA 105

Hydraulics • 3.0 Credits

A course that is designed to give the new firefighter a basic understanding of municipal water systems, principles of fluids, fire flow requirements, and basic fire stream calculations.

FCA 120

Fire Investigation • 3.0 Credits

Includes methods of determining the area of fire origin, fire causes, fire spread, and the aspects of fire behavior; recognition of accidental and incendiary fires and securing and preserving evidence.

FCA 137

Fire Protection Systems • 3.0 Credits

Designed to give a clear understanding of the principles and limitations of fire suppression and detection systems.

FCA 152

Building Construction • 3.0 Credits

A course covering basic building construction, outlining the specific weaknesses of various types of construction.

FCA 160

Fire Ground Tactics • 3.0 Credits

Discussion of basic firefighting tactics of company response, including size-up, rescue, exposure, ventilation and fire problems, and tactics used.

FCA 177

Wildland/Urban Interface • 3.0 Credits

Discussion of basic firefighting tactics of wildland fires that threaten homes within urban areas. In addition to general firefighting tactics, discussions on determining if a home or a group of homes can be safely protected are presented.

FCA 190

Introduction to Fire Inspection and Codes • 3.0 Credits

A course designed to give the new firefighter a basic concept of inspections involving the International Fire Code and the International Building Code.

FCA 251

Firefighter Level I Academy • 1.0 - 23.0 Credits

This academy offers extensive classroom and hands-on training to those seeking a career in Fire Science. The Academy meets or exceeds all the required subject areas for Firefighter Level I Certification as outlined by the Washington State Patrol Fire Protection Bureau.

FCA 261

Firefighter Level II Academy • 8.0 Credits

This academy is a continuation of Firefighter Academy I. Firefighter II provides extensive classroom and hands-on training to those seeking a career in Fire Science. The Academy meets or exceeds all the required subject areas for Firefighter Level II. **Prerequisite:** Firefighter I certification. **Certification as outlined by the Washington State Patrol Fire Protection Bureau.**

First Year Introduction

columbiabasin.edu/fyi

Department Overview: The purpose of FYI is to introduce new students to the academic culture, expectations, resources, procedures and policies at Columbia Basin College. Students attend seminars where topics like college terminology, study skills and learning styles are discussed. There are also a number of diverse modules to choose from ranging from career planning, to computer survival skills, to time management. Students also have the opportunity to explore the campus, meet CBC faculty and interact with students who are also new to the college experience.

Desired FYI Outcomes:

- Educate new students on college expectations

Courses & Programs

- Begin the educational planning process for each student
- Create a stronger sense of responsibility among students for their education
- Emphasize the importance of critical thinking skills
- Build relationships with peers, staff and faculty
- Improve the socialization process for new students at CBC
- Reduce the number of students on academic probation and suspension
- Increase retention rates

Completion of this course satisfies CBC's First Year Introduction (FYI) requirement for all degree and certificate seeking students.

CBC's FYI program is nationally recognized by the National Council of Student Development for acclimating students to the college environment and improving student persistence in college.

FYI 101

First Year Introduction • 1.0 Credit

FYI is an introduction to academic culture and student success strategies, as well as expectations, resources, procedures, and policies of CBC. FYI supports students in their transition to college. FYI is required for all degree and certificate seeking students in the first quarter of classes.

FYI 199

Special Studies • 1.0 - 2.0 Credits

A class used to explore new coursework.

French

columbiabasin.edu/french

Department Overview: Our French classes offer student-centered instruction that focuses on communicating effectively in French, appreciating the French culture and recognizing linguistic and cultural connections between the French-speaking parts of the world and the United States.

FRCH 150 (Formerly FR 150)

Beginning Conversational French • 1.0 - 5.0 Credits

Intensive practice in speaking and listening with an emphasis on surviving in everyday situations. **Recommended prerequisite:** successful completion of at least FRCH& 121.

FRCH 151 (Formerly FR 151)

Beginning Conversational French • 1.0 - 5.0 Credits

Intensive practice in speaking and listening with an emphasis on surviving in everyday situations. **Recommended prerequisite:** successful completion of at least FRCH& 121.

FRCH 152 (Formerly FR 152)

Beginning Conversational French • 1.0 - 5.0 Credits

Intensive practice in speaking and listening with an emphasis on surviving in everyday situations. **Recommended prerequisite:** successful completion of at least FRCH& 121.

FRCH 199

Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

FRCH 250 (Formerly FR 250)

Intermediate Conversational French • 1.0 - 5.0 Credits

Intensive practice in speaking French for students who have already gained a knowledge of beginning level grammar and vocabulary. Class is conducted entirely in French. **Prerequisite:** instructor permission.

FRCH 251 (Formerly FR 251)

Intermediate Conversational French • 1.0 - 5.0 Credits

Intensive practice in speaking French for students who have already gained a knowledge of beginning level grammar and vocabulary. Class is conducted entirely in French. **Prerequisite:** instructor permission.

FRCH 252 (Formerly FR 252)

Intermediate Conversational French • 1.0 - 5.0 Credits

Intensive practice in speaking French for students who have already gained a knowledge of beginning level grammar and vocabulary. Class is conducted entirely in French. **Prerequisite:** instructor permission.

FRCH 260 (Formerly FR 260)

French Literature Reading [H] • 1.0 - 3.0 Credits

Selected readings of French literature. **Prerequisite:** FRCH& 223 or instructor permission.

FRCH 261 (Formerly FR 261)

French Literature Reading [H] • 1.0 - 3.0 Credits

Selected readings of French literature. **Prerequisite:** FRCH& 223 or instructor permission.

FRCH 262 (Formerly FR 262)

French Literature Reading [H] • 1.0 - 3.0 Credits

Selected readings of French literature. **Prerequisite:** FRCH& 223 or instructor permission.

FRCH 299

Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

FRCH&121 (Formerly FR 101)

French I [H] • 5.0 Credits

Introduction to the French language including conversational skills, reading, writing and grammar, and French culture including geography, customs, daily life, and heritage. Designed for the novice learner of French, with little or no proficiency in the French language. **Recommended prerequisite:** successful completion of at least ENGL 099.

FRCH&122 (Formerly FR 102)

French II [H] • 5.0 Credits

Introduction to the French language including conversational skills, reading, writing and grammar, and French culture including geography, customs, daily life, and heritage. **Prerequisite:** FRCH& 121 or instructor permission.

FRCH&123 (Formerly FR 103)

French III [H] • 5.0 Credits

Introduction to the French language including conversational skills, reading, writing and grammar, and French culture including geography, customs, daily life, and heritage. **Prerequisite:** FRCH& 122 or instructor permission.

FRCH&221 (Formerly FR 201)

French IV [H] • 5.0 Credits

Extensive practice in all four language skills (reading, writing, speaking, listening). The course includes cultural readings and short stories, and includes an in-depth review of basic French grammar, expansion of basic vocabulary, and a broadening of the student's understanding of French culture. **Prerequisite:** FRCH& 123 or instructor permission.

FRCH&222 (Formerly FR 202)

French V [H] • 5.0 Credits

Extensive practice in all four language skills (reading, writing, speaking, listening). The course includes cultural readings and short stories, and includes an in-depth review of basic French grammar, expansion of basic vocabulary, and a broadening of the student's understanding of French culture. **Prerequisite:** FRCH& 221 or instructor permission.

FRCH&223 (Formerly FR 203)

French VI [H] • 5.0 Credits

Extensive practice in all four language skills (reading, writing, speaking, listening). The course includes cultural readings and short stories, and includes an in-depth review of basic French grammar, expansion of basic vocabulary, and a broadening of the student's understanding of French culture. **Prerequisite:** FRCH& 222 or instructor permission.

Courses & Programs

General Engineering

columbiabasin.edu/engineering

Department Overview: General Engineering courses are required for various engineering degrees and fulfill the requirements for transfer to four-year institutions.

ENGR 199
Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

ENGR 299
Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

ENGR&111 (Formerly GE 101)
Engineering Graphics 1 • 3.0 Credits

Principles of mechanical drawing: geometric construction, orthographic projection, sectional views, auxiliary views, isometric and oblique drawings, dimensions, threads, fasteners, and lettering.

ENGR&214 (Formerly GE 281)
Statics • 5.0 Credits

Analysis of force systems in static equilibrium. Topics include: force vectors, equilibrium of particles and rigid bodies, structural analysis, distributed forces, friction, center of gravity, moments of inertia. **Prerequisite:** PHYS& 241/231 and MATH& 151.

ENGR&215 (Formerly GE 291)
Dynamics • 5.0 Credits

Analysis of motion of particles and rigid bodies. Topics include: kinematics of particles and rigid bodies, kinetics of particles and rigid bodies, Newton's laws, work and energy, impulse, and momentum. **Prerequisite:** ENGR& 214.

Geography

columbiabasin.edu/geography

Department Overview: The geography offerings through CBC's Math/ Science Division provide transfer science credits to science majors, science requirements and electives toward graduation with an Associate in Arts and Sciences degree and personal interest opportunities for the community. The current geography courses explore relationships between earth's natural environments; including the atmosphere, solid earth, oceans and streams and between the environment and humans. Course offerings also include in-depth study of the atmosphere, including meteorology. The courses promote extensive skill-building opportunities in communication through the spoken and written word, skills in the use of technology as a learning/research tool and emphasis on critical thinking skills (also see Cultural Geography).

Cultural Geography

CBC's course in Cultural Geography provides an introduction to the ways in which human groups think about, arrange and modify their physical habitats. This geographic knowledge is a basic means to understanding one's own world and the worlds of others.

GE0 101
Physical Geography [M/S] • 5.0 Credits

Physical Geography provides an introduction to the physical earth. It may include processes, which impact the earth; it may also include the relationship between humans and the earth. Study of the physical areas and environment of the earth. Topics include the weather, climate, water cycle, soils, and land form studies. The class also covers how humans influence and are influenced by their physical environment.

GE0 150
Cultural Geography [S/B] • 5.0 Credits

An introduction to the use of human geography as a framework with which to critically analyze and understand the world, both on a micro and macro level. CBC's course in Cultural Geography provides an introduction to the ways in which human groups think about, arrange, and modify their physical habitats. This geographic knowledge is a basic means to understanding one's own world and the worlds of others.

GE0 199
Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

GE0 299
Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

Geology

columbiabasin.edu/geology

Department Overview: The Geology offerings through CBC's Math/ Science Division provide transfer science credits to science majors, science requirements and electives toward graduation with an Associate in Arts and Sciences degree and personal interest opportunities for the community.

Intro to Physical Geology introduces students to earth's processes and the relationships between the processes and earth's physical/chemical properties. Physical Geology II is an introductory study in geomorphology—a study of earth's landforms through processes that build them. Environmental Geology is a study of the ever-increasing collision course between humans and our geologic environment, including flooding, landslides, earthquakes, pollution and volcanic eruptions. Historical Geology is the study of earth's continents, oceans and life forms through time. The Geology offerings promote extensive skill-building opportunities in communication through the spoken and written word, skills in the use of technology as a learning and research tool and emphasis on critical thinking skills.

GEOL 115
Geology of the National Parks • 5.0 Credits

The U. S. national parks and wilderness monuments preserve spectacular natural wonders. Their beauty is a direct result of their underlying geology. In this course, we explore the processes and forces by which the park lands were formed and transformed over geologic time, and their current geologic significance. This includes volcanism, plate tectonics, mountain-building, and alpine glaciations.

GEOL 199
Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

GEOL 299
Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

Courses & Programs

GEOL&101 (Formerly GEL 101)

Intro to Physical Geology w/ Lab [M/S] • 5.0 Credits

Composition and structure of the earth. Study and identification of common minerals and the three major rock groups. Plate tectonics concept of the evolution of surface features of continents. A study of volcanic, seismic, weathering, and groundwater processes. Outline of geologic development of the Pacific Northwest, including field studies. Lecture and lab must be taken concurrently. **Prerequisite:** grade of 2.0 or better in MATH 040 or 084.

GEOL&103 (Formerly GEL 203)

Historical Geology w/ Lab [M/S] • 5.0 Credits

Assessment of the history and development of the earth's physical environment and its inhabitants. An historical and chronologic analysis of the origin of the earth, including the development of the earth through time and discussion based on the paleontologic, sedimentologic, and stratigraphic record. Study of distinctive fossil groups for each geologic period and applications for correlation and reconstruction of regional geologic history. Lecture and lab must be taken concurrently. **Prerequisite:** GEOL& 101 or instructor permission.

GEOL&110 (Formerly GEL 211)

Environmental Geology w/ Lab [M/S] • 5.0 Credits

Relationships of human activities with earth materials and processes. Earthquakes, volcanic activity, mass wasting, subsidence, surface water, mineral resources, waste disposal, water pollution, and a heavy emphasis on groundwater may all be included. Students are expected to make interpretations and draw conclusions from scientific data such as graphs, charts, and maps. Lecture and lab must be taken concurrently. Field trips may be included as a part of the laboratory experience. **Prerequisite:** GEOL& 101 or instructor permission.

Health Education

columbiabasin.edu/healtheducation

Department Overview: The Health Education department offers a variety of classes designed to enhance students' knowledge about a healthy lifestyle and/or help the student learn first-aid skills and accident prevention.

HE 110

Concepts of Fitness [PE] • 2.0 Credits

Physiological, kinesiological, and energy aspects of movement activities and exercises related to health and physical fitness. The course is lecture/lab.

HE 160

Diet, Exercise & Weight Control [PE] • 2.0 Credits

Class is designed to promote and achieve knowledge in the areas of diet, exercise, and weight management for today's lifestyles as it relates to the students' total well-being.

HE 161

HIV/AIDS Issues and Strategies [PE] • 2.0 Credits

A comprehensive overview of the virus HIV and AIDS, including: biological, epidemiological, historical, universal precautions, economic, legal, ethical, social, and behavioral aspects.

HE 162 (Formerly HE 1611)

HIV/AIDS Education [PE] • 1.0 Credit

This lab is designed to provide additional information on HIV/AIDS and activities that prepare students to give presentations about health issues related to HIV/AIDS to classes and other student groups on campus.

HE 170

Health and Wellness [PE] • 3.0 Credits

Study of current health and wellness issues and problems of the college-age student. Emphasis is on lifestyles, risk factors, and preventing disease and illness with a wellness lifestyle.

HE 171

Exercise Prescription [PE] • 2.0 Credits

This course is the study of the history, current trends, and research regarding proper protocols for designing individual workout programs based on needs and experience of individuals.

HE 172 (Formerly HE 1711)

Exercise Prescription Lab [PE] • 1.0 Credit

Lab to be taken concurrently with HE 171.

HE 199

Special Studies • 1.0 - 15.0 Credits

An experimental class to be used to explore new approaches and applications to Health Education.

HE 210

Sports Nutrition [PE] • 3.0 Credits

This course is an introduction to terms, concepts, and research regarding proper nutrition for athletes and active individuals. In addition, supplementation and aids to enhance performance are studied.

HE 215

Health and Fitness for Life [PE] • 3.0 Credits

This course is designed to provide students with the necessary knowledge and skills to maintain a healthy fitness level throughout the lifespan. Students will develop, implement, and modify an exercise program geared to their specific fitness and wellness goals. This class requires students to exercise in the fitness center.

HE 216 (Formerly HE 2151)

Health and Fitness for Life Lab [PE] • 1.0 Credit

Lab to be taken concurrently with HE 215.

HE 220

Drugs and Health [PE] • 3.0 Credits

This course is designed to achieve physiological knowledge and awareness of chemical use and abuse as it relates to the student's total well-being.

HE 230

First-Aid Safety • 3.0 Credits

Designed to help students learn first-aid skills and accident prevention. Advanced first-aid and CPR card given for successful completion.

HE 232

Sports Psychology [PE] • 3.0 Credits

An introduction to terms, concepts, and research regarding the psychological area of sports. The history, current trends, and legal issues regarding the field of sports psychology are studied.

HE 240

Stress Management [PE] • 3.0 Credits

A study of the causes of human stress and how to manage or minimize this stress. Theories, implications, and practical applications are emphasized.

HE 250

Sports Management [PE] • 3.0 Credits

This course is an introduction to the history, current global perspectives, trends, and research regarding the field of sports management. Students gain an understanding of marketing, organization, and financial aspects of sports management.

Health Sciences

columbiabasin.edu/healthsciences

Department Overview: The Health Sciences (HSCI) courses provide both specialized multi-healthcare education and certification as well as general courses to meet a broad spectrum of healthcare program needs.

Courses & Programs

HSCI 147 (Formerly AOT 147, HIT 147)

Medical Terminology • 5.0 Credits

Provides a basic background of medical terminology for the medical office. Major topics to be studied are: cells and oncology, tissues and the integumentary system, skeletal system, muscular system, nervous system, special senses, glands, cardiovascular system; blood and lymphatic-immune systems, respiratory system; digestive system; urinary system, reproductive system, pregnancy and human development; general diseases, lab tests, diagnoses, surgery, pharmacology, and therapy. Emphasis is placed on identifying and labeling word parts, defining and building medical terms, basic anatomy, and becoming familiar with common diseases of the systems.

HSCI 148

Spanish Medical Interpreting I • 5.0 Credits

The Spanish Medical Interpreting program is a sequential, three-quarter vocational certificate program, consisting of Spanish Medical Interpreting I, II, and III. The program prepares students for state or national medical interpreter certification and to enter the workforce as professional, ethical, and competent healthcare interpreters. Students are introduced to healthcare interpreting as a profession, concepts and relevant terminology in biomedicine, and given opportunities to develop foundational skills in healthcare interpreting. Topics include: International code of ethics and its application, language access laws, HIPAA, interpreting modalities and protocols, basic note-taking skills, self-evaluation, glossary building and intervention techniques. **Prerequisite:** 1. Native-like proficiency in English and Spanish. 2. Applicants must pass an entrance test to be admitted. Recommended courses: HSCI 147, SPAN 205, 206, 207. Cross-listed as SPAN 281 (credit cannot be received for both courses).

HSCI 149

Spanish Medical Interpreting II • 5.0 Credits

The Spanish Medical Interpreting program prepares students for state or national medical interpreter certification and to enter the workforce as professional, ethical, and competent healthcare interpreters. Students are introduced to healthcare interpreting as a profession, concepts and relevant terminology in biomedicine, and given opportunities to develop foundational skills in healthcare interpreting. This course builds on the knowledge and skills acquired in Spanish Medical Interpreting I. Topics include: National code of ethics and standards of practice, ethical decision-making, basic medical prefixes, roots and suffixes, note-taking and sight translation skills, interpreter positioning, language and communication dynamics, and the role of the interpreter in health equity. **Prerequisite:** HSCI 148 or SPAN 281 with a 1.0 or higher. Cross-listed as SPAN 282 (credit cannot be received for both courses).

HSCI 150

Advanced Spanish Medical Interpreting • 5.0 Credits

The Spanish Medical Interpreting program prepares students for state or national medical interpreter certification and to enter the workforce as professional, ethical, and competent healthcare interpreters. Students are introduced to healthcare interpreting as a profession, concepts and relevant terminology in biomedicine, and given opportunities to develop foundational skills in healthcare interpreting. This course builds on the knowledge and skills acquired in Spanish Medical Interpreting II. This course provides students with guided interpreting practice. Topics include: State code of ethics, abbreviations in healthcare, the concepts of patient advocacy, communicative autonomy, cultural brokering and responsiveness, and business practices in the industry. **Prerequisite:** HSCI 149 or SPAN 282 with a 1.0 or higher. Cross-listed as SPAN 283 (credit cannot be received for both courses).

HSCI 199

Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

HSCI 220

ACLS Initial • 2.0 Credits

Through the Advanced Cardiac Life Support course, healthcare providers enhance their skills in the treatment of the adult victim of a cardiac arrest or other cardiopulmonary emergencies. The emphasis is on the importance and integration of basic life support CPR with advanced cardiovascular life support and then importance of effective team interaction and communication during resuscitation. **Prerequisite:** current healthcare provider BLS card and completion of prerequisite checklist.

HSCI 221

ACLS Renewal • 0.9 Credits

This course is offered to provide an update to current ACLS providers and to renew ACLS provider status. **Prerequisite:** current Healthcare Provider BLS card, current ACLS Provider Card, and completed ACLS precourse checklist.

HSCI 222

ACLS Experienced Provider • 1.0 Credit

The ACLS Experienced Provider course is for seasoned ACLS providers who wish to renew their ACLS provider status. This course provides a stimulus for expert healthcare providers to identify areas in resuscitation that deal with special circumstances. **Prerequisite:** current Healthcare Provider BLS card and current ACLS Provider Card.

HSCI 223

ACLS Instructor Course • 1.0 Credit

One credit class to prepare individuals to become instructors in advanced cardiovascular life support. **Prerequisite:** current ACLS provider. Recommendation of an ACLS Course Director or ACLS Regional Faculty member. Completion of AHA Core Instructor course prior to class.

HSCI 230

PALS Initial • 2.0 Credits

The goal of the Pediatric Advanced Life Support (PALS) course is to aid the healthcare provider in developing the knowledge and skills necessary to provide emergency care for the pediatric population, and effectively manage critically ill infants and children. Skills taught include recognition and treatment of infants and children at risk for cardiopulmonary arrest; the systematic approach to pediatric assessment, effective respiratory management; defibrillation and synchronized cardioversion; intraosseous access and fluid bolus administration; and effective resuscitation team dynamics. **Prerequisite:** current Healthcare Provider BLS card and completed PALS precourse checklist.

HSCI 231

PALS Renewal • 0.9 Credits

This course is offered to provide an update to current PALS providers and to renew PALS provider status. **Prerequisite:** current Healthcare Provider BLS card, current PALS Provider card, and completed PALS precourse checklist.

HSCI 233

PALS Instructor Course • 1.0 Credit

One credit class to prepare individuals to become instructors in pediatric advanced life support. **Prerequisite:** current PALS Provider is required. Recommendation of PALS Course Director or PALS Regional Faculty Member. Completion of AHA Core Instructor course prior to class.

HSCI 240

ALS/OTEP General Pharmacology • 0.3 Credits

This course provides an overview of the basic principles of pharmacology as they apply to the paramedic administering medications in the field setting. Significant emphasis is placed on the pharmacokinetics and dynamics with specific drug profiles being completed in the specific treatment modalities taught in the separate courses of ALS OTEP. **Prerequisite:** current certification as EMT-I/Paramedic.

Courses & Programs

HSCI 241

ALS/OTEP Medical Legal • 0.3 Credits

This course provides a general overview of legal considerations as they apply to the certified paramedic or EMT-Intermediate. The course focuses on standard of care issues, legal terminology, issues regarding consent to treat, refusals, Do Not Resuscitate Orders and POLST, abandonment, negligence claims, civil and tort law, certification, and proper documentation. **Prerequisite:** current certification as paramedic.

HSCI 242

ALS/OTEP Patient Assessment in the Field • 0.3 Credits

This course provides an overview of patient assessment of the patient in the field. The course focuses on the general medical and trauma patient with specific emphasis on scene size-up, initial assessment, identifying life threatening emergencies, focused assessment and history, detailed and ongoing exam, and the prioritization of patients. **Prerequisite:** current certification as paramedic.

HSCI 243

ALS/OTEP Communicable Disease • 0.3 Credits

This course provides a general overview of communicable disease to the certified Paramedic or EMT-Intermediate. The course focuses on principles of infectious disease control, barriers to infection, and stages of infectious disease. The course further discusses the pathophysiology, identification and treatment of various blood, air, parasitic, and fecal/sputum pathogens. **Prerequisite:** current certification as paramedic.

HSCI 244

ALS/OTEP Mass Casualty & Terrorist Incidents • 0.3 Credits

This course provides the certified Paramedic with the necessary knowledge and skills necessary to identify the Mass Casualty Incident and the possibilities of terrorist involvement. The course emphasizes the need of the paramedic to recognize the need for triage, treatment, and transportation; as well as fulfill the role of each of the MCI positions as they relate to the size and complexity of the emergency. The course provides specific information on explosive, nuclear, chemical, and biological agents, as well as tools to assist EMS personnel in recognition of terrorist acts. There is a strong emphasis of scene safety for all EMS personnel. **Prerequisite:** current certification as Paramedic.

HSCI 245

ALS/OTEP Shock Trauma Resuscitation • 0.3 Credits

This course provides current specific assessment and management techniques to be used on the trauma patient suffering compensated, uncompensated, or irreversible shock. Identifying the stage of shock and the appropriate actions to improve end organ perfusion are the primary focus of the course. **Prerequisite:** current certification as paramedic.

HSCI 246

ALS/OTEP Burns & Soft Tissue Trauma • 0.3 Credits

The purpose of this course is to review the various mechanisms and effects of soft tissue trauma, ranging from the minor laceration to the severe crush injury, and compartment syndrome. Within this subject, specific pathophysiology, assessment, and management are covered. Additionally, the pathophysiology, assessment, and management of all severities of burns is addressed. At the completion of the course, students are expected to perform specific skills pertaining to the treatment of soft tissue injuries. **Prerequisite:** current certification as EMT-I/Paramedic.

HSCI 247

ALS/OTEP Musculoskeletal Trauma • 0.3 Credits

The purpose of this course is to review the various mechanisms and effects of musculoskeletal trauma on the human body. Pathophysiology of the trauma, assessment, and management of the injury are covered in depth. At the completion of the course, students are expected to perform specific skills pertaining to the treatment of musculoskeletal injuries. **Prerequisite:** current certification as paramedic.

HSCI 248

ALS/OTEP Head & Facial Trauma • 0.3 Credits

The focus of this course is the epidemiology and pathophysiology of head and facial trauma. Specific assessment and management techniques are reviewed and discussed within the course. At the completion of the course, students are expected to perform specific skills pertaining to the treatment of head and facial injuries. **Prerequisite:** current certification as paramedic.

HSCI 249

ALS/OTEP Neck & Spinal Trauma • 0.3 Credits

The focus of this course is the epidemiology and pathophysiology of neck and spinal trauma. Specific assessment and management techniques are reviewed and discussed within the course. At the completion of the course, students are expected to perform specific skills pertaining to the treatment of neck and spinal injuries. **Prerequisite:** current certification as paramedic.

HSCI 250

ALS/OTEP Chest & Abdominal Trauma • 0.3 Credits

The focus of this course is the epidemiology and pathophysiology of chest and abdominal trauma. Specific assessment and management techniques are reviewed and discussed within the course. At the completion of the course, students are expected to perform specific skills pertaining to the treatment of chest and abdominal injuries. **Prerequisite:** current certification as paramedic.

HSCI 251

ALS/OTEP Environmental Emergencies • 0.3 Credits

The focus of this course is to provide the paramedic with additional information regarding the various medical and trauma emergencies that can evolve from exposure to a wide spectrum of environmental conditions. Drowning, altitude illnesses, diving complexes, and exposure to various reptiles and spiders are discussed. **Prerequisite:** current certification as paramedic.

HSCI 252

ALS/OTEP Respiratory Emergencies • 0.3 Credits

The focus of this course is to review the pathophysiology of various pulmonary disorders that frequently affect the population. There is a heavy focus on the assessment and management of the patient suffering from various components of COPD, asthma, SARS, lung cancer, and pulmonary embolism. **Prerequisite:** current certification as EMT-I/Paramedic.

HSCI 253

ALS/OTEP Neurological Emergencies • 0.3 Credits

This course specifically targets the assessment and treatment of patients suffering from a neurological disorder. Specific illness/diseases covered include stroke, seizures, altered mental status, and syncope. **Prerequisite:** current certification as paramedic.

HSCI 254

ALS/OTEP Gastro & Endocrine Emergencies • 0.3 Credits

The purpose of this course is to provide a general overview of the assessment and treatment of acute upper and lower gastrointestinal disorders treated by paramedics in the pre-hospital setting. **Prerequisite:** current certification as EMT-I/Paramedic.

HSCI 255

ALS/OTEP OB-GYN Emergencies • 0.3 Credits

The focus of this course is obstetrical and gynecological emergencies faced by the paramedic in the pre-hospital setting. At the completion of the course, paramedics should be able to distinguish various OB/GYN emergencies from GI emergencies and adequately provide treatment accordingly. **Prerequisite:** current certification as paramedic.

HSCI 256

ALS/OTEP Geriatric Emergencies • 0.3 Credits

The focus of this course is to review the added difficulty in managing both medical and trauma emergencies involving geriatric patients. **Prerequisite:** current certification as paramedic.

Courses & Programs

HSCI 257

ALS/OTEP Behavioral Emerg & the Violent Patient • 0.3 Credits

This course reviews the three major mental illnesses, identifies appropriate assessment techniques and discusses the appropriate treatment of these patients, to include the physical and chemical restraint of violent patients. **Prerequisite:** current certification as paramedic.

HSCI 258

ALS/OTEP Allergies & Anaphylaxis • 0.3 Credits

This course specifically discusses the assessment and aggressive treatment of anaphylaxis in the pre-hospital setting. **Prerequisite:** current certification as EMT-I/Paramedic.

HSCI 259

ALS/OTEP Toxicologic Emergencies • 0.3 Credits

This course reviews toxicological emergencies found in the pre-hospital setting and discusses the current treatment modalities of such emergencies. **Prerequisite:** current certification as paramedic.

HSCI 260

ALS/OTEP Advanced Airway Management • 0.9 Credits

This course provides the paramedic with specific training in the techniques for securing a patent airway in the critical medical or trauma patient. Included within the course is anatomy and physiology, recognition of existing and impending airway compromise, determination of appropriate advanced maneuvers, and deployment of various advanced airway skills and tools. **Prerequisite:** current certification as paramedic.

HSCI 261

ALS/OTEP Advanced Cardiac Life Support • 0.9 Credits

This course provides recertification to the Certified Paramedic in Advanced Cardiac Life Support. The course focuses on ACLS as intended to be taught by the American Heart Association. In addition, focus is also applied to the modalities of care for the cardiac patient in Benton/Franklin counties as per local protocol. **Prerequisite:** current certification as paramedic.

HSCI 262

ALS/OTEP Pediatric Advanced Life Support • 0.9 Credits

This course provides recertification to the Certified Paramedic in Pediatric Advanced Life Support. The course focuses on PALS as intended to be taught by the American Heart Association. In addition, focus is also applied to the modalities of care for the general pediatric patient in Benton/Franklin counties as per local protocol. **Prerequisite:** current certification as paramedic.

HSCI 263

48 Hour Paramedic Refresher • 4.5 Credits

This course is intended for the paramedic preparing for recertification of the National Registry of EMT-Paramedic, or attempting to regain this certification. The course covers all required hours and skills required of the National Registry 48 Hour Certificate. **Prerequisite:** current certification as paramedic.

HSCI 264

ILS/OTEP Refresher • 0.9 Credits

This course is intended for the EMT-Intermediate as a supplement to his/her EMT-B OTEP courses. This course focuses on the additional skills and requisite knowledge of the EMT-I in the areas of assessment, pharmacology, intravenous skills, and advanced airway management. **Prerequisite:** current certification as an EMT- Intermediate.

HSCI 265

Combi-Tube Endorsement Course • 0.9 Credits

This course is intended for EMT-Basic who desires the additional endorsement to his/her certification for insertion of a dual lumen advanced airway device, (specifically Combi-Tube). **Prerequisite:** current certification as an EMT-Basic.

HSCI 266

General Cardiology • 0.3 Credits

This course provides general cardiology theories, principles, ECG interpretation, diagnosis, management or treatment of cardiac emergencies in both the chronic and acute setting for paramedics enrolled in the Benton Franklin Counties Ongoing Training and Education Programs (OTEP) and follows treatment algorithms as outlined in the local Benton Franklin protocol.

HSCI 293

Current Topics • 1.0 - 15.0 Credits

This course is an elective credit for on-the-job firefighting training and experience.

HSCI 299

Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

Healthcare Administration

columbiabasin.edu/hcad

Department Overview: The Healthcare Administration concentration within the Bachelor of Applied Science in Applied Management degree is designed to provide in-depth prepared healthcare specialists that are knowledgeable and skilled in management and leadership within the healthcare sector. There are a wide range of exciting careers in health services management, including assistant department head, assistant hospital administrator, or management positions in residential care facilities and practitioners' offices.

HCAD 300

Healthcare Systems, Strategic Thinking, & Strategy • 5.0 Credits

Foundational introduction to the healthcare administration profession. Examination of system/strategic thinking, strategy making, styles of leadership and administration, and management theories as applied to healthcare organizations. Additional focus is placed on evolving trends in healthcare delivery due to healthcare policy changes such as the Affordable Care Act and the role of other federal, state, and local government healthcare public policy impact on health services. Best practices in healthcare such as evidenced-based practice, wellness models, treating the whole person, innovation, and the application of change management and decision science are also discussed. **Prerequisite:** meets the criteria for acceptance into a BAS/BSN program, completion of a two-year degree or equivalent, or instructor approval, and AMGT 300.

HCAD 310

Healthcare Operations Management • 5.0 Credits

This course addresses use of operations management concepts and skills in healthcare organizations. Students learn how to analyze, design, plan, and identify support for healthcare delivery services and to effectively and efficiently meet patient needs. Theory is addressed and explored through the use of case studies. Topics also include healthcare quality assurance, performance management, healthcare facilities, management skills, supply chain management, and patient flow logistics. **Prerequisite:** meets the criteria for acceptance into a BAS/BSN program, completion of a two-year degree or equivalent, or instructor approval.

Courses & Programs

HCAD 315

Healthcare Informatics/Information Technology • 5.0 Credits

This course provides an introduction to health information technology and to the science of informatics as applied to healthcare. Emphasis is placed on how healthcare facilities use information technology to select and utilize electronic information management systems and to integrate data from patient health records. Topics include: use of computer networks, system protocols and policies, data and system architecture and congruency, communication and legal issues, basic computer security and safety, mobile applications, multi-system integration, stand-alone applications, data collection methods and integrity, legal document compliance, and consistent documentation to prevent errors. **Prerequisite:** meets the criteria for acceptance into a BAS/BSN program, completion of a two-year degree or equivalent, or instructor approval. This course is cross linked to NRS 315. Students completing HCAD 315 may not receive graduation credit for NRS 315.

HCAD 330

Legal Issues in Healthcare • 5.0 Credits

This course covers laws and regulations that affect healthcare administration including torts and crimes, contracts, HIPAA and Stark laws, and federal and state laws and regulations such as the Affordable Health Act. **Prerequisite:** meets the criteria for acceptance into a BAS/BSN program, completion of a two-year degree or equivalent or instructor approval.

HCAD 350

Healthcare Marketing • 5.0 Credits

Examines marketing as a management tool and the application of marketing to healthcare, the marketing process, marketing resources, and strategies for accomplishing marketing objectives. This course involves analysis, evaluation, and implementation of marketing strategies within healthcare and managed-care environments. This course is also designed to develop skills in segmenting customer and medical markets, brand products and services, enhance a communication strategy to the consumer, and develop pricing approaches. Methods and models of marketing fundamentals are introduced. **Prerequisite:** meets the criteria for acceptance into a BAS/BSN program, completion of a two-year degree or equivalent, or instructor approval.

HCAD 420

Human Resources Management & Policy • 5.0 Credits

Course topics include healthcare personnel policies and programs, human resources requirements, recruitment, onboarding new staff, talent management, performance appraisal, salary and wage administration, communicating with and motivating of healthcare personnel, and management/labor relations in healthcare industries. Healthcare policy, politics, and the role of federal, state and local government on healthcare public policy and its impact on healthcare services are also considered. The basic principles for policy development are discussed. **Prerequisite:** meets the criteria for acceptance into a BAS/BSN program, completion of a two-year degree or equivalent, or instructor approval.

HCAD 480

Healthcare Administration Capstone • 3.0 Credits

Provides students the opportunity to integrate and synthesize the required healthcare administration and applied management coursework. The focus is the application of healthcare leadership and management components, theories, and concepts. Provides the theoretical foundations of program planning and evaluation (including needs assessment, program monitoring, and outcome evaluation), and their applications. Students develop a comprehensive strategic plan for a healthcare organization, complete a major project, and/or complete an approved internship. **Prerequisite:** AMGT 300, 400, 420, 430, and HCAD 300, 315, 330, and 350.

Healthcare Central Service Technology

columbiabasin.edu/hcst

Department Overview: The CBC Healthcare Central Service Technology program prepares students for an entry-level career in sterile processing and materiel management. Commonly referred to as sterile processing technicians, central service technicians perform decontamination and sterilization procedures required to ensure proper reprocessing of invasive therapeutic and diagnostic equipment, surgical instrumentation and medical supplies. Additional duties include assembly and inspection of surgical instruments, maintenance and delivery of patient equipment, inventory control and supply ordering and preoperative case preparation.

Central service technicians are typically employed in hospital central service, sterile processing, and materiel management departments but may also be stationed in outpatient surgery centers and other medical device related facilities. Many central service technicians will work a 40-hour week, but may also need to be available during weekends, evenings, holidays, or on-call.

CBC's Healthcare Central Service Technology program is a two-quarter program beginning in spring quarter. The Healthcare Central Service Technology program is a selective admission program. You must apply to the College and to the program. Applicants are screened according to timely coursework completion and grades completed through winter quarter. During the course of the program, enrolled students will gain extensive hands-on training and acquire 400 hours of applied technical experience in clinical settings. Upon successful completion of all certificate and program requirements, students will obtain a Healthcare Central Service Technology Short-Term Certificate. Graduates of the HCST Program are eligible for certification through the International Association of Healthcare Central Service Materiel Management (IAHCSCMM).

HCST 100

Foundations of Central Service • 6.0 Credits

This course is designed to prepare students for entry-level opportunities within the central service and material management setting. Fundamentals of sterile processing are discussed in the context of today's diverse perioperative environment. Students learn basic technical concepts within the scope of the central service department. Topics include supply chain management, purchasing and inventory management concepts, recommended standards of practice for instrument and equipment processing, safety regulations, and the impact of effective customer service on quality patient care. **Prerequisite:** Acceptance into the Healthcare Central Service Technology program.

HCST 150

Central Service Clinical • 12.0 Credits

This course provides students the opportunity to apply central service and material management concepts within the context of a clinical internship. Students perform technical skills within the scope of the central service department. Skills include cleaning and disinfecting medical devices, preparing items for sterilization, inspecting and assembling surgical instrumentation, operating sterilization equipment, and storing surgical equipment and supplies. **Prerequisite:** HCST 100 and HSCI 147, both with a 2.0 or better.

Hebrew

columbiabasin.edu/hebrew

Department Overview: Our Hebrew classes offer student-centered instruction that focuses on communicating effectively in Hebrew, appreciating the Israeli and Jewish culture and recognizing linguistic and cultural connections between the Hebrew-speaking parts of the world and the United States.

HEB 121

Hebrew I [H] • 5.0 Credits

Introduction to the modern Hebrew language including conversational skills, reading, writing and grammar, and Israeli and Jewish culture including geography, customs, daily life, and heritage. Designed for the novice learner of Hebrew, with little or no proficiency in the Hebrew language. **Recommended prerequisite:** successful completion of at least ENGL 099.

Courses & Programs

HEB 122 Hebrew II [H] • 5.0 Credits

Introduction to the Hebrew language including conversational skills, reading, writing and grammar, and Israeli and Jewish culture including geography, customs, daily life, and heritage. **Prerequisite:** HEB 121 or instructor permission.

HEB 123 Hebrew III [H] • 5.0 Credits

Introduction to the Hebrew language including conversational skills, reading, writing and grammar, and Israeli and Jewish culture including geography, customs, daily life, and heritage. **Prerequisite:** HEB 122 or instructor permission.

History

columbiabasin.edu/history

Department Overview: The History department is comprised of professors with a wide variety of specialties, representing most of the major regions of the world. Offerings include a variety of general and more specialized courses in American and World History. The department's goal is to broaden the student's historical knowledge and to cultivate a historical awareness that allows the student to think and write critically about human society. CBC offers a two-year Associate in Arts and Sciences (AA) degree with an emphasis in History.

HIST 107 (Formerly HIS 107) Chicano History [S/B] • 5.0 Credits

This course is an introduction to the history of peoples of Mexican origin in the United States beginning with the period before the arrival of the Europeans and ending with an examination of contemporary issues such as immigration, acculturation/assimilation, and political representation facing the Chicano community during the contemporary period.

HIST 108 (Formerly HIS 108) History of Immigration in the U.S. [S/B] • 5.0 Credits

This course provides an overview of the history of immigration (voluntary and involuntary) in the United States and examines the factors that led people from Europe, Asia, Africa, Latin America, and other parts of the world to migrate to the U.S. The course also examines and compares the experience of the various groups once they are in the United States.

HIST 110 (Formerly HIS 110) History of Modern East Asia [S/B] • 5.0 Credits

A history of East Asia. Major emphasis is on the history of China, an analysis of modernization in Japan, and issues of colonialism and nationalism in East Asia.

HIST 111 (Formerly HIS 111) Colonial Latin America [S/B] • 5.0 Credits

The primary objective of the course is to familiarize students with the major phases in colonial Latin American history, including the conquest of the indigenous people, the imposition of Catholicism, the insertion of Latin America into the world market, the introduction and development of African slavery, independence movements, and the creation of new societies resulting from the mixing of indigenous, Iberian, and African cultures.

HIST 112 (Formerly HIS 112) Modern Latin America [S/B] • 5.0 Credits

A survey of the political, social, and economic history of Latin America from the last decades of the nineteenth century to the present.

HIST 113 (Formerly HIS 113) Mexico Since Independence [S/B] • 5.0 Credits

This course provides students with an overview of the history of modern Mexico from the first movements towards independence at the beginning of the 19th century to the economic, political, and cultural struggles which the nation faces at the start of the 21st century.

HIST 115 (Formerly HIS 115) Intro to Middle East History & Society [S/B] • 5.0 Credits

This course will introduce students to the sociology and history of the Middle East as one of the most diverse regions in the world. Specifically, it examines the historical development as well as the current transformation of social, cultural, economic, and political systems of Middle Eastern societies. Topics will be examined using a macro-sociological approach which analyzes both their internal dynamics and their role and place in the world. **This course is cross-listed with SOC 115. Credit cannot be received for both courses.**

HIST 199 Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

HIST 233 (Formerly HIS 233) War in History [S/B] • 5.0 Credits

A study of the history of warfare in the Western world from the Ancient period to the present. Students are introduced to the study of war in terms of its social, political, economic, technological, and cultural roots and its effects on these various fields.

HIST 299 Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

HIST&126 (Formerly HIS 101) World Civilizations I [H] • 5.0 Credits

A study of world civilizations from their origins through late antiquity. Emphasis is placed upon Western, East Asian, and South Asian civilizations. Philosophies, religions, and political and social systems are covered.

HIST&127 (Formerly HIS 102) World Civilizations II [H] • 5.0 Credits

The development of world civilizations from the end of the classical age to the beginning of the modern. Political, social, economic, and cultural development are covered with emphasis upon Europe, Asia, and Africa.

HIST&128 (Formerly HIS 103) World Civilizations III [H] • 5.0 Credits

An examination of the major civilizations of the world from the birth of the modern age to the present. Emphasis is on the development of the modern nation-state, international relations, socio-economic developments, and shifting patterns of thought.

HIST&146 (Formerly HIS 104, HIST&136) U.S. History I [S/B] • 5.0 Credits

Survey of American history from the colonial period through the Civil War. Emphasis is placed on Native Americans, early colonial development, the American Revolution, the building of the nation, territorial expansion, slavery, and the Civil War.

HIST&147 (Formerly HIS 105, HIST&137) U.S. History II [S/B] • 5.0 Credits

Survey of U.S. history from the Civil War through World War II. Emphasis is placed on Reconstruction, industrialization, immigration, American foreign policy, Progressive Reform, the twenties, the Great Depression, the New Deal, and World War II.

HIST&148 U.S. History III [S/B] • 5.0 Credits

Survey of U.S. History from World War II to the present. Emphasis is placed on the Cold War era, Vietnam, Civil Rights, the liberal consensus, the rise of modern conservatism, minority relations, the 1990s, and post 9-11 American society.

HIST&214 (Formerly HIS 251) Pacific Northwest History • 5.0 Credits

A general history of the Pacific Northwest with particular emphasis on Washington state. Special emphasis is given to Indian culture, Indian-White relations, settlement, race relations, industrialization, and changes created by WWI and WWII.

Courses & Programs

Horticulture

columbiabasin.edu/horticulture

Department Overview: Horticulture is the science and art of growing plants for food, personal enjoyment and environmental enhancement. Horticulture includes the production, marketing and utilization of fruit and vegetable products that improve health and well-being, shade trees that reduce the urban heat island effect, bedding plants that increase business profits and interior plants that reduce stress and enhance productivity. See also Agriculture, Agricultural Food Systems and Animal Science for courses required to earn an Associate in Arts and Sciences with an Emphasis in Agri-Business.

HORT 202 Cultivated Plants w/ Lab • 5.0 Credits

The goal of the course is to introduce students to the morphology, anatomy, growth, and development of agronomic and horticultural crops. **Recommended prerequisite:** BIOL& 211.

HORT 203 Crop Growth & Development w/ Lab • 5.0 Credits

Basic scientific principles of crop growth and development, including external abiotic (light, temperature, water, and nutrients) influences and their interaction with internal influences (genes, proteins, and hormones) from the cellular to the whole plant level. Consideration of how the application of such scientific knowledge has and can lead to crop improvement for efficient and sustainable crop production is emphasized. **Recommended prerequisite:** HORT 202.

HORT 251 Plant Propagation w/ Lab • 5.0 Credits

An introduction to the methods of plant propagation including methods of propagating by true seed, bulbs, divisions, layering, cuttings, budding, grafting, and micro-propagation. Emphasis is placed on the basic principles necessary to furnish an adequate understanding for commercial and industrial application.

Hospitality

columbiabasin.edu/hsp

Department Overview: A career in hospitality offers an exciting professional future that allows someone to put their goals, interests and abilities to good use in a field of limitless potential. Whether it's conference or convention centers, resorts, cruise ships, restaurants, wineries, hotels, or vacation destinations, the hospitality industry needs employees with specialized skills. This program prepares students for entry into the industry by providing those specialized skills with industry certifications. The hospitality industry offers good, high-paying jobs with opportunities for advancing to top-level positions.

HSP 101 Front Desk Representative • 2.0 Credits

This course is an introduction to the purpose and tasks of a front desk representative. It includes the identification of the various equipment and systems that front desk representatives use in the course of performing their duties. Successful completion of this course results in a certified front desk representative credential.

HSP 102 Guestroom Attendant • 2.0 Credits

This course is an introduction to the purpose and tasks of a guest room attendant. It includes the standards that are required and the role of keeping property secure. Successful completion of this course results in a certified guestroom attendant credential.

HSP 103 Restaurant Server • 2.0 Credits

This course is an introduction to the purpose and tasks of a restaurant server and how they work together with others to meet superior performance standards. Successful completion of this course results in a certified restaurant server credential.

HSP 104 Maintenance Employee • 2.0 Credits

This course is an introduction to the duties and primary functions of a maintenance employee and how they work together with others to meet superior performance standards. Successful completion of this course results in a certified maintenance employee credential.

HSP 105 Kitchen Cook • 2.0 Credits

This course is an introduction that describes the duties and primary functions of a kitchen cook and how they work together with others to meet superior performance standards. Successful completion of this course results in a certified kitchen cook credential.

HSP 106 Breakfast Attendant • 2.0 Credits

This is an introduction to the duties and primary functions of a breakfast attendant and how they work together with others to meet superior performance standards. Successful completion of this course results in a certified breakfast attendant credential.

HSP 107 Guest Service Professional • 2.0 Credits

This course is an introduction to the duties and primary functions of a guest service professional to maintain the highest level of service excellence. Successful completion of this course results in a certified guest service professional credential.

HSP 108 Hospitality Internship • 6.0 Credits

Students serve an internship with a company that offers the application of classroom learning with on-the-job experiences in the hospitality industry. The student will be placed with an employer where the environment will build on the student's area of career interest and prepare them to be productive employees.

Human Development

columbiabasin.edu/humandev

Department Overview: Human Development (HDEV) courses at Columbia Basin College provide students with a theoretical and practical foundation for human growth and development across the life span. Encompassing a broad spectrum of inter- and intra-personal skills that enhance professional and personal relationships, these courses address such topics as learning theory, tools and techniques to succeed in college and life, career exploration and planning, decision-making and interpersonal communication. These classes are open to all CBC students and can be taken for personal development or as college-level restricted elective credits towards the Associate in Arts and Sciences degree.

HDEV 100 (Formerly ED 100, EDUC 100) College Success • 3.0 Credits

This course is designed to assist students in learning effective techniques for having a college experience that is successful both academically and personally. Topics include: time management, test-taking, communication skills, learning styles, and campus resources. The development of critical thinking skills are incorporated throughout the course.

Courses & Programs

HDEV 101

Creating Academic Success • 4.0 Credits

Designed to help students identify and understand the fundamental characteristics and learning strategies needed to achieve their goals for college and beyond. Students explore the role that personal responsibility, behaviors, and beliefs play in academic and personal achievement. Students utilize campus tools and resources to develop academic plans that support their career and educational goals.

HDEV 102 (Formerly HDEV 1994)

College Connections • 3.0 Credits

A seminar exploration of Columbia Basin College, college-level skills, behaviors, and expectations. Designed to empower students with a holistic, strengths-based approach to navigate career and college success. Students develop the skills necessary to perform academic planning and campus navigation. **Prerequisite:** placement into college-level reading and math. **Recommended:** computer skills and the ability to navigate online.

HDEV 110

Academic CPR • 1.0 Credit

Academic CPR is a course designed for students who have been dismissed from CBC. This course focuses on providing students with the tools and resources to raise their grades so that they may become academically successful and ultimately meet their educational goals. Some of the topics covered are: learning styles, an examination of personal academic records, time management, study strategies, developing problem-solving skills, self-exploration, career interests, and the creation of an action plan to achieve sound educational goals. Successful completion (i.e. earning a 3.0 grade or higher) in this course allows students in dismissal status to return to CBC prior to sitting out four quarters and to enroll without a substantial tuition penalty.

HDEV 120 (Formerly HDEV 1991)

Career Experience • 2.0 Credits

This course focuses on experiential learning to assist students in developing educational and occupational goals. Topics include professionalism, networking strategies, innovative approaches to job seeking, and effective use of online resources in professional development. Students try on a career through job shadowing and conduct informational interviews with individuals in occupations that interest them. These real world experiences allow students to develop professionally and generate solid career possibilities that will increase the likelihood of making satisfying occupational choices.

HDEV 124 (Formerly HDEV 1992)

Dependable Strengths • 1.0 Credit

Discover core strengths to increase confidence and employability using the Dependable Strengths Articulation Process (DSAP). Students plan for a successful future by identifying core strengths from past experiences that aid in overall life and career satisfaction. Students explore the connection between their strengths and career choice. Topics include highly effective approaches to well-being and resiliency and more.

HDEV 128 (Formerly HDEV 1993)

Maximizing Choices • 1.0 Credit

Introduces effective decision making and goal setting models as they pertain to choosing a college major, a career, and other key life decisions. Students practice using these models in various decisions, from every day ones, to those that will lay the foundation for determining their educational, career, and life goals.

HDEV 135 (Formerly ED 135, EDUC 135)

College Major/Career Planning • 3.0 Credits

This course is designed to assist students in gaining insight into interests, values, personality, strengths, and the decision-making processes necessary for choosing a college major and planning a career. This course is for those who are choosing, changing, or confirming their educational goals. Topics include growing career opportunities, job hunting techniques, goal-setting, and tools for success.

HDEV 199

Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

Industrial Drawing

columbiabasin.edu/industrialdrawing

Department Overview: Columbia Basin College offers an Industrial Drawing course tailored specifically for the Welding program.

DRW 106

Mechanical Drawing for Vocational Application • 3.0 Credits

A basic course in the technique of sketching and drawing. Welding students learn to create orthographic, oblique, and isometric renderings. This course also teaches dimensioning for the welding shop fabrication drawings.

Industrial Health & Safety Technology

<https://www.columbiabasin.edu/ihst>

Department Overview: This program prepares individuals to apply basic safety and health principles including physics, engineering principles and technical skills, in support of industry professionals engaged in identifying and mitigating hazardous materials and maintaining health and safety standards. This program includes instruction in industrial and construction safety principles; inspection, monitoring, testing and sampling procedures; biohazard identification, laboratory techniques, instrument calibration and equipment maintenance, safety and protection equipment; applications to specific work environments and report preparation.

Students graduating with an Associate in Applied Science degree in Industrial Health & Safety Technology will be prepared to:

- Perform basic occupational health and safety functions.
- Apply a working knowledge of mathematics, sciences and other related disciplines to conduct experiments and to analyze and interpret data to solve occupational health and safety-related issues.
- Identify, formulate and solve applied science problems, using the techniques, skills and modern tools necessary for professional practice.
- Apply the principles of industrial hygiene and toxicology, and use fundamental exposure measurement techniques.
- Evaluate the relevance of contemporary issues in occupational health and safety.
- Identify principles of professional and ethical responsibility for occupational health and safety professionals.
- Apply principles of occupational health and safety through mentored supervised learning experiences.

IHST 101

Fundamentals of Industrial Health and Safety • 5.0 Credits

This course covers the fundamental aspects of industrial health and safety practices and how they are related to applicable standards, risk management, performance metrics, hazard recognition/controls, industrial hygiene, environmental management, fire safety, systems safety, ergonomics, hazardous materials, fleet safety, emergency management, and accident investigation. **Prerequisite:** grade of 2.0 or better in MATH 095 or MATH 050 or MATH 070 or satisfactory placement test score.

Courses & Programs

IHST 124

Industrial and Construction Safety Regulations • 5.0 Credits

This course is a study of OSHA regulations for construction and general industry, and WISHA standards and regulations. Students will develop an understanding of safety management, project incorporation of safety, and subcontractor management. Topics covered include: excavation, fall protection, scaffolding, equipment operation, steel erection, cranes, and electrical. **Prerequisite:** IHST 101 or concurrently enrolled or instructor permission.

IHST 130

OSHA 30 - Construction Safety • 3.0 Credits

This course is intended to provide an introduction to OSHA as it relates to managing safety and health. It provides information for maintaining a safe and healthful workplace for anyone that may be involved in the construction industry. **Prerequisite:** IHST 101 or instructor permission.

IHST 147

Ethics, Documentation, and Records • 4.0 Credits

Safety and health professionals face potential legal and ethical issues on an almost daily basis. In a landscape of changing responsibilities and new laws, they often make difficult decisions that can result in the creation of legal issues and liabilities for themselves and their companies. This course will explore issues in criminal liability for individuals and corporations under the OSHA Act and state criminal codes. **Prerequisite:** IHST 101 or instructor permission.

IHST 151

Accident Prevention, Inspection & Investigations • 5.0 Credits

This course provides a review of accident investigation methodologies that include accident response, evidence collection, analysis techniques, and developing and communicating recommendations to prevent recurrence. It includes drug/alcohol testing, claims management, return to work/rehabilitation programs, and preparation for lawsuits and deposition. **Prerequisite:** IHST 101 or 274 or instructor permission.

IHST 152

Internship • 1.0 - 7.0 Credits

Under the supervision of the college instructor and employer, a student will serve an internship of up to approximately 231 hours in an industry, enforcement agency, or consultation services setting. **Prerequisite:** IHST 280.

IHST 153

Risk Management • 5.0 Credits

This course is an examination of risk management principles in the context of safety and health management. Strategies and tactics for reducing workplace hazards are presented through a review of best practices and principles balanced by an organization's use of opportunistic and speculative risks. **Prerequisite:** IHST 101 or 274.

IHST 154

Hazwoper Certification • 4.0 Credits

This course satisfies the initial worker training requirements for general waste site worker as found in 29 CFR 1910.120(e)(3)(i) and 29 CFR 1926.65(e)(3)(ii). **Prerequisite:** IHST 101 or instructor permission.

IHST 177

Industrial Chemical Safety & Hazards • 5.0 Credits

A systematic analysis of how hazardous materials escalate an incident or emergency event. This course includes examination of the basic fundamental concepts common to hazardous chemicals with an emphasis on how some key elements, compounds, and mixtures are inherently dangerous. **Prerequisite:** IHST 101 or instructor permission.

IHST 230

Industrial Toxicology • 5.0 Credits

This course is an exploration of the basic principles associated with the toxic effects of chemicals on the living organism while examining the regulatory aspects and applications of toxicology in the workplace. Among the topics covered are the potential adverse effects of drugs, pesticides, food additives, and industrial chemicals. **Prerequisite:** IHST 101 or instructor permission.

IHST 231

Biological Hazards • 5.0 Credits

This course is intended to familiarize students with a range of biological hazards that may be encountered in community and work environments, including commercial, non-industrial, industrial and healthcare settings, with emphasis on the methods occupational hygienists use to recognize, evaluate, and control microbiological hazards. **Prerequisite:** IHST 101 or instructor permission.

IHST 233

Fire Protection Systems • 2.0 Credits

This course is an in-depth study of flammables, combustibles, and their relation to fire prevention. It includes hazard analysis and assessment of establishments relating to the prevention and control of fires, understanding the types of extinguishing systems and the hazards associated with each, and emergency response and evacuation plans. **Prerequisite:** IHST 101 or instructor permission.

IHST 235

Physical Hazards • 5.0 Credits

This course is a study of the physical hazards in industry and the methods of workplace design and redesign to control these hazards. Emphasis is on the regulation codes and standards associated with the control of physical hazards. **Prerequisite:** IHST 101 or instructor permission.

IHST 271

Fundamentals of Industrial Hygiene • 4.0 Credits

This course is an introduction to the basics of industrial hygiene that includes the anticipation, recognition, evaluation, and control of workplace environmental stressors (chemical, physical, and biological) that can impact the health, comfort, or productivity of the worker. **Prerequisite:** IHST 101 or instructor permission.

IHST 272

Ergonomics • 4.0 Credits

This course covers the principles and practices of ergonomics as it applies to the industrial and construction environment. It demonstrates how to collect data on users and operators and how to convert the data to good workplace design. **Prerequisite:** IHST 101 or instructor permission.

IHST 274

Safety Program Management • 5.0 Credits

This course includes a study of accident cost analysis, recordkeeping standards, reporting, job safety analysis, fundamentals of safety training, and safety management system requirements, training, and implementation. **Prerequisite:** IHST 101 or instructor permission.

IHST 277

Environmental Management • 5.0 Credits

This course is an overview of the theories, processes, and applications of natural and technological hazards from a geographic perspective. Topics involve investigation beyond the basic physical processes to include mitigation strategies and emergency management considerations. Some of the subjects include earthquakes, volcanoes, wildfires, floods, tornadoes, hurricanes, winter storms, oil spills, chemical releases, and environmental terrorism. **Prerequisite:** IHST 101 or instructor permission.

IHST 280

Industrial Instrumentation and Equipment • 5.0 Credits

This course is an overview of the basic instrumentation used for industrial hygiene readings to include theory of operation, interferences, limitations, proper usage for Direct Reading Instruments (DRIs), Volatile Organic Compound (VOC) Meters, noise measuring, light measuring, heat stress instruments, and miscellaneous monitoring equipment as well as the use of sample pumps and media for source, area, and personal data gathering. **Prerequisite:** IHST 101 or instructor permission.

Industrial Hygiene Technology

columbiabasin.edu/osh

Courses & Programs

Department Overview: Industrial Hygiene Technology courses focus on implementing and enforcing safety standards. Currently, IHT courses support safety practices in existing programs.

IHT 100 **OSHA-10 • 1.0 Credit**

Provides the Occupational Safety and Health Administration (OSHA) 10-hour safety awareness training certification.

Industrial Technology

columbiabasin.edu/int

Department Overview: Certified Logistic Technician (CLT)

A Logistics Technician works with the world of supply chain and logistics. Logistics is the activity of transporting goods to customers. Students learn the activities involved in handling materials through the supply chain including product receiving and storage, order processing, packaging and shipping, inventory control, handling hazmat, transportation modes and dispatch and tracking. The Tri-Cities area has many companies that require people with these skills and are waiting to interview students with these skills for current job openings. The CLT program is 11 weeks long (one quarter) and students that successfully complete the course receive nationally portable, industry-recognized certification.

Certified Production Technician (CPT)

The Certified Production Technician program prepares workers for high-performance, technologically-advanced production jobs in all sectors of manufacturing. Students learn critical work functions in the following areas: safety (including intro to manufacturing and work-readiness skills), quality practices and measurement, manufacturing processes and production and maintenance awareness. The Tri-Cities area has many companies that require people with these skills and are waiting to interview students with these skills for current job openings. The CPT program is 11 weeks long (one quarter) and students that successfully complete the course receive nationally portable, industry-recognized certification.

Troubleshooting for Technicians

This course is designed to boost the efficiency and effectiveness of troubleshooting by teaching today's technicians a proven logical approach to solving problems. The course consists of both lecture and hands-on practice using computer simulations of industrial systems and related test equipment. Using the Path of Influence and Four-Step process along with the troubleshooting simulation, the technician analyzes the fault and chooses maintenance actions such as continuity tests, bench checking and swapping that might correct the problem. The logic used is evaluated as well as the time and expenses incurred by the technician to solve the problem. This class provides approximately 22 hours of classroom training and is offered several times during the year to accommodate industry needs. Please call 509-542-4804 for a schedule of training.

INT 101 **Forklift Operations • 1.0 Credit**

This course provides training and preparation for powered forklift and pallet jack equipment operation in warehouse and industrial settings.

INT 103 **Basic HVAC • 3.0 Credits**

This course provides a basic understanding of the installation, operation, service, maintenance, and troubleshooting of various types of heating, ventilation, air conditioning, and refrigeration systems. **Prerequisite:** CASAS 221+ or equivalent or by instructor permission.

INT 105 **Precision Measurement • 1.0 Credit**

This course provides knowledge and skills for using tapes, rules, and calipers including various features, sizes, variations, and the technology behind the tool.

INT 120 **Production Technician • 12.0 Credits**

This course provides an overview of five critical work functions within industry production: safety, quality practices and measurement, manufacturing processes and production, and maintenance awareness. **Prerequisite:** instructor permission.

INT 130 **Logistics Technician • 6.0 Credits**

This course provides an overview of the world of supply chain logistics and good workplace habits in the context of the industry, including global supply chain life cycle, logistics environment, material handling equipment and safety, safety principles, quality control teamwork, communication, and using computers. **Prerequisite:** instructor permission.

INT 250 **Principles of Troubleshooting • 4.0 Credits**

This course is designed to teach today's technicians a logical approach to solving problems. The course consists of both lecture and hands-on practice using computer simulations of industrial systems and related test equipment. Using the Path of Influence and Four-Step process along with the troubleshooting simulation, the technician analyzes the fault and chooses maintenance actions such as continuity tests, bench checking, and swapping that might correct the problem. The logic used is evaluated as well as the time and expenses incurred by the technician to solve the problem. **Prerequisite:** any one of the following: AMT 120, ELT 111, ENT 238, equivalent coursework, or instructor permission.

INT 251 **Troubleshooting for Technicians • 2.0 Credits**

This course is designed to supplement experienced technicians' knowledge of troubleshooting using a logical approach to solving problems. The course consists of using computer simulations of industrial systems and related test equipment. Using the Path of Influence and Four-Step process along with the troubleshooting simulations, the technician analyzes the fault and chooses maintenance actions such as continuity tests, bench checking, and swapping that might correct the problem. The logic used is evaluated as well as the time and expenses incurred by the technician to solve the problem. **Prerequisite:** any one of the following: AMT 120, ELT 111, ENT 238, equivalent coursework, or instructor permission.

Instrumentation and Control

columbiabasin.edu/ic

Department Overview: Instrumentation and control courses support the Nuclear Technology program. Instrumentation and control requires highly skilled people who understand electrical, mechanical, hydraulic and pneumatic principles in the installation, operation and maintenance of instrumentation, and process control systems.

IC 201 **Instrumentation I • 5.0 Credits**

The first of three courses focused on the in-depth knowledge required for specific jobs tailored to the instrumentation and control maintenance discipline. It builds upon the general and system component knowledge gained in the first level of the program. Both generic and plant specific equipment are included in the instruction. **Prerequisite:** ELT 154; NT 170 recommended.

Courses & Programs

IC 202

Instrumentation II • 5.0 Credits

The second of three courses focused on the in-depth knowledge and skills needed to maintain instrumentation in a nuclear power plant. Includes training on specific components of the power plant. **Prerequisite:** IC 201.

IC 203

Instrumentation III • 5.0 Credits

The third of three courses focused on the in-depth knowledge and skills needed to maintain instrumentation in a nuclear power plant. Includes training on specific components of the power plant. **Prerequisite:** IC 202.

IC 230

PLC Programming & Computer Interfacing • 5.0 Credits

Designed to prepare the instrumentation maintenance technician to program, trouble shoot, and maintain Programmable Logic Controllers (PLCs) and computer interfaces associated with the nuclear power plant. **Prerequisite:** ELT 171.

IC 250

Instrumentation & Control for Operators • 5.0 Credits

Basic introduction to instrumentation and control processes for operators. Topics include basic control circuits, pneumatic devices, sensors, and hydraulic controls. **Prerequisite:** NT 111 and ELT 111 or ELT 124.

IC 260

Process Instrumentation • 5.0 Credits

Topics build upon basic instrumentation knowledge and skills in previous course. Focus is on developing the knowledge and skills related to valve operations and components associated with strainers and filters. **Prerequisite:** IC 250.

Intercultural Studies

columbiabasin.edu/interculturalstudies

Department Overview: Courses in Intercultural Studies examine race, ethnicity, class, gender, disability, sexuality, and other diversities, with an aim towards understanding how diversity is changing the contours of American society. The goals of the ICS program are scholarly but also practical: we focus on understanding diversity with an aim towards applying that knowledge to workplace and social relationships in our pluralistic society. ICS students will gain a greater understanding of the diverse context of American society and become aware of their own cultural assumptions, perspectives, and habits, even as they recognize the assumptions that inform cultural perspectives other than their own. See degree plans for more information about requirements and specific programs for course descriptions.

ICS 100

Cultural and Historical Linked to Travel • 1.0 - 3.0 Credits

An introduction to the history, culture, geography, art, and language of a country or countries, to be followed by a required trip to the area studied for an immersion experience.

ICS 120

Survey of Hispanic Culture [H] • 5.0 Credits

An introduction to the culture and civilization of the Spanish-speaking world; taught in English.

ICS 125 (Formerly HIST&219)

Native American Culture [H] • 5.0 Credits

An introduction to the history and culture of Native American peoples. The situation of Native Americans in contemporary society is also discussed with particular focus on issues of tribal sovereignty.

ICS 130

Survey of Asian American Culture [H] • 5.0 Credits

An introduction to the history and people of Asian descent in the United States. This class covers the ethnic, national, cultural, and religious diversity of Americans who trace their culture and/or origins to Asia as well as the immigration and acculturation of members of these populations.

ICS 135 (Formerly HIS 106, HIST&220)

Survey of African American Cultures [H] • 5.0 Credits

An introduction to the history of African Americans in the United States beginning with a study of the ancestors in Africa and ending with a discussion of the issue facing the African American community today.

ICS 199

Special Studies • 1.0 - 5.0 Credits

A class used to explore new coursework.

ICS 220

Globalization [S/B] • 5.0 Credits

Sociological analysis of the global interconnectedness of things, people, and ideas. Topics include economic development and trade, immigration and citizenship, human rights, transmission of culture and knowledge, and new technologies including the internet. Emphasis on understanding the significance of social forces and inequalities in shaping globalization processes. Cross-listed as SOC 220 (credit cannot be received for both courses).

ICS 222

Columbia Basin Cultures [H] • 5.0 Credits

A study of the history and contemporary situation of the Columbia Basin with special attention paid to Native Americans, Hispanic Americans, Asian Americans, and African Americans. Important topics include early settlement, labor relations, race relations, and historic and modern patterns of migration.

ICS 255

Race and Ethnic Relations [S/B] • 5.0 Credits

Relationships among various ethnic and racial groups in America, patterns of immigration, assimilation and mobility, and inter-ethnic conflicts and coalitions are examined. Although the perspective is historical, contemporary data is used to explore the question of the persisting impact of ethnicity. Special attention is paid to the relationship between ethnicity and social class.

ICS 299

Special Studies • 1.0 - 5.0 Credits

A class used to explore new coursework.

ICS 310

American Diversity [H] • 5.0 Credits

This course examines race, ethnicity, class, gender, disability, sexuality, and other forms of diversity, with the goal of understanding how diversity is changing the contours of American society and reshaping the American workplace. Students explore diversity with an aim towards applying that knowledge to workplace and social relationships in our pluralistic society. By the end of the course, students will have a greater understanding of the diverse context of American society and will be conversant in the ongoing debates regarding race, class, gender, disability, and sexuality in our society today. Finally, students will become aware of their own cultural assumptions, perspectives, and habits so that they might engage respectfully with others who do not share their opinions, viewpoints, and cultural worldview. **Prerequisite:** meets the criteria for acceptance into a BAS/BSN program, completion of a two-year degree or equivalent, or instructor approval.

International Studies

columbiabasin.edu/internationalstudies

Courses & Programs

Department Overview: This program combines social sciences and humanities to examine international problems and change. Using a diverse, multidisciplinary approach, the emphasis encourages students to look at our increasingly interdependent world in order to learn how to study it and understand its politics, societies, economies and cultures. Students choosing to study International Studies can earn an AA degree with that emphasis by taking specific courses in History, Geography, Political Science, Environmental Science and Sociology. See degree plans for more information about requirements and specific programs for course descriptions.

Japanese

columbiabasin.edu/japanese

Department Overview: Our Japanese classes offer student-centered instruction that focuses on communicating effectively in Japanese, appreciating the Japanese culture and recognizing linguistic and cultural connections between Japanese-speaking parts of the world and the United States.

JAPN 299
Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

JAPN&121 (Formerly JPSE 101)
Japanese I [H] • 5.0 Credits

Introduction to the Japanese language including speaking and listening skills, reading, writing, and grammar, and the Japanese culture including geography, customs, daily life, and heritage. Designed for the novice learner of Japanese, with little or no proficiency in the Japanese language. **Recommended prerequisite: successful completion of at least ENGL 099.**

JAPN&122 (Formerly JPSE 102)
Japanese II [H] • 5.0 Credits

Introduction to the Japanese language including speaking and listening skills, reading, writing, and grammar, and the Japanese culture including geography, customs, daily life, and heritage. **Prerequisite: JAPN& 121 or instructor permission.**

JAPN&123 (Formerly JPSE 103)
Japanese III [H] • 5.0 Credits

Introduction to the Japanese language including speaking and listening skills, reading, writing, and grammar, and the Japanese culture including geography, customs, daily life, and heritage. **Prerequisite: JAPN& 122 or instructor permission.**

JAPN&221 (Formerly JPSE 201)
Japanese IV [H] • 5.0 Credits

Extensive practice in all four language skills (reading, writing, speaking, and listening). This course includes cultural readings and includes an in-depth review of basic Japanese grammar, expansion of basic vocabulary, and a broadening of students' understanding of Japanese culture (including geography, customs, daily life, and heritage). **Prerequisite: JAPN& 123 or instructor permission.**

JAPN&222 (Formerly JPSE 202)
Japanese V [H] • 5.0 Credits

Extensive practice in all four language skills (reading, writing, speaking, and listening). This course includes cultural readings and in-depth review of basic Japanese grammar, expansion of basic vocabulary, and a broadening of students understanding of Japanese culture. **Prerequisite: JAPN& 221 or instructor permission.**

JAPN&223 (Formerly JPSE 203)
Japanese VI [H] • 5.0 Credits

Extensive practice in all four language skills (reading, writing, speaking, and listening). The course includes cultural readings and in-depth review of basic Japanese grammar, expansion of basic vocabulary, and a broadening of students understanding of Japanese culture. **Prerequisite: JAPN& 222 or instructor permission.**

Latino & Latin American Studies

columbiabasin.edu/latinostudies

Department Overview: In our increasingly multiethnic and global society, it is important to learn about and understand the people and cultures of the many places around the world. The growing presence of people of Hispanic/Latino descent in the United States as well as our country's continued economic, political and cultural connection with Spanish speaking countries makes it imperative to learn about this region and its people. Students choosing to study Latino & Latin American Studies can earn an AA degree by taking specific courses in History, Intercultural Studies, Political Science, Anthropology, Psychology and Sociology. See degree plans for more information about requirements and specific programs for course descriptions.

Maintenance

<https://www.columbiabasin.edu/bim>

Department Overview: The Maintenance program offers two short-term certificates to provide students a foundation in the fundamentals of maintenance, blueprint reading, hydraulic systems, electricity, welding and machine operations. Maintenance mechanics are responsible for the management and operation of production machinery.

MNT 110 (Formerly AGET 110)
Fundamentals of Maintenance • 7.0 Credits

Introduces skills and knowledge required by all service technicians including: precision measurement, environmental and safety regulation compliance; safety and personal protection equipment, fastener identification; hand and power tool identification, use and safety; lifting and blocking, torque wrench use; tapping, threading and thread inserts. Students demonstrate the ability to follow written instruction, complete business forms, and perform basic math skills. Includes a review of the student rights and responsibilities. **Prerequisite: RDG 099 and ENGL 099 and either MATH 050 or 084 with a grade of 2.0 or better, or MATH 084 with a grade of P if taken before spring 2016, or satisfactory placement test score.**

MNT 111 (Formerly MOP 111)
Intro to Machine Operations • 7.0 Credits

This course is designed to give students skills using measuring instruments and the concepts of machining with a metal lathe.

MNT 210 (Formerly AGET 210)
Hydraulic and Pneumatic Systems • 7.0 Credits

This course is designed to teach the systems operation and the testing, adjusting, maintenance, and repair procedures for pneumatic and hydraulic systems including load sensing pressure compensated systems, electro-hydraulic systems, and hydrostatic systems. Students identify system components and discuss their operation and application. Students identify different systems, trace the flow through the systems, and state the systems operation and application. Students use onboard diagnostic systems, T adapter kits, digital volt/ohm meters, flow meters, pressure gauges, and manufacturer specific tools to diagnose hydraulic and pneumatic system malfunctions. **Prerequisite: instructor permission.**

Courses & Programs

Manufacturing Technology

columbiabasin.edu/mt

Department Overview: Every manufactured part from aerospace and automobiles, to computers, cell phones and motorcycles, virtually everything man-made is touched by machinists.

A machinist is a skilled metal worker who makes parts out of metal, plastic and composites with machine tools such as lathes, milling machines, precision grinders and Computer Numerical Controlled (CNC) machines. A machinist can set up and operate most types of machines and has an understanding of what the various machine tools do. Machinists turn a block of material into intricate parts that meet precise specifications. Machinists use precision-measuring instruments such as micrometers, optical comparators and gages to measure the accuracy of their work to thousandths of an inch.

The CBC Manufacturing Technology curriculum includes trade support theory courses in conjunction with laboratory training and general education courses. For more information, call 509.544.2267.

The department requires students achieve a minimum grade of 2.0 to be able to continue enrollment in major courses. The Associate in Applied Science degree also requires a minimum grade of 2.0 for each major course. A student who achieves a grade of 1.9 or lower in any required major courses may repeat that course once to attempt to achieve a grade of 2.0 or higher. Exceptions to this policy must be approved by the dean of the program prior to enrollment and must be based on extenuating circumstances.

At the end of the program, successful students will be able to:

- Demonstrate machining skills on manual machine tools such as lathes, milling machines, surface grinders, drill presses, sawing machines and measuring tools, as well as blueprint reading and other skills
- Operate high tech equipment, such as computer coordinate measuring systems (CMM)
- Set-up, operate and maintain Computer Numerical Control (CNC) machines
- Demonstrate skills in computer-aided drafting (CAD) and computer-aided manufacturing (CAM)
- Use math and problem-solving skills to produce parts with machining tools
- Inspect and measure parts to specified tolerances
- Demonstrate appropriate employment skills necessary for industry employment

MT 102

SolidWorks(R) I • 5.0 Credits

This course is an introduction to SolidWorks® design software. The intent is to guide students through the software so they develop an understanding of how parts are designed as well as the concepts of blueprint construction/reading. The principles of geometric construction and constraints such as perpendicularity, concentricity, and parallelism are stressed so students are able to understand the workings of a precision model. **Prerequisite:** BPR 105 or 110 or equivalent, and CA 100 or CS 101, or instructor permission.

MT 111

Basic Machine Technology I • 5.0 Credits

This course is designed to give students skills in using measuring instruments and concepts of machining with a metal lathe. Upon completion of this course, students should know how to turn and measure diameters within .001, cut threads, knurl, and cut tapers.

MT 112 (Formerly MT 1111)

Basic Machine Technology I Lab • 1.0 - 9.0 Credits

Work on projects using the lathe to practice the concepts taught in the class.

MT 121

Basic Machine Technology II • 5.0 Credits

This course is designed to build skills and knowledge on vertical and horizontal milling machine. Upon completion, students should be able to set up a milling machine to cut features with a tolerance of .001. **Prerequisite:** MT 111 or instructor permission.

MT 122 (Formerly MT 1211)

Basic Machine Technology II Lab • 1.0 - 9.0 Credits

Work on projects using the lathe and milling machine to practice the concepts taught in class. **Prerequisite:** MT 112 or instructor permission.

MT 131

Basic Machine Technology III • 5.0 Credits

This course is designed to allow students to learn about job planning, scheduling, and estimating parts as well as producing a product suggested by the instructor. **Prerequisite:** successful completion of MT 102, MT 111/MT 112, and MT 121/MT 122 with a 2.0 or higher, or instructor permission.

MT 132 (Formerly MT 1311)

Basic Machine Technology III Lab • 1.0 - 9.0 Credits

Work on projects using the lathe and milling machine to practice the concepts taught in class. **Prerequisite:** MT 122 or instructor permission.

MT 193

Independent Study • 1.0 - 15.0 Credits

A class used to explore new coursework or for a specific topic of special interest.

MT 201

Introduction to Engineering Material Science • 5.0 Credits

As an introductory course, the goal is to learn the fundamental nature of engineered materials, as applied to a Machine Technology Certificate or as a qualifying transfer class to bachelor program at a four-year institution. Instruction begins with the basics of how materials are organized on the atomic, microscopic, and macroscopic levels, how and why these produce a finished project. Though this course is more practical to the common processes used today, it also introduces new trends in materials manufacturing for sustainability, automation, and some of the recent developments in materials science using polymers, composites, ceramics, and advanced metal alloys. Materials science and engineering is an exciting field and an understanding of it is vital for technologists and engineers alike.

MT 202

SolidWorks(R) II • 5.0 Credits

This course prepares students to take the Certified SolidWorks® Associate Exam. **Prerequisite:** MT 102 or instructor permission.

MT 211

Advanced Machine Technology I • 5.0 Credits

This course is designed to build skills and knowledge in Computer Numerical Controlled (CNC) milling. Upon completion of this course, students should be able to program, set up, and operate a CNC milling machine. **Prerequisite:** MT 131 or instructor permission.

MT 212 (Formerly MT 2111)

Advanced Machine Technology I Lab • 1.0 - 9.0 Credits

Work on projects using the lathe and milling machine to practice the concepts taught in class. **Prerequisite:** MT 132 or instructor permission.

MT 221

Advanced Machine Technology II • 5.0 Credits

This course is designed to build skill and knowledge in CNC. Upon completion of this course, students should be able to program, set up, and operate CNC equipment. **Prerequisite:** MT 211 or instructor permission.

MT 222 (Formerly MT 2211)

Advanced Machine Technology II Lab • 9.0 Credits

Work on projects using the CNC to practice the concepts taught in class. **Prerequisite:** MT 212 or instructor permission.

Courses & Programs

MT 231 Advanced Machine Technology III • 5.0 Credits

This course is designed to build skill and knowledge in Computer Aided Manufacturing (CAM). Upon completion of this course, students should be able to draw a part in a solid modeling software, write a program with the CAM system, and machine the part on a CNC. **Prerequisite:** MT 221 or instructor permission.

MT 232 (Formerly MT 2311) Advanced Machine Technology III Lab • 1.0 - 9.0 Credits

Work on projects using SolidWorks(R), CAM system, and CNC milling machine to practice the concepts taught in class. **Prerequisite:** MT 222 or instructor permission.

Mathematics

columbiabasin.edu/mathematics

Department Overview: Mathematics courses are required by a vast number of technical, occupational and academic disciplines. The Math department seeks to support these needs by providing a full range of courses for students seeking degrees and certificates and students seeking to transfer to baccalaureate institutions. Additionally, courses are provided for students who require developmental math.

MATH 040 Pre-Algebra • 5.0 Credits

This introductory course includes computations with integers, fractions, and decimals, prime factorization, algebraic symbols and operations including integer exponents, square roots and inequalities, order of operations, percent, ratios and proportions, translating sentences into mathematical expressions, problem solving strategies, properties of standard geometric objects, and linear equations. **Prerequisite:** MATH 080 or higher or satisfactory placement test score.

MATH 048 Math for Technical Applications Support • 2.0 Credits

Designed as a corequisite course for any student taking MATH 100 that does not meet the prerequisite requirements. This course will run concurrently with MATH 100 and provide the tools and concepts necessary for students to participate in MATH 100. Topics include whole numbers, decimals, fractions, basic proportions and percentages, real numbers, and basic algebra concepts. **Prerequisite:** concurrent enrollment in MATH 100.

MATH 050 Quantitative Literacy • 5.0 Credits

This course is designed to engage students in complex and realistic situations involving the mathematics of quantity, change and relationships, spatial reasoning, geometric investigations, probability and statistics. Intermediate algebra topics include linear and nonlinear models, ratios, proportions, percents and dimensional analysis. Note that this course will not satisfy the intermediate algebra requirement of the University of Washington. **Prerequisite:** grade of 2.0 or better in MATH 040, 084, 096 or 097 or STAT 091 or satisfactory placement test score.

MATH 060 Algebra I • 5.0 Credits

This course includes linear equations and applications, linear inequalities, compound linear inequalities, absolute value equations and inequalities, graphing linear equations in two variables, slope and intercepts, finding the equation of a line, functions and relations, graphs of basic functions, systems of linear equations in two variables, systems of inequalities in two variables, adding and subtracting polynomials, polynomial multiplication and division. **Prerequisite:** grade of 2.5 or better in MATH 040 or grade of 2.0 or better in MATH 084 or satisfactory placement test score.

MATH 062 Algebra I Supported • 7.0 Credits

This course includes linear equations and applications, linear inequalities, compound linear inequalities, absolute value equations and inequalities, graphing linear equations in two variables, slope and intercepts, finding the equation of a line, functions and relations, graphs of basic functions, systems of linear equations in two variables, systems of inequalities in two variables, adding and subtracting polynomials, polynomial multiplication and division. Additional two hours per week of the course will provide review for essential prerequisite material. **Prerequisite:** grade of 2.0 or better in MATH 040 or MATH 084 or satisfactory placement test score.

MATH 070 Algebra II • 5.0 Credits

This course includes factoring polynomials and solving polynomial equations, rational expressions, complex fractions, rational equations and inequalities, radical expressions, simplifying expressions with radicals and rational exponents, radical equations and functions, complex numbers, methods for solving quadratic equations and applications, exponential and logarithmic properties and equations. **Prerequisite:** grade of 2.5 or better in MATH 060 or MATH 062 or grade of 2.0 or better in MATH 097 or satisfactory placement test score.

MATH 072 Algebra II Supported • 7.0 Credits

This course includes factoring polynomials and solving polynomial equations, rational expressions, complex fractions, rational equations and inequalities, radical expressions, simplifying expressions with radicals and rational exponents, radical equations and functions, complex numbers, methods for solving quadratic equations and applications, exponential and logarithmic properties and equations. Additional two hours per week of the course will provide review for essential prerequisite material. **Prerequisite:** grade of 2.0 or better in MATH 060 or MATH 062 or MATH 096 or MATH 097 or satisfactory placement test score.

MATH 092 Special Topics in Mathematics • 1.0 - 10.0 Credits

This course is designed to give special mathematical topics to those students whose needs are not met with the existing curriculum.

MATH 100 (Formerly MTH 100) Algebraic Tools for Vocational Application • 5.0 Credits

Designed to introduce the student to the tools and concepts necessary to solve mathematical problems applicable to the student's trade. Topics include ratios and proportions, percentages, measurement, applying formulas, basic algebra concepts, geometry, and basic triangle trigonometry. **Prerequisite:** appropriate placement or concurrent enrollment in MATH 048.

MATH 106 (Formerly MTH 106) Business Mathematics • 5.0 Credits

Mathematical concepts used in business such as interest, annuities, mortgages, investments, and taxes. Required by some majors for the AAS degree; does not satisfy math requirement for AA degree. **Prerequisite:** MATH 084 with a grade of 2.0 or better, or MATH 084 with a grade of P if taken before spring 2016, or MATH 050 with a grade of 2.0 or better or satisfactory placement test score.

MATH 108 (Formerly MTH 108) Math for Early Childhood Education • 5.0 Credits

An elementary introduction to problem-solving, fractions and decimals, probability and statistics, geometry and measurement, and functions and graphs. Intended for early childhood and para education majors only. **Prerequisite:** MATH 084 with a grade of 2.0 or better, or MATH 084 with a grade of P if taken before spring 2016, or MATH 040 with a grade of 2.0 or better or satisfactory placement test score.

MATH 109 (Formerly MTH 109) Trigonometric Tools for Vocational Application • 3.0 Credits

The second course of a two-quarter sequence designed to introduce vocational students to the mathematical tools necessary to solve problems applicable to the student's trade. Topics include trigonometric functions, emphasis on right angle triangles, law of sines, law of cosines, solving oblique triangles, and vectors. **Prerequisite:** grade of 2.0 or higher in MATH 100 or appropriate placement.

Courses & Programs

MATH 111 (Formerly MTH 111)

Automotive Math • 5.0 Credits

Mathematical concepts listed in the automotive trades including algebraic functions, geometry, interest, and discounts. Brief review of micrometer reading, and the physics of engine design. Required by Automotive for AAS degree; does not satisfy math requirement for AA degree. **Prerequisite:** MATH 084 with a grade of 2.0 or better, or MATH 084 with a grade of P if taken before spring 2016, or MATH 040 with a grade of 2.0 or better or satisfactory placement test score.

MATH 112 (Formerly MTH 112)

Machinist Math • 5.0 Credits

A mathematics course designed to assist machine students with the tools necessary to solve problems associated with the field of endeavor-the machine shop. Topics include algebraic manipulation of equations, both linear and quadratic with graphs. The use of ratios, direct, and inverse proportions especially in relation to gears. Introduction to geometric principles, volumes of various shapes, and right angle and oblique trigonometry required for Machine Technology for AAS degree; does not satisfy math requirement for AA degree. **Prerequisite:** MATH 095 or MATH 098 or MATH 070 (or MATH 072) with a grade of 2.0 or better or satisfactory placement test score.

MATH 113 (Formerly MTH 103, MTH 113)

Geometry/Trigonometry [M/S] • 5.0 Credits

Areas and volumes of basic geometric figures, approximations, ratio and proportions, literal equations, scientific notation, vectors, logarithms, complex numbers, trigonometric functions, and graphs of trigonometric functions. Recommended for students intending to take PHYS& 134. **Prerequisite:** MATH 095 or MATH 098 or MATH 070 (or MATH 072) with a grade of 2.0 or better or satisfactory placement test score.

MATH 147 (Formerly MTH 147, MTH 200)

Finite Math [M/S] [Q/SR] • 5.0 Credits

A course especially suited for students in behavioral, managerial, and social sciences. Topics include: matrices, systems of linear equations and inequalities, finance, probability and counting techniques, exponential, and logarithmic functions. **Prerequisite:** MATH 095 or MATH 098 or MATH 070 (or MATH 072) with a grade of 2.0 or better or satisfactory placement test score.

MATH 199

Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

MATH 243 (Formerly MTH 213, MTH 243)

Linear Algebra [M/S] [Q/SR] • 5.0 Credits

Designed for physical science majors in fields such as mathematics, engineering, and physics. Topics include vectors, matrices and determinants, lines and planes in 3-space, linear systems, vector spaces, linear transformations, eigenvalues, and eigenvectors. **Prerequisite:** grade of 2.0 or better in MATH& 151.

MATH 246 (Formerly MTH 216, MTH 246)

Discrete Structures [M/S] [Q/SR] • 5.0 Credits

An introduction to discrete mathematics, trees, graphs, elementary logic, and combinatorics with applications to computer science. **Prerequisite:** grade of 2.0 or better in MATH& 141. A knowledge of computers, programming, and calculus is beneficial but is not required.

MATH 255 (Formerly MTH 254)

Differential Equations [M/S] [Q/SR] • 5.0 Credits

Beginning course in differential equations. Topics include first order methods, linear differential operators, Laplace transforms, series methods, and numerical techniques. **Prerequisite:** MATH& 153 or equivalent. MATH& 153 may be taken concurrently.

MATH 299

Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

MATH&107 (Formerly MTH 110, MTH 130)

Math in Society [M/S] [Q/SR] • 5.0 Credits

This course is designed for students who have successfully completed intermediate algebra coursework. This course will introduce students to mathematical applications in a variety of disciplines and will satisfy the quantitative/symbolic reasoning requirement for the AA degree. **Prerequisite:** MATH 094 or MATH 095 or MATH 098 or MATH 050 or MATH 070 (or MATH 072) with a grade of 2.0 or better or satisfactory placement test score.

MATH&141 (Formerly MTH 104, MTH 154)

Precalculus I [M/S] [Q/SR] • 5.0 Credits

Designed to prepare students for entry into basic calculus. Precalculus I together with Precalculus II is designed to prepare students for entry into the calculus sequence: MATH& 151, MATH& 152, MATH& 153, and MATH& 254. The topics include: absolute value, complex numbers, linear and quadratic equations, rational, polynomial, exponential and logarithmic functions, inverse functions, theory of equations, and sequences and series. **Prerequisite:** grade of 2.0 or better in MATH 070 or MATH 072 or MATH 095 or MATH 098 or satisfactory placement test score.

MATH&142 (Formerly MTH 105, MTH 155)

Precalculus II [M/S] [Q/SR] • 5.0 Credits

Precalculus II is the second quarter of the precalculus sequence. Precalculus II is predominantly trigonometry. The topics include trigonometric functions and their inverses, solving triangles, circular functions, identities, conditional equations, complex numbers in polar form, conic sections, parametric and polar equations, systems of equations, matrices and determinants, and vectors. **Prerequisite:** grade of 2.0 or better in MATH& 141, or appropriate placement. Students completing MATH& 142 may not receive graduation credit for MATH& 144.

MATH&144 (Formerly MTH 107, MTH 157)

Precalculus I & II [M/S] [Q/SR] • 5.0 Credits

Precalculus I & II is a condensed, accelerated combination of Precalculus I and Precalculus II. Selected topics from Precalculus I and Precalculus II are covered in one quarter, allowing the better prepared student to complete the precalculus preparation in one quarter rather than two. The topics include polynomial, rational, logarithmic, and circular functions. Also, analytic geometry, complex numbers, vectors, and sequences and series. **Prerequisite:** appropriate placement or instructor permission. Students completing MATH& 144 may not receive graduation credit for MATH& 141 and/or MATH& 142.

MATH&146 (Formerly MTH 143)

Introduction to Stats [M/S] [Q/SR] • 5.0 Credits

A course especially suited for the non-physical science major such as business, medical professionals, behavioral sciences, computer science, etc. A study of both descriptive and inferential statistics, including: measures of central tendency, random variables, probability, probability distributions, sampling methods, confidence intervals, hypothesis testing, estimation, linear regression, and correlation. **Prerequisite:** STAT 092 or MATH 094 or MATH 095 or MATH 098 or MATH 050 or MATH 070 (or MATH 072) with a grade of 2.0 or better or satisfactory placement test score.

MATH&148 (Formerly MTH 210)

Business Calculus [M/S] [Q/SR] • 5.0 Credits

Designed for non-physical science majors such as business, management, behavioral science, and social science. Topics include: relations, functions, exponential and logarithmic functions, derivatives and their applications, integrals and their applications, and functions of several variables. **Prerequisite:** grade of 2.0 or better in MATH 070 or MATH 072 or MATH 147 or satisfactory placement test score. Suggested prerequisite: MATH& 141.

MATH&151 (Formerly MTH 201, MTH 231)

Calculus I [M/S] [Q/SR] • 5.0 Credits

The first course in the sequence for students whose major field of study requires a full year of calculus. Topics include: limits of algebraic and trigonometric expressions and exponential and logarithm functions; the derivatives of algebraic, trigonometric functions, and their inverses; exponential and logarithm functions; hyperbolic functions and their inverses; applications of the derivative, and an introduction to antiderivatives and the definite and indefinite integral. **Prerequisite:** grade of 2.0 or better in MATH& 141 and MATH& 142 or MATH& 144, or appropriate placement.

Courses & Programs

MATH&152 (Formerly MTH 202, MTH 232)

Calculus II [M/S] [Q/SR] • 5.0 Credits

A continuation of MATH& 151. Topics include: the fundamental theorem of calculus; techniques of integration; trigonometric integrals and substitution; applications of the definite integral including areas, average values, and volumes; improper integrals; and parametric equations, polar coordinates, arc length, and surface area with polar functions. **Prerequisite:** grade of 2.0 or better in MATH& 151 or equivalent.

MATH&153 (Formerly MTH 203, MTH 233)

Calculus III [M/S] [Q/SR] • 5.0 Credits

A continuation of MATH& 152. Topics include: infinite sequences and series; MacLaurin, Taylor, and power series; conic sections, vectors, and the calculus of vector functions in two and three dimensions with applications. **Prerequisite:** grade of 2.0 or better in MATH& 152 or equivalent.

MATH&171 (Formerly MATH 121)

Math for Elementary Education I [M/S] • 5.0 Credits

An introduction to problem-solving principles and strategies, sets and logic, numeration systems, properties of the real number system and its subsystems, and applications of mathematics. Primarily for elementary education majors. **Prerequisite:** a grade of 2.0 or better in MATH 070 or MATH 072 or MATH 095 or MATH 098 or satisfactory placement test score.

MATH&172 (Formerly MATH 122)

Math for Elementary Education II [M/S] [Q/SR] • 5.0 Credits

An informal approach to the basic ideas of geometry; including construction, congruence and similarity, transformations, symmetry, measurement, and coordinate geometry. This course satisfies the quantitative skills requirement for the AA degree, provided that MATH& 171 (previously MATH 121) has also been successfully completed. **Prerequisite:** grade of 2.0 or better in MATH& 171.

MATH&173 (Formerly MATH 123)

Math for Elementary Education III [M/S] [Q/SR] • 5.0 Credits

An elementary introduction to algebraic reasoning, probability, and statistics. Primarily for elementary education majors. This course satisfies the quantitative skills requirement for the AA degree, provided that MATH& 171 (previously MATH 121) has been successfully completed. **Prerequisite:** grade of 2.0 or better in MATH& 171.

MATH&254 (Formerly MTH 204, MTH 234)

Calculus IV [M/S] [Q/SR] • 5.0 Credits

An introduction to the calculus applied to functions of two or three variables. Topics include: functions of several variables, partial derivatives, directional derivatives, multiple integration, integration using cylindrical and spherical coordinates, vector fields, line integrals, surfaces and surface integrals, Green's Theorem, Stoke's Theorem, and the Divergence Theorem. **Prerequisite:** grade of 2.0 or better in MATH& 153 or equivalent.

Medical Assistant

columbiabasin.edu/medicalassistant

Department Overview: The Columbia Basin College Medical Assistant (MA) program prepares graduates for a wide range of duties in medical offices and other healthcare settings. Students learn the knowledge, technical skills and work ethic that are required for an entry-level position in medical assisting. The curriculum includes competencies in front office administrative processes as well as back office clinical procedures. The program provides a two-year Associate in Applied Science degree as well as a One-Year Certificate in Medical Assisting.

The Columbia Basin College Medical Assistant Certificate program is accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP) upon the recommendation of the Medical Assisting Education Review Board (MAERB). Commission on Accreditation of Allied Health Education Programs, 25400 U.S. Highway 10 North, Suite 158, Clearwater, FL 33763. Only graduates of a Commission on Accreditation of Allied Health Education Programs or an Accrediting Bureau of Health Education Schools (ABHES) accredited program are eligible to take the CMA (AAMA) Certification Exam. Upon passing the certification exam, graduates are eligible to apply for licensure as a Medical Assistant-Certified (MA-C) in the state of Washington.

Students must meet minimum entrance standards and be accepted for enrollment after application to the department. The major courses for the Medical Assistant program are offered over a four-quarter sequence, beginning in the fall quarter of each year. The fourth quarter of the program will be offered in the summer in which students will be active in externships throughout the healthcare community. Students may complete General Education requirements for the two-year Associate in Applied Science degree either before or after completion of the Medical Assistant Certificate major courses.

Prerequisites that are considered for acceptance into the Medical Assistant program include: PSYC& 100, ENGL& 101, CMST& 210, CMST& 220, CMST 260, and HSCI 147. All prerequisite and Medical Assistant courses must be passed at a 2.0 GPA or higher. Students are expected to possess the ability to use basic computer systems and produce documents.

A Medical Assistant program application is required for consideration. Medical Assistant program application should include a copy of the following healthcare documents:

- Certificate of Completion for seven hours of HIV/AIDS Bloodborne Pathogen Training
- A current American Heart Association Basic Life Support (BLS) card

Accepted applicants will be mailed a letter confirming registration and are required to provide the following additional documentation:

- Program specific immunization records (details provided with admission into the program).
- Satisfactory criminal history background check using a college approved vendor. Criminal history background information is required of all Medical Assistant students. Information obtained will be considered in determining student eligibility to complete clinical coursework. Inability to participate in clinical experiences due to the information obtained from the background check may result in the student's inability to satisfactorily complete program degree requirements. Any infraction while enrolled in the Medical Assistant program should be self-reported to the coordinator/director. Questions regarding this policy should be directed to the Dean for Health Sciences.

MA 111

Pharmacology I • 5.0 Credits

Provides a basic knowledge of pharmacology including the legal ethical issues, the terms and abbreviations, the involvement of governmental agencies, the role of the providers and allied health professional, reading, interpreting and documenting the medication orders; and the effects of medication and common drugs used with each body system including antineoplastics, analgesics, antipyretics, nutritional supplements, and alternative medicines and immunizations. **Prerequisite:** placement into MATH 083. **Required admission into the Medical Assistant program.**

MA 114

Human Body Structure, Function, and Diseases I • 4.0 Credits

This is the first of two structure and function classes introducing cellular function, organ systems of the body, the anatomy and physiology of the integumentary, skeletal, muscular, nervous, endocrine systems, and the senses. Common diseases related to each of these body systems is presented as well as pathology and expected medical treatment. **Prerequisite:** HSCI 147 and required admission into the Medical Assistant program.

Courses & Programs

MA 115

Clinical Procedures Theory I • 4.0 Credits

This class provides a theoretical foundation in medical asepsis, infection control, vital signs, phlebotomy, cardiopulmonary procedures, colon procedures, introduction to the clinical laboratory, urinalysis, and a theoretical foundation for the gynecological exam, prenatal care, pediatric exams, and office emergencies. **Prerequisite:** MA 111, 114, and 140. **This course to be taken concurrently with MA 116 (lab course).**

MA 116 (Formerly MA 1151)

Clinical Procedures Lab I • 4.0 Credits

This lab class provides for a practice in basic patient exam techniques, procedures, lab tests, and injections commonly performed in the physician's office or clinic. **Prerequisite:** MA 111, 114, and 140. **This course to be taken concurrently with MA 115 (theory course).**

MA 140

Admin. Medical Assistant Office Procedures I • 5.0 Credits

This course defines the front office roles and responsibilities in a medical office. Major topics covered are a history of the medical assistant profession; written, verbal, and non-verbal communication; patient education; medical law and ethics, the medical record and introduction to the electronic medical record; and performing daily administrative office duties including: appointment scheduling, coordinating outpatient procedures, managing referrals for patients, and utilizing the computer and electronic medical record. **Prerequisite:** acceptance into the Medical Assisting program.

MA 141

Career Development for Medical Assistants • 2.0 Credits

This class covers professionalism in a medical office, successful job search, interview techniques, the importance of networking, and how to be successful on the job. **Prerequisite:** MA 115, 116, 211, and 214.

MA 211

Pharmacology II • 5.0 Credits

This is the second of two pharmacology classes. This class includes the administration of medication including: safety and quality assurance, enteral, percutaneous, and parenteral routes of medication; measurement, conversions of medications for administration, calculating dosages and solutions, and immunization schedules. **Prerequisite:** MA 111, 114, and 140.

MA 214

Human Body Structure, Function, and Diseases II • 4.0 Credits

This is the second of two body structure, function, and disease courses and includes: the circulatory system, lymphatic system and immunity, the respiratory system, the digestive system, nutrition and metabolism, the urinary system, fluid and electrolyte balance, acid-base balance, the reproductive system, genetics, growth and development, mental disorders, and disorders and conditions resulting from trauma. Common diseases are presented for each of these body systems as well as pathology and expected medical treatment. **Prerequisite:** MA 111, 114, and 140.

MA 215

Clinical Procedures Theory II • 4.0 Credits

This class provides a theoretical foundation in physical agents to promote tissue healing, radiology, sterilization and disinfection, minor office surgery, eye and ear assessment and procedures, the physical examination, hematology, blood chemistry and serology, and medical microbiology. **Prerequisite:** MA 115, 116, 211, and 214. **This course to be taken concurrently with MA 216 (lab course).**

MA 216 (Formerly MA 2151)

Clinical Procedures Lab II • 4.0 Credits

This class provides for a practice in basic patient exam techniques, procedures, lab tests, and basic sterile techniques commonly performed in the provider's office or clinic. **Prerequisite:** MA 115, 116, 211, and 214. **This course to be taken concurrently with MA 215 (theory course).**

MA 240

Admin. Medical Assistant Office Procedures II • 6.0 Credits

This course expands on front office roles and responsibilities of an Administrative Medical Assistant. Major topics covered include: patient account management, medical billing, medical banking services and procedures, management of practice finances, and the use of computers in the medical office including electronic medical record, and safety and emergency practices. **Prerequisite:** MA 115, 116, 211, and 214.

MA 241

Externship Seminar • 2.0 Credits

This course is to be taken concurrently with the externship for Medical Assistants. The seminar provides current information regarding workplace issues, technologies, and advancements in healthcare pertinent to the externship experience. Students engage in discussions based on their experiential learning opportunities within the externship. **Prerequisite:** successful completion of all other Medical Assistant courses with a GPA of 2.0 or higher.

MA 242 (Formerly MA 2413)

Externship • 6.0 Credits

This class provides an opportunity to apply the theory learned in the classroom setting to a healthcare setting through practical, hands-on experience. **Prerequisite:** successful completion of all other Medical Assistant courses with a GPA of 2.0 or higher.

Medical Imaging Technology

columbiabasin.edu/image

Department Overview: The IMAGE courses are designed to prepare students for advanced level ARRT certification examinations in the following three areas:

- Computed Tomography (CT)
- Bone Densitometry
- Magnetic Resonance Imaging (MRI)
- Mammography

For additional information, see the program specialty information.

Computed Tomography (CT)

The Computed Tomography certificate program is designed to address competency development required by the American Registry of Radiologic Technologists (ARRT) for the advanced level certification exam in Computed Tomography (CT). In addition to clinical competency, academic coursework is offered to prepare the student for the exam administered by the ARRT. Coursework includes sectional anatomy, physics and instrumentation of CT scanning machines. Additional work experience may be needed to satisfy the minimum number of exams necessary to qualify for the ARRT advanced level exam in CT. The program is designed for certified technologists registered by the ARRT in Radiography, Nuclear Medicine, or Radiation Therapy.

Magnetic Resonance Imaging (MRI)

The Magnetic Resonance Imaging (MRI) certificate program is designed to address competency development required by the American Registry of Radiologic Technologists (ARRT) for the advanced level certification exam in Magnetic Resonance Imaging (MRI). In addition to clinical competency, academic coursework is offered to prepare the student for the exam administered by the ARRT. Coursework includes sectional anatomy, physics and instrumentation of MRI scanning machines. Additional work experience may be needed to satisfy the minimum number of exams necessary to qualify for the ARRT advanced level exam in MRI. The program is designed for certified technologists registered by the ARRT in Radiography, Nuclear Medicine, Radiation Therapy, or Ultrasound.

Mammography

Courses & Programs

The Mammography short-term certificate program is designed to prepare radiologic technologists to be licensed by the ARRT in radiography [R.T. (R)] in the specialized area of mammography. Lecture, lab and academic coursework are required for the advanced level certification exam offered by the ARRT in Mammography. Students will need additional supervised work experience to satisfy the minimum number of exams in order to be eligible for registry. This certificate includes the following documented training contact hours required by MQSA while under the supervision of a qualified instructor: eight hours of digital education in mammography modality while performing mammography exams, and 40 hours of Initial Training.

For more information, contact the Health Science Center at 509.544.8300.

IMAGE100

Bone Densitometry • 4.0 Credits

An in-depth analysis of bone densitometry positioning, exposure techniques, quality control, film critiquing, and radiation safety. **Prerequisite:** currently enrolled in an approved Radiologic Technology program or ARRT Certified Radiologic Technologist.

IMAGE110

Bone Densitometry Clinical • 4.0 Credits

Students are assigned to a bone densitometry department for 132 hours to satisfy clinical competency requirements of the ARRT for eligibility to sit for the ARRT advanced-level exam in bone densitometry. **Prerequisite:** currently enrolled in an approved Radiologic Technology program or ARRT Certified Radiologic Technologist.

IMAGE225

Mammography • 4.0 Credits

Preparation for certification by the ARRT in mammography. In addition to didactic education, this course includes laboratory sessions in a mammography department. This course fulfills MQSA requirements of eight hours of digital education in mammography modality while performing mammography exams and 40 hours of Initial Training. Training in breast anatomy, physiology, positioning, compression, quality assurance/quality control techniques, and imaging of patients with breast implants. **Prerequisite:** currently enrolled in an approved Radiologic Technology program or ARRT Certified Radiologic Technologist.

IMAGE229

Mammography Clinical • 4.0 Credits

Preparation for certification by the ARRT in mammography. This course includes clinical and laboratory sessions while in a mammography department. Special education in mammographic examinations under the supervision of a qualified mammographer. Training in breast anatomy, physiology, positioning, compression, quality assurance/quality control techniques, and imaging of patients with breast implants. This course requires documented performance of 25 examinations that include eight hours of training in each mammography modality while performing mammography exams. Documentation includes time sheets and competencies to be verified by the student and the clinical site. Students are assigned to a mammography clinical site to complete 132 hours. These hours are required to satisfy clinical competency requirements with MQSA and eligibility with ARRT to sit for the ARRT advanced-level exam in mammography. **Prerequisite:** currently enrolled in an approved Radiologic Technology program or an ARRT Certified Radiologic Technologist.

IMAGE250

Cross Sectional Anatomy • 3.0 Credits

Course presents normal human anatomy in various planes using CT and MRI images. **Prerequisite:** currently enrolled in an approved Radiologic Technology program, ARRT Certified Radiologic Technologist, ARRT Certified Radiation Therapist, or NMTCB Certified Nuclear Medicine Technologist.

IMAGE251

Advanced Sectional Anatomy • 2.0 Credits

Designed for students having completed a cross-sectional anatomy course. Neuro and vascular anatomy and sectional images of joint and extremity body areas are presented with CT and MRI images. **Prerequisite:** currently enrolled in an approved Radiologic Technology program, ARRT Certified Radiologic Technologist, ARRT Certified Radiation Therapist, or NMTCB Certified Nuclear Medicine Technologist.

IMAGE265

Body Pathophysiology • 3.0 Credits

Presents pathologies of the abdomen, chest, and neck with physiological implications pertinent to CT, MR, Interventional, and Cardiac Cath imaging modalities. **Prerequisite:** currently enrolled in an approved Radiologic Technology program, ARRT Certified Radiologic Technologist, ARRT Certified Radiation Therapist, or NMTCB Certified Nuclear Medicine Technologist.

IMAGE266

Neuropathophysiology • 3.0 Credits

Presents neurological based pathologies and the related diagnostic/interventional procedures applied in evaluation and treatment of them. **Prerequisite:** currently enrolled in an approved Radiologic Technology program, ARRT Certified Radiologic Technologist, ARRT Certified Radiation Therapist, or NMTCB Certified Nuclear Medicine Technologist.

IMAGE270

CT Clinical Practicum I • 1.0 - 12.0 Credits

Provides hands-on experience in the clinical setting. Students perform designated tasks associated with CT scanning and procedures under direct and indirect supervision. Completion of this course prepares the student for entry-level work in a CT department. **Prerequisite:** currently enrolled in an approved Radiologic Technology program, ARRT Certified Radiologic Technologist, ARRT Certified Radiation Therapist, or NMTCB Certified Nuclear Medicine Technologist.

IMAGE271

MRI Clinical Practicum • 1.0 - 12.0 Credits

Provides hands-on experience in the clinical setting. Students perform designated tasks associated with MRI scanning and procedures under direct and indirect supervision. **Prerequisite:** currently enrolled in an approved Radiologic Technology program, ARRT Certified Radiologic Technologist, ARRT Certified Radiation Therapist, or NMTCB Certified Nuclear Medicine Technologist.

IMAGE280

CT Instrumentation • 3.0 Credits

Designed to provide didactic preparation for advanced-level certification exam in CT scanning. Includes information pertaining to the equipment used, clinical application, specific technique applications, patient care, and quality control. **Prerequisite:** currently enrolled in an approved Radiologic Technology program, ARRT Certified Radiologic Technologist, ARRT Certified Radiation Therapist, or NMTCB Certified Nuclear Medicine Technologist.

IMAGE281

MRI Instrumentation and Procedures • 3.0 Credits

Presents the physics of magnetization, image production, image weighting, pulse responses, scanning procedures, magnet safety, and the role of the technologist. **Prerequisite:** currently enrolled in an approved Radiologic Technology program, ARRT Certified Radiologic Technologist, ARRT Certified Radiation Therapist, or NMTCB Certified Nuclear Medicine Technologist.

Medical Records & Healthcare Information

columbiabasin.edu/medicalrecords

Department Overview: The Medical Records and Healthcare Information program provides a solid foundation in important medical science concepts, computer applications, healthcare coding classifications and information management, all of which creates a skilled professional who can process, code, classify, condense, analyze and manage healthcare information through physical and computer technology methods. Pathway options include a One-Year Certificate, a two-year Associate in Applied Science (AAS) degree and a Bachelor of Applied Science in Applied Management with a concentration in Healthcare Administration.

Courses & Programs

The program prepares students for professional positions in a variety of areas, including hospitals, clinics, long-term care facilities, insurance agencies, home-health, government and other agencies. The AAS degree enhances the graduate's ability to join a high-growth component of the medical industry as a Healthcare Information Management professional.

MRHI 101

Introduction to Health Information Practices • 5.0 Credits

This introductory course surveys the fundamental theories and practices of the Medical Records and Health Information Management profession. Areas of study include the responsibilities and duties of a professional in the field, the basics of health services organization and delivery, elements of health data and record structure, the essentials of the electronic health record, and an overview of information privacy and security as applied to the field. **Prerequisite:** HSCI 147 with a minimum 2.0 or instructor permission.

MRHI 103

Legal Aspects of Healthcare • 5.0 Credits

An introduction to legal issues as it relates to healthcare practitioners and the health record. Topics include confidentiality and release of information standards with specific attention paid to HIPAA requirements. This course emphasizes the health record as a legal document and introduces privacy and security principles of protected health information. **Prerequisite:** HSCI 147 with a minimum 2.0 or instructor permission.

MRHI 114

Human Body Structure, Function, and Disease I • 4.0 Credits

This is the first of two structure, function, and disease classes. It introduces the chemistry of life, cells and tissues, and organ systems of the body. The structure and function of the following systems are covered: the integumentary, skeletal, muscular, nervous, endocrine, senses, and blood. The common diseases, pathology of the diseases, and treatment modality of each of these diseases is also covered. This course is cross listed with MA 114. Students completing MRHI 114 may not receive graduation credit for MA 114. **Prerequisite:** HSCI 147 with a 2.0 or better or instructor permission.

MRHI 150

Pharmacology in Allied Health • 3.0 Credits

This class provides a basic knowledge of pharmacology. The main topics covered within the context of pharmacology include an introduction to legal and ethical issues, terms and abbreviations, governmental agencies, and providers and professionals. Additional topics include reading and interpreting medication orders, understanding drug classifications, and identifying commonly prescribed drugs used with each body system. **Prerequisite:** HSCI 147 with a 2.0 or better or instructor permission.

MRHI 195

Practicum I • 2.0 Credits

This course focuses on medical records office training. Theory is applied in practice through an individualized learning plan. Students demonstrate abilities by creating, processing, and analyzing health records and medical billing procedures. **Prerequisite:** MRHI 101 with a 2.0 or better or instructor permission.

MRHI 201

Coding I • 5.0 Credits

This course introduces the basic principles and conventions of the International Classification of Diseases, tenth-edition (ICD-10). Areas of study include ICD-10-CM understanding and application, ICD-10-PCS fundamentals, ICD-10 Manual navigation, ICD-10 Coding Guidelines, and body-system diagnostic code assignment. **Prerequisite:** MRHI 214 with a 2.0 or better or instructor permission.

MRHI 205

Health Information Administration • 5.0 Credits

This course contains an overview of management theories, organizational structure, and legal regulations that apply to Health Information Management (HIM). The course focuses on the topics of change management, human resources management, ethics, performance management, training, and organizational structure as it relates to HIM. Students develop the skills necessary to become a successful HIM management professional. **Prerequisite:** MRHI 101 with a 2.0 or better or instructor permission.

MRHI 206

Data Integrity • 5.0 Credits

This course introduces healthcare data and information system concepts necessary to successfully manage healthcare data in the digital era. A variety of data governance functions are examined including data architecture management, metadata management, master data management, content and record management, data security management, business intelligence and big data, data quality management, and terminology and classification systems. Students discover how to develop a sound data governance program that solves the significant data management challenges faced by a Healthcare Information Management professional.

MRHI 207

Intro to Revenue Cycle • 5.0 Credits

This course provides an overview of reimbursement methodologies, health insurance plans and claims, terminology, coding and compliance, payment systems, and value-based purchasing. The course examines the interrelationship between billing and coding and compliance, and discusses how each affects healthcare providers, patients, and insurance payers. **Prerequisite:** MRHI 101 with a 2.0 or better or instructor permission.

MRHI 211

Coding II • 5.0 Credits

This is the second course in the coding series. It is a beginning level course in Current Procedural Terminology (CPT), a clinical coding system used to code professional procedures and services. This course also covers intermediate level International Classification of Diseases, 10th edition (ICD-10-CM) coding. Sub-areas of study include CPT format and usage, Healthcare Common Procedure Coding System (HCPCS) II coding, modifier assignment, facility vs. non-facility coding, Ambulatory Payment Classifications (APC), and ICD-10-CM diagnosis coding. **Prerequisite:** MRHI 201 with a 2.0 or better or instructor permission.

MRHI 214

Human Body Structure, Function, and Disease II • 4.0 Credits

This is the second-in-series body structure, function, and disease course. Topics include the circulatory, lymphatic, respiratory, digestive, urinary, and reproductive systems. Further instruction covers immunity, nutrition and metabolism, fluid and electrolyte balance, acid-base balance, growth and development, mental disorders, and disorders and conditions resulting from trauma. Common diseases are presented for each of these body systems as well as pathology and expected medical treatment. This course is cross listed with MA 214. Students completing MRHI 214 may not receive graduation credit for MA 214. **Prerequisite:** MRHI 114 with a 2.0 or better or instructor permission.

MRHI 221

Coding III • 5.0 Credits

This final course in the coding series covers inpatient hospital coding with advanced coding principles. Areas of study include inpatient procedure and diagnosis code assignment, Diagnosis Related Group (DRG) classification, and advanced ICD-10-CM coding. This course also discusses the relationship between coding and billing, and provides an analysis of documentation discrepancies. **Prerequisite:** MRHI 211 with a 2.0 or better or instructor permission.

Courses & Programs

MRHI 295

Practicum II • 3.0 Credits

This course is a directed coding practicum. Students are assigned to a healthcare facility where they are supervised in a clinical coding experience. The course's project requirements involve coding case scenarios and creating a quality assurance audit plan. There is continued emphasis on quality assurance, data abstraction, ICD-10 coding, and CPT assignment. **Prerequisite:** MRHI 201 and 211 with a 2.0 or better and concurrent enrollment in MRHI 221.

Medical Simulation

columbiabasin.edu/sim

Department Overview: The Medical Simulation Associate in Applied Science – Transfer degree prepares students for entry-level employment in simulation laboratories. These simulation laboratories are currently being used in nursing instruction, hospital and medical provider training and emergency response teams. To meet the growing need for training simulation professionals, the Medical Simulation program will develop students who can implement simulation scenarios, conduct manikin programming, establish maintenance standards, develop interpersonal relationships and promote community engagement. Upon completion of the Medical Simulation Associate in Applied Science – Transfer degree, students are prepared to take industry certification exams validating their skills.

Big Bend Community College, in collaboration with CBC, offers the opportunity to obtain an Associate in Applied Science-Transfer degree in Medical Simulation. The Medical Simulation program is designed to allow for students who do not live near Big Bend Community College. For example, most of the content in the Medical Simulation courses are taught online with a preceptor lab option. This means that distance learners have an opportunity to complete their labs with an expert in the field in an approved location closer to their homes. In order to create an effective distance learning plan, students will need to contact the Medical Simulation coordinator or advisor as soon as possible. More information can be found on Big Bend Community College's website at bigbend.edu/academics/programs/medical-simulation.

Music

columbiabasin.edu/music

Department Overview: Music offerings at Columbia Basin College meet the requirements for the first two years of Bachelor of Arts or Bachelor of Science degrees in Music at most four-year institutions; enhance the musical knowledge and performance ability of students wishing to enter the professional field with an associate in arts degree; and provide general leisure activity.

Music majors should choose a major instrument or voice for performance emphasis and register for appropriate applied music courses. Music majors should also register for the music theory sequence beginning with the fall quarter of their freshman year. All students in the College are encouraged to participate in the performance groups. Students planning to major in music must participate in at least one large performing group per quarter.

Career opportunities include the fields of music performance, teaching (public and private), composition, music ministry, music industry, music library studies, ethnomusicology, systematic musicology music history and music therapy.

MUSC 100 (Formerly MUS 100)

Music Fundamentals • 3.0 Credits

Non-major course covering basic concepts of rhythm, melody, keyboards, scales, and harmony.

MUSC 116 (Formerly MUS 116)

History of Jazz [H] • 5.0 Credits

The evolution of jazz and the development of black music in white America. This is an intercultural humanities course. Emphasis on listening and enjoyment through the use of recordings, attendance at concerts, and films.

MUSC 118 (Formerly MUS 118)

Band • 1.0 - 2.0 Credits

Instruction and performance of standard and contemporary wind literature. In all performing groups, a maximum of six elective credits may be applied to an AA degree.

MUSC 122 (Formerly MUS 122)

Applied Music • 1.0 Credit

Private lessons on wind, percussion, and keyboard instruments. Instruction may be by CBC faculty or by instructors approved by the CBC Music department. There may be additional fees charged by the instructor. These courses are intended for students who are pursuing a degree in music.

MUSC 123 (Formerly MUS 123)

Applied Music • 1.0 Credit

Private vocal lessons. Instruction may be by CBC faculty or by instructors approved by the CBC Music department. There may be additional fees charged by the instructor. These courses are intended for students who are pursuing a degree in music. **Prerequisite:** instructor permission.

MUSC 124 (Formerly MUS 124)

Applied Music • 1.0 Credit

Private lessons on string instruments. Instruction may be by CBC faculty or by instructors approved by the CBC Music department. There may be additional fees charged by the instructor. These courses are intended for students who are pursuing a degree in music.

MUSC 125 (Formerly MUS 125)

Orchestra • 1.0 Credit

Introduction in and performance of standard orchestral literature. In all performing groups, a maximum of six elective credits can be applied to an AA degree. **Prerequisite:** orchestra instrument background and instructor permission.

MUSC 134 (Formerly MUS 134)

Piano Class • 2.0 Credits

Group piano instruction for all students interested in beginning piano. Students may take more than one quarter.

MUSC 135 (Formerly MUS 135)

Piano Class • 2.0 Credits

Group piano instruction for music majors and minors who cannot meet entrance requirements in piano and for all students interested in beginning piano.

MUSC 136 (Formerly MUS 136)

Piano Class • 2.0 Credits

Group piano instruction for music majors and minors who cannot meet entrance requirements in piano and for all students interested in beginning piano.

MUSC 137 (Formerly MUS 137)

Jazz Band • 1.0 - 3.0 Credits

Study, rehearse, and perform jazz, commercial, and big band literature. Performances required on and off campus. A maximum of six elective credits from this course can be applied to an AA degree. **Prerequisite:** audition and/or instructor permission.

MUSC 138 (Formerly MUS 141)

Voice Class • 2.0 Credits

An introduction to the principles of voice production, vocal literature, and vocal techniques.

MUSC 139 (Formerly MUS 142)

Voice Ensemble • 1.0 - 3.0 Credits

Emphasis on vocal ensemble literature. May include different types of ensembles/styles according to available voicing. **Prerequisite:** instructor permission.

Courses & Programs

MUSC 140 (Formerly MUS 140)

Vocal Jazz • 1.0 - 3.0 Credits

Emphasis on swing and vocal jazz concepts within a performance ensemble. Performances required on and off campus. Auditions for this ensemble are held in May and June for the following academic year. Contact instructor for materials. In all performing groups a maximum of six elective credits from this course can be applied to an AA degree. **Prerequisite:** audition and/or instructor permission.

MUSC 147 (Formerly MUS 147)

Instrument Ensemble • 1.0 Credit

The following ensembles will be organized if enrollment warrants: brass ensemble, woodwind ensemble, string ensemble, and mixed instrumental ensemble. A maximum of six elective credits from this course can be applied to an AA degree.

MUSC 151 (Formerly MUS 151)

Brass Techniques • 1.0 - 3.0 Credits

Class instruction in fundamentals and materials for beginning students on brass instruments. Cornet, trumpet, French horn, baritone horn, trombone, sousaphone, and tuba.

MUSC 152 (Formerly MUS 152)

Percussion Techniques • 2.0 Credits

Class instruction in fundamentals and materials for beginning students on percussion instruments.

MUSC 153 (Formerly MUS 153)

Woodwind Techniques • 2.0 Credits

Class instruction in the fundamentals and materials for beginning students on woodwind instruments. Clarinet, saxophone, flute, oboe, and bassoon.

MUSC 154 (Formerly MUS 154)

Woodwind & Flute • 2.0 Credits

Class instruction in the fundamentals and materials for beginning students on woodwind instruments. Clarinet, saxophone, flute, oboe, and bassoon.

MUSC 155 (Formerly MUS 155)

Wood/Oboe/Bassoon • 2.0 Credits

Class instruction in the fundamentals and materials for beginning students on woodwind instruments. Clarinet, saxophone, flute, oboe, and bassoon.

MUSC 156 (Formerly MUS 156)

Wood/Oboe/Bassoon • 2.0 Credits

Class instruction in the fundamentals and materials for beginning students on woodwind instruments. Clarinet, saxophone, flute, oboe, and bassoon.

MUSC 161 (Formerly MUS 161)

Beginning Folk Guitar • 2.0 Credits

Group guitar instruction in the fundamentals of folk guitar playing for the beginner, including basic strums, chords, and note reading.

MUSC 162 (Formerly MUS 162)

Intermediate Folk Guitar • 2.0 Credits

Group intermediate guitar instruction for intermediate students. Students cover various techniques in strumming, picking, movable chords, and musical styles; i.e., Calypso, Latin Strum, Bossa Nova.

MUSC 171 (Formerly MUS 171)

Ear Training Fundamentals • 1.0 Credit

This class focuses on developing the skills to correctly identify major and minor scales, intervals, rhythmic patterns, and triads in root position. This class should be taken concurrently with MUSC& 141. Offered fall quarter only.

MUSC 172 (Formerly MUS 172)

Ear Training Fundamentals • 1.0 Credit

This class focuses on developing the skills to correctly identify triads in first and second inversion, basic chord progressions, and cadences. This class should be taken concurrently with MUSC& 142. Offered winter quarter only.

MUSC 173 (Formerly MUS 173)

Ear Training Fundamentals • 1.0 Credit

This class focuses on developing the skills to correctly identify seventh chords (both in root position and inversion), diatonic chord progression, and simple melodies containing basic non-harmonic tones. This class should be taken concurrently with MUSC& 143. Offered spring quarter only.

MUSC 181 (Formerly MUS 181)

Chorus • 1.0 - 3.0 Credits

Instruction and performance of standard choral literature from a variety of historical periods and cultures. Performances required on and off campus. Open to all students. A maximum of six credits from this course can be applied to an AA degree.

MUSC 199

Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

MUSC 216 (Formerly MUSC 2152)

Studio Problems - Conducting • 3.0 Credits

Individual study for advanced students relating to conducting. **Prerequisite:** instructor permission and successfully completed classes in area of individual study and/or demonstrated proficiency in area of individual study.

MUSC 217 (Formerly MUSC 2153)

Studio Problems - Composition • 3.0 Credits

Individual study for advanced students relating to composition. **Prerequisite:** instructor permission and successfully completed classes in area of individual study and/or demonstrated proficiency in area of individual study.

MUSC 218 (Formerly MUSC 2154)

Studio Problems - Performance • 3.0 Credits

Individual study for advanced students relating to performance. **Prerequisite:** instructor permission and successfully completed classes in area of individual study and/or demonstrated proficiency in area of individual study.

MUSC 225 (Formerly MUS 225)

Applied Music • 2.0 Credits

Advanced private vocal lessons. Instruction may be by CBC faculty or by instructors approved by the CBC music department. There may be additional fees charged by the instructor. These courses are intended for students who are pursuing a degree in music. **Prerequisite:** instructor permission.

MUSC 227 (Formerly MUS 227)

Applied Music • 2.0 Credits

Advanced private instrumental lessons. Instruction may be by CBC faculty or by instructors approved by the CBC Music department. There may be additional fees charged by the instructor. These courses are intended for students who are pursuing a degree in music.

MUSC 236 (Formerly MUS 236)

Piano Class/Music Majors • 2.0 Credits

Group piano instruction for music majors who cannot meet keyboard entrance requirements necessary for transfer to four-year institutions or for more advanced students interested in concepts of piano theory. Students may take more than one quarter.

MUSC 240 (Formerly MUS 240)

Jazz Theory and Improvisation • 1.0 - 2.0 Credits

A combination of jazz theory and improvisation techniques for the small group setting. The emphasis is on individual solving skills. Performance required at various CBC concerts and jazz festivals.

Courses & Programs

MUSC 244 (Formerly MUS 242)

Advanced Vocal Jazz • 1.0 - 3.0 Credits

Emphasis on traditional and contemporary vocal jazz concepts in an advanced ensemble situation. Extensive audition required each spring for the following academic year. Performances required on and off campus. Auditions for this ensemble are held in May and June for the following academic year. Contact instructor for materials. In all performing groups, a maximum of six elective credits from this course can be applied to an AA degree. **Prerequisite:** audition and/or instructor permission.

MUSC 274 (Formerly MUS 274)

Advanced Ear Training • 1.0 Credit

This class focuses on developing the skills to correctly identify chord progressions and melodic dictation, and continued work with ear training concepts. This class should be taken concurrently with MUSC& 241. Offered fall quarter only.

MUSC 275 (Formerly MUS 275)

Advanced Ear Training • 1.0 Credit

This class focuses on developing the skills to correctly notate chord progressions using inversions, two-part melodic dictation, and identification of chromatically altered chords. This class should be taken concurrently with MUSC& 242. Offered winter quarter only.

MUSC 276 (Formerly MUS 276)

Advanced Ear Training • 1.0 Credit

This class focuses on developing the skills to correctly notate chord progressions using inversions and chromatically altered chords, four-part dictation, and identification of scales, chords, and progressions as used in 20th century techniques. This class should be taken concurrently with MUSC& 243. Offered spring quarter only.

MUSC 281 (Formerly MUS 281)

Advanced Chorus • 1.0 - 3.0 Credits

Instruction and performance of advanced choral literature from a variety of historical periods and cultures. Performances required on and off campus. A maximum of six credits from this course can be applied to an AA degree. **Prerequisite:** instructor permission.

MUSC 299

Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

MUSC&105 (Formerly MUS 115)

Music Appreciation [H] • 5.0 Credits

The study of musical literature from early times to the present. Emphasis on listening and enjoyment through the use of recordings, attendance at concerts, and films.

MUSC&141 (Formerly MUS 101)

Music Theory I • 5.0 Credits

Courses must be taken in sequence. The melodic, rhythmic and harmonic elements of music through ear-training, sight singing, writing, analysis, and keyboard work. This course should be taken concurrently with MUSC 171. Some music background is required. Students with no piano background should take MUSC 134 concurrently. Offered fall quarter only.

MUSC&142 (Formerly MUS 102)

Music Theory II • 5.0 Credits

Courses must be taken in sequence. The melodic, rhythmic, and harmonic elements of music through ear-training, sight singing, writing, analysis, and keyboard work. Students with no piano background must take MUSC 135 concurrently. Offered winter quarter only. **Prerequisite:** MUSC& 141.

MUSC&143 (Formerly MUS 103)

Music Theory III • 5.0 Credits

Courses must be taken in sequence. The melodic, rhythmic, and harmonic elements of music through writing, analysis, ear-training, sight singing, and keyboard work. Music background is required. Students with no piano background must take MUSC 136 concurrently. Offered spring quarter only. **Prerequisite:** MUSC& 142.

MUSC&241 (Formerly MUS 204)

Music Theory IV • 5.0 Credits

Melody harmonization, harmonic dictation, chromatic harmony, advanced modulation, 20th century techniques, and oral composition. Offered fall quarter only. **Prerequisite:** MUSC& 143. **This course should be taken concurrently with MUSC 274.**

MUSC&242 (Formerly MUS 205)

Music Theory V • 5.0 Credits

Melody harmonization, harmonic dictation, chromatic harmony, advanced modulation, 20th century techniques, and oral composition. Offered winter quarter only. **Prerequisite:** MUSC& 241.

MUSC&243 (Formerly MUS 206)

Music Theory VI • 5.0 Credits

Melody harmonization, harmonic dictation, chromatic harmony, advanced modulation, 20th century techniques, and oral composition. Offered spring quarter only. **Prerequisite:** MUSC& 242.

Non-Licensed Operator

columbiabasin.edu/nop

Department Overview: Non-Licensed Operator courses support the Nuclear Technology program. Non-licensed operator positions require highly skilled people who understand principles associated with electrical production and distribution, mechanical and electrical components, hydraulic, water and steam systems, heat transfer and fluid flow, HVAC systems and instrumentation and control, and to use these principles in the monitoring, operation and minor maintenance of nuclear and auxiliary process systems. Additionally, courses in this curriculum provide principles of conduct of operations, human performance improvement, safety analysis and environmental compliance.

NOP 111

Hydraulic and Fluid Flows • 5.0 Credits

Introduction to the basic operations of hydraulic and fluid flows. Focuses on principles associated with lubrication, pumps, manual valves, valve operators, and components associated with strainers and filters. **Prerequisite:** NT 111.

NOP 221

Advanced Operational Systems • 5.0 Credits

This course provides an introduction to electrical generation and distribution systems with a focus on transformers, motor and control circuits, generators, and the impact of environmental conditions. **Prerequisite:** ELT 111 or ELT 124, and NT 121 or NT 122.

NOP 231

Advanced Facility Components • 5.0 Credits

This course provides an introduction to steam systems with a focus on steam traps, steam turbines, heat exchangers, and related facility components. **Prerequisite:** NT 111 or instructor permission.

NOP 241

Chemical & Water Treatment Systems • 5.0 Credits

Introduction to chemical and water treatment systems with a focus on chemical safety and reactions, ion exchange, UV oxidation, and permitting. **Prerequisite:** CHEM& 140 with a 2.0 grade or higher.

NOP 251

Advanced Thermodynamics and Heat Transfer • 4.0 Credits

This course provides an introduction to industrial processes and cycles including steam plants, diesel generators, air compressors, and refrigeration cycles. It also covers advanced heat transfer topics including thermal hydraulics. **Prerequisite:** NT 170 or instructor permission.

Courses & Programs

Nuclear Medicine Technology

columbiabasin.edu/nuclearmed

Department Overview: Nuclear medicine is the medical specialty that utilizes the nuclear properties of radioactive and stable nuclides to make diagnostic evaluations of the physiologic and/or anatomic conditions of the body and to provide therapy with unsealed radioactive sources. The nuclear medicine technologist is an allied health professional who, under the direction of an authorized user, is committed to applying the art and skill of diagnostic evaluation and therapeutics through the safe and effective use of radionuclides. Responsibilities include, but are not limited to: preparation, quality control testing and administration of radioactive compounds; execution of patient imaging procedures including computer processing and image enhancement; laboratory testing; patient interviews; instruction and preparation for administration of prescribed radioactive compounds for therapy; quality control; and radiation safety.

This is an 18-month, full-time Nuclear Medicine Technology program leading to an Associate in Arts in Nuclear Medicine Technology at Bellevue College. It is offered through a cooperative effort between Columbia Basin College and Bellevue College. The curriculum prepares students in all aspects of nuclear medicine technology. In addition to performing a wide variety of imaging and therapeutic procedures, students learn to prepare and administer radiopharmaceuticals, explain the procedures and their risks, take patient histories and analyze the results of each study. Students work with a number of radiation detection systems, including gamma cameras and positron emission tomography systems. They also work with computers that analyze data from imaging studies in addition to those used for administrative tasks. Most importantly, students work directly with patients helping to ease their anxiety as well as provide important test result information for physician diagnosis of their ailments. Through the use of distance education and interactive television courses, Bellevue College will deliver course content to students at Columbia Basin College. Students will be able to complete the great majority of the clinical portion of the degree at clinical facilities in the Tri-City area. Upon successful program completion, students are eligible for national certification exams as well as Washington state licensure.

Students are required to attend a Nuclear Medicine Information Session at CBC prior to applying for the program through Bellevue College. The prospective student would then apply to Bellevue College for the program which is a selective and competitive admissions process. Tuition and fees for the entire program are approximately \$8,000; books are approximately \$1,000, most of which are purchased at the beginning of the program.

NMTEC199

Introduction to Nuclear Medicine Technology • 2.0 Credits

This course introduces the student to the Bellevue College Nuclear Medicine Technology program. It includes three days of clinical orientation in a nuclear medicine department. We'll create a shared understanding of the basics of nuclear medicine practice, examine active learning techniques, and develop cohesiveness as a group. **Prerequisite:** acceptance into program or instructor permission.

NMTEC200

Applied Anatomy & Physiology • 1.0 Credit

Studies human anatomy and physiology as they apply to nuclear medicine imaging. Specific organ systems covered include skeletal, circulatory, cardiac, pulmonary, gastrointestinal, immune, excretory, endocrine, and central nervous systems. **Prerequisite:** acceptance into program.

NMTEC201

Basic Nuclear Medicine Science • 3.0 Credits

Presents basic science required for nuclear medicine. Topics include types of radiation, half-life and radioactive decay, interactions of radiation, detection instruments, statistics of radiation counting, basic radiation protection, and introduction to imaging process. **Prerequisite:** acceptance into program.

NMTEC202

Instrumentation • 2.0 Credits

Examines the function and use of the nuclear medicine gamma camera. Topics include basic electronics, collimators, digital cameras, online correction systems, and modifications required for tomographic studies. Students learn quality control and troubleshooting. **Prerequisite:** acceptance into program.

NMTEC203

Computers in Nuclear Medicine • 3.0 Credits

Introduces the use of computers in nuclear medicine, emphasizing analysis of static, dynamic, and tomographic images. **Prerequisite:** acceptance into program.

NMTEC210

Radiopharmacy • 1.0 Credit

Studies all commonly used nuclear medicine pharmaceuticals, their preparation, indications for use, dosages, and contraindications. **Prerequisite:** acceptance into program.

NMTEC211

Nursing Procedures • 1.0 Credit

Presents nursing procedures relating to nuclear medicine. Topics include patient assessment, oxygen administration, infection control, intravenous drug administration, vasovagal and anaphylactic reactions, basic pharmacology, sedation, medical and legal issues, cardiac physiology, and electrocardiography. **Prerequisite:** acceptance into program.

NMTEC212

Position Emission Tomography • 2.0 Credits

Covers all aspects of positron emission tomography (PET), including basic principles, instrumentation, PET/CT imaging and quality control, quantitation of radiopharmaceutical uptake, clinical indications for PET imaging, biochemistry of fluorodeoxyglucose (FDG), clinical aspects of FDG imaging, new PET radiopharmaceuticals, and issues relating to reimbursement for PET scans. **Prerequisite:** acceptance into program.

NMTEC229

Introduction to Clinical Education • 3.0 Credits

Provides an introduction to the practice of nuclear medicine with an emphasis on the operation of a gamma camera, basic radiopharmacy and radiation safety principles, and patient care procedures. **Prerequisite:** acceptance into program.

NMTEC230

Clinical Education I • 10.0 Credits

First in a five-course sequence of supervised clinical instruction in nuclear medicine technology. Topics including imaging, patient care, radiopharmacy, camera quality control, and computer analysis. Students are expected to gain proficiency according to defined objectives. **Prerequisite:** acceptance into program.

NMTEC231

Clinical Education II • 10.0 Credits

Second in a five-course sequence of supervised clinical instruction in nuclear medicine technology. Topics include imaging, patient care, radiopharmacy, camera quality control, and computer analysis. Students are expected to gain proficiency according to defined objectives. **Prerequisite:** acceptance into program.

NMTEC232

Clinical Education III • 10.0 Credits

Third in a five-course sequence of supervised clinical instruction in nuclear medicine technology. Topics include imaging, patient care, radiopharmacy, camera quality control, and computer analysis. Students are expected to gain proficiency according to defined objectives. **Prerequisite:** acceptance into program.

NMTEC233

Clinical Education IV • 13.0 Credits

Fourth in a five-course sequence of supervised clinical instruction in nuclear medicine technology. Topics include imaging, patient care, radiopharmacy, camera quality control, and computer analysis. Students are expected to gain proficiency according to defined objectives. **Prerequisite:** acceptance into program.

Courses & Programs

NMTEC234

Clinical Education V • 13.0 Credits

Fifth in a five-course sequence of supervised clinical instruction in nuclear medicine technology. Topics include radiopharmacy, positron emission tomography, nuclear cardiology, and pediatrics. **Prerequisite:** acceptance into program.

NMTEC240

Radiation Safety • 1.0 Credit

Covers principles and practices for radiation safety. Topics include calculation of doses absorbed from procedures, personnel monitoring, handling and disposal of radioactive materials, and licensing of a nuclear medicine department. **Prerequisite:** acceptance into program.

NMTEC241

Radiation Biology • 1.0 Credit

Discusses the potentially harmful effects of radiation on humans. Topics include the basic chemistry of radiation interactions in living cells, the effects of extensive radiation exposure, and the potential long-term effects of accumulated radiation damage. **Prerequisite:** acceptance into program.

NMTEC250

Sectional Anatomy for Nuclear Medicine • 3.0 Credits

Presents sectional anatomy of the body, including a brief introduction to the following imaging modalities: CT, MRI, angiography, and ultrasound. Main emphasis is on identifying organs of the head, neck, chest, abdomen, and pelvis on CT and MR images. **Prerequisite:** acceptance into program.

NMTEC260

Clinical Nuclear Medicine I • 1.0 Credit

Presents nuclear medicine from the technologist's standpoint, emphasizing the technical aspects and pitfalls of nuclear medicine procedures. NMTEC 260 lectures are coordinated with NMTEC 200. **Prerequisite:** acceptance into program.

NMTEC261

Clinical Nuclear Medicine II • 1.0 Credit

Presents nuclear medicine from the physician's standpoint, emphasizing the diagnosis of disease and ways in which the technologist can assist the physician making a correct diagnosis. **Prerequisite:** acceptance into program.

NMTEC262

Clinical Nuclear Medicine III • 1.0 Credit

Discusses advanced topics related to imaging and non-imaging procedures. Topics include hematology and immunology, laboratory techniques in nuclear medicine, Schilling test, H. pylori breath testing, blood volume determination, bone densitometry, radioimmunotherapy, and advanced nuclear neurology. **Prerequisite:** acceptance into program.

NMTEC275

Board Preparation • 1.0 Credit

Prepares students for the NMTCB exam by reviewing all aspects of nuclear medicine technology and giving practice tests. Students focus on practical application of the basic science knowledge gained throughout the program. Students also complete a capstone project. **Prerequisite:** acceptance into program.

NMTEC280

CT for the Nuclear Medicine Technologist • 3.0 Credits

Provides didactic instruction in CT scanning, as is pertinent to its application to nuclear medicine procedures. Includes information pertaining to production and detection of X-rays in CT, instrumentation and image reconstruction, specific technique applications, patient care, and quality control. **Prerequisite:** acceptance into program.

Nuclear Technology

columbiabasin.edu/NT

Department Overview: Due to an aging workforce and resurgence of interest in nuclear power generation, nuclear technicians are in high demand. The Nuclear Technology program allows students to specialize in nuclear facility clean-up activities at the Hanford Reservation or in reactor plant operation at the Columbia Generating Station. The curriculum follows the common curriculum standards adopted by the nuclear industry.

Enrollment in the Nuclear Technology program is limited and students are selected on a competitive basis. Contact the Career and Technical Education Division for application requirements and deadline.

Program Mission

The mission of the Nuclear Technology program is to provide students the technical expertise, critical and analytical skills, interpersonal skills and knowledge needed to begin a successful career in the nuclear and other associated industries.

Program Goals

Graduates of the Nuclear Technology program will be able to effectively address the needs of the nuclear industry by:

- Applying relevant theory and techniques from mathematics, physics and chemistry to effectively understand, communicate and/or operate nuclear systems, structures and components promoting excellence and safety
- Effectively and accurately applying, understanding and communicating nuclear technology related concepts
- Effectively and accurately applying, understanding and communicating basic knowledge of nuclear facilities operations
- Understanding nuclear fundamentals, systems, tools and equipment
- Applying skills pertinent to each discipline minimizing personnel exposure to radiation and/or hazardous materials
- Applying, understanding and communicating radiological protection theory and techniques promoting excellence and safety
- Understanding and communicating nuclear facilities, design, theory and/or operations

NT 111

Basic Nuclear Math & Physics • 5.0 Credits

Introduction to basic nuclear concepts using mathematics and physics; includes concepts of dimensional analysis, algebra, geometry, trigonometry, mechanical principles, simple machines, including definitions, and basic concepts. Industrial and science applications of nuclear processes, and risk/benefit analysis are included. **Prerequisite:** grade of 2.0 or better in MATH 095 or MATH 050 or MATH 070 or satisfactory placement test score.

NT 114

Introduction to Radiation Safety • 5.0 Credits

Topics include types of radiation, radioactive decay, activity, radioactive sources, and interaction of radiation with matter, radiation units, and basic fundamentals of exposure, dose, and personnel dose. The course includes an opportunity to practice basic radiation protection tasks.

NT 121

Reactor Plant Operations • 4.0 Credits

Introduction to the basics of reactor plant operations. Topics include basic computer operations and knowledge of basic systems associate with a nuclear power plant. **Prerequisite:** admission to the Nuclear Technology program.

NT 122

Basic Nuclear Facilities • 4.0 Credits

Introduction to tank farms, vitrification, and decommissioning nuclear facilities. **Prerequisite:** admission to the Nuclear Technology program.

Courses & Programs

NT 131

Nuclear Facility Components • 4.0 Credits

Introduction to basic mechanical and electrical components used by nuclear power plants such as different types of piping, valves, pumps, ejectors, filters, turbines, heat exchangers, compressors, lubrication systems, valve actuators, breakers, transformers, relays, and other equipment.

NT 141

Basic Reactor Safety, Theory, & Operations • 5.0 Credits

Introduction to the fission process, reactivity/criticality, basic reactor kinetics, heat removal, reactor types, nuclear power plant chemistry, and elementary thermodynamics. In addition, basic radiation worker training is provided in this course. **Prerequisite:** NT 121 or NT 122.

NT 142

Basic Nuclear Safety & Environmental Compliance • 5.0 Credits

An introduction to nuclear facility safety, accident analysis, and environmental regulations and compliance standards. **Prerequisite:** NT 121 or NT 122.

NT 150

Internship Seminar • 1.0 Credit

This class focuses on preparation for the internship. Topics include workplace expectations, safety, and communication skills. Evaluation methods for the internship are explained and discussed. **Prerequisite:** currently enrolled in the NT program or instructor permission.

NT 152

Internship • 1.0 - 5.0 Credits

Students serve an internship of up to 165 hours with a company that uses nuclear technicians in radiation protection, nuclear reactor operations, or nuclear reactor maintenance. Students are expected to apply learned skills and training to be a productive employee and the employer is expected to place students in an environment that builds on the first year of study and enhances knowledge of working in the nuclear industry. **Prerequisite:** NT 150 or instructor/department chair approval.

NT 154

Industry Project • 1.0 - 5.0 Credits

Students complete an industry project with a company that uses nuclear technicians. Students are expected to apply learned skills and training to be productive employees, and employers are expected to create a project that builds on the students' first year of study and enhances the students' knowledge of working in the nuclear industry. Thirty-three field-based experience hours equals one credit. **Prerequisite:** instructor/departmental chair approval.

NT 160

Nuclear Chemistry • 3.0 Credits

Designed to give students a broad understanding of nuclear chemistry. Focuses on basic reactor water chemistry fundamentals, basic material properties, brittle fracture characteristics/mechanisms, and plant material problems. **Prerequisite:** CHEM& 140.

NT 170 (Formerly MEC 111)

Mechanical & Fluid Power Transmission • 4.0 Credits

Introduction to the concepts of mechanical and fluid power transmission including principles of heat, steam, heat transfer, and fluid flow. **Prerequisite:** NT 111.

NT 200

Nuclear Industry Exam Preparation • 3.0 Credits

This course prepares nuclear technology students for taking multiple industry exams, which may include DOE Core Exam, POSS, or other exams as may be required by industry employers. **Prerequisite:** must be enrolled as a Nuclear Technology student.

NT 261

Nuclear Facilities Management • 5.0 Credits

This course provides students with background in managing work functions in nuclear facilities, including compliance with federal and state regulations, quality assurances, and maintenance forms and records. This class should be taken during or after the second year of study in the Nuclear Technology program. **Prerequisite:** instructor permission.

Nursing

columbiabasin.edu/nursing

Department Overview: Columbia Basin College offers an Accreditation Commission for Education in Nursing (ACEN) Nursing program. The Nursing program prepares students for professional nursing practice through an educational process that combines a rigorous academic curriculum with clinical practice hours. Instruction takes place on the Richland campus as well as in partnering healthcare facilities. A state-of-art practice lab is available for students to learn and practice clinical skills. For more information, call 509.544.8309.

Associate in Nursing-Transfer Degree

Students must first submit a general Application for Admission to CBC and include transcripts from all colleges attended. Application to the Nursing program is to be completed in January/February of the intended year of enrollment. Students will be admitted to a cohort that begins each fall. Students are strongly encouraged to complete as many nursing support courses as possible before entering the Nursing program. It is especially helpful to have all science classes completed. These courses provide points for the Admission Index Score used in the application process. If support courses are not completed before entry, students must be eligible to enter those courses while enrolled in Nursing and must complete all coursework before receiving the AAS-T degree from CBC. Students should meet with an advisor after first attending a pre-nursing information session. Current information and the schedule for pre-nursing information sessions can be found at columbiabasin.edu/nursing. Please refer to the Entrance Requirements.

All nursing support courses must be passed with a 2.0 or better. Nursing support courses that should be completed prior to entering the Nursing program include the following:

- Chemistry with lab: CHEM& 121 or higher
- Human A&P 1 with lab: BIOL& 241
- Human A&P 2 with lab: BIOL& 242
- English Composition: ENGL& 101 or 102
- Lifespan Psychology: PSYC& 200
- Microbiology with lab: BIOL& 260
- Math: Introduction to Stats, MATH& 146
- Communication Studies: CMST 260 or CMST& 210 or 220

Once admitted into the program, each student will be responsible for providing documentation of the following additional requirements:

- Required immunization records
- Current American Heart Association BLS CPR card
- Satisfactory criminal history background check using a college approved vendor. Criminal history background information is required of all Nursing students. Information obtained will be considered in determining student eligibility to complete clinical coursework. Inability to participate in clinical experiences due to the information obtained from the background check may result in the student's inability to satisfactorily complete program degree requirements. Any infraction while enrolled in the Nursing program should be self-reported to the director. Questions regarding this policy should be directed to the Dean for Health Sciences at 509.544.8310.

Courses & Programs

Registered Nurse to Bachelor of Science (RN-BSN) Entrance Requirements:

Associate Degree Registered nurses with an unencumbered license in the State of Washington have the option to complete the Bachelor of Science in Nursing (BSN). This program can be completed in as little as four quarters and much of the course work is completed online. To be considered for the RN-BSN program, the applicant must have completed 40 general education credits in an Associate degree in Nursing program, including:

- MATH& 146 Introduction to Stats (or equivalent)
- CHEM& 121 Intro to Chemistry w/ Lab (or equivalent)
- ENGL& 101 English Composition I (or equivalent), ENGL&102 Composition II (or equivalent), or ENGL&235 Technical Writing (or equivalent)
- NUTR& 101 Nutrition (or equivalent) Note: this course may be taken concurrently during the RN-BSN program

Please note: transcripts will be reviewed by the CBC transcript evaluator to ensure course equivalency. Prerequisite courses do not have an expiration date; however, prerequisite courses must be completed prior to being accepted into the RN-BSN program.

NRS 101

Basic Pharmacology Math • 1.0 - 3.0 Credits

Drug dosage calculations. Emphasis is on mathematic computations for various forms of drug administration utilizing metric and household measures. This course must be completed with a 2.0 or better before advancing to NRS 102, 121, and 123. **Prerequisite:** admission to the Nursing program.

NRS 102

Pharmacological Classifications I • 1.0 Credit

Provides new information as well as supplements, reviews, and reinforces information previously provided on the pharmacology of drugs introduced in Nursing I. Students review drug classifications and pharmacological principles associated with medication administration while relating this information to corresponding patient diagnoses as well as understanding related nursing implications. This course must be completed with a 2.0 or better before advancing to NRS 103, 131, and 133. **Prerequisite:** NRS 101 and 111/113 with a 2.0 or better and concurrent enrollment in NRS 121/123.

NRS 103

Pharmacological Classifications II • 1.0 Credit

Provides new information as well as supplements, reviews, and reinforces information previously provided on the pharmacology of drugs introduced in Nursing I and II. Students review drug classifications and pharmacological principles associated with medication administration while relating this information to a corresponding patient diagnoses as well as understanding the related nursing implications. **Prerequisite:** NRS 102 and 121/123 with a 2.0 or better and concurrent enrollment in NRS 131/133.

NRS 111

Nursing I • 1.0 - 7.0 Credits

This is the first theoretical course in the associate degree curriculum. Theoretical concepts include the fundamentals of nursing care and the introduction of the nursing process. Concepts of lifespan growth and development, culture and ethnicity, basic pharmacological concepts, and beginning professional communication techniques are presented. Emphasis is on safety, health maintenance, professional responsibility, and the organizations that affect the practice of nursing. **Prerequisite:** admission to the Nursing program.

NRS 113 (Formerly NRS 1111)

Nursing I Lab • 1.0 - 4.0 Credits

Clinical lab to be taken concurrently with NRS 111. This is the first clinical course in the associate degree curricular sequence. This course provides for the application of theoretical concepts to nursing care for adult patients in the long-term care setting. Students are introduced to basic nursing care practices. Emphasis is on therapeutic communication and application of the nursing process. **Prerequisite:** admission to the Nursing program.

NRS 121

Nursing II • 1.0 - 5.0 Credits

This course builds on the theoretical concepts presented in NRS I. Learning experiences are directed toward increasing student knowledge of nursing care of individuals experiencing basic alterations in health. Emphasis is on the introduction of alterations in physical and emotional health throughout the life span. The nursing process is used as a framework for the development of knowledge. Students are introduced to nursing literature. **Prerequisite:** NRS 101 and 111/113 with a 2.0 or better.

NRS 123 (Formerly NRS 1211)

Nursing II Lab • 1.0 - 5.0 Credits

Clinical lab to be taken concurrently with NRS 121. This clinical course provides for the application of introductory theoretical concepts to the nursing care of adults and children in the acute care setting. Emphasis is on collaboration with members of the healthcare team and continued application of the nursing process in developing individualized plans of care. Nursing informatics is introduced as a method for documentation and communication. **Prerequisite:** NRS 101 and 111/113 with a 2.0 or better.

NRS 131

Nursing III • 1.0 - 5.0 Credits

This course builds on the theoretical concepts from NRS I and II. Learning experiences provide further exploration of physical illness throughout the life span. Emphasis is on alterations in gastrointestinal, cardiac, and fluid balance. Maternal child nursing concepts are introduced. There is a continued emphasis on the use of the nursing process and nursing research to plan, deliver, and evaluate nursing care. **Prerequisite:** NRS 102 and 121/123 with a 2.0 or better.

NRS 133 (Formerly NRS 1311)

Nursing III Lab • 1.0 - 5.0 Credits

Clinical lab to be taken concurrently with NRS 131. This clinical course provides for the application of theoretical concepts to the nursing care of adults, children, and the family unit. Emphasis is on caring for multiple clients in the acute care setting and in health facilities outside the acute care model. There is expanded application of the nursing process to promote adaptation and wellness in developing individualized plans of care. **Prerequisite:** NRS 102 and 121/123 with a 2.0 or better.

NRS 135 (Formerly NRS 1351)

Nursing Trends Lab • 1.0 - 2.0 Credits

A campus laboratory experience designed to allow nursing students to gain proficiency in nursing skills before actual practice in the acute care setting. Students enrolled in the Nursing program register for this pass/fail class each quarter. **Prerequisite:** enrollment in the Nursing program.

NRS 141

Practical Nursing • 1.0 - 5.0 Credits

This optional theory course is offered to students desiring to obtain a Licensed Practical Nurse (LPN) certificate of completion. Emphasis is on theory and practice at the Practical Nurse level in the acute care setting. Legal and professional roles of the LPN are explored. Students satisfactorily completing this course are eligible to take the NCLEX LPN exam. **Prerequisite:** NRS 103 and 131/133 with a 2.0 or better.

NRS 143 (Formerly NRS 1411)

Practical Nursing Lab • 1.0 - 6.0 Credits

This optional clinical lab course is offered to students desiring to obtain a Licensed Practical Nurse certificate of completion. This course provides for application of theoretical concepts to the nursing care of adults and children in the acute care setting. Team-leading and delegation principles are introduced and students participate in structured team-leading activities. Community health nursing is introduced. **Prerequisite:** NRS 103 and 131/133 with a 2.0 or better.

NRS 145

First Year Clinical Elective • 6.0 Credits

This optional clinical lab course is offered to students desiring to obtain extra clinical experience before starting the second year of the Associate Degree Nursing Program. This course provides for application of theoretical concepts to the nursing care of adults and children in acute care setting. **Prerequisite:** a grade of 2.0 or better in NRS 103, 131, and 133.

Courses & Programs

NRS 151

Advanced Placement • 1.0 - 11.0 Credits

The LPN advanced placement process is designed for Licensed Practical Nurses who seek to further their education and advance in the nursing profession. This program begins summer quarter and students are admitted on a space available basis. The course provides the opportunity to orient students for transition into the RN program the subsequent fall quarter. The program recognizes knowledge previously obtained from other practical nursing education programs. All students requesting entrance into the LPN Advanced Placement program must have graduated from an accredited Practical Nursing program and passed the LPN NCLEX examination. Students must also hold an unencumbered Washington State LPN license and have current experience in acute care. The advanced placement program builds on the practical nursing foundation by broadening theoretical knowledge, enhancing nursing skills, and increasing critical thinking to prepare the LPN for role change responsibilities.

NRS 201

Pharmacological Classifications III • 1.0 Credit

Provides new information as well as supplements, reviews, and reinforces information previously provided on the pharmacology of drugs introduced in Nursing I, II, and III. Students review selected drug classifications and pharmacological principles associated with medication administration while relating this information to a corresponding patient diagnoses as well as understanding related nursing implications. This course must be completed with a 2.0 or better before advancing to NRS 221/223. **Prerequisite:** NRS 103 with a 2.0 or better and concurrent enrollment in NRS 211/213.

NRS 211

Nursing IV • 1.0 - 5.0 Credits

This theory course is the first course in the second year of the associate degree curriculum. Learning experiences are directed toward expanding the student's knowledge of nursing care of individuals experiencing alterations in health. Emphasis is on application of the nursing process in delivery of care to children and families, clients with mental health problems, and those with respiratory and immunological disorders. Concepts of patient education strategies are expanded upon through the formation of patient teaching plans. **Prerequisite:** NRS 103 and 131/133 or advanced placement standing with an active LPN license. Continuation in the Nursing program requires a minimum cumulative 2.5 GPA in all Nursing courses and a 2.0 or better in all supporting courses.

NRS 213 (Formerly NRS 2111)

Nursing IV Lab • 1.0 - 5.0 Credits

Clinical lab to be taken concurrently with NRS 211. This clinical course provides for application of theoretical concepts to the nursing care of adults and children in acute care and psychiatric settings. Emphasis is on the use of the nursing process to develop individualized plans of care for patients across the lifespan. During the psychiatric nursing rotation, emphasis is on developing interpersonal and therapeutic communication skills and caring for the mentally ill client. **Prerequisite:** NRS 103 and 131/133 with a 2.0 or better.

NRS 221

Nursing V • 1.0 - 5.0 Credits

This course builds on the theoretical concepts presented in NRS I, II, III, and IV. Learning experiences are directed toward increasing the student's knowledge of nursing care of individuals experiencing alterations in health. Emphasis is on application of the nursing process in the delivery of care to individuals experiencing complex health issues associated with neurological, cardiac and oncological illnesses. Concepts of advanced leadership, delegation, and research are expanded. **Prerequisite:** NRS 201 and 211/213 with a 2.0 or better.

NRS 222

Professional Issues I • 1.0 Credit

One-credit class providing an overview of nursing management and leadership, legal issues in nursing, job search, nursing delivery systems, and role transition issues related to moving from a nursing student to professional nursing practice. **Prerequisite:** concurrent enrollment in NRS 221/223.

NRS 223 (Formerly NRS 2211)

Nursing V Lab • 1.0 - 5.0 Credits

Clinical lab to be taken concurrently with NRS 221. This clinical course provides for application of theoretical concepts to the nursing care of adults and children in acute care and psychiatric settings. Emphasis is on implementing delegation/leadership skills and utilizing the nursing process to develop individualized plans of care for patients across the lifespan. During the psychiatric nursing rotation, emphasis is on developing interpersonal communication skills and caring for the mentally ill client. **Prerequisite:** Nursing 201 and 211/213 with a 2.0 or better.

NRS 231

Nursing VI • 1.0 - 5.0 Credits

This course builds on the theoretical concepts presented in NRS I, II, III, IV, and V. Learning experiences are directed toward increasing the student's knowledge of nursing care of individuals experiencing alterations in health. Emphasis is on application of the nursing process in the delivery of care to individuals experiencing complex health issues including reproductive and endocrine disorders and those requiring emergent care. Concepts of leadership, delegation, and community service are reinforced. **Prerequisite:** NRS 222 and 221/223 with a 2.0 or better.

NRS 232

Professional Issues II • 1.0 Credit

One credit class provides an overview of contemporary healthcare, regulations of Registered Nurse practice, collective bargaining, conflict management, safety in the workplace, and boundary issues for professional nurses. **Prerequisite:** NRS 222 and 221/213 with a 2.0 or better and concurrent enrollment in NRS 231/233.

NRS 233 (Formerly NRS 2311)

Nursing VI Lab • 1.0 - 8.0 Credits

Clinical lab to be taken concurrently with NRS 231. This is the final clinical learning experience of the associate degree curriculum. This course provides for application of theoretical concepts to the care of adults and children in acute care and community settings. A preceptor experience is offered during this quarter. All students are expected to progress towards competence in thinking critically, using the nursing process, performing nursing skills, providing leadership, and delegating care at an associate degree nurse entry level. Students will also participate in various community service events. **Prerequisites:** NRS 222 and 221/223 with a 2.0 or better.

NRS 235 (Formerly NRS 2351)

Nursing Trends Lab • 1.0 Credit

A campus laboratory experience designed to allow nursing students to gain proficiency in nursing skills before actual practice in acute care settings. Students enrolled in the Nursing program register for this pass/fail class each quarter. **Prerequisite:** enrollment in the Nursing program.

NRS 299

Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

NRS 301

Nursing Roles, Dimensions, and Perspectives • 3.0 Credits

Facilitates the transition of Registered Nurses with an Associate degree in Nursing to the role of a BSN graduate. Introduces students to the philosophy, theory, and roles of the professional nurse in the context of contemporary and future professional nursing practice. Analysis of social, economic, and policy issues affecting the practice of professional nursing with emphasis on strategies for advancing the profession. **Prerequisite:** acceptance into the RN-BSN program.

Courses & Programs

NRS 315

Healthcare Informatics/Information Technology • 5.0 Credits

Provides an introduction to health information technology and to the science of informatics as applied to healthcare. Emphasis is placed on how healthcare facilities use information technology to select and utilize electronic information management systems and to integrate data from patient health records. Topics of study include: use of computer networks, system protocols and policies, data and system architecture and congruency, communication and legal issues, basic computer security and safety, mobile applications, multi-system integration, stand-alone applications, data collection methods and integrity, legal document compliance, and consistent documentation to prevent errors. **Prerequisite:** acceptance into the RN-BSN program. This course is cross linked to HCAD 315. Students completing NRS 315 may not receive graduation credit for HCAD 315.

NRS 320

Nursing Research and Evidence-Based Practice • 5.0 Credits

Examines the nature of inquiry, basic research concepts, language, and processes. Content in process focuses on how research contributes to the development of nursing knowledge, improves nursing practice, and enhances professional development and professional accountability. Qualitative and quantitative research methods are compared and are analyzed to enhance understanding of the research process. Legal and ethical issues are explored. Students utilize evidence based practice to guide decision-making in nursing practice. **Prerequisite:** acceptance into the RN-BSN program.

NRS 350

Pathophysiology, Pharmacology, and Assessment • 5.0 Credits

This course builds upon the RN's knowledge of the pathophysiology of disease, pharmacologic intervention, and health assessment of an individual by examining issues that affect families and communities on a local and global scale. Emphasis is on the role of the Bachelor's-prepared RN in assessing families, communities, and populations, identifying barriers to treatment, and developing interdisciplinary solutions. Major topics include family, community, and population assessment, determinants of health, health disparities, vulnerable populations, genetics, genomics, and pharmacogenetics. **Prerequisite:** acceptance into the RN-BSN program.

NRS 399

NCLEX Exam • 35.0 Credits

NRS 410

Nursing Leadership and Management • 5.0 Credits

Enables students to practice within complex healthcare systems and to assume the roles of provider of care; designer/manager/coordinator of care; and member of a diverse and global health care environment. Major topic areas include: provision of complex systems, change theory, conflict management, conflict resolution strategies, negotiation, relationship building, group roles/group dynamics, and concepts of teamwork. Management and organizational theories and concepts are studied, evaluated, and applied. **Prerequisite:** acceptance into the RN-BSN program.

NRS 420

Populations and Global Health Nursing • 3.0 Credits

This course examines nursing as part of the larger healthcare delivery system. Emphasis is on identification of cultural, social, political, and epidemiological factors related to health, illness, health promotion, and disease prevention that impact local, national, and global healthcare. **Prerequisite:** acceptance into the RN-BSN program.

NRS 421

Populations and Global Health Nursing Practicum • 2.0 Credits

This course presents clinical concepts of community health nursing and the multiple determinants of health in local healthcare settings. Students participate in selected clinical based activities in various community agencies as interdisciplinary provider, designer, and manager in the process to provide competent care, promote health protection, and provide assistance with health maintenance and restoration to a diverse population within the community. **Prerequisite:** acceptance into the RN-BSN program.

NRS 460

Leadership Capstone • 2.0 Credits

In collaboration with a nursing faculty and clinical preceptor, students plan and implement an evidence-based project consistent with the professional leadership role. Students use critical thinking skills and evidence-based practice to promote patient-centered nursing in a complex healthcare environment. This course culminates with an evidence-based project that is presented to peers and the community. **Prerequisite:** acceptance into the RN-BSN program.

Nursing Assistant

columbiabasin.edu/nursingassistant

Department Overview: Nursing assistants (NAs) provide care to patients in a variety of healthcare settings for individuals that have difficulty performing their own basic care. Because of the personal nature of the job, nursing assistants should be compassionate and enjoy helping others. The Nursing Assistant program is designed to prepare students for entry-level practice as a Nursing Assistant-Certified (NAC) in Washington state. Students who successfully pass all components of the CBC NA coursework will receive a DSHS Certificate of Completion, notation posted on the CBC transcript and will be eligible to take the Nurse Aide Assessment Program (NNAAP) exam and apply for licensure as an NAC. The exam has two parts: a written or oral portion and a skills demonstration. Candidates must successfully pass both parts in order to be eligible to apply for licensure in the state of Washington and be placed on the nurse aide registry.

Lecture/Clinical Requirements

Students are required to meet three to four days per week to complete the NA 100 lecture hours.

Students are required to complete 50 clinical hours during the quarter. These hours include time in the campus laboratory and a minimum of 36 clinical hours in a local healthcare facility. Students are to complete these hours during shifts that may start as early as 6 am. These hours are arranged by the instructor with the facility. Students need to make arrangements to attend these required shifts as attendance is mandatory.

Applicants are required to provide the following documentation:

- A current American Heart Association Healthcare Basic Life Support (BLS) card
- A current First Aid card
- A professional letter of reference

After review of the applications, applicants will be mailed a letter informing them of their status. Once admitted into the program, each student will be responsible for providing documentation of the following additional requirements:

- Program specific immunization records (details provided with admission into the program)
- Satisfactory criminal history background check using a college-approved vendor. Criminal history background information is required of all Health Science students. Information obtained will be considered in determining student eligibility to complete clinical coursework. Inability to participate in clinical experiences due to the information obtained from the background check may result in the student's inability to satisfactorily complete the Nursing Assistant program requirements. Any infraction while enrolled in the Nursing Assistant program should be self-reported to the director. Questions regarding the criminal background policy should be directed to the Dean for Health Sciences at 509.544.8310.

Courses & Programs

NA 100

Nursing Assistant • 4.0 Credits

This course leads to the ability of those completing the course to become eligible for testing as a Nursing Assistant Certified. The course covers communication and interpersonal skills, infection control, safety and emergency procedures, promoting resident independence, respecting resident rights, basic nursing skills, personal care skills, mental health and social services needs, care of the cognitively impaired resident, basic restorative care, resident rights, HIPAA, First Aid and CPR for the healthcare provider, seven hours of HIV/AIDS Bloodborne Pathogens training, dementia, and cultural awareness. Concurrent enrollment into NA 102 lab is required. Students are required to demonstrate competencies in skills associated with each of the course subjects within the laboratory or clinical setting.

NA 102 (Formerly NA 1001)

Nursing Assistant Lab • 4.0 Credits

This course provides competencies in skills for laboratory and clinical requirements for the Nursing Assistant lecture course. Students are involved in on-campus learning laboratory experiences as well as clinical rotations within community health facilities.

Nutrition & Food Science

columbiabasin.edu/nutrition

Department Overview: Nutrition & Food Science currently offers a course designed to introduce students to the concept of food and nutrition to maintenance of a healthy life. Students learn the principles of nutrition as they apply to macro-nutrients and metabolic pathways. Application of vitamins, minerals and special nutritional requirements at different stages of the live cycle, as well as current issues in nutrition are considered.

NUTR&101 (Formerly NFS 111)

Nutrition [M/S] • 5.0 Credits

Principles of nutrition as they apply to macro-nutrients. Economic, cultural, and psychological influences are considered. The need for vitamins, minerals, and special nutritional requirements at different stages of the lifecycle and special topics of current concern are included.

Paramedic

columbiabasin.edu/paramedic

Department Overview: The Paramedic is the highest trained of all Emergency Medical Technicians. It is crucial to have a good foundation as an EMT or an Advanced EMT in order to be successful as a Paramedic. The Paramedic requires significantly more training than the EMT or the Advanced EMT, and represents the Advanced Life Support role in the pre-hospital setting.

Two options are provided for the Paramedic pathway: a Paramedic Certificate and an Associate in Applied Science (AAS) Degree in Paramedicine.

An application and entrance exam are required as part of the acceptance process into the Paramedic Certificate or AAS degree program. A student does not need to be accepted and enrolled in the Paramedic program to take major support or general education prerequisite classes. The major program course work for both the degree and certificate will begin in January of every odd year and finish in June, 18 months later. Individuals working towards the AAS and Certificate will require successful completion of the specified prerequisites before the program start date in January.

Entrance requirements for both the AAS and Certificate Program:

- Be a minimum of 18 years old by the start of the program.

- Provide evidence of a high school diploma or equivalent qualification with an accumulative 2.0 GPA or better.
- Be a certified EMT for a minimum of one year prior to starting the program. You may apply prior to one year, as long as you will become certified for one year before the program begins.
- Complete placement testing with scores eligible to enter MATH& 146 or successful completion of MATH 094 or 095 or 098 or equivalent with a grade of 2.0 or higher (prior to the summer of 2019). After the summer of 2019, MATH 050, equivalent or greater with a grade of 2.0 or higher.
- Complete placement testing and are eligible for ENGL& 101 or have the equivalent on transcript.

Paramedic Certificate specific:

- The applicant will provide evidence of a basic understanding of human anatomy and physiology when taking the Paramedic Entrance Assessment. It is highly recommended that applicants who have not taken the AAS prerequisites or a recent high school anatomy and physiology course, consider taking a preparatory A&P course. Please contact the Program Director for recommendations of an applicable course or for approval of previous courses taken.

Note: if you choose to complete the AAS in Paramedicine at a later time, the Anatomy and Physiology courses listed for the AAS must be completed, however this may be done after the Paramedic program ends.

AAS in Paramedicine specific prerequisites are as follows:

- Successful completion of the following biology courses with a grade if 2.0 or higher. If transferring A&P courses to CBC for an AAS degree, contact the Student Records office for transferability:
- BIOL& 241 Human A&P 1 w/ Lab (Please note, BIOL& 241 at CBC has a prerequisite of BIOL& 160)
- BIOL& 242 Human A&P 2 w/ Lab

PMD 201

Paramedic I • 6.0 Credits

This course is intended to prepare the paramedic student in the areas of medical, legal, ethics, roles and responsibilities, principles of pathophysiology, pharmacology, intravenous access, and medication administration. This course follows the 2012 WA State EMS Education Standards for Paramedic as well as the National EMS Education Standard Instructional Guidelines for Paramedics. It is designed to give students the foundation to continue training to become eligible to take the National Registry EMT-Paramedic exam. **Prerequisite: acceptance into the program. See CBC Paramedic program entrance requirements at columbiabasin.edu/paramedic.**

PMD 202

Paramedic II • 6.0 Credits

This course is intended to train students in the areas of advanced airway management, physical assessment, field assessment, clinical decision-making, documentation, and the assessment and management of respiratory emergencies. This course follows the 2012 WA State EMS Education Standards for Paramedic as well as the National EMS Education Standard Instructional Guidelines for Paramedics, and is designed to give students the foundation to continue training to become eligible to take the National Registry EMT-Paramedic Exam. **Prerequisite: completion of the previous PMD course sequence with a grade of 2.0 or better.**

Courses & Programs

PMD 203

Paramedic III • 6.0 Credits

This course in the Paramedic sequence provides skills and knowledge necessary to assess and manage medical emergencies specifically: cardiac, neurological, and endocrine emergencies as well as allergies and anaphylaxis. At the completion of this course, students are certified in ACLS. This course follows the 2012 WA State EMS Education Standards for Paramedic as well as the National EMS Education Standard Instructional Guidelines for Paramedics, and is designed to give students the foundation to continue training to become eligible to take the National Registry EMT-Paramedic Exam. **Prerequisite:** completion of previous PMD sequence courses with a grade of 2.0 or better.

PMD 204

Paramedic IV • 6.0 Credits

This course in the Paramedic sequence provides skills and knowledge necessary to assess and manage trauma emergencies, specifically: mechanism of injury, soft tissue and burn injuries, as well as head, neck, chest, abdominal, and other musculoskeletal trauma. At the successful completion of this course, students are certified in PHTLS. This course follows the 2012 WA State EMS Education Standards for Paramedic as well as the National EMS Education Standard Instructional Guidelines for Paramedics, and is designed to give students the foundation to continue training to become eligible to take the National Registry EMT-Paramedic Exam. At the end of this course, the areas of neonate and pediatric care will begin, with completion in PMD 205. **Prerequisite:** completion of previous PMD sequence courses with a grade of 2.0 or better.

PMD 205

Paramedic V • 6.0 Credits

This course in the Paramedic sequence provides skills and knowledge necessary to assess and manage special emergencies with neonates, pediatrics, childbirth, geriatrics, behavioral emergencies, as well as abuse, and assault. At the completion of this course, students are certified in PALS. This course follows the 2012 WA State EMS Education Standards for Paramedic as well as the National EMS Education Standard Instructional Guidelines for Paramedics, and is designed to give students the foundation to continue training to become eligible to take the National Registry EMT-Paramedic Exam. **Prerequisite:** completion of previous PMD sequences with a grade of 2.0 or better.

PMD 206

Paramedic VI • 6.0 Credits

This course provides skills and knowledge necessary to assess and manage emergencies of a gastrointestinal, urological, toxicological, or environmental nature. It additionally reviews special considerations of mass casualty, hazardous materials, rescue, and crime scene awareness. At the completion of this course, students complete a term paper and oral presentation. This course follows the 2012 WA State EMS Education Standards for Paramedic as well as the National EMS Education Standard Instructional Guidelines for Paramedics, and is designed to give students the foundation to continue training to become eligible to take the National Registry EMT-Paramedic Exam. Students continue the field/ambulance clinical competencies. **Prerequisite:** completion of the previous PMD sequences with a grade of 2.0 or better.

PMD 210 (Formerly PMD 2013)

Paramedic I Lab • 2.0 Credits

Lab to be taken concurrently with PMD 201. Introduces students to the policies and procedures of the field and hospital internship sites where students begin in same-day surgery performing IVs on patients preparing for surgical procedures.

PMD 220 (Formerly PMD 2023)

Paramedic II Lab • 3.0 Credits

Lab to be taken concurrently with PMD 202. The lab portion of the course introduces students to the policies and procedures of the field and hospital internship sites where they continue to work on their minimum competencies in same-day surgery, operating room, emergency department, as well as beginning their field/ambulance experience.

PMD 230 (Formerly PMD 2033)

Paramedic III Lab • 3.0 Credits

Lab to be taken concurrently with PMD 203. The lab portion of this course introduces students to the policies and procedures of the field and hospital internship sites where they continue to work on their minimum competencies in the operating room, emergency department, respiratory therapy, cardiac catheterization lab, and the intensive care units. Students continue the field/ambulance clinical competencies.

PMD 240 (Formerly PMD 2043)

Paramedic IV Lab • 3.0 Credits

Lab to be taken concurrently with PMD 204. The lab portion of this course introduces students to the policies and procedures of the field and hospital internship sites where they continue to work on their minimum competencies in the emergency department, respiratory therapy, cardiac catheterization lab, and the intensive care units. Students continue the field/ambulance clinical competencies.

PMD 250 (Formerly PMD 2053)

Paramedic V Lab • 3.0 Credits

Lab to be taken concurrently with PMD 205. The lab portion of this course introduces the students to the policies and procedures of the field and hospital internship sites where they continue to work on their minimum competencies in the emergency department, respiratory therapy, cardiac catheterization lab, intensive care units, pediatrics, neonate intensive care unit, obstetrics unit, and psychiatric rotations. Students continue the field/ambulance clinical competencies.

PMD 260 (Formerly PMD 2063)

Paramedic VI Lab • 3.0 Credits

Lab to be taken concurrently with PMD 206. The lab portion of the course focuses on the completion of hospital internship where students continue to work on their minimum competencies in the emergency department, respiratory therapy, cardiac catheterization lab, intensive care units, pediatrics, neonate intensive care unit, obstetrics unit, psychiatric rotations, and field internship.

PMD 270 (Formerly PMD 2103)

Extended Paramedic Internship • 1.0 - 3.0 Credits

This extension course is provided to current paramedic students who are working to complete field and/or hospital internship requirements as required by the program. This course follows the 2012 WA State EMS Education Standards for Paramedic as well as the National EMS Education Standard Instructional Guidelines for Paramedics, and allows students to complete all requirements and to become eligible to take the National EMT-P Certification Exam. **Prerequisite:** successful completion of all previous PMD sequences with a minimum overall GPA of 2.5. Placement into this course is at the discretion of the Paramedic Director.

Courses & Programs

Perioperative Nursing

<https://www.columbiabasin.edu/periop>

Department Overview: Perioperative nurses are Registered Nurses (RNs) with special training, knowledge and skills in surgical patient care. Perioperative nurses work in hospital operating rooms and surgical services departments, ambulatory surgery centers, physician offices and other specialty facilities providing care to patients during the course of a surgical procedure. They work closely with surgeons, anesthesia providers, surgical technologists and other operating room professionals. Traditionally, the perioperative nurse may serve as either a scrub nurse or a circulating nurse. In the scrub role, the perioperative nurse establishes and maintains the sterile field, anticipates the needs of the surgical team and passes instruments and supplies to the surgeon and surgical first assistant. In the circulating role, the perioperative nurse manages the overall care of the patient and ensures patient safety by ensuring a proper environment. The circulator also transfers and positions the patient, performs urinary catheterization, positions the patient, performs counts of all instruments and supplies with the surgical technologist or scrub nurse and maintains intraoperative documentation. To be successful, perioperative nurses must develop a strong sense of physical and environmental awareness and the ability to anticipate the patient and surgical team's needs. This requires in-depth knowledge of surgical anatomy, operative procedures, surgical instrumentation and supplies, sterilization and infection control procedures and technical specialty equipment.

CBC's Perioperative Nursing program incorporates AORN's PeriOp 101 program into didactic, laboratory and clinical study. Didactic coursework is presented using a hybrid online and classroom-based learning environment, culminating in a 165-hour clinical experience designed to prepare students for a career in the operating room. Program applicants must be licensed RNs meeting specific entrance criteria.

PON 101

Perioperative Nursing Theory I • 6.0 Credits

This course is designed to prepare students for entry into perioperative nursing practice. Surgical nursing concepts are presented using a combination of lectures and online modules published by the Association of periOperative registered Nurses (AORN). Topics include an introduction to perioperative nursing practice, related core nursing skills, teamwork in the perioperative setting, the operating room environment, and standards for aseptic technique and surgical patient safety. **Prerequisite:** graduate of an accredited registered nursing program with current Washington state RN licensure and acceptance into the Perioperative Nursing program.

PON 111

Perioperative Nursing Lab • 3.0 Credits

This course provides students the opportunity to apply core perioperative nursing concepts and practice skills within a structured laboratory environment. Students will perform technical skills within the scope of the perioperative nurse. Skills include sterile and aseptic technique, preoperative patient preparation, surgical patient positioning, operative counts, and other functions performed in the scrub and circulating nurse roles. **Prerequisite:** graduate of an accredited registered nursing program with current Washington state RN licensure and acceptance into the Perioperative Nursing program.

PON 201

Perioperative Nursing Theory II • 4.0 Credits

This course explores the role of the perioperative nurse within the context of the primary surgical specialties and will review basic surgical anatomy, pathophysiology, surgical wound classification and healing, operative instrumentation, and general considerations for patients undergoing general, obstetric and gynecologic, otorhinolaryngologic, genitourinary, orthopedic, plastic and reconstructive, peripheral vascular, cardiothoracic, oral and maxillofacial, ophthalmic, and neurosurgical procedures. **Prerequisite:** PON 101 and 111, both with a minimum grade of 2.0.

PON 221

Perioperative Nursing Practicum • 5.0 Credits

Students in this course will gain technical experience within the perioperative nursing role by participating in a structured clinical internship program. Students prepare for and perform assigned surgical tasks under the supervision of facility personnel, clinical preceptors, and clinical college faculty in accordance with patient safety standards and industry best practices. **Prerequisite:** PON 101 and 111, both with a minimum grade of 2.0.

Philosophy

[columbiabasin.edu/philosophy](https://www.columbiabasin.edu/philosophy)

Department Overview: Philosophy is the attempt to think rationally and critically about the most important questions of life. Courses in this program examines normative issues of good and evil, the nature and purpose of human life, what is reality, the existence of God, and the adequacy of scientific materialism as a world view. See degree plans for more information about requirements and specific programs for course descriptions.

PHIL 106 (Formerly PHILj)

Introduction to Logic [H] • 5.0 Credits

A study of the principles of formal and informal thinking: induction, deduction, and language.

PHIL 131 (Formerly PHI 131)

World Religions [H] • 5.0 Credits

A survey of the major religious systems of the world, including Hinduism, Buddhism, Confucianism, Taoism, Judaism, Christianity, and Islam.

PHIL 150 (Formerly PHI 150)

Introduction to Ethics [H] • 5.0 Credits

An introduction to moral concepts; their assumptions, arguments, implications, and practices. Special consideration is given to topics in the area of medicine, business, war, individual rights, and the future.

PHIL 199

Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

PHIL 299

Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

PHIL 305

Professional Ethics [H] • 5.0 Credits

This course examines the role of ethics and social responsibility in the management of public and private sector organizations and businesses. An emphasis is on contemporary trends in corporate responsibilities with respect to ethical, legal, economic, and regulatory conditions in the global marketplace. The use of the case study approach is applied to a contemporary business ethical issue. **Prerequisite:** meets the criteria for acceptance into a BAS/BSN program, completion of a two-year degree or equivalent, or instructor approval.

PHIL 315

Professional Ethics in Healthcare [H] • 5.0 Credits

This course examines the role of ethics and social responsibility in the management of public and private healthcare organizations. Topics to be explored include the nature of morality, normative theories of ethics, justice and economic distribution as it relates to healthcare and healthcare-funded programs; the impact of technology on ethics in healthcare; and ethical situations in patient care. This course also examines practical applications of ethical theories in the context of real world scenarios, delving into the hard work of maintaining an ethical backbone through the steadfast commitment necessary to maintain accountability and integrity in the workplace. **Prerequisite:** meets the criteria for acceptance into a BAS/BSN program, completion of a two-year degree or equivalent, or instructor approval.

Courses & Programs

PHIL&101 (Formerly PHI 101)

Intro to Philosophy [H] • 5.0 Credits

A study of the fundamental questions concerning humans and the universe that recur in the history of their thoughts, religion, knowledge, reality, and morality.

PHIL&120

Symbolic Logic [Q/SR] • 5.0 Credits

A study of the principles of formal thinking, which includes an analysis of symbolic theory within a context that encourages the development of logical skills. **Prerequisite:** grade of 2.0 or higher in MATH 094 or MATH 095 or MATH 098 or MATH 050 or MTAH 070 or MATH 072 or appropriate placement.

Phlebotomy

columbiabasin.edu/phlebotomy

Department Overview: Phlebotomists work in many areas of the health care industry including hospitals, clinics and medical offices and are valuable members of the health care team. Phlebotomists must demonstrate patience, compassion, excellent communication skills and have the ability to keep up with a fast-paced environment. The phlebotomy curriculum is a two-course sequence, which prepares individuals with the knowledge, skills and abilities necessary to function as an entry-level phlebotomist. This training fulfills the Washington state Department of Health (DOH) requirements necessary to be certified as a healthcare professional in a category of Medical Assistant-Phlebotomist. Details are available online at www.doh.wa.gov/LicensesPermitsandCertificates/ProfessionsNewReneworUpdate/MedicalAssistant/ApplicationsandForms.aspx.

Phlebotomy training is a two-course sequence. In the first course, Phlebotomy 100 (PHLEB 100), students must achieve a 75 percent average or better on testing as well as pass the required lab skills competencies to continue into the second course, Phlebotomy 101 (clinical practicum). Malpractice fees are mandatory for all Health Science students and will be added to the registration fees. Applicants are required to provide the following documentation:

- Certificate of Completion for seven hours of HIV/AIDS Bloodborne Pathogen Training
- A current American Heart Association CPR card for Healthcare Provider
- A current First Aid card

Once admitted into the program, each student will be responsible for providing documentation of the following additional requirements:

- Program specific immunization records (details provided with admission into the program).
- Satisfactory criminal history background check using a college-approved vendor. Criminal history background information is required of all Health Science students. Information obtained will be considered in determining student eligibility to complete clinical coursework. Inability to participate in clinical experiences due to the information obtained from the background check may result in the student's inability to satisfactorily complete the Phlebotomy program requirements. Any infraction while enrolled in the Phlebotomy program should be self-reported to the coordinator/director. Questions regarding this policy should be directed to the Dean for Health Sciences at 509.544.8310.

After review of applications, applicants will be mailed a letter informing them of their status.

More information can be obtained from the Health Sciences Center office at 509.544.8300.

PHLEB100

Phlebotomy I • 4.0 Credits

This lecture is the first course of a two-course sequence. Medical terminology and basic anatomy are introduced. Students learn skill development in the performance of blood and specimen collection methods using proper techniques and standard precautions. Emphasis is on safely collecting specimens from clients across the life span utilizing a variety of collection devices. The principles of infection prevention and safety with specimen collection are emphasized. Communication techniques and maintaining patient data are presented. Students must pass this course with 75 percent or better in order to continue into the subsequent course, PHLEB 101.

Prerequisite: acceptance into the Phlebotomy program.

PHLEB101 (Formerly PHLEB1001)

Phlebotomy I Lab • 5.0 Credits

This clinical course is the second class of the two-course sequence. This class requires 120 hours of supervised clinical experience in various medical facilities throughout the regional area. The 120 clinical hours are arranged by the instructor. Students need to accommodate the hours of the facility where they are assigned, and complete the 120 hours within the quarter. Clinical facility hours may begin as early as 6:00 a.m. and end as late as 6:00 p.m., Monday through Saturday. Students who successfully complete both courses (9 credits total) with a 75 percent or better will receive a certificate of completion from Columbia Basin College with academic credit. **Prerequisite:** successful completion of PHLEB 100 with a 75 percent or better.

Physical Education

columbiabasin.edu/physicaleducation

Department Overview: The Physical Education department offers a variety of classes that can expose the student to leisure activity skills and fitness activities.

PE 103 (Formerly PE 1031)

Physical Fitness I [PE] • 1.0 Credit

Instruction and practice in exercises that condition the body. Designed to develop a level of strength, flexibility, and endurance.

PE 104 (Formerly PE 1041)

Physical Fitness II [PE] • 1.0 Credit

This course offers advanced conditioning through the use of strenuous exercises and incorporates techniques recently developed through research.

Prerequisite: PE 103.

PE 110 (Formerly PE 1101)

Aerobics Step Training I [PE] • 1.0 Credit

A low-impact exercise program that involves stepping up and down on a platform of adjustable height to the accompaniment of music, leading to improved cardiovascular conditioning, as well as lower body endurance and strength.

PE 111 (Formerly PE 1111)

Aerobics Step Training II [PE] • 1.0 Credit

Continued study and involvement offering a greater level of conditioning through the use of more intense training techniques involved with step training.

PE 112 (Formerly PE 1121)

Aerobic Dance I [PE] • 1.0 Credit

Dance steps and routines rigorously executed to increase cardiovascular rate, leading to figure trimming and toning. Records on improvements in pulse rates and pulmonary recovery are kept.

Courses & Programs

PE 113 (Formerly PE 1131)

Aerobic Dance II [PE] • 1.0 Credit

Continued study and advanced techniques of this activity. Dance steps and routines executed to increase cardiovascular rate. Students test and record improvements in pulse rates and pulmonary recovery. **Prerequisite:** PE 112.

PE 114 (Formerly PE 1141)

Aerobic Dance III [PE] • 1.0 Credit

Advanced study in this activity. Dance steps and routines rigorously executed for improving cardiovascular rate and leading to figure trimming and toning. Improvements are tested and recorded. **Prerequisite:** PE 113.

PE 115 (Formerly PE 1151)

Body Mechanics [PE] • 1.0 Credit

This course involves special exercise and calisthenics which enhance total fitness, figure improvement, body toning, weight control, and posture.

PE 116 (Formerly PE 1161)

Pilates [PE] • 1.0 Credit

An introductory course to Pilates emphasizing physical exercises, breathing, core strength and stability, and muscle awareness.

PE 117 (Formerly PE 1171)

Yoga I [PE] • 1.0 Credit

An introductory course to Hatha Yoga emphasizing physical exercises, breathing exercises, and meditation practice.

PE 118 (Formerly PE 1181)

Step Aerobic Interval Training [PE] • 1.0 Credit

Using intervals of high intensity exercise followed by recovery periods, this class combines high and low intensity exercises performed on the floor as well as on the step. Aerobic exercise, power moves, step training, light weight training, and body resistance are used to introduce students to the benefits of an interval training program. Greater cardiovascular strengthening as well as muscular strengthening and endurance are introduced and practiced in this class.

PE 119 (Formerly PE 1191)

Yoga II [PE] • 1.0 Credit

A continuation course to a Hatha Yoga practice including intermediate physical poses, yoga breathing exercises, and selected meditations.

PE 120 (Formerly PE 1201)

Weight Training I [PE] • 1.0 Credit

Students are exposed to theories of weight training. Emphasis is placed on strength development, muscular endurance, and flexibility. Students design an individual program with the use of free weights and multi-station machines.

PE 121 (Formerly PE 1211)

Weight Training II [PE] • 1.0 - 2.0 Credits

An intermediate program with students designing their individual workout program.

PE 122 (Formerly PE 1221)

Weight Training III [PE] • 1.0 - 2.0 Credits

An advanced program with the student designing her/his individual workout program.

PE 127 (Formerly PE 1271)

Fitness Center [PE] • 1.0 - 6.0 Credits

A total fitness program that develops individual fitness levels in cardiovascular training with benefits of weight training to improve muscle tone and physical conditioning. Students can earn a maximum of two credits per quarter from Fitness Center classes.

PE 132 (Formerly PE 1321)

Golf I [PE] • 1.0 Credit

Basic stroke instruction with all clubs to provide students with sufficient skills to enjoy playing the game. The rules, courtesies, and safety factors are taught and tested.

PE 133 (Formerly PE 1331)

Golf II [PE] • 1.0 Credit

Techniques on special shots such as sand shots, sidehill, and downhill lies are emphasized. **Prerequisite:** PE 132.

PE 134 (Formerly PE 1341)

Golf III • 1.0 Credit

Course involves student in actual play with a lesson arranged with the instructor. Strategy, club selection, and metal control are covered during the quarter. **Prerequisite:** PE 132 or 133.

PE 135 (Formerly PE 1351)

Golf Swing Analysis Strategies [PE] • 2.0 Credits

A comprehensive study of the individual parts of the modern golf swing with intensive training directed toward precise control and more power.

PE 140 (Formerly PE 1401)

Softball I [PE] • 1.0 Credit

Softball I is designed for the beginning softball player. This course offers instruction of basic skills and rules of softball. Skills and knowledge of rules are tested.

PE 141 (Formerly PE 1411)

Softball II [PE] • 1.0 Credit

Designed for the intermediate softball player. Additional work of strategy, individual, and team offensive/defensive techniques are taught. Skills and knowledge of rules are tested. **Prerequisite:** PE 140.

PE 142 (Formerly PE 1421)

Softball III [PE] • 1.0 Credit

Designed for the advanced softball player. Additional work of strategy, individual, and team offensive/defensive techniques are taught. Skills and knowledge of rules are tested. **Prerequisite:** PE 140 and PE 141.

PE 145 (Formerly PE 1451)

Soccer I [PE] • 1.0 Credit

Basic individual skills are presented and developed. The international rules are emphasized and a physical conditioning program designed to prepare the student for play is implemented.

PE 146 (Formerly PE 1461)

Soccer II [PE] • 1.0 Credit

Soccer II is designed for the intermediate player. Review of the basic skills taught in the beginning course. Additional work on strategy, defensive techniques. **Prerequisite:** PE 145.

PE 147 (Formerly PE 1471)

Soccer III [PE] • 1.0 Credit

Soccer III is designed for the advanced player. Advanced strategy, team defensive, and team offensive techniques are taught. Skills and rules are tested. **Prerequisite:** PE 146.

PE 148 (Formerly PE 1481)

Jogging I [PE] • 1.0 - 2.0 Credits

Provides cardiovascular improvement, burns body fat, and builds lifetime skills in aerobic fitness. Emphasis on stretching, safety, motivation, and enjoying jogging. Offered for the beginning jogger or walker through the competitive runner.

PE 149 (Formerly PE 1491)

Jogging II [PE] • 1.0 - 2.0 Credits

Provides cardiovascular improvement, burns body fat, and builds lifetime skills in aerobic fitness. Emphasis on stretching, safety, motivation, and enjoying jogging. Offered for the intermediate jogger or walker through the competitive runner.

Courses & Programs

PE 150 (Formerly PE 1501)

Jogging III [PE] • 1.0 - 2.0 Credits

Provides cardiovascular improvement, burns body fat, and builds lifetime skills in aerobic fitness. Emphasis on stretching, safety, motivation, and enjoying jogging. Offered for the advanced jogger or walker through the competitive runner.

PE 160 (Formerly PE 1601)

Basketball I [PE] • 1.0 Credit

Beginning skills and strategy, this class is suitable for anyone with a desire to learn the basics of the game, with emphasis on rules and court procedure.

PE 161 (Formerly PE 1611)

Basketball II [PE] • 1.0 Credit

Students expand their knowledge of the skills of basketball, and additional skills are introduced. Team strategy at a more advanced level is emphasized. **Prerequisite:** PE 160.

PE 162 (Formerly PE 1621)

Basketball III [PE] • 1.0 Credit

Review of advanced basketball skills. Introduction of offensive patterns, defensive sets, and individual style of play. This class also involves usage of fast break and the transition game. **Prerequisite:** PE 161.

PE 163 (Formerly PE 1631)

Volleyball I [PE] • 1.0 Credit

Covers basic skills, court positions, and strategies for beginning sets along with 4-2 and 5-1 offenses.

PE 164 (Formerly PE 1641)

Volleyball II [PE] • 1.0 Credit

A continuation of Volleyball I. Intermediate skills, defensive strategies, play sets, and how to play doubles and triples volleyball. **Prerequisite:** PE 163.

PE 165 (Formerly PE 1651)

Volleyball III [PE] • 1.0 Credit

Emphasis is on team plan and interaction using and applying all volleyball skills. **Prerequisite:** PE 164.

PE 172 (Formerly PE 1721)

Bowling I • 1.0 Credit

Course is structured to allow the individual to acquire and use proper bowling forms. Students learn to eliminate errors in techniques, follow rules, compute handicaps, and keep scores.

PE 173 (Formerly PE 1731)

Bowling II • 1.0 Credit

Students should be a 135-average bowler or better and be able to demonstrate good approach form. **Prerequisite:** PE 172.

PE 180

Adaptive PE [PE] • 2.0 Credits

This course is a study of the history, current global perspective, current trends, and laws regarding the opportunity for people with challenges and limitations to participate in physical activity and sports.

PE 181 (Formerly PE 1811)

Swimming I [PE] • 1.0 Credit

This course is designed to provide students with the basic fundamental skills to become a proficient, safe swimmer. Students learn these skills: rhythmic breathing, breath holding, leveling off from vertical position, floats in both supine and prone positions, arm strokes for front crawl, back stroke, side stroke, breast stroke, and the front dive.

PE 182 (Formerly PE 1801)

Adaptive PE Lab [PE] • 1.0 Credit

Lab to be taken concurrently with PE 180.

PE 187 (Formerly PE 1871)

Baseball I [PE] • 1.0 - 2.0 Credits

Introduces students to basic skills of baseball. Students are given instruction in all phases of the game, with main purpose being to gain an understanding of fundamentals.

PE 188 (Formerly PE 1881)

Baseball II [PE] • 1.0 Credit

Students expand their knowledge of the skills of baseball taught at the beginning level. Team strategy is taught at a more advanced level. **Prerequisite:** PE 187.

PE 189 (Formerly PE 1891)

Baseball III [PE] • 1.0 Credit

Advanced level of skills are taught, and theory of baseball strategy is introduced in all phases of the game. Specific drills are used for development of specialized skills. **Prerequisite:** PE 188.

PE 190 (Formerly PE 1901)

Cardio Kickboxing I [PE] • 1.0 Credit

This course involves the study and implementation of martial art style kicks and punches, along with exercises to enhance flexibility, cardiovascular endurance, and increased stamina.

PE 198 (Formerly PE 1991)

Special Studies • 1.0 - 15.0 Credits

An experimental class to be used to explore new approaches and applications to Physical Education.

PE 199

Special Studies • 1.0 - 15.0 Credits

An experimental lab class to be used to explore new approaches and applications to Physical Education.

PE 201 (Formerly PE 2011)

Exercise and Weights [PE] • 1.0 Credit

Combination of activities including plyometrics, agility and speed training, and circuit training. Students participate in a supervised program designed to improve cardiovascular conditioning, core body strength, and physical agility.

PE 298 (Formerly PE 2991)

Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

PE 299

Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

Physical Education Professional

columbiabasin.edu/pep

Department Overview: These courses are designed for the PE major or students interested in a coaching career.

PEC 135 (Formerly PEC 1351)

Swing Analysis and Strategies • 2.0 Credits

A comprehensive study of the individual parts of the modern golf swing with intensive training directed toward precise control and more power. Class meets at Golf Land, Argent & Rd. 42 in Pasco.

PEC 180

Care and Prevention of Athletic Injuries • 3.0 Credits

This course includes information on preventative procedures such as taping and bracing. Care of initial injury including American Red Cross Certification for Adult CPR and First Aid. Rehabilitation and return to activity protocol. This is good information for coaches, athletes, or active people in general.

Courses & Programs

PEC 184 (Formerly PEC 182)

Care & Prevention of Athletic Injuries II • 2.0 Credits

This course is a continuation of the study as to the causes of athletic injury with a focus on rehabilitation. Theories, implications, and techniques such as rehabilitation program development, re-evaluations, communication with the medical community, and modalities are researched. **Prerequisite:** PEC 180.

PEC 185 (Formerly PEC 1821)

Care & Prevention of Athletic Injuries II Lab • 1.0 Credit

Lab to be taken concurrently with PEC 184.

PEC 188 (Formerly PEC 183)

Athletic Training Internship • 2.0 Credits

This course is for students interested in transferring to a four-year athletic training program and therefore need to complete a minimum of 100 internship hours under the supervision of a certified athletic trainer. The internship consists of practical work in the training room and with sports programs. **Prerequisite:** PEC 180.

PEC 189 (Formerly PEC 1831)

Athletic Training Internship Lab • 1.0 Credit

Lab to be taken concurrently with PEC 188.

PEC 230

Introduction to PE • 3.0 Credits

This course is the study of the history and foundations of physical education. Emphasis is placed on basic elements, foundations, specialty areas of further study, career opportunities, and the relationship of physical education to other fields. This course will broaden students' understanding of how the philosophies and programs of physical education, exercise, and sport have evolved to their current status.

PEC 235

Fundamentals of Basketball • 2.0 Credits

History, fundamentals, practice organization, method of instruction, game preparation, and player evaluation are the main topics for instruction.

PEC 236

Fundamentals of Volleyball • 2.0 Credits

An introductory course in the history and development of power volleyball. It is also a study of the basic skills and organization of offensive and defensive strategies.

PEC 239

Fundamentals of Golf • 2.0 Credits

All elements of basic knowledge of golf fundamentals are reviewed with emphasis on methods and techniques of golf instruction for individuals or groups.

PEC 242

Theory of Basketball • 2.0 Credits

Advanced concepts and theory in basketball coaching and continuation of fundamentals of basketball supply students with up-to-date information concerning fundamentals, practice organization, game preparation, and player evaluation. **Prerequisite:** PEC 235.

PEC 243

Theory of Volleyball • 2.0 Credits

Theory of volleyball for prospective coaches and advanced players with the aspects of philosophy, psychology, methods, and organization.

PEC 244

Sports Officiating • 3.0 Credits

This course provides students with the knowledge and expertise necessary to officiate in physical education classes, intramurals, and interscholastically.

PEC 246

Sports Officiating • 3.0 Credits

This course is a continuation of sports officiating with focus on developing an officiating philosophy and understanding the psychology of officiating.

PEC 247

Sports Officiating • 3.0 Credits

This course is a continuation of sports officiating with focus on being physically prepared to officiate, understanding the responsibilities of officiating, and knowing how and where to work as an official.

PEC 248

Theory of Baseball I • 2.0 Credits

Introduces students to the complexities of offensive and defensive strategies. A complete review of the mental aspects of individual and team play. **Prerequisite:** PEC 250.

PEC 249

Theory of Golf • 2.0 Credits

An introduction of the philosophies and strategies involved in golf at all levels. The main objective is to help each student understand and form sound philosophy in teaching and playing the sport. This course includes stroke, match, and best ball strategy and covers weather, game management, and the mental aspects. The complete theory of the mechanics of the golf swing are investigated and explored with reference to the scientific foundation of the maneuver. **Prerequisite:** instructor permission.

PEC 250

Baseball Fundamentals • 3.0 Credits

Study of the basics involved in the total offensive and defensive scheme of baseball. Methods of instruction and techniques of performance are covered along with specific progress drills.

Physics

columbiabasin.edu/physics

Department Overview: Physics courses are required by vast number of technical, occupational and academic disciplines because the Laws of Physics form a foundation for engineering, health sciences and other physical sciences. The Physics department supports these needs by providing conceptual physics, algebra/trigonometric-based physics (general physics) and calculus-based physics (engineering physics). The courses fulfill the requirement for the transfer to four-year institutions and various technical programs.

PHYS 102

Physics of Everyday Experience [M/S] • 5.0 Credits

Designed for non-science majors, this course is a practical introduction to physics and science in everyday life. Lecture demonstrations are used to illustrate physics that we experience in everyday life such as motion, sports, energy and power, gravity and planetary motion, fluids, pressure, aerodynamics, waves, sounds and music, musical instruments, temperature and heat, engines, electricity, lightning, house hold electric circuits, magnets, electric generators, light and colors, images, laser, nuclear energy, radioactivity, and medical imaging technology. This is a lecture only class with no associated lab. **Prerequisite:** grade of 2.0 or better in MATH 040 or 084.

PHYS 199

Special Studies • 1.0 - 5.0 Credits

A class used to explore new coursework.

PHYS 299

Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

PHYS&100 (Formerly PHY 100)

Physics for Non-Science Majors [M/S] • 4.0 Credits

Introduces the principles and concepts of physics using elementary algebraic procedures. Selected topics from classical and modern physics. Primarily for the non-science major. **Prerequisite:** grade of 2.0 or better in MATH 050, 060, 062, 096 or higher.

Courses & Programs

PHYS&101 (Formerly PHY 1001)

Physics Lab for Non-Science Majors [M/S] • 1.0 Credit

Lab to be taken concurrently with PHYS& 100.

PHYS&124 (Formerly PHY 1051, PHYS&131)

General Physics Lab I [M/S] • 1.0 Credit

Lab to be taken concurrently with PHYS& 134.

PHYS&125 (Formerly PHY 1061, PHYS&132)

General Physics Lab II [M/S] • 1.0 Credit

Lab to be taken concurrently with PHYS& 135.

PHYS&126 (Formerly PHY 1071, PHYS&133)

General Physics Lab III [M/S] • 1.0 Credit

Lab to be taken concurrently with PHYS& 136.

PHYS&134 (Formerly PHY 105, PHYS&121)

General Physics I [M/S] • 4.0 Credits

This course is designed for those students that are not majoring in a four-year engineering or physical science degree. Topics include measurement and units, vectors, motion in one and two dimensions, Newton's laws, work and energy, momentum and collisions, circular motion, gravity, and rotational motion. **Prerequisite:** MATH 113 or equivalent with a 2.0 or better, and concurrent enrollment in PHYS& 124.

PHYS&135 (Formerly PHY 106, PHYS&122)

General Physics II [M/S] • 4.0 Credits

Solids and fluids, thermal physics, laws of thermodynamics, vibrations and waves, sound, electric forces and fields, electrical energy, and capacitance. **Prerequisite:** PHYS& 134/124, and concurrent enrollment in PHYS& 125.

PHYS&136 (Formerly PHY 107, PHYS&123)

General Physics III [M/S] • 4.0 Credits

Resistance, direct current circuits, magnetism, inductance, alternating current circuits, electromagnetic waves, reflection, refraction, interference and diffraction of light, mirrors and lenses, and optical instruments. **Prerequisite:** PHYS& 135/125, and concurrent enrollment in PHYS& 126.

PHYS&231 (Formerly PHY 2011)

Engineering Physics Lab I [M/S] • 1.0 Credit

Lab to be taken concurrently with PHYS& 241.

PHYS&232 (Formerly PHY 2021)

Engineering Physics Lab II [M/S] • 1.0 Credit

Lab to be taken concurrently with PHYS& 242.

PHYS&233 (Formerly PHY 2031)

Engineering Physics Lab III [M/S] • 1.0 Credit

Lab to be taken concurrently with PHYS& 243.

PHYS&241 (Formerly PHY 201, PHYS&221)

Engineering Physics I [M/S] • 4.0 Credits

Physics for Engineering or Physical Science majors. Mechanics. **Prerequisite:** MATH& 151, or equivalent, with a GPA of 2.0 or better, and concurrent enrollment in PHYS& 231.

PHYS&242 (Formerly PHY 202, PHYS&222)

Engineering Physics II [M/S] • 4.0 Credits

Mechanics, thermodynamics, and electromagnetism. **Prerequisite:** MATH& 152 and PHYS& 241/231, and concurrent enrollment in PHYS& 232.

PHYS&243 (Formerly PHY 203, PHYS&223)

Engineering Physics III [M/S] • 4.0 Credits

Electromagnetism and optics. **Prerequisite:** PHYS& 242/232, and concurrent enrollment in PHYS& 233.

Political Science

columbiabasin.edu/politicalscience

Department Overview: Political science examines the institutional means through which scarce societal resources are allocated and the processes that make determinations regarding the moral fabric of community life. It combines both normative and descriptive analyses: how power is distributed and for what values or purposes it should be employed. This includes the study of the types and branches of government, means of representation, as well as issues of policy formation. CBC offers a two-year Associate in Arts and Sciences degree with an emphasis in Political Science.

POLS 104 (Formerly PS 104)

State and Local Government [S/B] • 5.0 Credits

An examination of federal, state, and local government relationships; state executive, legislative, judicial, and political party systems; and forms of local governmental units.

POLS 199

Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

POLS 205 (Formerly PS 151)

American Political Thought [S/B] • 5.0 Credits

Examines through classical and contemporary texts the crucial, ethical, and philosophical issues that shaped the founding and continues to be debated up to the modern day.

POLS 299

Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

POLS&201 (Formerly PS 150)

Intro Political Theory [S/B] • 5.0 Credits

An introduction to fundamental concepts and theories in political science, this course uses classic and contemporary works of political thought to deal with basic issues in the study of politics, such as who should rule, political rights, and the nature and limits of political authority.

POLS&202 (Formerly PS 100)

American Government [S/B] • 5.0 Credits

A survey of the system and process of American national politics and government; including the structure and function of the executive, legislative, and judicial branches, and the American political party system.

POLS&203 (Formerly PS 103)

International Relations [S/B] • 5.0 Credits

An examination of various theoretical approaches to international politics, causes of war, approaches to peace, and sources of conflict in the contemporary world.

POLS&204 (Formerly PS 101)

Comparative Government [S/B] • 5.0 Credits

A comparative study of the development and transformation of western democratic, communist, and third world political systems and processes.

Project Management

columbiabasin.edu/projectmanagement

Courses & Programs

Department Overview: The Project Management program provides knowledge and skills in project management, including fundamentals (e.g., initiating, planning, execution, monitoring and control), as well as scheduling software, procurements and contracts, managing human resources and risk management. The program incorporates a hands-on, practical application approach and uses experienced project management practitioner perspectives in the development and execution of the program. The program uses a building block approach of a certificate, two-year Associate in Applied Science degree and a four-year Bachelor of Applied Science degree where each added step in the education builds on and reinforces the earlier knowledge, skills and experiences. The Bachelor of Applied Science in Project Management also offers a concentration option in Construction. The goal of the Project Management program is to equip students with sound project management knowledge and skills with practical experience in project scenarios that resemble real-world situations. Students in this program will be able to apply these project management knowledge and skills in the workplace, in volunteer organizations, or life.

At the end of the program successful students will be able to:

- Develop familiarity with project management processes, terminology and concepts
- Develop familiarity with important project planning processes, terminology and concepts
- Develop familiarity with project execution phase and monitoring/control processes, terminology, concepts and activities
- Develop skills using Microsoft Project or Primavera software for creating and using the project schedule
- Examine procurement concepts and practices including solicitation, source selection and contract administration
- Develop project integration and communication concepts including directing and performing the work defined in the Project Management Plan, activity interrelationships, communicating relevant information to the team and stakeholders and change control
- Develop and apply risk management concepts including risk identification, qualitative and quantitative risk analyses, risk response planning and risk monitoring/control
- Integrate project management concepts in a simulated project(s) environment which includes applying project management concepts and practices, creating and using a project schedule, analyzing and communicating project performance and experiencing and analyzing team behavior

Students may begin a Project Management certificate or degree program during any quarter.

The Bachelor of Applied Science in Project Management is accredited by the Project Management Institute (PMI) Global Accreditation Center for Project Management Education Programs (GAC). GAC accredited programs must demonstrate and meet rigorous global standards of accreditation, which include an assessment of each program's objectives and outcomes, faculty and student evaluations, onsite and online resources, annual self-evaluation and proof of continuous improvements in the area of project management education. GAC accreditation ensures the quality of academic degree programs and their graduates, to meet the standards of the rapidly growing field of project management.

- Students eligible to sit for a PMI credential exam may immediately apply the classroom hours from a completed Project Management (PROJ) course toward the contact hour requirement, rather than waiting until they graduate from the program. The student can be confident that these hours are pre-approved and will automatically be accepted toward fulfilling the contact hour requirement.
- As a GAC accredited program, CBC is able to issue Professional Development Units (PDUs) to students who complete any individual registered Project Management course within their accredited degree program. The PMI credential holder can be confident that these PDUs are pre-approved, and will automatically be accepted toward fulfilling the PMI continuing certification requirement.

PROJ 100

Introduction to Project Management • 5.0 Credits

An introduction to foundational knowledge and concepts for the project management profession. Introduces key project definitions, project phases, and the project management knowledge areas. Also introduces students to project management activities such as scope, cost, and schedule management, project leadership skills, and the project team development model. The role of ethics in project management is also discussed.

PROJ 110

Project Planning • 5.0 Credits

Examines the important planning phase of a project which includes preparing the project management plan, defining the project scope and work breakdown structure; defining the activities and schedule; and estimating the costs and defining the budget. Also addresses planning quality, human resources, communication, risk, and procurement elements of a project. Introduces schedule concepts and is typically taken concurrently with scheduling software course PROJ 130 or 140. **Prerequisite:** PROJ 100 with a 2.0 or better or concurrent enrollment.

PROJ 120

Project Execution & Control • 5.0 Credits

Presents the project execution phase and corresponding monitoring and control activities. Also addresses project team acquisition and development; performing quality assurance/control activities; distributing information; managing stakeholder expectations; and procurement activities. **Prerequisite:** PROJ 110 with a 2.0 or better or instructor permission.

PROJ 130

Introduction to Microsoft Project • 5.0 Credits

Provides hands-on skills using Microsoft Project 2010 software for developing and maintaining the project schedule. Uses Project 2010 to develop the project schedule including such things as creating a work breakdown structure; identifying activities, estimates, durations, and relationships; and assignment of resources. Also provides a basic understanding of such things as capturing performance data; preparing outputs and reports; and using baselines. **Prerequisite:** PROJ 100 with a 2.0 or better.

PROJ 140

Introduction to Primavera • 5.0 Credits

Provides hands-on skills using Primavera software for developing and maintaining the project schedule. Uses Primavera to develop the project schedule including such things as creating a work breakdown structure; identifying activities, estimates, durations, and relationships; and assignment of resources. Also provides a basic understanding of such things as capturing performance data; preparing outputs and reports; and using baselines. **Prerequisite:** PROJ 100 with a 2.0 or better.

PROJ 170

Project Management Internship • 1.0 - 5.0 Credits

Designed to provide students with major-related, supervised, evaluated practical training work experiences which may be paid or voluntary. Students are graded on the basis of documented learning acquired through hands-on new experiences in an actual work setting. **Prerequisite:** enrollment in the Project Management program and instructor permission.

PROJ 211

Project Procurement • 3.0 Credits

Provides basic understanding of the project procurement management including key processes, roles/responsibilities, and types of contracts. Addresses the various roles people play in the procurement process and how procurement management plays a key part in achieving successful projects. **Prerequisite:** PROJ 110 with a 2.0 or better; PROJ 120 with a 2.0 or better or concurrent enrollment.

Courses & Programs

PROJ 222

Project Quality Management • 3.0 Credits

Provides further understanding of how project quality planning and control contribute to sound project management and improved project results. This course addresses quality tools, skills, and techniques. **Prerequisite:** PROJ 110 with a 2.0 or better; PROJ 120 with a 2.0 or better or concurrent enrollment.

PROJ 231

Project Risk Management • 5.0 Credits

Provides additional knowledge and skills for identifying project risks, analyzing risks, and risk responses. Addresses both quantitative and qualitative analysis, risk monitoring and control techniques, risk probability, and risk impacts. **Prerequisite:** PROJ 110 with a 2.0 or better.

PROJ 241

Project Management Capstone • 5.0 Credits

Integrates all the various project management knowledge and skills learned in previous courses into a simulated project(s) including project initiation, planning, execution, and monitoring/control activities in a team environment. Includes evaluation of project decisions to identify improvement opportunities. **Prerequisite:** PROJ 120 with a 2.0 or better; PROJ 130 with a 2.0 or better or PROJ 140 with a 2.0 or better; PROJ 211 with a 2.0 or better; PROJ 221 with a 2.0 or better or PROJ 222 with a 2.0 or better; and PROJ 231 with a 2.0 or better.

PROJ 270

Project Management Internship • 1.0 - 5.0 Credits

Designed to provide students with major-related, supervised, evaluated practical training work experiences which may be paid or voluntary. Students are graded on the basis of documented learning acquired through hands-on new experiences in an actual work setting. **Prerequisite:** enrollment in the Project Management program and instructor permission.

PROJ 299

Special Studies • 1.0 - 5.0 Credits

A class used to explore new coursework.

PROJ 310

Project Contracts & Legal Issues • 5.0 Credits

Develops concepts beyond PROJ 211 dealing specifically with contracts including advanced contract administration topics such as monitoring/change control and claims. Also addresses project management legal issues. **Prerequisite:** PROJ 120 with a 2.0 or better and PROJ 211 with a 2.0 or better.

PROJ 320

Project Monitoring, Control, & Earned Value • 5.0 Credits

Develops monitoring and control issues beyond PROJ 120 including earned value management concepts and skills. **Prerequisite:** PROJ 120 with a 2.0 or better; PROJ 130 with a 2.0 or better or PROJ 140 with a 2.0 or better; or instructor permission.

PROJ 330

Project HR Management & Communication Skills • 5.0 Credits

Addresses project team development, leadership, and dynamics, as well as dealing with conflict. Specifically needed communication skills are identified and developed through appropriate activities (e.g., presentations, role play). **Prerequisite:** PROJ 120 with a 2.0 or better.

PROJ 370

Project Management Internship • 1.0 - 5.0 Credits

Designed to provide students with major-related, supervised, evaluated practical training work experiences which may be paid or voluntary. Students are graded on the basis of documented learning acquired through hands-on new experiences in an actual work setting. **Prerequisite:** enrollment in the Project Management program and instructor permission.

PROJ 411

Advanced Microsoft Project • 5.0 Credits

Develops advanced schedule concepts and practices using Microsoft Project 2010 software, beyond those learned in PROJ 130, including topics such as resource leveling, critical path management, baselining, and progress reporting. The class utilizes scenarios to be addressed using the software. **Prerequisite:** PROJ 130 with a 2.0 or better and PROJ 320 with a 2.0 or better or concurrent enrollment in PROJ 320.

PROJ 421

Advanced Primavera • 5.0 Credits

Develops advanced schedule concepts and practices using Primavera software, beyond those learned in PROJ 140, including topics such as resource leveling, critical path management, baselining, and progress reporting. The class utilizes scenarios to be addressed using the software. **Prerequisite:** PROJ 140 with a 2.0 or better and PROJ 320 with a 2.0 or better or concurrent enrollment in PROJ 320.

PROJ 470

Project Management Internship • 1.0 - 5.0 Credits

Designed to provide students with major-related, supervised, evaluated practical training work experiences which may be paid or voluntary. Students are graded on the basis of documented learning acquired through hands-on new experiences in an actual work setting. **Prerequisite:** enrollment in the Project Management program and instructor permission.

PROJ 480

Advanced Project Management Capstone • 5.0 Credits

Integrates all the various project management knowledge and skills learned in previous courses into a simulated project(s) including project initiation, planning, execution, and monitoring/control activities in a team environment. This course includes evaluation of project decisions to identify improvement opportunities. **Prerequisite:** PROJ 231 with a 2.0 or better; PROJ 310 with a 2.0 or better; PROJ 320 with a 2.0 or better; PROJ 330 with a 2.0 or better; and either PROJ 221 with a 2.0 or better or PROJ 222 with a 2.0 or better; and either PROJ 411 with a 2.0 or better or PROJ 421 with a 2.0 or better; or instructor permission.

Psychology

columbiabasin.edu/psychology

Department Overview: Psychology is the scientific study of human behavior and mental processes. General Psychology (PSYC& 100) provides an overview of different perspectives held by psychologists. Major topics include research methods, learning theory, neuropsychology, memory, consciousness and motivation. General Psychology is a prerequisite for many 200-level classes.

PSYC 103 (Formerly PSY 100)

Applied Psychology • 3.0 Credits

Designed to meet requirements for students graduating with vocational and technical degrees. The application of psychology in the workplace and the development of human relations skills is emphasized.

PSYC 106 (Formerly PSY 106)

Child Growth & Development • 3.0 Credits

This course provides an overview of all aspects of child growth and the developmental stages of children from conception to adolescence, including the physical, cognitive, linguistic, emotional, mental, social, and personality development of the child. Provides an understanding of the things and situations that can affect how a child behaves.

PSYC 199

Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

Courses & Programs

PSYC 201 (Formerly PSY 201)

Social Psychology [S/B] • 5.0 Credits

This course will provide students with an introduction to the field of social psychology, a subfield of the science of psychology that focuses on the perceptions, thoughts, feelings, and behaviors of individuals and groups within a social context. As this is a survey course, this class will give you a broad overview of the major theories and findings within social psychology. **Recommended prerequisite:** PSYC& 100.

PSYC 205 (Formerly PSY 205)

Psychology of Adjustment • 5.0 Credits

A study of important findings of modern psychology as they relate to adjustment: social development, personality theory, motivation, mental health, and resources for personal growth.

PSYC 209

Fundamentals of Psychological Research [S/B] • 5.0 Credits

Covers psychological research methodology and techniques. Topics include the logic of hypothesis testing, experimental design, research strategies and techniques, fundamentals of scientific writing, evaluation of research literature in psychology, and ethical issues in psychological research. Students learn to apply computer software to data collected in psychological research, and participate in a class research project. **Prerequisite:** PSYC& 100.

PSYC 217

Forensic Psychology • 5.0 Credits

Introduces students to the interface of psychology and the law. The applications of psychological theory, research, methods, and expertise to issues that come before the legal system are the focus of this course. Topics include forensic assessment; competency and insanity; dangerousness and psychopathy; domestic violence; profiling; child abuse; and sex offenders. Legal standards regarding insanity, civil commitment, and eye-witness and expert testimony will be reviewed.

PSYC 270

Health Psychology • 5.0 Credits

An overview of the psychological, behavioral, and social factors in health and disease. The biopsychosocial approach integrates the understanding and application of biological, psychological, and social factors as they relate to one's health and overall well-being. Some topics covered include stress and wellness, the adoption of healthy behaviors, and the avoidance of maladaptive behaviors. **Recommended prerequisite:** PSYC& 100.

PSYC 280

Positive Psychology • 5.0 Credits

Historically, psychology has been somewhat negative in orientation, through an emphasis on human weaknesses and liabilities, abnormalities, developmental difficulties, pathology, and treatment modalities. Mental illness, rather than mental health, has been a primary focus for research and practice. This course describes how the scope of psychology has recently been broadened to understand positive emotion, build strength and virtue, and provide a framework for creating what Aristotle called the good life. Topics include happiness (subjective well-being, positive emotions), optimal performance, personal fulfillment, optimal wellness/medical health, emotional intelligence, creativity, optimism, hope, self-efficacy, goals and life commitments, wisdom, spirituality, meaning and purpose in life, and the civic virtues. **Prerequisite:** PSYC& 100.

PSYC 297 (Formerly PSYC 2972)

Field Experience • 1.0 - 3.0 Credits

Students work as volunteers in a community agency and complete a journal and report (usually 1 credit). **Prerequisite:** PSYC& 100 and instructor permission.

PSYC 299

Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

PSYC&100 (Formerly PSY 101)

General Psychology [S/B] • 5.0 Credits

Introduction to the scientific study of human behavior and mental processes. Topics include major psychological theory, learning, neuropsychology, consciousness, cognition, memory, and research methods.

PSYC&180 (Formerly PSY 230)

Human Sexuality • 5.0 Credits

A survey of human sexuality from biological, psychological, sociocultural, and sociobiological perspectives. Topics include sexual orientation, sexual dysfunction, and sexually transmitted diseases.

PSYC&200 (Formerly PSY 240)

Lifespan Psychology [S/B] • 5.0 Credits

A comprehensive survey of psychological development of the human from conception to death using the biopsychosocial approach. **Prerequisite:** PSYC& 100.

PSYC&220 (Formerly PSY 202)

Abnormal Psychology [S/B] • 5.0 Credits

Explores the conceptualization of abnormality and mental disorders from sociocultural, biological, psycho-dynamic, cognitive, and behavioral perspectives. Describes maladaptive mental disorders as well as their incidence and treatment. **Prerequisite:** PSYC& 100.

Race, Ethnicity, & Immigration

columbiabasin.edu/rei

Department Overview: The United States is a nation made of people of various racial and ethnic backgrounds and whose ancestors, or themselves, migrated to the nation in order to create a new and better life for themselves and their families. This program provides students an opportunity to examine these aspects of American society through a combination of courses in history, anthropology, political science and sociology. Students also examine how the U.S. experience in race, ethnicity and immigration compares to that of other areas of the world. Students choosing to study Race, Ethnicity, & Immigration can earn an AA degree with that emphasis by taking specific courses in History, Intercultural Studies, Psychology and/or Sociology. See degree plans for more information about requirements and specific programs for course descriptions.

Radiation Protection Technician

columbiabasin.edu/rpt

Department Overview: The Radiation Protection Technician (RPT) option of the Nuclear Technology program develops technicians who measure and record radiation levels. Technicians also maintain and calibrate radiation protection instruments. A RPT has a key role in fostering a safe work environment for employees working with radioactive materials or in radiation areas. RPTs must be able to assist in the development of procedures for the operation of radiation protection instruments and in the evaluation of plans to limit the dose of radiation workers receive.

RPT 111

Radiation Fundamentals • 5.0 Credits

This course provides future radiological protection technicians with an overview of radioactivity, sources of radiation, and radioactive decay. Emphasis is placed on plant safety, radiological hazards, and radioactivity containment. **Prerequisite:** admission to the Nuclear Technology program.

Courses & Programs

RPT 121

Radiation Monitoring • 5.0 Credits

Principles of radiation detection and measurement principles. Application of radiological survey and analysis instruments, sample collection equipment, and calibration sources and equipment. **Prerequisite:** RPT 111 or concurrent enrollment or instructor permission.

RPT 131

Radiation Effects • 5.0 Credits

Radiation biology, radiation effects on simple chemical systems, biological molecules, cells, organisms, and humans. Stochastic vs. deterministic effects, units of exposure, dose and dose equivalent, external dosimetry, internal dosimetry, control of external and internal exposure, detector and instrumentation systems for measuring dose. **Prerequisite:** RPT 111 or 121 or instructor permission.

RPT 141

Radioactive Materials Handling • 5.0 Credits

Radioactive material control and methods to minimize and control external exposure and airborne radioactivity. **Prerequisite:** RPT 111.

RPT 211

Radiological Safety and Response • 5.0 Credits

This course focuses on contamination control and appropriate responses to radiological events. **Prerequisite:** RPT 111.

RPT 222

Radiation Protection • 5.0 Credits

Practical applications and demonstrations of radiation protection and health physics. Radiological protection standards, contamination control, radiological incident evaluation and control, decontamination, and environmental monitoring. **Prerequisite:** RPT 111.

Radiologic Technology

columbiabasin.edu/radtech

Department Overview: The Radiologic Technology program at Columbia Basin College is an eight-quarter program preparing students to be eligible to become certified by taking the National Registry Examination offered by the American Registry of Radiology Technologists.

Radiology Technologists work directly with the patient and physician performing sophisticated diagnostic x-ray procedures including radiation safety, radiographic exposures, image and film processing and operating many types of technological equipment. The radiologic technologist also provides professional handling and care of patients.

The program requires a series of credit courses directly related to radiologic sciences. The program also requires students have completed major support and general education courses prior to admission. For additional information, please refer to the Associate in Applied Science in Radiologic Technology degree requirements.

The Radiologic Technology program admits students annually during summer quarter for this eight-quarter program. Once admitted into the program, each student will be responsible for providing documentation of the following additional requirements:

- Program specific immunization records (details provided with admission into the program)
- Current American Heart Association CPR card for Healthcare Provider
- Satisfactory criminal history background check using a college approved vendor. Criminal history background information is required of all Health Science students. Information obtained will be considered in

determining student eligibility to complete clinical coursework. Inability to participate in clinical experiences due to the information obtained from the background check may result in the student's inability to satisfactorily complete program degree requirements. Any infraction while enrolled in the Radiologic Technology program should be self-reported to the program coordinator. Questions regarding the background policy should be directed to the Dean for Health Sciences at 509.544.8310.

For more information regarding the Radiologic Technology program, please visit columbiabasin.edu/radtech or contact the Health Sciences Division at 509.544.8306 or 509.544.8300.

RATEC102

Radiographic Physics • 5.0 Credits

Examines X-ray circuits, tubes, and X-ray equipment. Topics include design and application, troubleshooting and maintenance, equipment testing, imaging intensification, cineradiography, and advanced imaging procedures. **Prerequisite:** acceptance into the Radiologic Technology program.

RATEC103

Principles of Radiographic Exposure • 3.0 Credits

Presents basic elements of radiologic technique and other factors influencing it. Format includes two hours of lecture and a two-hour lab each week. **Prerequisite:** acceptance into the Radiologic Technology program.

RATEC104

Advanced Radiographic Procedures • 4.0 Credits

Examines the theory and principles of contrast media used in radiologic examinations and special positioning. **Prerequisite:** acceptance into the Radiologic Technology program.

RATEC105

Introduction to Radiographic Technique • 2.0 Credits

Introduces concepts of electromagnetic radiation necessary to understanding the production and control of X-radiation. Students learn how the radiographic image is created and what factors affect the appearance of that image. **Prerequisite:** acceptance into the Radiologic Technology program.

RATEC106

Computed Imaging • 2.0 Credits

Presents computed imaging in comparison to screen-film technology. Topics include identifying components, understanding how they affect the image, and quality control. **Prerequisite:** acceptance into the Radiologic Technology program.

RATEC107

Positioning and Related Anatomy I • 2.0 Credits

Presents basic positioning principles and terminology. Students get demonstration and film evaluation experience in positioning and related anatomy of the chest, abdomen, and upper extremities. Format includes two hours of lecture and a two-hour lab each week. **Prerequisite:** acceptance into the Radiologic Technology program.

RATEC108

Positioning and Related Anatomy II • 3.0 Credits

Provides demonstration and film evaluation experience in positioning and related anatomy of the spine, pelvis, and lower extremities. Format includes two hours of lecture and a two-hour lab each week. **Prerequisite:** acceptance into the Radiologic Technology program.

RATEC109

Positioning and Related Anatomy III • 3.0 Credits

Provides demonstration and film evaluation experience in positioning and related anatomy of the cervical and thoracic spine, bony thorax, skull, facial bones, and sinuses. Format includes two hours of lecture and a two-hour lab each week. **Prerequisite:** acceptance into the Radiologic Technology program.

RATEC111 (Formerly RATEC1113)

Clinical Education I • 5.0 Credits

Second in a series of supervised clinical education experiences. Students are assigned to clinical sites, 16 hours per week. Students observe and perform diagnostic radiological procedures. **Prerequisite:** acceptance into the Radiologic Technology program.

Courses & Programs

RATEC112 (Formerly RATEC1123)

Clinical Education II • 5.0 Credits

Third in a series of supervised clinical education experiences. Students are assigned to clinical sites, 16 hours per week. Specific performance objectives are established for each student. **Prerequisite:** acceptance into the Radiologic Technology program.

RATEC113 (Formerly RATEC1133)

Clinical Education III • 5.0 Credits

Fourth in a series of supervised clinical education experiences. Students are assigned to clinical sites, 16 hours per week. Specific performance objectives are established for each student. **Prerequisite:** acceptance into the Radiologic Technology program.

RATEC114 (Formerly RATEC1143)

Supplemental Clinical Practicum I • 1.0 Credit

An optional course that offers supervised clinical education experiences between the fall and winter quarter of the first program year. Students are assigned to clinical sites, 16 hours per week. Students observe and perform diagnostic radiologic procedures. **Prerequisite:** acceptance into the Radiologic Technology program and instructor permission.

RATEC120

Nursing Procedures • 2.0 Credits

Presents basic nursing procedures emphasizing the role of the radiologic technologist in various patient-care situations. Incorporates seven hours of AIDS and bloodborne pathogen education. Healthcare provider BLS is included. **Prerequisite:** acceptance into the Radiologic Technology program.

RATEC121

Patient Care • 2.0 Credits

Examines patient care and assessment in the imaging department, as well as in other special care units. Topics include medications and their administration, acute patient care, bedside radiography, and patient lines and tubes. **Prerequisite:** acceptance into the Radiologic Technology program.

RATEC125

Medical Terminology • 1.0 Credit

Presents a systematic approach to medical terminology combining word roots, prefixes, and suffixes. **Prerequisite:** acceptance into the Radiologic Technology program.

RATEC127

Introduction to Sectional Anatomy • 2.0 Credits

Expands knowledge of anatomy through the introduction of multiple plane orientations. Students review normal anatomy of the brain, chest, abdomen, pelvis, neck, and spine. **Prerequisite:** acceptance into the Radiologic Technology program.

RATEC199

Special Studies • 1.0 - 10.0 Credits

A class used to explore new coursework.

RATEC207

Concept Integration • 2.0 Credits

Prepares students for the American Registry of Radiologic Technologists exam through a comprehensive review. **Prerequisite:** acceptance into the Radiologic Technology program.

RATEC210 (Formerly RATEC2103)

Clinical Education IV • 13.0 Credits

Fifth in a series of supervised clinical education experiences. Students are assigned to clinical sites, 40 hours per week for 11 weeks. Specific performance objectives are established for each student. **Prerequisite:** acceptance into the Radiologic Technology program.

RATEC211 (Formerly RATEC2113)

Clinical Education V • 8.0 Credits

Sixth in a series of supervised clinical education experiences. Students are assigned to clinical sites, 24 hours per week. Specific performance objectives are established for each student. **Prerequisite:** acceptance into the Radiologic Technology program.

RATEC212 (Formerly RATEC2123)

Clinical Education VI • 8.0 Credits

Seventh in a series of supervised clinical education experiences. Students are assigned to clinical sites, 24 hours per week. Specific performance objectives are established for each student. **Prerequisite:** acceptance into the Radiologic Technology program.

RATEC213 (Formerly RATEC2133)

Clinical Education VII • 8.0 Credits

Eighth in a series of supervised clinical education experiences. Students are assigned to clinical sites, 24 hours per week. Specific performance objectives are established for each student. **Prerequisite:** acceptance into the Radiologic Technology program.

RATEC214 (Formerly RATEC2143)

Supplemental Clinical Practicum II • 1.0 Credit

An optional course that offers supervised clinical education experiences between the fall and winter quarter of the second program year. Students are assigned to clinical sites, 16 hours per week. Students observe and perform diagnostic radiologic procedures. **Prerequisite:** acceptance and current enrollment in the Radiologic Technology program and instructor permission.

RATEC220

Pathology I • 3.0 Credits

Introduces changes that occur in disease and injury, with application to radiologic technology. Topics include respiratory, skeletal, gastrointestinal, and urinary systems. **Prerequisite:** acceptance into the Radiologic Technology program.

RATEC221

Pathology II • 2.0 Credits

Continues RATEC 220. Students become familiar with the etiology, symptoms, prognosis, and imaging of disease processes of the cardiovascular, nervous, hemopoetic, endocrine, and reproductive systems. **Prerequisite:** acceptance into the Radiologic Technology program.

RATEC240

Radiation Biology and Protection • 3.0 Credits

Explores types of radiation, interaction of radiation with matter, and the effects of those interactions in human tissue. Students learn methods and principles of radiation protection for both patient and technologist. **Prerequisite:** acceptance into the Radiologic Technology program.

RATEC296

Special Topics in Radiology • 2.0 Credits

Allows study of special topics that may be necessary to update students in the field of radiologic technology. **Prerequisite:** acceptance into the Radiologic Technology program or instructor permission.

RATEC299

Special Studies • 1.0 - 10.0 Credits

A class used to explore new coursework.

Reading

columbiabasin.edu/reading

Department Overview: The Reading department offers classes for students who need to build and/or improve college reading skills or who wish to acquire college vocabulary.

Courses & Programs

RDG 091

Reading Skills • 5.0 Credits

Reinforces essential reading comprehension skills: recognizing vocabulary in context, locating main ideas, understanding supporting details, identifying transitions, making inferences, outlining and summarizing, and recognizing patterns of organization. This class gives students an opportunity to practice and improve these strategies in a supportive environment. **Prerequisite:** appropriate placement or teacher recommendation.

RDG 099

College Reading Skills • 5.0 Credits

Breaks reading down into the skills necessary for academic success: learning vocabulary in context, locating main ideas and supporting details, and recognizing inferences, transitions, patterns of organization, purpose and tone, support for argument, and fact and opinion. **Prerequisite:** appropriate placement or successful completion of RDG 091, or teacher recommendation.

RDG 115

Vocabulary Improvement • 1.0 - 3.0 Credits

This class teaches students to advance their vocabulary for college-level writing using a words-in-context approach.

RDG 199

Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

RDG 299

Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

Russian

columbiabasin.edu/russian

Department Overview: Our Russian classes offer student-centered instruction that focuses on communicating effectively in Russian, appreciating the Russian culture and recognizing linguistic and cultural connections between the Russian-speaking parts of the world and the United States.

RUSS&121 (Formerly RUS 101)

Russian I [H] • 5.0 Credits

Introduction to the Russian language including speaking and listening skills, reading, writing, and grammar and Russian culture including geography, customs, daily life, and heritage. Designed for the novice learner of Russian, with little or no proficiency in the Russian language. **Recommended prerequisite:** successful completion of at least ENGL 099.

RUSS&122 (Formerly RUS 102)

Russian II [H] • 5.0 Credits

Introduction to the Russian language including speaking and listening skills, reading, writing, and grammar and Russian culture including geography customs, daily life, and heritage. **Prerequisite:** RUSS& 121 or instructor permission.

RUSS&123 (Formerly RUS 103)

Russian III [H] • 5.0 Credits

Introduction to the Russian language including speaking and listening skills, reading, writing, and grammar and Russian culture including geography, customs, daily life, and heritage. **Prerequisite:** RUSS& 122 or instructor permission.

Senior Citizen

Department Overview: The Senior Citizen department offers a variety of opportunities for the lifelong learner to take courses for professional development or personal enrichment.

SNR 015

Senior Fitness • 0.0 Credits

Class includes total fitness program involving strength, flexibility, muscle toning, and aerobic exercise. Orientation and instructor's permission are required for this class.

Social Science

columbiabasin.edu/socialscience

Department Overview: The program offers courses in undergraduate social science research.

SSCI 199

Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

SSCI 290

Social Research Methods [S/B] • 4.0 Credits

Introduces the theory, methodology, and some of the specific techniques of social science research. Students learn how to compose research questions, review the literature, make measurements and obtain data, perform basic analyses of qualitative and quantitative data, and write up research findings. This course also explores the philosophical underpinnings and ethical considerations involved in social research. Intended for students majoring in the social or behavioral sciences.

SSCI 291 (Formerly SSCI 2901)

Social Research Methods Lab [S/B] • 1.0 Credit

Lab to be taken concurrently with SSCI 290.

Social Work

Department Overview: Social work is a profession dedicated to enhancing the social functioning of all people. Generally speaking, social work promotes the development of environmental conditions that will help people achieve their maximum potential. Specifically, social work may take many forms; psychological services, child protection, government planning and policymaking, and much, much more.

The Social Work program at CBC prepares you for a career in social work. It helps you develop transferable skills and the ability to find work in a wide variety of employment fields.

SOWK 101 (Formerly HS 101)

Introduction to Social Work • 5.0 Credits

An overview of social work experience including history, purpose and tasks, practice settings, and future trends of social work profession.

SOWK 103 (Formerly HS 103)

Social Work Ethics • 5.0 Credits

The course is designed to review, discuss, and evaluate ethics as it pertains to the field of Social Work. The course will cover current ethical codes, ethical decision making, and how students' personal beliefs, attitudes, biases, and values impact their role as helping professionals.

Courses & Programs

SOWK 201 (Formerly HS 201)

Counseling Theory and Practice • 5.0 Credits

This course is an overview of major theories of counseling and psychotherapy. Students will be exposed to a wide variety of theories and have the opportunity to apply those approaches in classroom exercises and role-playing situations. Students will have the opportunity to develop a unique style of counseling, utilizing effective techniques with an emphasis on multicultural awareness. **Prerequisite:** SOWK 101 or concurrent enrollment.

Sociology

columbiabasin.edu/sociology

Department Overview: The Sociology department is dedicated to offering courses which concern the scientific study of the social group aspect of human life. Our courses range from concentrating on small groups (social psychology) to institutions (marriage and family) to large-scale issues (social problems). SOC& 101 provides an introduction to each of these areas.

SOC 110

Gender, Media, & Popular Culture [S/B] • 5.0 Credits

This course explores how men and women, as well as the qualities of masculinity and femininity, are portrayed in print, visual, and news media, as well as the relationship between gender and cultural experiences, such as technology, sports, and violence.

SOC 115

Intro to Middle East History & Society [S/B] • 5.0 Credits

This course will introduce students to the sociology and history of the Middle East as one of the most diverse regions in the world. Specifically, it examines the historical development as well as the current transformation of social, cultural, economic, and political systems of Middle Eastern societies. Topics will be examined using a macro-sociological approach which analyzes both their internal dynamics and their role and place in the world. **This course is cross-listed with HIST 115. Credit cannot be received for both courses.**

SOC 150

Marriage-Family [S/B] • 5.0 Credits

The family is discussed in broad sociobiological, historical, and comparative perspectives. Modern family life is analyzed after conceptual frameworks have been developed.

SOC 160

Gender Studies • 5.0 Credits

Societies create many roles for their members, depending upon technology, organization, and the distribution of power. Some of those roles are assigned on the basis of sex. This course examines the social creation of those gender roles assigned to sex and sexual behavior, and explores the inner life of acting out those roles.

SOC 197

Field Experience • 1.0 - 3.0 Credits

Arrangements are made for students to receive actual field experience. The number of hours per week determines the credit enrollment. **Prerequisite:** SOC& 101 and instructor permission.

SOC 199

Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

SOC 220

Globalization [S/B] • 5.0 Credits

Sociological analysis of the global interconnectedness of things, people, and ideas. Topics include economic development and trade, immigration and citizenship, human rights, transmission of culture and knowledge, and new technologies including the internet. Emphasis on understanding the significance of social forces and inequalities in shaping globalization processes. Cross-listed as ICS 220 (credit cannot be received for both courses).

SOC 230

Human Sexuality • 3.0 Credits

A survey of human sexuality from biological, psychological, sociocultural, and sociobiological perspectives. Topics include sexual orientation, sexual dysfunction, and sexually transmitted diseases.

SOC 269

Sociology of World Cinema [S/B] • 5.0 Credits

Introduces one of the most vital and significant aspects of cultural life in the world. The world cinema is central to an artistic self-awareness that reflects a range of dominant social and cultural issues. Through a number of feature films from the Arab, Iranian, Israeli, Turkish, Chinese, Indian, French, Italian, German, Mexican, and American cinema, this course takes these cultural products as the aesthetic expressions of some enduring social, cultural, political, and economic concerns in contemporary world societies. A total of about ten feature films are shown and discussed in the course of the quarter.

SOC 297

Field Experience • 1.0 - 3.0 Credits

Arrangements are made for students to receive actual field experience. The number of hours per week determines the credit enrollment. **Prerequisite:** SOC& 101 and instructor permission.

SOC 299

Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

SOC 305

Cybercrime: A Sociological Perspective [S/B] • 5.0 Credits

Cybercrime is a deviant behavior involving the illegal use of computer technology and the internet against individuals, social groups, and institutions. This course examines cybercrime and its various types (such as identity theft, bullying, and cyber-terrorism) as a social problem in the United States and the world. The goal of this course is to introduce students to the theories and methods used by sociologists to understand the different dimensions of cybercrime including their causes, costs, and challenges to society, and possible solutions. Topics include: cyber-sociology, crime and deviance, types of cybercrime, challenges to social order, society's responses to cybercrime, and socio-economic and ethical consequences of cybercrime. **Prerequisite:** acceptance into the Bachelor of Applied Science program or instructor permission. **Recommended:** SOC& 101 or 201.

SOC& 101 (Formerly SOC 101)

Intro to Sociology [S/B] • 5.0 Credits

An introduction to the scientific study of society. Emphasis on relationship of the individual to society, inequality, social institutions, and deviant behavior.

SOC& 201 (Formerly SOC 201)

Social Problems [S/B] • 5.0 Credits

Examines conditions that adversely affect the quality of life in the United States. Deviant behavior (crime, alcoholism, drug abuse, sexual deviance, mental illness) and problems of inequality (including poverty, racism, and sexism) are to be covered.

Spanish

columbiabasin.edu/spanish

Courses & Programs

Department Overview: Our Spanish classes offer student-centered instruction that focuses on communicating effectively in Spanish, appreciating the Hispanic culture and recognizing linguistic and cultural connections between the Spanish-speaking parts of the world and the United States. Heritage Learners of Spanish are strongly encouraged to enroll in SPAN 205, SPAN 206, or SPAN 207.

The placement guidelines and process are available on the World Languages webpage. Information on how to Prior Learning Credits is also available on the webpage.

SPAN 104 (Formerly SPA 104)

Intensive 1st Year Spanish [H] • 15.0 Credits

An intensive introduction to the Spanish language (including speaking and listening skills, reading, writing, and grammar) and Hispanic culture (including geography, customs, daily life, and heritage).

SPAN 110 (Formerly SPA 110)

Beginning Spanish for Professionals [H] • 5.0 Credits

A beginning-level Spanish course designed for those who interact with Spanish-speaking people professionally, as customers, clients, patients, or co-workers. This course is also intended for students who intend to follow business, service, legal, or medical professions. This class begins with basic Spanish language study, followed by activities specifically designed to meet the individual needs and professions of the participants. No previous Spanish is required.

SPAN 111 (Formerly SPA 111)

Intermediate Spanish for Professionals [H] • 5.0 Credits

The second level of Spanish for Professionals, is a course designed for those who interact with Spanish-speaking people professionally, as customers, clients, patients, or co-workers. This course is also intended for students who intend to follow business, service, legal, or medical professions. Continuing basic Spanish instruction is followed by activities specifically designed to meet the individual needs and professions of the participants. **Prerequisite:** SPAN 110, SPAN& 121, or instructor permission.

SPAN 112 (Formerly SPA 112)

Advanced Spanish for Professionals [H] • 5.0 Credits

The third level of Spanish for Professionals, a course designed for those who interact with Spanish-speaking people professionally, as customers, clients, patients, or co-workers. This course is also intended for students who intend to follow business, service, legal, or medical professions. Continuing Spanish language instruction is followed by activities specifically designed to meet the individual needs and professions of the participants. **Prerequisite:** SPAN 111, SPAN& 122, or instructor permission.

SPAN 150 (Formerly SPA 150)

Beginning Conversational Spanish • 1.0 - 5.0 Credits

Intensive practice in speaking and listening with an emphasis on surviving in everyday situations. **Recommended prerequisite:** successful completion of at least SPAN& 121.

SPAN 151 (Formerly SPA 151)

Beginning Conversational Spanish • 1.0 - 5.0 Credits

Intensive practice in speaking and listening with an emphasis on surviving in everyday situations. **Recommended prerequisite:** successful completion of at least SPAN& 121.

SPAN 152 (Formerly SPA 152)

Conversational Spanish • 5.0 Credits

Intensive practice in speaking and listening with an emphasis on surviving in everyday situations. **Recommended prerequisite:** successful completion of SPAN& 121.

SPAN 199

Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

SPAN 205 (Formerly SPA 205)

Spanish for Spanish Speakers [H] • 5.0 Credits

Native or near-native speakers of Spanish develop and improve reading, writing, and grammar skills in their native language, while learning to appreciate the depth and diversity of Latino culture both in the United States and abroad. Special attention is given to spelling, accents, grammar, and vocabulary of standard Spanish. Students are also introduced to a comprehensive and analytical survey of Spanish and Latin American literature.

SPAN 206 (Formerly SPA 206)

Spanish for Spanish Speakers [H] • 5.0 Credits

Designed for native or near-native speakers of Spanish who learn Spanish at home and wish to reactivate their use of the Spanish language, while expanding their academic Spanish language skills and cultural knowledge. Emphasis on speaking, reading, writing, and listening comprehension, in response to students' specific needs. Special attention is given to advanced grammar and vocabulary of standard Spanish. **Prerequisite:** SPAN 205 or instructor permission.

SPAN 207 (Formerly SPA 207)

Spanish for Spanish Speakers [H] • 5.0 Credits

Designed for native or near-native speakers of Spanish who learn Spanish at home and wish to reactivate their use of the Spanish language, while expanding their academic Spanish language skills and cultural knowledge. Emphasis on speaking, reading, writing, and listening comprehension, in response to students' specific needs. Special attention is given to advanced grammar and vocabulary of standard Spanish. Students are introduced to a comprehensive and analytical survey of Spanish and Latin American literature. **Prerequisite:** SPAN 206 or instructor permission.

SPAN 250 (Formerly SPA 250)

Intermediate Conversational Spanish • 1.0 - 5.0 Credits

Intensive practice in speaking Spanish for students who have already gained a knowledge of beginning-level grammar and vocabulary. Class is conducted entirely in Spanish. **Prerequisite:** one year of college-level Spanish or instructor permission.

SPAN 251 (Formerly SPA 251)

Intermediate Conversational Spanish • 1.0 - 5.0 Credits

Intensive practice in speaking Spanish for students who have already gained a knowledge of beginning-level grammar and vocabulary. Class is conducted entirely in Spanish. **Prerequisite:** one year of college-level Spanish or instructor permission.

SPAN 252 (Formerly SPA 252)

Intermediate Conversational Spanish • 1.0 - 5.0 Credits

Intensive practice in speaking Spanish for students who have already gained a knowledge of beginning-level grammar and vocabulary. Class is conducted entirely in Spanish. **Prerequisite:** one year of college-level Spanish or instructor permission.

SPAN 260 (Formerly SPA 260)

Spanish Literature Readings [H] • 3.0 Credits

An introduction to Spanish and Spanish American Literature, with reading selections from a variety of Hispanic authors and discussions of literary movements and periods. Taught entirely in Spanish. **Prerequisite:** SPAN& 223 or instructor permission.

SPAN 261 (Formerly SPA 261)

Spanish Literature Readings [H] • 3.0 Credits

An introduction to Spanish and Spanish American Literature, with reading selections from a variety of Hispanic authors and discussions of literary movements and periods. Taught entirely in Spanish. **Prerequisite:** SPAN& 223 or instructor permission.

SPAN 262 (Formerly SPA 262)

Spanish Literature Readings [H] • 3.0 Credits

An introduction to Spanish and Spanish American Literature, with reading selections from a variety of Hispanic authors and discussions of literary movements and periods. Taught entirely in Spanish. **Prerequisite:** SPAN& 223 or instructor permission.

Courses & Programs

SPAN 281

Spanish Medical Interpreting I • 5.0 Credits

The Spanish Medical Interpreting program is a sequential, three-quarter vocational certificate program, consisting of Spanish Medical Interpreting I, II, and III. The program prepares students for state or national medical interpreter certification and to enter the workforce as professional, ethical, and competent healthcare interpreters. Students are introduced to healthcare interpreting as a profession, concepts and relevant terminology in biomedicine, and given opportunities to develop foundational skills in healthcare interpreting. Topics include: International code of ethics and its application, language access laws, HIPAA, interpreting modalities and protocols, basic note-taking skills, self-evaluation, glossary building and intervention techniques. **Prerequisite:** 1. Native-like proficiency in English and Spanish. 2. Applicants must pass an entrance test to be admitted. Recommended courses: HSCI 147, SPAN 205, 206, 207. Cross-listed as HSCI 148 (credit cannot be received for both courses).

SPAN 282

Spanish Medical Interpreting II • 5.0 Credits

The Spanish Medical Interpreting program prepares students for state or national medical interpreter certification and to enter the workforce as professional, ethical, and competent healthcare interpreters. Students are introduced to healthcare interpreting as a profession, concepts and relevant terminology in biomedicine, and given opportunities to develop foundational skills in healthcare interpreting. This course builds on the knowledge and skills acquired in Spanish Medical Interpreting I. Topics include: National code of ethics and standards of practice, ethical decision-making, basic medical prefixes, roots and suffixes, note-taking and sight translation skills, interpreter positioning, language and communication dynamics, and the role of the interpreter in health equity. **Prerequisite:** HSCI 148 or SPAN 281 with a 1.0 or higher. Cross-listed as HSCI 149 (credit cannot be received for both courses).

SPAN 283

Advanced Spanish Medical Interpreting • 5.0 Credits

The Spanish Medical Interpreting program prepares students for state or national medical interpreter certification and to enter the workforce as professional, ethical, and competent healthcare interpreters. Students are introduced to healthcare interpreting as a profession, concepts and relevant terminology in biomedicine, and given opportunities to develop foundational skills in healthcare interpreting. This course builds on the knowledge and skills acquired in Spanish Medical Interpreting II. This course provides students with guided interpreting practice. Topics include: State code of ethics, abbreviations in healthcare, the concepts of patient advocacy, communicative autonomy, cultural brokering and responsiveness, and business practices in the industry. **Prerequisite:** HSCI 149 or SPAN 282 with a 1.0 or higher. Cross-listed as HSCI 150 (credit cannot be received for both courses).

SPAN 299

Special Studies • 1.0 - 15.0 Credits

A class used to explore new coursework.

SPAN&121 (Formerly SPA 101)

Spanish I [H] • 5.0 Credits

Introduction to the Spanish language including conversational skills, reading, writing and grammar, and Hispanic culture including geography, customs, daily life, and heritage. Designed for the novice learner of Spanish, with little or no proficiency in the Spanish language. **Recommended prerequisite:** successful completion of at least ENGL 099.

SPAN&122 (Formerly SPA 102)

Spanish II [H] • 5.0 Credits

Introduction to the Spanish language including conversational skills, reading, writing and grammar, and Hispanic culture including geography, customs, daily life, and heritage. **Prerequisite:** SPAN& 121 or instructor permission.

SPAN&123 (Formerly SPA 103)

Spanish III [H] • 5.0 Credits

Introduction to the Spanish language including conversational skills, reading, writing, grammar, Hispanic culture including geography, customs, daily life, and heritage. **Prerequisite:** SPAN& 122 or instructor permission.

SPAN&221 (Formerly SPA 201)

Spanish IV [H] • 5.0 Credits

Extensive practice in all four language skills (reading, writing, speaking, and listening). The course includes cultural readings and short stories and an in-depth review of basic Spanish grammar, expansion of basic vocabulary, and a broadening of the student's understanding of Hispanic culture. **Prerequisite:** SPAN& 123 or instructor permission.

SPAN&222 (Formerly SPA 202)

Spanish V [H] • 5.0 Credits

Extensive practice in all four language skills (reading, writing, speaking, and listening). The course includes cultural readings and short stories and an in-depth review of basic Spanish grammar, expansion of basic vocabulary, and a broadening of the student's understanding of Hispanic culture. **Prerequisite:** SPAN& 221 or instructor permission.

SPAN&223 (Formerly SPA 203)

Spanish VI [H] • 5.0 Credits

Extensive practice in all four language skills (reading, writing, speaking, and listening). The course includes cultural readings and short stories and an in-depth review of basic Spanish grammar, expansion of basic vocabulary, and a broadening of the student's understanding of Hispanic culture. **Prerequisite:** SPAN& 222 or instructor permission.

Surgical Technology

columbiabasin.edu/surgtech

Department Overview: The Surgical Technology program prepares students to work as an effective surgical team member. Students learn a variety of skills in lecture, experiential lab and practical settings. These skills include perioperative patient care, aseptic technique, operative procedures, surgical instrumentation and sterile processing. Clinical practice locations include hospitals and surgical centers.

Admission eligibility requirements include successful completion of the following prerequisite and general education support courses:

- BIOL& 241 Human A&P 1 w/ Lab 5-6 credits
- BIOL& 242 Human A&P 2 w/ Lab 5-6 credits
- BIOL& 260 Microbiology w/ Lab 5-6 credits
- CMST& 210 Interpersonal Communication or CMST& 220 Public Speaking or CMST 260 Multicultural Communication 5 credits
- HSCI 147 Medical Terminology 5 credits
- MATH& 146 Introduction to Stats 5 credits
- PSYC& 100 General Psychology 5 credits

Application to the Surgical Technology program is submitted through the Health Sciences Division office from June 21 until July 21 every year.

The program provides a One-Year Operating Room Aide Certificate to students completing the first quarter of the program. Graduates of the Surgical Technology program earn an Associate in Applied Science degree in Surgical Technology and are eligible for national board certification through the National Board of Surgical Technology and Surgical Assisting (NBSTSA). The NBSTSA Certified Surgical Technologist (CST) examination first-time pass rate for graduates of the CBC Surgical Technology program is 86%*.

Applicants are required to provide the following documentation:

- Certificate of Completion for seven hours of HIV/AIDS Bloodborne Pathogen Training
- A current American Heart Association Basic Life Support (CPR/BLS) certification card for Healthcare Providers

Courses & Programs

Students meeting the admissions criteria may be required to attend a formal interview with Surgical Technology program faculty. Accepted applicants will be mailed a letter confirming fall registration and once admitted into the program, each student will be responsible for providing documentation of the following additional requirements:

- Program specific immunization records (details provided with admission into the program)
- Satisfactory criminal history background check using a college-approved vendor. Criminal history background information is required of Health Science students. Information obtained will be considered in determining student eligibility to complete clinical coursework. Inability to participate in clinical experiences due to the information obtained from the background check may result in the student's inability to satisfactorily complete program degree requirements. Any infraction while enrolled in the Surgical Technology program should be self-reported to the program director. Questions regarding the background policy should be directed to the Dean for Health Sciences at 509.544.8310.
- Successful completion of a 10-panel drug screening (may be required for some clinical rotations).

For more information regarding the Surgical Technology program, please visit columbiabasin.edu/surgtech or contact the Health Sciences Division at 509.544.8354 or 509.544.8300.

SURG 101 (Formerly SRTG 101) **Introduction to Surgical Technology • 4.0 Credits**

This course explores fundamental concepts related to perioperative practice and provides a comprehensive introduction into the field of surgical technology. Areas of emphasis include: historical foundations of surgical sciences, role definition and scope of practice, teamwork, operating equipment and instrumentation, aseptic principles, and perioperative case management. **Prerequisite:** completion of major support courses for Surgical Technology and acceptance into the Surgical Technology program.

SURG 102 (Formerly SRTG 110) **Perioperative Science • 3.0 Credits**

This course surveys perioperative sciences specific to the practice of surgical technology. Topics include operation room equipment and furniture, physical and environmental hazards, basic computer skills, electrical concepts and safety, surgical robotics, operative lasers, decontamination and sterilization fundamentals, infection control practices, the disease process, and postoperative wound healing. **Prerequisite:** completion of major support courses for Surgical Technology and acceptance into the Surgical Technology program.

SURG 103 (Formerly SRTG 160) **Perioperative Patient Care • 2.0 Credits**

This course explores the duties and responsibilities of the surgical technologist in the assistant circulator role. Additionally, students are introduced to legal and ethical concepts governing perioperative practices related to surgical technology. Topics include: legal concepts and risk management, professional and medical ethics, HIPAA, patient records, medication handling, open gloving, urinary catheterization, patient positioning, preoperative skin preparation, and emergency management. **Prerequisite:** completion of major support courses for Surgical Technology and acceptance into the Surgical Technology program.

SURG 106 (Formerly SRTG 104) **Pharmacology for the Surgical Technologist • 5.0 Credits**

This class provides a basic knowledge of the language of pharmacology including: reading, interpreting, and documenting medication orders; systems of measurement and conversions; measuring medications for administration; calculating dosages and solutions; routes of administration for the surgical patient; anesthesia agents and principles of anesthesia administration; and medications used in emergency situations in the operating room. **Prerequisite:** acceptance into the Surgical Technology program and successful completion of SURG 101, 111, 102, 112, 103, and 113 with a minimum grade of 2.0.

SURG 107 (Formerly SRTG 150) **Surgical Procedures I • 8.0 Credits**

This course introduces students to surgery and primary surgical procedures within basic specialties including diagnostic procedures, general surgery, obstetrics and gynecology, otorhinolaryngology, genitourinary surgery, and orthopedics. **Prerequisite:** acceptance into the Surgical Technology program and successful completion of SURG 101, 111, 102, 112, 103, and 113 with a minimum grade of 2.0.

SURG 111 (Formerly SRTG 1011) **Introduction to Surgical Technology Lab • 3.0 Credits**

Skills laboratory designed to accompany SURG 101. This course provides students with an opportunity to demonstrate practical skills designed to facilitate operative procedures in the scrub role and ensure high-quality patient care. Practical skills include: identifying surgical equipment and instrumentation, assembling and preparing surgical supplies, establishing and maintaining the sterile field, surgical hand hygiene, gowning and gloving, intraoperative case management, operative counts, and dressing application. **Prerequisite:** completion of major support courses for Surgical Technology and acceptance into the Surgical Technology program.

SURG 112 (Formerly SRTG 1101) **Perioperative Science Lab • 2.0 Credits**

Skills laboratory designed to accompany SURG 102. This course provides students with an opportunity to demonstrate practical skills designed to facilitate operative procedures in the scrub role and ensure high-quality patient care. Practical skills include: donning operation room attire and PPE, patient transport, basic computer skills, electrosurgical unit safety, surgical instrument reprocessing, assisting with wound closure techniques, and surgical specimen handling. **Prerequisite:** completion of major support courses for Surgical Technology and acceptance into the Surgical Technology program.

SURG 113 (Formerly SRTG 1601) **Perioperative Patient Care Lab • 1.0 Credit**

Skills laboratory designed to accompany SURG 103. This course provides students with an opportunity to demonstrate practical skills designed to facilitate operative procedures in the assistant circulator role and ensure high-quality patient care. Practical skills include: reviewing documentation, medication handling, open gloving, urinary catheterization, patient positioning, preoperative skin preparation, and emergency management. **Prerequisite:** completion of major support courses for Surgical Technology and acceptance into the Surgical Technology program.

SURG 117 (Formerly SRTG 1501) **Surgical Procedures I Lab • 3.0 Credits**

This course provides students with an opportunity to perform comprehensive practical skills designed to facilitate operative procedures and ensure high-quality patient care in the clinical setting. **Prerequisite:** acceptance into the Surgical Technology program and successful completion of SURG 101, 111, 102, 112, 103, and 113 with a minimum grade of 2.0.

SURG 202 (Formerly SRTG 120) **Central Service • 1.0 Credit**

This course explores the field of sterile processing and materiel management in the healthcare setting and provides students with the foundational knowledge required to perform the essential job functions of central service personnel. **Prerequisite:** acceptance into the Surgical Technology program and successful completion of SURG 106, 107, and 117 with a minimum grade of 2.0.

SURG 207 (Formerly SRTG 250) **Surgical Procedures II • 8.0 Credits**

A progression from SURG 107. This course introduces students to surgery and primary surgical procedures within basic specialties including ophthalmology, oral and maxillofacial surgery, plastic and reconstructive surgery, cardiothoracic surgery, peripheral vascular surgery, and neurosurgery. **Prerequisite:** acceptance into the Surgical Technology program and successful completion of SURG 106, 107, and 117 with a minimum grade of 2.0.

Courses & Programs

SURG 208 (Formerly SRGT 240)

Surgical Seminar • 3.0 Credits

This course is to be taken concurrently with the SURG 224. The seminar provides current information regarding workplace issues, technologies, and advancements in healthcare pertinent to the practicum experience. Students engage in discussions based on their experiential learning opportunities within the practicum to assist in preparation for the national certifying examination for surgical technologists. **Prerequisite:** acceptance into the Surgical Technology program and successful completion of SURG 202, 222, 223, and 207 with a minimum grade of 2.0.

SURG 209 (Formerly SRGT 103)

Ethics & Professionalism • 2.0 Credits

This class provides an understanding of ethical and legal concepts related to the practice of surgical technology, including: ethical dilemmas, organizational and professional issues, ethics committees, legal concepts, the law as related to the decision-making process in the healthcare setting, and conflict resolution. **Prerequisite:** acceptance into the Surgical Technology program and successful completion of SURG 202, 222, 223, and 207 with a minimum grade of 2.0.

SURG 222 (Formerly SRGT 1201)

Central Service Clinical • 1.0 Credit

Clinical rotations are designed to reinforce concepts learned in SURG 202. This course explores the field of sterile processing and materiel management in the healthcare setting and provides students with the foundational knowledge and skills required to perform the essential job functions of central service personnel. **Prerequisite:** acceptance into the Surgical Technology program and successful completion of SURG 106, 107, and 117 with a minimum grade of 2.0.

SURG 223 (Formerly SRGT 1411)

Operating Room Practicum I • 8.0 Credits

This course provides progressive exposure to and experience with diverse surgical procedures performed in multiple specialties within the clinical setting. Students prepare for and perform assigned surgical procedures under the supervision of facility personnel, clinical preceptors, and clinical college faculty in accordance with patient safety standards and industry best practices. **Prerequisite:** acceptance into the Surgical Technology program and successful completion of SURG 106, 107, and 117 with a minimum grade of 2.0.

SURG 224 (Formerly SRGT 2411)

Operating Room Practicum II • 10.0 Credits

A progression from SURG 223. This course provides progressive exposure to and experience with diverse surgical procedures performed in multiple specialties within the clinical setting. Students prepare for and perform assigned surgical procedures under the supervision of facility personnel, clinical preceptors, and clinical college faculty in accordance with patient safety standards and industry best practices. Clinical experience focuses on advanced skills intended to assist in the transition from classroom to employment. **Prerequisite:** acceptance into the Surgical Technology program and successful completion of SURG 202, 222, 223, and 207 with a minimum grade of 2.0.

SURG 293 (Formerly SRGT 293)

Independent Study • 1.0 - 5.0 Credits

A class used to explore new coursework or for a specific topic of special interest. **Prerequisite:** completion of major support courses for Surgical Technology and acceptance into the Surgical Technology program.

Technical Education

Department Overview: Technical Education courses are designed to support career and technical education instructors' knowledge and application of instructional strategies to provide the best learning opportunities for their students.

EDUT 204

Instruct Strategies for Career & Tech Instrs • 1.0 - 4.0 Credits

This course is designed to support career and technical education instructors' knowledge and application of instructional strategies. Students complete an instructional design course and apply the knowledge gained through the completed course while collaborating with CBC instructor(s) and local mentors to employ and reflect on the use of appropriate strategies in their own professional practice. **Prerequisite:** instructor permission.

Theatre

columbiabasin.edu/theatre

Department Overview: Theatre offerings at Columbia Basin College are designed:

- To meet the requirements for the first two years of a Bachelor of Arts degree in Theatre at four-year institutions
- To enhance the theatre knowledge and performance ability of students wishing to enter the professional field
- To provide extracurricular, leisure activity
- To enrich the appreciation of the theatre going public

The department attempts to provide a production schedule that will encourage both students and community participation as either audience members or production personnel.

Career opportunities include teaching theatre, professional acting, directing, designing, stage management and working in the dramatic/film arts. Theatre classes may also better prepare students for careers in law, public relations, advertising, teaching effectiveness and other careers where speaking or performing for the public is important. It is not necessary to be a theatre major to take theatre classes or to participate in CBC shows.

DRMA 100 (Formerly DRMA 1001)

Theatre Study Tour • 1.0 - 3.0 Credits

Students participate in a field trip experience to attend professional, commercial theatre. Destinations are selected among Ashland, Los Angeles, Seattle, San Francisco, Portland, and New York City. Students meet for analysis and discussions before and after attending the planned events. Fees apply. May be repeated for credit.

DRMA 105 (Formerly DRMA 1051)

Rehearsal and Performance • 1.0 - 3.0 Credits

Participation in college theatre productions on stage and backstage. After play auditions for each quarter, the class, composed of students selected for cast and production staff positions, are involved in rehearsals and performances.

DRMA 106 (Formerly DRMA 1061)

Rehearsal and Performance • 1.0 - 3.0 Credits

Participation in college theatre productions on stage and backstage. After play auditions for each quarter, the class, composed of students selected for cast and production staff positions, are involved in rehearsals and performances.

DRMA 107 (Formerly DRMA 1071)

Rehearsal and Performance • 1.0 - 3.0 Credits

Participation in college theatre productions on stage and backstage. After play auditions for each quarter, the class, composed of students selected for cast and production staff positions, is involved in rehearsals and performances.

DRMA 110 (Formerly THA 110)

Creative Dramatics • 3.0 Credits

A course in the fundamentals of creative dramatics. This course fosters some competency in teaching drama skills to children, through the combined use of theatre games, improvisation, class exercises, lectures, and discussion. Recommended for Education majors. **Recommended prerequisite:** DRMA 225.

Courses & Programs

DRMA 120 (Formerly THA 120)

Acting-Beginning • 5.0 Credits

An introduction to acting course. This course focuses on creating a character with internal truth that is presented with an awareness of external craft, including interpretive skills, through a variety of exploratory exercises. Class culminates in performance final.

DRMA 121 (Formerly THA 121)

Acting-Intermediate • 3.0 Credits

An intermediate studio acting course which is a continuation of DRMA 120. This course continues its focus on creating a character with internal truth that is presented with an awareness of external craft, including interpretive skills, through a variety of exploratory exercises. Class culminates in performance final. **Prerequisite:** DRMA 120 or instructor permission.

DRMA 122 (Formerly THA 122)

Acting-Advanced • 3.0 Credits

An advanced studio acting course which is a continuation of DRMA 121. This course continues its focus on creating a character with internal truth that is presented with an awareness of external craft, including interpretive skills, through exploration of scenes, monologues, and readings. Students broaden their knowledge of dramatic literature and build their repertoire of audition monologues. **Prerequisite:** DRMA 120 and 121, or instructor permission.

DRMA 126 (Formerly DRMA 1261)

Stagecraft • 1.0 - 3.0 Credits

A study of the technical aspects of stage craft, and some design, with an emphasis on construction techniques. During lab times, students gain a working knowledge of shop tools, their application, shop safety, and crew protocol.

DRMA 127 (Formerly DRMA 1271)

Stagecraft • 1.0 - 3.0 Credits

A study of the technical aspects of stage craft, and some design, with an emphasis on construction techniques. During lab times, students gain a working knowledge of shop tools, their application, shop safety, and crew protocol.

DRMA 128 (Formerly DRMA 1281)

Stagecraft • 1.0 - 3.0 Credits

A study of the technical aspects of stage craft, and some design, with an emphasis on construction techniques. During lab times, students gain a working knowledge of shop tools, their application, shop safety, and crew protocol.

DRMA 130 (Formerly THA 130)

Stage Movement • 1.0 - 3.0 Credits

This course explores various types of movement particularly useful for the stage, inclusive of dance, ballet, and stylized period movement. It is a technique class intended to help students gain control of their body (and thus more effectively use it on stage), and to introduce various skills and functions useful to period plays. May be repeated for credit.

DRMA 149 (Formerly THA 149)

Special Studies • 1.0 - 3.0 Credits

Topics vary from among dramatic literature, acting styles, directing, theory, criticism, aesthetics, history, and design. May be repeated for credit. **Prerequisite:** varies.

DRMA 198 (Formerly DRMA 1991)

Special Studies • 1.0 - 3.0 Credits

A class used to explore new coursework.

DRMA 199

Special Studies • 1.0 - 3.0 Credits

A class used to explore new coursework.

DRMA 200 (Formerly DRMA 2001)

Theatre Study Tour • 1.0 - 3.0 Credits

Students participate in a field trip experience to attend professional, commercial theatre. Destinations are selected among Ashland, Los Angeles, Seattle, San Francisco, Portland, and New York City. Students meet for analysis and discussions before and after attending the planned events. Fees apply. May be repeated for credit.

DRMA 215 (Formerly THA 215)

Survey of Theatre History [H] • 5.0 Credits

This is a survey course that covers significant trends and innovations throughout theatre history from its inception in ancient Greece through the present. The emphasis, however, is on early theatre and its development and evolution.

DRMA 216 (Formerly THA 216)

Acting for the Camera • 3.0 Credits

Instruction and practice in the basics of acting for both TV and film style productions: playing to the camera, shooting out of sequence, blocking, and other production considerations. **Prerequisite:** DRMA 120 or instructor permission.

DRMA 217 (Formerly THA 217)

Classical Acting • 1.0 - 3.0 Credits

An introductory course in basic fundamentals, such as movement, posture, voice work, and delivery and analysis of text is explored through research, scene work, exercises, and the study of classical period practices. **Prerequisite:** DRMA 120 or instructor permission.

DRMA 220 (Formerly DRMA 2201)

Acting Studio • 1.0 - 3.0 Credits

A professional acting studio which utilizes class performances of scenes and monologues, as well as class discussions of theory. This course focuses on creating a character with internal truth (Stanislavskian-based) that is presented with an awareness of external craft including interpretive skills. Emphasis is placed on actor coaching and discovery. **Prerequisite:** DRMA 120 or instructor permission.

DRMA 221 (Formerly DRMA 2211)

Acting Studio • 1.0 - 3.0 Credits

A professional acting studio which utilizes class performances of scenes and monologues, as well as class discussions of theory. This course focuses on creating a character with internal truth (Stanislavskian-based) that is presented with an awareness of external craft including interpretive skills. Emphasis is placed on actor coaching and discovery. **Prerequisite:** DRMA 120 or instructor permission.

DRMA 222 (Formerly DRMA 2221)

Acting Studio • 1.0 - 3.0 Credits

A professional acting studio which utilizes class performances of scenes and monologues, as well as class discussions of theory. This course focuses on creating a character with internal truth (Stanislavskian-based) that is presented with an awareness of external craft including interpretive skills. Emphasis is placed on actor coaching and discovery. **Prerequisite:** DRMA 120 or instructor permission.

DRMA 225 (Formerly DRMA 2251)

Touring Children's Theatre • 1.0 - 3.0 Credits

This course involves adapting and developing material from children's stories and original literature into theatrical presentations. Emphasis is on ensemble acting and improvisation skills. The second half of the quarter focuses on performance as group tours area grade schools.

DRMA 228

Touring Rep Part II • 1.0 - 3.0 Credits

Courses & Programs

DRMA 230 (Formerly DRMA 2301) **Stage Combat • 2.0 Credits**

An introductory course meant to teach the basics required for safe and effective stage combat. This is a course for students who wish to pursue theatre as a career option, and want to learn new skills to add to their repertoire. This is not a certification course, however students learn the skills that will lay the foundation for future stage combat education.

DRMA 242 (Formerly THA 242) **Design Essential • 3.0 Credits**

This is an introductory course in developing basic skills in visualization, period research, graphic techniques, and script interpretation for theatre design; the focus being on scenic and costume design approaches.

DRMA 243 (Formerly DRMA 2431) **Stage Costuming • 1.0 - 3.0 Credits**

An introductory course in the theory and practice of stage costume design and construction.

DRMA 244 (Formerly THA 244) **Stage Makeup • 1.0 - 2.0 Credits**

A course covering the basics of stage makeup design as an extension of characterization. Students learn the techniques of makeup application, including youth, middle-age, old-age, and specialty makeup.

DRMA 245 (Formerly DRMA 2451) **Sound Design • 1.0 - 3.0 Credits**

An introduction to sound design for theatre. This class focuses on the equipment, typical set-ups for theatre, and the design concepts for the use of sound in today's theatre environments. **Prerequisite:** DRMA 242 or instructor permission.

DRMA 246 (Formerly DRMA 2461) **Stage Lighting • 1.0 - 3.0 Credits**

A beginning course in the theory and practice of stage lighting. This course is a hands-on approach to design and technical drawing. Lab time involves, hang and focus crew techniques and protocol, and special projects.

DRMA 248 (Formerly THA 248) **Stage Management • 2.0 Credits**

Examines the work of a stage manager. This course covers management of the stage and explores the business aspects of commercial theatre. Emphasis is on preparing students for stage managing in the commercial theatre and to prepare students for a theatre career with an enlightened view of theatre as a business. **Prerequisite:** instructor permission.

DRMA 249 (Formerly THA 249) **Special Studies • 1.0 - 3.0 Credits**

Topics vary from among dramatic literature, acting styles, directing, theory criticism, aesthetics, history, and design. May be repeated for credit. **Prerequisite:** varies.

DRMA 250 (Formerly THA 250) **Directing for the Stage • 3.0 Credits**

An introductory course in the theory and practice of directing for the stage. Students explore analysis, interpretation, and concept formulation of dramatic literature. Communication and collaboration is emphasized. **Prerequisite:** DRMA 120 or instructor permission.

DRMA 298 (Formerly DRMA 2991) **Special Studies • 1.0 - 3.0 Credits**

A class used to explore new coursework.

DRMA 299 **Special Studies - Scene Painting • 1.0 - 3.0 Credits**

A class used to explore new coursework.

DRMA&101 (Formerly THA 115) **Intro to Theatre [H] • 5.0 Credits**

An exploration of the many facets of theatre and the many creative artists who comprise the theatre arts. Students study the history of theatre, styles of production, plays, playwrights, directors, actors, critics, and designers.

Welding Technology

columbiabasin.edu/welding

Department Overview: Welding Technology offers certificates and an AAS degree that includes both theoretical and practical training in basic and advanced welding techniques. Areas covered include, shield metal arc welding, gas flu and cored arc welding, metal arc welding, gas tungsten arc welding, structural welding, pipe welding and fabrication.

Welding has become a very sophisticated and technical science that requires mental application as well as hands-on abilities. Students who complete the Associate in Applied Science degree will learn welding skills, but also basic math, English and other communication skills. CBC's welding training, plus general education requirements, prepares graduates for careers in today's construction trades and fabrications shops. For more information, call 509.544.4924.

The department requires students achieve a minimum grade of 2.0 to be able to continue enrollment in major courses. The Associate in Applied Science degree also requires a minimum grade of 2.0 for each major course. A student who achieves a grade of 1.9 or lower in any required major courses may repeat that course once to attempt to achieve a grade of 2.0 or higher. Exceptions to this policy must be approved by the Dean of the program prior to enrollment and must be based on extenuating circumstances.

At the end of the program, successful students will be able to:

- Obtain all position Structural Steel certification using Shielded Metallic Arc Welding (SMAW)
- Obtain all position pipe certification using Shielded Metallic Arc Welding (SMAW) and Gas Tungsten Arc Welding (GTAW) process
- Demonstrate competent cutting procedures and correct operation of equipment
- Demonstrate proper set-up and use of welding and fabricating equipment; troubleshoot and solve basic welding, fabricating and equipment problems
- Analyze and interpret prints and drawings for welding and fabricating
- Display and communicate knowledge of welding information
- Exhibit and maintain essential employability behaviors

WT 048 **Welding Certification • 0.0 Credits**

This course is primarily for WABO certification. This is a non-instructional course that deals with welder certification. Fees depend on what type of certification test is needed.

WT 050 **Welding Booth Time • 0.0 Credits**

Designed primarily for tradesmen who need a place to brush-up on their skills. This course allows the tradesmen to practice at their own pace. This is a non-instructional course. Fees to rent the weld booth depend on how many hours are needed to practice.

WT 100 **Basic Welding • 3.0 Credits**

This course provides a beginning level of theory and welding processes and applications being used today. This course includes safety, set-up and tear-down, present concepts, applications and methods, and operation of oxy-acetylene, electric arc, and MIG welding. **Prerequisite:** instructor permission.

WT 101 **Oxy-Acetylene Process • 1.0 Credit**

A theoretical approach to give students an understanding in the areas of oxy-acetylene cutting, welding, and brazing of various metals. This class is for beginning, entry-level students. Subject matter focuses on background of the process and safety of this process and equipment, and its uses.

Courses & Programs

WT 103

Fundamentals Major Processes & their Consumables • 1.0 - 5.0 Credits

This is the systems' approach to welded design, the design of welded joints and allowable for welds. Arc welding consumables are covered and students become familiar with various welding processes.

WT 107

Fabrication Principles Review • 4.0 Credits

Introduces welding students to many mathematical procedures they will face in the fabrication shop. Topics include the manipulation of fractions and decimals along with an instructor handout intended to familiarize students with the reading of tape measures and rulers. Students work problems involving calculating various dimensions from complex shapes, both fractional and decimal. In conjunction with these exercises, students are exposed to various geometry principles that are extremely beneficial in the fabrication shop for calculating sheet metal parameters, areas, volumes, and the weight of the finished product. The geometry portion also teaches how to calculate angles necessary to be cut and fitted in place in order to complete the finished product. **Prerequisite:** MATH 084 with a grade of 2.0 or better, or MATH 084 with a grade of P if taken before spring 2016, or MATH 050 with a grade of 2.0 or better, or satisfactory placement test score.

WT 108

Fabrication Technique I • 1.0 Credit

This course is designed to aid students in understanding the variables that greatly affect welding fabrication. **Prerequisite:** WT 107 and 112 or instructor permission.

WT 111 (Formerly WT 1011)

Oxy-Acetylene Process Lab • 1.0 - 3.0 Credits

Gives students hands-on experience in a laboratory situation with the use of oxygen-acetylene equipment. Safety equipment set up/shut down, and manual and automatic cutting are covered, as well as identification of metals.

WT 112 (Formerly WT 1021)

Introduction to Shield Metal Arc Welding • 1.0 - 10.0 Credits

An introduction to mild steel arc welding consisting of manipulative skills using the shield metal arc process with E6010 type mild steel electrode. **Prerequisite:** grade of 2.0 or better in MATH 050 or 096 or satisfactory placement test score, appropriate reading skills, or instructor permission.

WT 113 (Formerly WT 1031)

Advanced Shield Metal Arc Welding • 1.0 - 10.0 Credits

This course develops welding skills to meet AWS and ASME standards using the shielded metal arc process. **Prerequisite:** WT 112 or instructor permission.

WT 131 (Formerly WT 1301)

Metallic Arc Refresher • 1.0 - 10.0 Credits

Designed primarily for tradesmen who need upgrading in shielded metallic arc welding. Includes instruction and practice for upgrading skills, test qualifications, and special application. **Prerequisite:** trade experience; a test may be given to verify experience.

WT 140

Shield Metal Arc Certification Preparation • 1.0 - 5.0 Credits

This course develops students' shielded metal arc welding skills in preparation for meeting American Welding Society (AWS), Washington Association of Building Officials (WABO), and American Society of Mechanical Engineers (ASME) certification standards. **Prerequisite:** WT 113 and concurrent enrollment in WT 141 or instructor permission.

WT 141 (Formerly WT 1041)

Shield Metal Arc Welding Certification • 1.0 - 5.0 Credits

This course provides advanced development of arc welding skills to meet American Welding Society (AWS), Washington Association of Building Officials (WABO), and American Society of Mechanical Engineers (ASME) certification standards. **Prerequisite:** WT 113 and concurrent enrollment in WT 140 or instructor permission.

WT 144

Welding Upgrade • 1.0 - 1.0 Credit

This course provides an opportunity for journeyman welders to upgrade their skills for current employment opportunities. Credits depend on how many hours. **Prerequisite:** instructor permission.

WT 151 (Formerly WT 1051)

Gas Metal Arc Welding (MIG) Certificate • 1.0 - 10.0 Credits

An introduction to gas metal arc welding consisting of manipulative skills using the gas metal arc process. **Prerequisite:** WT 113 or instructor permission.

WT 154

WABO Testing • 1.0 - 2.0 Credits

This course provides required testing to meet the standards for structural steel welding. When students pass the test, the Welding department submits required test results to the Washington Association of Building Officials (WABO) and they issue certification to the student. Credits depend on what type of test. **Prerequisite:** instructor permission.

WT 181 (Formerly WT 1081)

Fabrication Techniques I Lab • 3.0 Credits

This course is designed to aid students in understanding the variables that greatly affect welding fabrication. Students get hands-on and field work experience utilizing a welding truck for structural fabrication, including hoisting and rigging. **Prerequisite:** WT 112 or instructor permission.

WT 195

Supervised Employment • 1.0 - 3.0 Credits

This is a supervised work experience involving the application and practice of skills and principles learned in the classroom and lab. The student will be placed with an employer where the environment will build on the student's area of career interest and prepare them to be productive employees. **Prerequisite:** WT 181 or instructor permission.

WT 201

Weldability of Metals • 1.0 - 5.0 Credits

This course introduces the concepts that explain the metallurgical behavior and determine the weldability of ferrous and non-ferrous metals. **Prerequisite:** WT 141, 108, and 181.

WT 202

Welding Inspection • 1.0 - 5.0 Credits

This course is designed to acquaint students with fundamental information and to help in the preparation for the AWS Welding Inspector Certification examination.

WT 208

Fabrication Technique II • 1.0 Credit

This course is designed to aid students in understanding the variables that greatly affect welding fabrication. **Prerequisite:** MATH 100 and WT 222 or instructor permission.

WT 211 (Formerly WT 2011)

Introduction to Pipe Welding • 1.0 - 10.0 Credits

An introduction to pipe welding using mild steel pipe and the shield metal arc process with E6010/E7081 covered electrode. Develop the necessary welding skills and techniques to prepare for certification in accordance with ASME code. **Prerequisite:** WT 141, 151, or instructor permission.

WT 222 (Formerly WT 2021)

Gas Tungsten Arc Welding (TIG) • 1.0 - 10.0 Credits

This course is designed for the welding of plate and pipe using the gas tungsten arc welding (GTAW) process. Instruction stresses developing proper manipulative techniques and skills necessary to certify using the GTAW process. **Prerequisite:** WT 211 or instructor permission.

WT 231 (Formerly WT 2031)

Pipe Welding Certification • 1.0 - 10.0 Credits

This course emphasizes qualification tests for piping and tubing. **Prerequisite:** WT 222 or instructor permission.

Courses & Programs

WT 233 (Formerly WT 2301)

Pipe Welding Refresher • 1.0 - 10.0 Credits

This course is designed for tradesmen who need upgrading on pipe welding procedures and skills for employment in the piping field. Includes instruction and practice for upgrading welding test qualifications and special applications. **Prerequisite:** trade experience; a test may be given to verify experience.

WT 281 (Formerly WT 2081)

Fabrication Technique II Lab • 3.0 Credits

This course is designed to aid students in understanding the variables that greatly affect the welding of pipe fabrication. Students get hands-on and field work experience utilizing a welding truck for pipe fabrication including hoisting and rigging. **Prerequisite:** WT 222 or instructor permission.

Women's Studies

columbiabasin.edu/womensstudies

Department Overview: CBC offers students courses in Women's Studies that focus specifically on women's issues. Students learn various theories to help analyze and explore women's issues historically, economically and across cultures, and how women's perspectives contribute to art, literature and culture.

WS 155

Women's Cultural Heritage [H] • 5.0 Credits

An introductory course which presents an overview of the contributions women have made socially, politically, and culturally.

WS 160

Women in Literature and Art [H] • 5.0 Credits

A survey of women writers and artists from the 19th and 20th centuries, including the historical background and social context of their works, the intellectual/cultural issues they addressed, and their role and influence in society.

Workshop

Department Overview: Workshops are offered by a variety of academic departments throughout the year; many are exploratory or one time options.

WKSP 000

Workshop • 0.0 Credits

A class used to explore new coursework.

WKSP 089

Bachelor of Applied Science Program Entry • 0.0 Credits

A class used for registration into BAS classes.

WKSP 090

First Year Introduction for Running Start • 0.0 Credits

FYI is an introduction to academic culture and student success strategies, as well as expectations, resources, procedures, and policies of CBC. FYI supports students in their transition to college. FYI is required for all degree and certificate seeking students in the first quarter of classes.

WKSP 092

ASCBC Leadership Council • 0.0 Credits

This free weekly workshop allows interested CBC students to be actively involved in the college's student government program as a registered volunteer. This workshop is no-credit.

Associate Professor, Physics

Jay M. King

Start Year: 2017
M.B.A., Walden University
A.S., Community College of Allegheny County
Assistant Professor, Radiological Technology

Cheryl L. Klym

Start Year: 2008
M.Ed., Heritage University
BSW, Walla Walla University
Senior Associate Professor, ESL

Annalee K. Kodman

Start Year: 2013
Ph.D., M.A., University of Delaware
M.A., East Tennessee State University
B.A., B.M., Carson-Newman College
Associate Professor, English

Krystal A. Lancaster

Start Year: 2014
M.S., Gonzaga University
Associate Professor, Nursing

Andrea J. Leach

Start Year: 2017
M.S., Western Governors University
B.S., Oregon Institute of Technology
A.A.S., Yakima Valley College
Assistant Professor, Dental Hygiene

Elise N. Leahy

Start Year: 2016
M.S., Portland State University
B.S., University of Oregon
Assistant Professor, Human Development

Rebecca S. Luttrell

Start Year: 2014
M.S., Eastern Washington University
B.S., Whitworth University
Associate Professor, Mathematics

Ryan M. Malm

Start Year: 2016
M.B.A., California State University, Sacramento
Assistant Professor, Business

David Mandeville

Start Year: 2018
Ph.D., M.S., University of Oregon
Assistant Professor, Exercise Science

Eudelio Martinez

Start Year: 2018
Ph.D., University of California Irvine
Instructor, Intercultural Studies

Matt Mathesius

Start Year: 1993
M.A., B.A., Western Washington University
A.A., Community Colleges of Spokane
Senior Associate Professor, English

Melissa R. McNickle

Start Year: 2006
M.S., B.S., Montana State University
Senior Associate Professor, Mathematics

Elaina M. Meiners

Start Year: 2006
M.Ed., Washington State University
M.A., B.A., Eastern Washington University
A.A., Walla Walla Community College
Senior Associate Professor, English

Eric S. Melby

Start Year: 2017
Ph.D., M.S., B.S., University of Wisconsin-Madison
Assistant Professor, Chemistry

Christopher F. Mitchell

Start Year: 2006
A.A.S., Columbia Basin College
Senior Associate Professor, Welding

Melissa A. Mitchell

Start Year: 2007
M. Ed., B.A., Portland State University
Senior Associate Professor, English/Reading

Matthew Montoya

Start Year: 2018
B.A., Brigham Young University
M.A., Central Washington University
Assistant Professor, English

Molly E. Mooney

Start Year: 2016
M.S., University of Michigan
Assistant Professor, Library Services

Churairat T. O'Brien

Start Year: 1993
D.I.T., Capella University M.Ed., Heritage University
B.S., Washington State University
B.Ed., Srinakarinwirot University
Senior Associate Professor, Computer Science

Ryan M. Orr

Start Year: 2014
M.S., University of South Carolina
B.A., Eastern Washington University
Associate Professor, Mathematics

Catherine Pattee

Start Year: 2018
M.A., B.A., Brigham Young University
Assistant Professor, Intercultural Studies

Robert Pedersen

Start Year: 1992
M.A., B.A., Washington State University
Senior Associate Professor, English

Becky L. Phillips

Start Year: 2016
M.S.N., B.S.N., Washington State University
Assistant Professor, Nursing

Joy C. Phillips

Start Year: 2016
M.F.A., State University of New York
B.F.A., Columbus College of Art & Design
Assistant Professor, Art

Phillip A. Ponn

Start Year: 2016
A.A., Columbia Basin College
Assistant Professor, Welding

Bradley Powell

Start Year: 2018
M.A, Case Western Reserve University
Assistant Professor, Sociology

Monty L. Prather

Start Year: 2005
A.A.S., Columbia Basin College
Senior Associate Professor, Automotive Technology

Virginia Quinley

Start Year: 1983
M.A., B.A., Washington State University
Professor, Communication Studies/Theatre

Michael N. Reynolds

Start Year: 2016
Ph.D., M.A., Western Michigan University
Assistant Professor, Psychology

Nicholas Robertson

Start Year: 2018
M.S., Eastern Washington University
Assistant Professor, Exercise Science

Terry J. Rueckert

Start Year: 2011
M.S., University of Oregon
B.S., BA., Washington State University
A.A., Columbia Basin College
Assistant Professor, Social/Behavioral Sciences

Tracie L. Russell

Start Year: 2012
M.S., University of Washington
B.A., Maryville College
Senior Associate Professor, Mathematics

Jennifer L. Sainz

Start Year: 2012
M.A., San Diego State University
B.A., Concordia University, Irvine
Associate Professor, English

Anthony A. Sako

Start Year: 1995
B.S., University of Washington
Senior Associate Professor, Computer Science

Dean T. Schau

Start Year: 1986
M.A., Washington State University
B.A., Central Washington University
Senior Associate Professor, Economics

Bradley J. Sealy

Start Year: 1999
M.S., Boise State University
M.A., University of North Carolina
B.A., University of California
Senior Associate Professor, English

Aissata Sidibe

Start Year: 1995
M.S., University of California Davis
M.S., B.S., University of Abidjan
Senior Associate Professor, Physics

Krista A. Smiley

Start Year: 2018
M.S., University of Idaho
B.S., Oregon Institute of Technology
Assistant Professor, Dental Hygiene

Rachel L. Smith

Start Year: 2016
M.F.A., University of Idaho
Assistant Professor, Art

Board of Trustees, Faculty & Administrative Exempt

Richard D. Smith

Start Year: 2010
Ph.D., University of California
B.S., Western Washington University
Senior Associate Professor, Environmental Science/Biology

Heidi L. Snyder

Start Year: 2003
A.A.S., Pima Medical Institute
Instructor, Medical Assistant

John P. Spence

Start Year: 2008
M.S., University of Idaho
B.S., Lewis-Clark State College
Senior Associate Professor, Mathematics

Kiera Squires

Start Year: 2018
M.A., Western Washington University
Assistant Professor, English

Steven Stauffer

Start Year: 2016
P.h.D., Indiana Institution of Technology
M.P.M., Indiana University
Assistant Professor, Business

Kay Lynn Stevens

Start Year: 2003
M.S., B.S., Washington State University
Senior Associate Professor, Psychology

Renaë Stout

Start Year: 2018
M.S., Purdue University Global
B.S., Central Washington University
Assistant Professor, Accounting

Yongsheng Sun

Start Year: 1994
Ph.D., Washington State University
M.Ed., Heritage University
B.A., Inner Mongolia Teachers' University
Professor, ESL/Intercultural Studies

Mark A. Taff

Start Year: 2000
Ph.D., M.A., B.A., U.C., Berkeley
Senior Associate Professor, Anthropology/Psychology

Teresa F. Thonney

Start Year: 1986
Ph.D., University of Washington
M.A., B.A., Eastern Washington University
Senior Associate Professor, English

Kim Trinh

Start Year: 2018
M.A., University of Washington
B.S., Whitman College A.A., Highline College
Assistant Professor, English

Chelsey Vandewall

Start Year: 2018
M.S., University of Idaho
B.S., Pacific University
Assistant Professor, Dental Hygiene

Wilikinia A. Vasquez

Start Year: 2017
Ed.D., Argosy University
Assistant Professor, Psychology

Jennifer von Reis

Start Year: 2000
Ph.D., Washington State University M.S., California Polytechnic State University
B.S., University of Michigan
Senior Associate Professor, Biology

Christopher Wagar

Start Year: 2013
M.Ed., Western Governors University B.A., Washington State University
Instructor, ABE/Transitional Studies

Clifford Wakeman

Start Year: 1994
M.A., San Francisco State University
B.A., University of California
A.A., Modesto Junior College
Senior Associate Professor, English/Philosophy

Bruce A. Walker, Jr.

Start Year: 2014
M.M., Central Washington University
B.M., Southern Illinois University Edwardsville
Associate Professor, Music

Tracy L. Walker

Start Year: 2001
M.F.A., University of Cincinnati
B.A., M.A., Central Washington University
Senior Associate Professor, Art

Kahunya Wario

Start Year: 2018
B.A., Portland State University
Instructor, ABE/Transitional Studies

Tammy D. Wend

Start Year: 2001
M.P.Ac., B.S., Montana State University
Senior Associate Professor, Accounting/Business

Collin Wilson

Start Year: 2016
D.M.A., M.M., University of Illinois
Assistant Professor, Music

Sylvia Withers

Start Year: 2007
M.S.W., Eastern Washington University
B.S.W., Heritage University
Senior Associate Professor, Counseling

Debbie L. Wolf

Start Year: 1999
B.A., Washington State University
A.A.S., Columbia Basin College
Senior Associate Professor, Computer Science

James L. Wutzke

Start Year: 2006
M.S., B.A., Washington State University
Senior Associate Professor, Speech

Paige A. Wyatt

Start Year: 1996
M.S., Washington State University
B.S., Oklahoma State University
Senior Associate Professor, Engineering Technology

Carol D. Wysocki

Start Year: 1995
Ph.D., M.B.A., Washington State University
B.S., Eastern Oregon University
B.S., Iowa State University
Senior Associate Professor, Accounting/Business

Sharon B. Yedidia

Start Year: 2011
M.A., University of Bath
B.A., Anglia Polytechnic University
Instructor, Spanish

Ying Yu

Start Year: 2004
M.S., University of Illinois at Urbana-Champaign
B.A., Shaanxi Normal University
Senior Associate Professor, Library Services

Limin Zhang

Start Year: 1993
Ph.D., M.S., Washington State University
M.S., B.S., Northeast University of Technology
Professor, Mathematics

Academic Calendar

CALENDAR TERMS AND DEFINITIONS

1. **ACADEMIC YEAR** - Four consecutive quarters beginning with summer quarter.
2. **CONTRACT DAY** - A day faculty members are expected to be engaged in teaching activities or other designated activities as part of their annual 176-day contract.
3. **COMMENCEMENT** - Graduation ceremony scheduled by the College. Commencement falls on a contract day for faculty and administrative/exempt staff who are required to participate unless excused by the President of the College.
4. **COUNSELOR/LIBRARIAN FACULTY** - Faculty who are employed as counselors or librarians.
5. **FINALS** - Final exam days as designated on the academic calendar. All exams must be given at the times designated in the finals schedule. Any deviation from the published finals schedule must be done in consultation with the division dean. Extended day, weekend, and distance learning class exams may be given during the last scheduled class, or at a time designated by the instructor. Times selected may not conflict with the published finals schedule.
6. **INSTRUCTIONAL DAY** - A contract day in which classes are scheduled for students and faculty.
7. **INSTRUCTIONAL FACULTY** - Faculty whose primary assignment is teaching.
8. **INSTRUCTIONAL YEAR** - Three consecutive academic quarters beginning with fall quarter.
9. **IN-SERVICE DAYS** - Up to ten contract days for all faculty, three of which are Teaching & Learning Days each year. In-Service days include scheduled activities, trainings and meetings, which promote personal, professional development, and/or support meeting College goals and objectives. Faculty members may have specific work assignments during In-Service days defined by division, department, or program needs.
10. **NON-INSTRUCTIONAL DAYS** - Days within the instructional year which the College is open, but there are no classes scheduled. These are not contract days for the instructional faculty. They may be contract days for the counselor and librarian faculty.
11. **TEACHING & LEARNING DAYS** - Three scheduled days each instructional year during which faculty engage in assessment work required by the College's assessment plan for accreditation purposes and/or in scheduled professional development activities related to scholarship of teaching and learning.
12. **STUDENT SUCCESS DAYS** - Three scheduled days each instructional year occurring on the non-instructional day immediately preceding the first day of finals during which faculty engage in student-success-related activities.

Columbia Basin College complies with the spirit and letter of state and federal laws, regulations and executive orders pertaining to civil rights, Title IX, equal opportunity and affirmative action. CBC does not discriminate on the basis of race, color, creed, religion, national or ethnic origin, parental status or families with children, marital status, sex (gender), sexual orientation, gender identity or expression, age, genetic information, honorably discharged veteran or military status, or the presence of any sensory, mental, or physical disability, or the use of a trained dog guide or service animal (allowed by law) by a person with a disability, or any other prohibited basis in its educational programs or employment. Questions or complaints may be referred to the Vice President for Human Resources & Legal Affairs and CBC's Title IX/EEO Coordinator at (509) 542-5548. Individuals with disabilities are encouraged to participate in all college sponsored events and programs. If you have a disability, and require an accommodation, please contact the CBC Resource Center at (509) 542-4412 or the Washington Relay Service at 711 or 1-800-833-6384. This notice is available in alternative media by request.

Community College District #19 provides equal opportunity in education and employment and does not discriminate upon the basis of race, color, national origin, sex or handicap in accordance with Title VI of the Civil Rights Act of 1964, Title IX of the Educational Amendments of 1972 and Section 504 of the Rehabilitation Act of 1974. Every effort is made to provide accurate information. Policies, class and fee information contained herein, however, may have changed subsequent to the time of publication. Students are therefore advised to consult with the counseling office or with the appropriate college division for any possible corrections or revisions.
